ORAL PRESENTATION – “Two-Minute Talk”
Medical Terminology

- Your oral presentation will be a 2-minute talk. You must tell me at least 2 days in advance which root(s) you are presenting to prevent repetition.
- Your presentation should begin by clearly stating the root(s) you are using, followed by “word building” with those roots. I recommend choosing a root from a chapter within the current unit of study. Use examples from your text and at least one additional example. Define all roots, prefixes, suffixes, and terms.
- You are welcome to use whatever notes or script you like. I encourage creativity and you must use a visual aid: write on the chalkboard, make PowerPoint presentation (use at least 24 pt font), create a poster, a demonstration, song & dance, etc.
- PRACTICE YOUR PRESENTATION! You are welcome to practice the presentation with me or in Room 103 (when it’s not in use), but you should at least practice in front of a friend/relative/spouse. The most common mistake is failure to speak loudly enough to be heard at the back of the room.

Grading will be based on the following criteria:

**Content:** 10 pts  
-- accuracy

**Presentation:** 10 pts  
-- legibility
-- clarity

Note here the day you volunteered for: ________________________________.

(If you don’t volunteer, I’ll volunteer for you.)
