This homework is due on Monday, February 26, at classtime.

On Friday, February 23, I will be out of town at a meeting and thus we will not hold formal class. However, the Department of Physical Sciences is sponsoring its “Career Awareness and Graduate Recruitment Day” on that day. This day provides an opportunity to hear speakers on a variety of topics that include physical sciences as well as biological sciences. Your assignment for this homework is to attend at least one session and write a short report on what you learn. There is one session (the bold-faced one) that meshes perfectly with class so you shouldn’t have anything else planned at that time and you will be able to attend at least that session. All sessions take place in the Goodyear Lecture Hall, Room 100.

A brief listing of topics:
11:00 to 11:50: Opportunities in Biomedical Sciences: Med School, Grad School, Done with School?
1:00 to 1:50: Research and Educational Opportunities at the University of Oklahoma Health Sciences Center (OUHSC)
1:50 to 2:45: The Road to Research has Many Branches
3:00 to 3:55: The Coldest Physics: Atoms and Molecules Near Absolute Zero
3:55 to 4:50: What Chemistry Graduate School is all About

The format of the short paper you turn in will be:

- Title of talk attended
- Name of speaker plus brief biographical information on speaker (usually provided during the introduction)
- General outline of talk – brief description of topic and key points
- List two things you learned from the talk you did not already know.

This paper will count as one standard homework grade.
