PREFACE

This catalog provides information about the academic programs of Cameron University. It also contains information concerning admissions, academic regulations and requirements, services available to students, academic offerings, and a list of the administrative officers and faculty of the University. While every effort has been made to make this catalog as complete and accurate as possible, changes may occur at any time in requirements, deadlines, fees, curricula, and courses listed in this catalog. All such changes are effective at such time as the proper institutional authorities determine and may apply not only to prospective students but also to those who are already enrolled at the University. This catalog should not be construed as a contract between Cameron and any person. The online Undergraduate Catalog reflects the most recent changes to requirements, curricula, and courses.

The courses listed in a curriculum are required, but the display of a curriculum does not in any way indicate the length of time required for a student to finish degree requirements. Rather, this display is intended as a guide to indicate the preferred order for completion of degree requirements. Exceptions to certain requirements may be petitioned through proper academic channels.

Because this catalog was prepared well in advance of its effective date, the course descriptions may differ in some instances from actual content taught in some courses, due to advancements in the discipline or decisions to change the scope of the course. Thus, the descriptions that follow are not provided in the nature of a contractual obligation. Consequently, students should consult the appropriate advisor and refer to the class schedule for the offerings in any given academic session.

ACADEMIC CALENDAR

Cameron University's academic calendar is approved by the President or their designee and submitted annually to the Oklahoma State Regents for Higher Education (OSRHE). The academic calendar shall describe any alternative schedules. Submission is due by January 1 prior to the summer semester to which the proposed calendar applies.

The uniform academic calendar for institutions in The Oklahoma State System of Higher Education consists of the fall and spring semesters and a summer session defined as follows:

A. The summer session begins late May or early June and ends late July or early August.
B. The fall semester begins mid- to late August or early September and ends in December.
C. The spring semester begins in January and ends prior to the first of June.
D. Academic terms shorter than a traditional semester or summer session, generally referred to as “intersessions,” may be conducted between semesters or between the summer session and spring and fall semesters. Block or alternative course schedules may also occur within the dates set forth for a semester or summer session.

The approved Academic Calendar is distributed to all departments and is available online.

OUTCOMES ASSESSMENT

Cameron University's comprehensive outcomes assessment program, mandated by the Oklahoma State Regents for Higher Education, consists of entry level assessment, general education assessment, program outcomes assessment, and student satisfaction and engagement assessment. Participation by students may be required as a condition of enrollment, continued enrollment, or graduation.

2019-2021 UNDERGRADUATE CATALOG
GENERAL INFORMATION

HISTORY

The evolution of Cameron University closely parallels the history of the area it serves in Southwest Oklahoma. It was founded by the Oklahoma Legislature in 1908 as the Cameron State School of Agriculture, one of six agricultural high schools in the state and placed under the jurisdiction of the State Commission of Agriculture and Industrial Education. The institution was named for E. D. Cameron, the first State Superintendent of Schools.

Cameron added junior college work in 1927 when local needs demanded access to higher education. With the changed function came the name Cameron State Agricultural College. It became solely a college in 1941 when the Oklahoma State System of Higher Education was formed and Cameron joined a group of institutions governed by the Board of Regents for Oklahoma A&M Colleges.

Baccalaureate degrees were authorized in 1966 by the Oklahoma State Regents for Higher Education, following action by the Legislature. In May 1970, the first bachelor’s degrees were awarded. The institution’s name was changed to Cameron College in 1971 and was further amended to Cameron University in 1974.

In 1988, the Oklahoma State Regents for Higher Education expanded Cameron’s functions to include offerings at the master’s degree level. This change in function was the first granted to an Oklahoma institution since Cameron was given authority to offer bachelor’s degrees more than 20 years earlier. The first master’s degrees were awarded in May 1990.

In recognition that Cameron’s mission had become significantly more complex and predominantly urban, in June 1992, governance of the university was transferred by the Oklahoma Legislature to The Board of Regents of The University of Oklahoma. With the transfer of governance came new affiliations between Cameron and the University of Oklahoma, which have broadened and strengthened academic offerings by both institutions.

WHO WE ARE

Cameron University is a regional, public university serving Southwest Oklahoma and a global learning community. The university is governed by The Board of Regents of The University of Oklahoma within a state system coordinated by the Oklahoma State Regents for Higher Education. Cameron University offers associate, baccalaureate, and master’s degree programs.

MISSION STATEMENT

Cameron University provides a diverse and dynamic student body access to quality educational opportunities; fosters a student-centered academic environment that combines innovative classroom teaching with experiential learning; prepares students for professional success, responsible citizenship, life-long learning, and meaningful contributions to a rapidly changing world; and is a driving force in the cultural life and economic development of the region.

CORE VALUES

Cameron University values:

- Student learning as our top priority;
- Excellence in teaching, scholarship, service, and mentoring:
  - Investment in people: The growth and development of our students, faculty and staff in a learning environment based on integrity, respect, and ethical behavior that encourages and provides opportunities for professional improvement;
- Leadership in our community and region that emphasizes:
  - Stimulating economic development,
  - Forming partnerships and collaborative relationships,
  - Providing cultural and social development, and
  - Serving the community and region by sharing our expertise;
- Shared governance that includes:
  - Emphasizing teamwork,
  - Facilitating open and effective communication, and
  - Providing opportunities for active participation by all constituencies;
- Diversity among our students, faculty, and staff as demonstrated by:
  - Providing access to educational and teaching opportunities for all constituents, and
  - Promoting tolerance through a free and open exchange of ideas;
- Responsible stewardship of public and private resources, the public trust, and Cameron’s future that includes:
  - Focusing resources to achieve optimal student learning,
  - Increasing student access to quality higher education,
  - Establishing a reliable stream of public and private revenue,
  - Holding administrative costs to a minimum,
  - Enhancing alumni involvement, and
  - Providing accountability in key areas such as student learning and management of resources.

UNIVERSITY FUNCTIONS

The functions assigned to Cameron University by the Oklahoma State Regents for Higher Education include:

A. Both lower- and upper-division undergraduate study in several fields leading to the baccalaureate degree.
B. A limited number of programs leading toward the first professional degree when appropriate to the institution's strengths and the needs of the state.
C. Graduate study below the doctor's level, primarily in teacher education but moving toward limited comprehensiveness in fields related to Oklahoma's manpower needs.
D. Extension and public service responsibilities in the geographic regions in which the university is located.
E. Responsibility for institutional and applied research in those areas related closely to program assignments.
F. Responsibility for regional programs of economic development.
G. Perform other functional or programmatic responsibilities as authorized by the Oklahoma State Regents for Higher Education. Criteria for consideration of programs outside of the function described herein are outlined in the OSRHE Academic Program Approval policy.

ACCREDITATION
Cameron University is accredited by The Higher Learning Commission.

Many of Cameron's academic programs are accredited through discipline-specific accrediting programs. A list of accredited programs and information regarding their respective accrediting bodies is maintained on the Accreditation webpage.

EQUAL OPPORTUNITY
Cameron University is committed to the principles of equal opportunity and affirmative action and promotes an environment of awareness and understanding of culturally diverse groups in our society. The University strives to maintain a campus climate of mutual respect and tolerance that is free from discrimination. Discrimination is unlawful and undermines the freedom of students, faculty, and staff to productively learn and work at the University.

This institution, in compliance with all applicable federal and state laws and regulations, does not discriminate on the basis of race, color, national origin, sex, sexual orientation, gender identity, gender expression, age, religion, political beliefs, disability, or status as a veteran in any of its policies, practices, or procedures. This includes but is not limited to admissions, employment, housing, financial aid, and education services.

To obtain information about applicable laws or to file a EEO- or Title IX-related complaint of discrimination, including harassment, on the basis of race, color, national origin, sex, sexual orientation, gender identity, gender expression, age, religion, political beliefs, disability, or status as a veteran contact the Office of Human Resources, Administration Building, Room 121, 2800 W. Gore Blvd., Lawton, Oklahoma 73505-6377, (580) 581-2245 or e-mail hr@cameron.edu.
DEGREES AND MAJORS

Cameron University offers curricula leading to master's, bachelor's, and associate degrees. The following degrees are offered: Associate in Arts (A.A.), Associate in Science (A.S.), Associate in Applied Science (A.A.S.), Bachelor of Accounting (B.Acc.), Bachelor of Arts (B.A.), Bachelor of Business Administration (B.B.A.), Bachelor of Fine Arts (B.F.A.), Bachelor of Music (B.M.), Bachelor of Music Education (B.M.E.), and Bachelor of Science (B.S.). Associate and baccalaureate programs include general education requirements and a major or concentration. Baccalaureate programs may also include a minor (or major-minor) and electives. Development of expertise in a discipline occurs in major courses while a minor broadens the student's education. General education provides the common experience and knowledge that characterize the academically educated person. Electives afford the opportunity for both exploration and continued study in areas of particular interest.

Students are responsible for meeting all degree requirements. It is essential that each student (1) become familiar with the requirements for the degree being pursued, (2) formally request course substitutions or waivers necessary to meet degree requirements, (3) verify each enrollment to ensure courses apply toward degree requirements, satisfy a prerequisite, or meet a mandated institutional requirement, and (4) review their Degree Works audit for accuracy each semester.

Accounting (BACC)  
Agriculture (BS) with concentrations:  
Agribusiness Management  
Agronomy  
Animal Science  
General Agriculture  
Allied Health Sciences (AS)  
Art (BA)  
Art, Studio Art (BFA) with concentrations:  
Graphic Design  
Painting  
Printmaking

Sports and Exercise Science (BS)  
Strategic Communication (AA & BA) with BA concentrations:  
Communication Studies  
Public Relations  
Theatre (BA) with concentrations:  
Performance Theatre  
Technical Theatre
MINORS

A minor for baccalaureate programs consists of a minimum of 18 semester hours in an approved subject area. Defined minors are those for which a specific set of courses is recommended. Other approved minor programs are structured through the advisement process subject to the approval of the chair of the department that offers the courses. Minors that include courses from multiple departments are approved by the dean of the school that offers the majority of the program. Transfer students may use credits earned at other institutions to fulfill minor requirements.

APPROVED MINOR PROGRAMS

| Accounting* | Information |
| Agriculture | Technology* |
| Agronomy | Journalism and Media |
| Animal Science | Production* |

*Defined Minor

DEFINED MINORS

Accounting (18 hours)

For Non-Business Majors: ACCT 2013, ACCT 2023, and upper division accounting courses (12 hours); For Business Majors: Upper division accounting courses (18 hours).

Art (24 hours)

ART 1113, ART 1213, ART 1223, ART 2243, ART 2623, and upper division ART electives (9 hours).

Art History (18 hours)

ART 1013, ART 2613, ART 2623, and ART 4633 (9 hours).

Biology (24 hours)

BIOL 1364, BIOL 1474, BIOL 2124, BIOL 2144, BIOL 2154, and BIOL 3014.

Chemistry (18 hours)

CHEM 1361/1364, CHEM 1471/1474, and 8 hours selected from CHEM 3113, CHEM 3232, CHEM 3314, CHEM 3324, or other approved Chemistry courses.

Communication Studies (18 hours)

COMM 1113, COMM 2313 or COMM 3553, COMM 2393, and COMM electives (9 hours).

Computer Science (20 hours)

Required: CS 1314, CS 1514, CS 3183; and two courses selected from: CS 1523, CS 1733, CS 2333, CS 2413, CS 3013*, CS 3513*. (Prerequisite: CS 2413.)

Criminal Justice (18 hours)

CJ 1013, CJ 2113, CJ 3103; and three additional courses (9 hours) in CJ, CORR, or LE (at least one of these courses must be a CJ course).

Cyber Security (19 hours)

19 hours of courses from the Information Technology Program, including IT 1063, IT 2064, IAS 2233, and at least 9 hours chosen from the following courses in the Cyber Security and Information Assurance Option: IAS 2333, IAS 3063, IAS 3233, IAS 3263, IAS 4063.

Economics (18 hours)

For Non-Business Majors: ECON 2013, ECON 2023, ECON 3013, ECON 3023, ECON 3313, and upper division business or economics electives (3 hours); For Business Administration and Accounting Majors: ECON 3013, ECON 3023, ECON 3313, and upper division business and economics electives (9 hours).

Educational Studies (18 hours)

(Closed to History, Political Science, English, and Music Majors). EDUC 3003, EDUC 3733, EDUC 4883, SPED 3103; and 6 hours selected from the following: EDUC 3013, EDUC 3673, EDUC 3753, or EDUC 4653.

Environmental Studies (18 hours)

For Non-Biology Majors: ENSC 2004, BIOL 1004, and a minimum of 10 hours from: BIOL 1114, GEOG 1014, GEOG 3023, GEOL 1014, and SOCI 3373; For Biology Majors: ENSC 2004 and a minimum of 14 hours from: BIOL 1114, BIOL 3054*, BIOL 3074*, BIOL 4064*, GEOG 1014, and GEOG 3023. (*These courses have
prerequisites covered by Biology Major core and/or concentration requirements).

**Family Science (18 hours)**

FAMS 1123 and 15 hours to be chosen from any course with a FAMS prefix, ECON 2003, PSY 3353, PSY 3363, or PSY 3373.

**Finance (18 hours)**

For Business Administration and Accounting Majors: FIN 3313, FIN 3623, FIN 4333, and upper division finance electives (9 hours); For Non-Business Majors: ECON 2023, FIN 3313, FIN 3603, FIN 3623, FIN 4333, and upper division finance electives (3 hours).

**Foreign Languages (18 hours)**

Any 18-hour combination of any level course with a foreign language prefix.

**General Business Administration (18 hours)**

For Non-Business Majors: ACCT 2013, ACCT 2023, ECON 2023, FIN 3603, MGMT 3013, MKTG 3413.

**Health (18 hours)**

(Closed to Sports and Exercise Science Majors) SES 2003, SES 2013, SES 2023, SES 2033, SES 3003, SES 3013, SES 3023, SES 3053, SES 4033.

**History (18 hours)**

HIST 1113, HIST 1123, HIST 1483, HIST 1493, and history electives (6 hours).

**Humanities (18 hours)**

HIST 2113 or HIST 2223 and 15 hours selected from (with no more than 6 hours with the same prefix): ART 2613, ART 2623, ENGL 3063, ENGL 3073, HUM 2113, HUM 2223, PHIL 1113, PHIL 2713, HIST 1113, HIST 1123, MUSC 1413, MUSC 1423, THTR 3023.

**Information Technology (18 hours)**

18 semester hours of the Information Technology Program (including IT 2064 and IAS 2233). Note that CIS 1013 may not count toward this minor.

**Journalism and Media Production (18 hours)**

JRMP 1113, JRMP 1213, JRMP 1313, JRMP 2513, and 6 hours of courses with the JRMP prefix.

**Language Arts (18 hours)**

For English Majors: 18 hours in Foreign Languages, Journalism and Media Production, Library Science, Theatre, Communication (except COMM 1113), or Professional Writing. For non-English majors: 18 hours in Foreign Languages, Journalism and Media Production, Library Science, English (sophomore level or above), Theatre, Communication (except COMM 1113), or Professional Writing.

**Management (18 hours)**

For Business Administration and Accounting Majors: ACCT 3213, MGMT 3513, MGMT 3813, MGMT 4033, and upper division management electives (6 hours); For Non-Business Majors: BUS 1113, ACCT 2013, MGMT 3013, MGMT 3513, and upper division management electives (6 hours).

**Management Information Systems (18 hours)**

18 semester hours of the Management Information Systems Specialization courses including MIS 3033, MIS 4033, and MIS 4533. Appropriate classes in CIS, IAS, IT, or TECH may be used to meet the requirements of the MIS minor. CIS 1013 may not count toward this minor.

**Marketing (18 hours)**

For Business Administration and Accounting Majors: MKTG 3423, MKTG 4443, and upper division marketing electives (12 hours); For Non-Business Majors: BUS 1113, MKTG 3413, MKTG 3423, MKTG 4443, and upper division marketing electives (6 hours).

**Mathematics (18 hours)**

MATH 2215, MATH 2235, and a minimum of 8 credit hours of electives chosen from: MATH 2244, MATH 2613, MATH 3001, STAT 2013 or STAT 3113, MATH 3013*. or MATH 4433, MATH 3213*, MATH 3253, MATH 3302, MATH 3333, MATH 3433, MATH 3413, MATH 4113, MATH 4423*, MATH 4471-3, MATH 4483**. (Prerequisites: MATH 1513 and MATH 1613 or satisfactory placement score. “Prerequisite: MATH 2613. "Prerequisites: MATH 2235 and MATH 2613).

**Military Science (19 hours)**

MSL 3013, MSL 3011, MSL 3023, MSL 3021, MSL 4013, MSL 4011, MSL 4023, MSL 4021, HIST 3133.

**Multicultural Studies (18 hours)**

18 hours chosen from the following: COMM 4413, SOCI 3013, ENGL 2313, ENGL 2323 OR GEOG 3243, HUM 2713, MUSC 1033, and FNAR 1013.

**Music (18 hours)**

Band/Choir/Accomp./Orch.—MUSC 1110-1, MUSC 1140-1 (4 semesters); MUSC 1413, MUSC 2312, MUSC 2332, MUSC 3801 (4 semesters), MUSC 1000 (4 semesters), and Choose 1 from: MUSC 3513, MUSC 3523, or MUSC 3533.

**Organizational Leadership (18 hours)**

A minimum of 18 hours chosen from the following*: ORGL 3223, ORGL 3333, ORGL 3443, ORGL 4113, ORGL 4223, ORGL 4333, ORGL 4443. (*Exception: Students previously admitted to the Organizational Leadership program who have taken ORGL 3113 may count that course towards the 18 hour minor requirement).

**Physics (18 hours)**

(PHYS 1115 and PHYS 1215) or (PHYS 2015 and PHYS 2025), PHYS 3003, and electives (5 hours).

**Pre-Law (18 hours)**

Required (12 hours): PS 3813, PS 4253, BUS 3213*, COMM 2213; Electives (6 hours): BUS 3223*, CJ 2113, CJ 2233**, CJ 3053, COMM 3113, COMM 3633. (Prerequisites: Junior Standing; "Prerequisite: BUS 3213; "Prerequisite: CJ 1013).

**Public Relations (18 hours)**

COMM 4673, PBRL 2113, PBRL 4823, and PBRL or JRMP electives (9 hours).
Recreational Arts (18 hours)
To be selected from the following 3 areas with a minimum of 3 hours and no more than 9 hours from any one area for a total of 18 hours. Art: ART 1113, ART 1023, ART 2313, ART 2513, ART 2813, ART 3833; Music: Required: MUSC 3683 and choose from: MUSC 1111, MUSC 1141, MUSC 1023; Theatre: THTR 1103, THTR 1203, THTR 1603, THTR 2603, THTR 3403.

Sociology (18 hours)
SOCl 1113 and SOCI electives (15 hours).

Special Education (18 hours)
(Open to Psychology and Family and Child Studies majors only) SPED 3103*, SPED 3203, SPED 3223, SPED 3243, SPED 3263, SPED 4413. (*Prerequisite: EDUC 3733 or PSY 3353). This minor does not prepare students for state teaching licensure in the public schools.

Statistics (18 hours)
Required: MATH 2215*, MATH 2235, STAT 2013,** and a minimum of 5 credit hours of electives chosen from the following: STAT 2023, STAT 3113, STAT 3123, MATH 3253, MATH 3333, MATH 3302, MATH 4113, MATH 4433. (*Prerequisite: MATH 1513 and MATH 1613 or satisfactory placement score. **Prerequisite: MATH 1513 or satisfactory placement score).

PRE-PROFESSIONAL STUDIES
Cameron University offers course work at the pre-professional level for such fields as medicine, dentistry, law, pharmacy, veterinary medicine, and engineering.

The requirements for admission to specific professional schools vary considerably. Students should therefore consult the catalog of the professional school to which they plan to apply for admission for guidance in course selection. Departmental chairs and faculty advisors at Cameron are familiar with the requirements of many professional schools and can assist in appropriate selection of courses.

ADMISSIONS INFORMATION

UNDERGRADUATE ADMISSIONS

The Office of Admissions provides information to prospective students interested in attending Cameron University and typically serves as the first point of contact for prospective students, their parents, and academic counselors. The Office of Admissions also coordinates campus tours, college fairs, high school presentations, orientation, and other recruitment events throughout the year. For further information, visit the Office of Admissions website, call (580) 581-2289 or 1-888-454-7600, or e-mail admissions@cameron.edu.

ADMISSIONS COUNSELORS

Admissions counselors maintain contact with area schools and residents to inform them of the educational opportunities that exist at Cameron University. The Office of Admissions is responsible for the University's recruiting program. Campus tours may be arranged through the Welcome Center. The Office of Admissions provides scholarship applications and related information. The priority deadline for applications is February 1.

ADMISSION REQUIREMENTS

Standards for admission to Cameron University have been established by the Oklahoma State Regents for Higher Education. These standards are based on prospective students’ residence status and previous education background.

Students must meet the criteria for both the high school curricular requirements and the high school performance requirements as defined in the following sections.

Recent High School Graduate Admission

Baccalaureate Degrees. Minimum baccalaureate degree admissions requirements for recent high school graduates are:

- Graduate of an accredited high school or possess a GED (student’s high school class must have graduated),
- Meet the following performance requirements:
  - minimum composite ACT of 20 or SAT of 940, or
  - rank in the top 50 percent of high school graduating class AND have a high school (4 years) GPA of at least 2.7,
- Meet the minimum high school curricular requirements:
  - 4 years of English (grammar, composition, literature),
  - 3 years of mathematics (Algebra 1 and higher level mathematics),
  - 3 years of lab science (may not include general science),
  - 3 years of history and citizenship skills (including 1 year of American History and 2 additional years from the subjects of history, economics, geography, government, non-western culture),
- 2 years of other (additional subjects previously mentioned or selected from computer science and/or foreign language).

Graduates of unaccredited high schools or home study programs, whose high school class has graduated, may satisfy admissions requirements by taking the ACT or SAT and achieving a minimum ACT score of 20 or SAT of 940 and satisfying the curricular requirements as certified by the school, or for home study, the parent.

Individuals meeting the above criteria are eligible for admission to baccalaureate, associate in science, or associate in applied science degrees.

Associate in Arts and Associate in Science Degrees. Minimum AA and AS admissions requirements for recent high school graduates are:

- Graduate of an accredited high school or possess a GED (student’s high school class must have graduated), AND
- Meet the minimum high school curricular requirements for baccalaureate degrees above, AND
- Complete the ACT or SAT.

Associate in Applied Science Degrees. Minimum AAS admissions requirements for recent high school graduates are:

- Graduate of an accredited high school or possess a GED (student’s high school class must have graduated) AND
- Complete the ACT or SAT.

Students lacking curricular requirements may be required to take remedial/developmental courses. These courses must be completed within the first 24 semester hours attempted, with a grade of “C” or higher and prior to taking courses in the discipline. To transfer to an associate in arts, associate in science, or baccalaureate degree program the student must meet both the curricular and performance admission requirements.

Adult Admission

Students who are 21 years of age or older or active duty military who have graduated from high school or have a GED are eligible for admission to Cameron. Any student admitted through the Adult Admissions category must demonstrate college readiness through defined placement assessments or by successful completion of zero-level, developmental courses before entering bachelor level degree programs.

Alternative Admission

This admission category is for those individuals who do not meet the performance or curricular requirements or who need remediation in two or more subjects but (1) have a reasonable chance for academic success; (2) have
unusual talent or ability in art, drama, music, sports, etc., or (3) are educationally or economically disadvantaged and show promise of being able to succeed in a program or curriculum at Cameron. Students applying for admission under this section will be admitted through appropriate associate degree standards. To transition to baccalaureate degree programs, students must successfully address all curricular and performance deficiencies and successfully complete twenty-four collegiate credit hours.

Concurrent High School Student Admission
A junior or senior high school student enrolled in an accredited Oklahoma high school may be admitted provisionally if the following criteria are met. The student must:

- Earn an ACT (National, Pre-ACT, or Residual) composite score of 20 or higher or a SAT or PSAT score of 1020 (940 prior to March 5, 2016) or have an unweighted high school grade point average of 3.0 and rank in the top 50% of their class.

A student receiving high school level instruction at home or from an unaccredited high school may be admitted provisionally if the following criteria are met:

- Completed enough high school coursework to be equivalent to an individual who is classified as a junior or senior at an accredited high school.
- Earn an ACT (National, Pre-ACT, or Residual) composite score of 20 or higher or a SAT or PSAT score of 1020 (940 prior to March 5, 2016) or higher.

All concurrently enrolled students must also:

- Provide a signed statement from the high school principal or counselor stating that the student will be eligible to satisfy high school graduation requirements (including curricular requirements for college admission) no later than the spring semester of the senior year.
- Provide a signed statement from parent(s) or legal guardian stating the student has permission to enroll concurrently.

A high school student may enroll in a combined number of high school and college courses per semester not to exceed a full-time college workload of 19 semester credit hours. Non-academic high school units are excluded from the workload calculation.

Non-Degree Seeking Student Admission
A student who does not plan to pursue a degree may enroll in a maximum of nine semester hours without submitting academic credentials or meeting the academic curricular or performance requirements. Enrollment in mathematics, English, science, history, and government courses will be determined by placement tests. Enrollment beyond nine hours will require submission of official academic transcripts.

Transfer Admission
Any student who has attended another university other than Cameron University must submit official transcripts from ALL colleges attended. An undergraduate student with more than six attempted semester hours is considered a transfer student.

Transfer From Other Regionally Accredited Oklahoma Institutions. A student may transfer to Cameron from another regionally accredited Oklahoma institution under the following conditions:

- The student originally met both the high school curricular requirements and academic performance standards for admission to Cameron and has a GPA high enough to meet Cameron’s retention standards, or
- The student originally met the high school curricular requirements but not the academic performance standards for admission to Cameron and has a GPA high enough to meet Cameron’s retention standards based on at least 24 attempted semester hours of regularly graded (A, B, C, D, F) college work, or
- The student originally met the performance but not the curricular requirements for admission to Cameron and has removed curricular deficiencies, or
- The student originally met neither the curricular nor the academic performance requirements for admission to Cameron, but has a GPA high enough to meet Cameron’s retention standards based on at least 24 attempted semester hours of regularly graded (A, B, C, D, F) college work and has removed curricular deficiencies.

Transfer From Regionally Accredited Out-of-State Institutions. In addition to meeting Cameron’s entrance requirements, out-of-state transfer students must meet the following:

- Be in good standing in the institution from which they plan to transfer.
- Have made satisfactory progress (an average grade of "C" or better or met Cameron’s retention standards, whichever is higher) at the institution from which they plan to transfer.
- Students transferring from institutions not accredited by a regional association may have credits transferred by meeting the Oklahoma State Regents for Higher Education requirements.

Admission of Students Suspended From Other Institutions. A student suspended for academic reasons from other institutions may appeal for admission to Cameron.

Transfer Probation. Students who do not meet the academic criteria including curricular requirements as stated above under the transfer categories, but who have
not been formally suspended, may be admitted as "transfer probation" students. If GPA is less than 2.0, the student will be admitted as a "transfer probation" student. Students seeking admission in this category must meet with an Admissions Coordinator regarding procedures and enrollment conditions.

Admission of Oklahoma State System Associate in Arts and Associate in Science Graduates. Students who have completed the requirements for an Associate in Arts or Associate in Science degree at an Oklahoma State System institution will be accepted as having fulfilled the general education requirements for baccalaureate degrees. Additional requirements must be met: (1) prerequisites for upper division courses are lacking, (2) grade levels required by Cameron have not been attained, or (3) professional licensing or certifying agencies requirements exceed the general education requirements.

Opportunity Admission
Students who have not graduated from high school whose composite standard score on the ACT places them at the 99th percentile of all students using Oklahoma norms or whose combined verbal and mathematical score on the SAT places them at the 99th percentile of all students using national norms may apply for admission to Cameron. Admission will be based on the test scores, evaluation of the student’s level of maturity and ability to function in the adult college environment, and whether the experience will be in the best interest of the student intellectually and socially.

International Students and Students for Whom English is a Second Language Admission
International students are required to meet the equivalent academic performance standards listed above. Additionally, students for whom English is a second language will be required to present evidence of proficiency in the English language prior to admission. Applicants for first-time admission (less than 24 semester hours at a regionally accredited U.S. institution of higher education) at the undergraduate level must present a TOEFL minimum score of 500 or higher on the paper-based test, 173 or higher on the computer-based test, 61 or higher on the internet-based test, or a 5.5 on the IELTS to meet the standards for unqualified admission to Cameron.

Re-Admission
Any former Cameron student who did not attend Cameron during the previous academic year must apply for re-admission.

Use of Non-Academic Criteria in the Admission of Students
Cameron University is committed to providing a safe learning and teaching environment for our students, faculty, and staff. As part of that commitment, the University reviews applications from prospective students who indicate they have a felony conviction or have been suspended or expelled from another college or university for non-academic reasons to determine their admissibility. Students can contact the Office of the Dean of Students (580-581-2244) for review of the complete policy.

FALSIFICATION AND OWNERSHIP OF RECORDS
Falsification of any admission record, whether by change, omission, or untrue statement will be grounds for permanent denial of admission to the university or suspension from the university with forfeiture of any credit earned.

All records required for admission become the property of Cameron University. Examples include, but are not limited to, test score reports, GED reports, and transcripts.

NAME OR ADDRESS CHANGE
A student who has legally changed names must provide appropriate documentation to substantiate the change. This documentation is to be submitted to the Registrar’s Office. All transcripts are issued under the student’s legal name as recorded in the Registrar’s Office. Students should ensure their current mailing address is on file at all times to receive all important information and notices. Students should log in to their Aggie Access accounts to update address information.

INITIAL COURSE PLACEMENT
Course placement in English, math, science, and reading courses for first-time freshmen will be determined by either ACT/SAT sub-scores, high school GPA, or computerized placement test (CPT) scores. Students who are under 21 will take CPTs unless they have either ACT or SAT scores (SAT will be equated to ACT equivalents) of 19 or higher in English, math, and reading or an unweighted cumulative GPA of 3.0 or higher on a 7 semester or final high school transcript. Adult students (age 21 or older) and active-duty military will be required to take the CPT unless they submit either optional ACT or SAT scores or have an unweighted cumulative GPA of 3.0 or higher on a 7 semester or final high school transcript.

Initial course placement for transfer students will include a transcript review for course equivalencies. Transfer students who do not have course equivalencies to establish placement in English, math and reading will be required to take the CPT unless they submit either ACT or SAT scores or have an unweighted cumulative GPA of 3.0 or higher on a 7 semester or final high school transcript.

PRIOR LEARNING CREDIT AND ASSESSMENT
Students enrolled at Cameron University may receive degree credit for post-secondary level extra-institutional learning related to subject areas, courses, and programs of study offered by Cameron University. The Vice President for Academic Affairs is responsible for
developing and administering policies and procedures for awarding credit for prior learning. Assessment and awards of prior learning credit are made under policies and procedures designed to assure that reliable and valid measures of learning outcomes have been applied.

Cameron University offers students multiple options for earning college credit by demonstrating the knowledge they have gained via non-college experiences. Credit may be earned by completing standardized tests, by demonstrating course competency through departmental or national exams, and by submitting transcripts for workplace or military training recognized by ACE or NCCRS. In each case, credit for prior learning is awarded for verifiable skills and learning gained through the experience, and not for the experience itself.

The following regulations govern awarding of credit for prior learning at Cameron University:

- A maximum of 64 semester hours or prior learning credit may be applied toward the requirements for a baccalaureate degree.
- A maximum of 45 semester hours of prior learning credit may be applied toward the requirements for an associate degree.
- Prior learning credit may only be awarded in those academic programs approved by OSRHE to be offered at Cameron University, and must be validated by successful completion of 12 or more semester hours of academic work at CU before being placed on the student’s transcript. Active duty military personnel are exempt from the 12 hour validation requirements, and may have credits placed on the transcript upon full admission and completion of first paid enrollment.
- Prior learning credit is identified on the transcript by “Adv Standing”.
- The neutral grade of satisfactory (S) will be assigned to prior learning credit.
- Credit granted will be included only in the number of hours earned, not in GPA calculations.
- Credit for non-collegiate schools, such as those offered by military services, businesses, industry, unions, or governmental agencies, will be awarded according to ACE and NCCRS recommendations.
- Credit for experiential learning will be granted on course-by-course basis using institutionally-prepared exams.
- A score equivalent to a grade of “C” will be used as the minimum passing score for institutionally-prepared exam.
- Credit for military occupational specialties (MOS) will be granted on course-by-course basis.
- Credit recorded at an institution in the Oklahoma State System of Higher Education is transferable on the same basis as if the credit had been earned through regular study at the awarding institution.

Further information regarding prior learning credit can be found on the Testing Center webpage.

ADMISSIONS RESIDENCE STATUS

Proof of Residence. The burden of proof of establishing Oklahoma residence or domicile shall be upon the applicant. Some of the various types of evidence that may serve as proof of one’s residence status are year-round residence, ownership of property, registration for and voting in state general elections, filing an Oklahoma income tax return for the most recent calendar year, and payment of ad valorem property taxes. Since residence or domicile is at least partially a matter of intent, each case will be judged on its own merits, and no definitive or set criteria can be established as sufficient to guarantee classification as a resident of Oklahoma.

Independent Persons (Definition for Admissions Purpose). If a person enjoying majority privileges and who is independent of parental domicile can provide adequate and satisfactory proof of having come to Oklahoma with the intention of establishing domicile, that person may be granted resident student classification at the next enrollment occurring after expiration of 12 months following the establishment of domicile in Oklahoma. The spouse of such person must establish proof of his or her own domiciliary status on a separate basis, except as provided in other sections of this policy.

Dependent Persons (Definition for Admissions Purpose). The legal residence of a dependent person is that of the student’s parents, or the legal residence of the parent who has legal custody or the parent with whom the student habitually resides. If the student is under the care of those other than the parents, the legal residence is that of the student’s legal guardian.

A dependent person may become emancipated (freed from the parental domicile) through marriage, formal court action, abandonment by parents, or positive action on the student’s own part evidential of alienation of parental domicile. To qualify under the latter category, a dependent person must have completely separated from the parental domicile and have proved that such separation is complete and permanent. Mere absence from the parental domicile is not proof of its complete abandonment. If an applicant can provide adequate and satisfactory proof of complete emancipation and having come to Oklahoma with the intention of establishing domicile, the applicant may be granted resident student classification at the next enrollment occurring after expiration of 12 months following establishment of domicile in Oklahoma.

Foreign Nationals. An individual who is not a United States national may become eligible for classification as an Oklahoma resident provided that they hold “permanent resident status” as defined by the Immigration and Naturalization Service, evidenced by whatever documents may be required under applicable Federal law, who has resided in Oklahoma for at least 12 consecutive months, and who meets the criteria for establishment of domicile.
as set forth in the policy of the Oklahoma State Regents for Higher Education.

**Uniformed Services and Other Military Service/Training.**

*Active Uniformed Service/Discharged or Released from Active Uniformed Service for whom Oklahoma is the Home of Record.* The following shall be eligible for in-state status:

- Members of the uniformed services, along with their dependent children and spouse, who provide evidence that they are full-time active duty status of more than thirty (30) days in the uniformed services *stationed in Oklahoma* or temporarily present through military orders. Further, when members of the armed services are transferred out-of-state, the member, their spouse and dependent children shall continue to be classified as in-state as long as they remain continuously enrolled.

- Regardless of the residency of the student, dependent children or spouse of a person who is currently serving as a member of the active uniformed services of the United States on full-time active duty status of more than thirty (30) days for whom Oklahoma is the home of record.

- Person, or dependent children or spouse of a person, who was discharged or released from a period of not fewer than ninety (90) days of active uniformed service and less than five (5) years before the date of enrollment in the course(s) concerned and for whom Oklahoma is the home of record.

- Former full-time active uniformed services personnel who remain in Oklahoma after their service may retain their in-state status without the 12 month requirement if they establish domicile as defined in this policy.

*Active Uniformed Service/Discharged or Released from Active Uniformed Service (Regardless of the Home of Record).* Pursuant to Title 70, O.S., Section 3247 (as amended), the following is compliant with the eligibility criteria prescribed in the Veterans’ Access, Choice, and Accountability Act of 2014.

A student who files with Cameron University a letter of intent to establish residence in the state and who resides in the state while enrolled at Cameron shall be eligible for in-state status if the student:

- was discharged or released from a period of not fewer than ninety (90) days of active duty uniformed service, less than five (5) years before the date of enrollment in the course(s) concerned, and is pursuing a course of education with educational assistance under Chapters 30, 31 or 33 of Title 38 of the United States Code while living in Oklahoma; or

- is entitled to assistance under Section 3311(b)(9) or 3319 of Title 38 of the United States Code by virtue of a relationship to a person who was discharged or released from a period of not fewer than ninety (90) days of active duty uniformed services, and enrolls in the course(s) concerned within five (5) years of the date the related person was discharged or released from a period of not fewer than ninety (90) days of active duty uniformed services; or

- is a person who is the spouse/dependent of an individual currently serving as a member of the active, uniformed services of the United States on full-time, active duty status of more than thirty (30) days and is using Chapter 30 or 33 GI Bill benefits; or

- is a recipient of the Marine Gunnery Sergeant John David Fry Scholarship and is using it as a GI Bill benefit.

**Military Reserve Member on Full-Time Active Duty.** Regardless of the residency of the student, dependent children or a spouse of a person who is currently serving as a member of the military reserve on full-time active duty of more than thirty (30) days and for whom Oklahoma is the home of record shall be eligible for in-state status.

**Reserve Officer Training Corps (ROTC).** A student shall be eligible for in-state status regardless of the residency of the student if the student is a person who is participating in or has received a partial or full scholarship from the Air Force Reserve Officers’ Training Corps, Army Reserve Officers’ Training Corps or the Navy/Marines Reserve Officers’ Training Corps. “Participating” is defined as any student who is fully and actively participating in all aspects of the ROTC program (class, physical fitness training, leadership training (lab).

**Reclassification.** In addition to the aforementioned criteria, an independent person seeking to be reclassified as a resident of Oklahoma must meet the following criteria for the current and immediately preceding year:

1. The person must not have been claimed as an exemption for state and federal tax purposes by their non-resident parents.
2. The person is self-supporting as evidenced by having provided the majority of funds for their own upkeep.
3. The person must have maintained a continuous residence in Oklahoma for the period set forth above.
FINANCIAL INFORMATION

TUITION AND FEES
Tuition and other fees are established by the Oklahoma State Regents for Higher Education. All students are charged mandatory fees which includes charges for academic records, student technology, assessment, library services, student facilities, and student activities. Special fees are charged for other services which are made available to students. Descriptions for mandatory and special student fees are available.

FINANCIAL ASSISTANCE
Cameron offers many federal, state and institutional aid programs including tuition waivers, scholarships, grants, loans, and work study opportunities to assist students in their educational endeavors. The types and amounts of aid awarded are determined by financial need, student classification, academic merit, talent, and availability of funds. Students intending to apply for financial assistance should contact the Office of Financial Assistance well in advance of their desired start term. Application instructions and forms may be obtained online.

Applying for Aid
Applying for financial aid at Cameron University (CU) begins with the completion of the Free Application for Federal Student Aid (FAFSA) and Cameron’s Scholarship Application Portal. The FAFSA application is used to apply for nearly all types of financial assistance including federal, state, and institutional aid. The results of the application assist the financial aid office in determining how much and what type of aid may be awarded. The Scholarship Application Portal is utilized to award institutional scholarships that are offered through the university.

Types of Aid
Federal Grants. Grants are financial awards that typically do not have to be repaid. Grants are normally awarded to students who are determined to have a high financial need based on completion of the FAFSA.

Direct Student Loans. The William D. Ford Federal Direct Loan Program allows students who are enrolled at least half-time to borrow money to help pay for and defer the cost of their college education. These programs require that all funds be repaid.

Scholarships. A scholarship is a type of financial assistance that does not have to be repaid. Funds are provided through the institution, civic and religious organizations, professional groups, foundations, corporations, and cultural groups. Scholarships are based on academic excellence, personal skills, family affiliations, athletic ability, financial need, or other factors.

Tuition Waivers. Tuition waivers are institutional awards that are used to “offset” the cost of your tuition. These waivers can be applied against in-state and out-of-state tuition. Most tuition waivers are awarded based upon high school grade point average, ACT/SAT scores, high school class rank, and transfer retention grade point averages.

Students can apply for all institutional tuition waivers and scholarships through the CU Scholarship Application Portal. The priority deadline to apply is February 1st annually. A complete listing of institutional tuition waivers and scholarships is available online via Cameron’s Academic Works page.

Work Study. Work study is a student employment program that pays students to work in a variety of positions on campus. Students can use their work study earnings to help pay for tuition, fees, housing, and other expenses. Two types of work study are available: institutionally-funded and federally-funded. Enrolled students can find open workstudy positions on campus on the Quick Links menu in Aggie Access.

VETERANS BENEFITS
Cameron University is certified by the Oklahoma State Accrediting Agency to the Veterans Administration (VA) as an approved training institution for certain veterans, eligible dependents or survivors, and active service members who qualify for federally-enacted education benefits administered by the VA.

Cameron University’s Veterans Affairs Office (VAO) is an excellent source of information regarding various programs offered through the VA. The application process for benefits, university admissions requirements, and required VA course certification can be addressed. A primary function of VAO is certification of student enrollment and attendance to the VA. Eligible students are encouraged to use VAO services regularly.

Initiation and continuation of VA education benefits for eligible students is accomplished through the VAO. Students must submit paperwork indicating their intent to enroll at Cameron University and a request for assistance with benefits at least 10 weeks prior to the beginning of each summer. It is the responsibility of the student to report to the VAO prior to each semester.

Students utilizing VA education benefits must turn in all previous training records and transcripts to be evaluated for prior credit, whether or not prior credit is granted. Students utilizing VA education benefits may be in debt to the VA for withdrawal or early dismissal from the university.
GENERAL ACADEMIC INFORMATION

REQUIREMENTS FOR GRADUATION

Minimum Retention/Graduation GPA. Completion of the specified degree requirements with a minimum retention/graduation GPA of 2.0 and a minimum retention/graduation GPA of 2.0 in all work taken at Cameron University.

Minimum Hours in Residence–Baccalaureate Degrees. Baccalaureate degree candidates must satisfactorily complete a minimum of 30 semester hours in residence at Cameron University. At least 15 of the final 30 hours applied toward the degree or at least 50 percent of the hours in the major field must be satisfactorily completed at Cameron.

Minimum Hours in Residence–Associate Degrees. Associate degree candidates must complete a minimum of 15 semester hours in residence at Cameron University.

Minimum Total and Upper Division Hours at Baccalaureate Degree-granting Institution. Baccalaureate degree candidates must complete a minimum of 60 semester hours, excluding physical education activity courses, at a baccalaureate degree-granting institution, 40 semester hours of which must be upper division excluding physical education activity courses.

Minimum Hours in Liberal Arts and Science-Baccalaureate Degrees. Baccalaureate degrees must include a liberal arts and science component as follows: bachelor of arts, 80 semester hours minimum; bachelor of science, 55 semester hours minimum; and bachelor of specialty, 40 semester hours minimum.

Additional Degree Requirements. Some degrees have requirements in addition to these University requirements. Consult the specific degree for a listing of any such requirements.

Major Requirements. A minimum of one-half of the upper division credits required for a major must be earned in residence at Cameron University. The dean of the school responsible for the major, acting upon a written request from the student accompanied by a statement from the student’s advisor and the chair of the department responsible for the major, may approve an exception to this regulation.

GRADE POINT AVERAGE (GPA)

Cumulative Grade Point Average. The ratio of total grade points to the total grade point earning hours attempted throughout a student's undergraduate career excluding developmental courses. It is calculated by dividing the total grade points earned by the total grade point earning hours attempted. Credit hours to which an "AU", "AW", "I", "P", "RA", "RB", "RC", "RD", "RF", "S", "U", or "W" has been assigned are not grade point earning hours.

Retention/Graduation Grade Point Average. The ratio of grade points earned to the total grade point earning hours attempted excluding developmental courses, "forgiven" courses, "rengiven" courses, and physical education activity courses.

GRADUATION UNDER A PARTICULAR CATALOG

The set of degree requirements needed for a student (undergraduate or graduate) to complete a degree is initially determined by the catalog in effect at the time of the student’s initial enrollment. Students, in consultation with an academic advisor, may elect to fulfill the requirements from a more current catalog. All degree requirements in the chosen catalog must be met. Mixing of degree requirements from multiple catalog years is prohibited. Students who have had a break in enrollment at CU for one or more years (from the end of the last semester in which they were enrolled) will automatically be assigned to the current catalog year and required to meet current requirements.

Curricular requirements for baccalaureate and associate degrees can be changed for students only to the extent that such changes do not delay graduation or add additional hours to the program.

DEGREE WORKS (DEGREE AUDIT)

Degree Works provides an individualized degree audit for students using their specific major and catalog year. Each degree audit includes detailed information such as completed general education, university, major, concentration, and minor requirements, the courses applied to each requirement, the semester courses were taken, the grade in each course, and the requirements that remain incomplete. The online degree audit can be a useful tool in the advisement process, but it is not an official degree check and should not replace regular consultation with your academic advisor.

Students may view their individual Degree Works audit online in Aggie Access by clicking the My Info tab, under the Student Quick Links channel, click Degree Works, enter student ID, and the audit will display. An academic advisor can assist individual students with interpreting their Degree Works audit.

TRANSFER CREDIT FROM REGIONALLY ACCREDITED COLLEGES AND UNIVERSITIES

Semester hours transferred from accredited colleges and universities are equated on a one-to-one basis. Quarter hours are equated on the basis of three quarter hours to two semester hours. The maximum number of lower division hours transferred from non-baccalaureate degree granting institutions which may be applied toward baccalaureate degree requirements is equal to the total hours required for the degree less 60.
Transfer credits from regionally accredited colleges or universities may be accepted in transfer to meet major or minor requirements upon review by the chair of department, or in some instances, other faculty, in the department offering the major or minor. Final approval of applicable transfer credits to meet major or minor requirements rests with the chair of the department offering the major or minor and the dean of the school. The Vice President for Academic Affairs or designee is ultimately responsible for determining the applicability of transfer credits to meet general education requirements.

TRANSFER CREDIT FROM NON-REGIONALLY ACCREDITED COLLEGES AND UNIVERSITIES

Transfer credits from colleges and universities not accredited by a regional association may be accepted in transfer when appropriate to the student's degree program and when the dean of the school offering the major or minor has had an opportunity to validate the courses or programs. This responsibility may also be delegated to department chairs or faculty members. The Vice President for Academic Affairs is ultimately responsible for determining the applicability of transfer credits to meet general education requirements.

CORRESPONDENCE CREDIT

Credit earned through correspondence offered by regionally accredited institutions may be applied toward degree requirements upon recommendation by the student's advisor with approval of the department chair of the student's major and the dean responsible for the major.

SECOND BACCALAUREATE DEGREE

A student may receive a second baccalaureate degree upon completion of:
1. a minimum of 30 semester hours beyond the first degree with at least 15 of the hours in residence at Cameron,
2. a total of at least 30 semester hours in residence at Cameron,
3. the additional requirements for the second major, and
4. the U.S. History and American Government requirements.

SECOND ASSOCIATE DEGREE

A student may receive a second associate degree upon completion of a minimum of 15 semester hours in residence at Cameron University in addition to the hours required for the first degree, provided the requirements for the degree are met.

DOUBLE MAJORS

Students may have more than one major listed on their transcripts, provided they complete all of the requirements for each of the majors. A student seeking two majors must designate one of the majors as the "first major." The degree awarded will be determined by the designated "first major." Students fulfilling all of the requirements of a "second major" are not required to complete a minor.

DUPLICATE USE OF COURSES

Credits earned in a particular course may not be used to fulfill the requirements of two different majors or of both a major and a minor. Should the same course be required in each of a student's majors or in both his major and minor (See "Double Majors"), a student will be expected to complete an additional elective course in the discipline in which the duplication occurs.

GRADUATION APPLICATION

Each candidate for a degree must submit a graduation application online via Aggie Access the semester or summer session prior to the session in which the student expects to graduate (https://aggieaccess.cameron.edu).

DIPLOMAS AND TRANSCRIPTS

Cameron University views the diploma as a "ceremonial" document, suitable for display purposes. The document officially verifying completion of degree requirements is the transcript issued by the Registrar's Office. A student may obtain a copy of their official transcript from the Registrar's Office at no charge. Students may request transcripts online, by mail/e-mail/fax, or in-person. Visit website for more information. (http://www.cameron.edu/registrar/transcripts.html).

PRESENCE AT COMMENCEMENT EXERCISES

An annual commencement exercise is conducted at the end of the spring semester. Students who have completed or plan to complete graduation requirements that semester or at the end of the preceding fall semester and those who apply to graduate at the end of the following summer session or following fall semester, are invited and encouraged to attend.

RECOGNITION OF HONOR GRADUATES

Graduating baccalaureate and associate degree candidates with superior academic records are accorded special recognition by the University. A student who has achieved a cumulative GPA of 4.00 graduates "summa cum laude," one whose cumulative GPA is less than 4.00 but is 3.80 or above graduates "magna cum laude," and one whose cumulative GPA is between 3.60 and 3.80 graduates "cum laude." These honors are listed on official Cameron University transcripts, and honor graduates are formally recognized at the commencement.

ACADEMIC LOAD

Academic load includes all courses in which a student is enrolled.
- Academic load for a regular semester is 15 semester hours and for a summer or 8-week session is 9 semester hours.
The maximum load that a student will normally be permitted to carry is 18 semester hours during a regular semester or 9 semester hours during a summer or eight-week session.

A student who has attained a retention GPA of 3.00 and has completed a minimum of 15 semester hours will be permitted to enroll in 21 semester hours during a regular semester or 10 semester hours during a summer or eight-week session. A student who meets these qualifications should contact the Registrar's Office to have their maximum hours raised.

All other overloads must be recommended by a student's advisor and approved by the dean of the school responsible for the student's major.

The credit hour load that may be approved for a regular semester, summer session, eight-week session, or short course can never exceed one and one-half times the number of weeks in the semester, summer session, eight-week session, or short course.

**FULL-TIME UNDERGRADUATE STUDENT**

An undergraduate student who enrolls in 12 or more hours during a regular semester or 6 or more hours during a summer semester is classified as a full-time student. Students who wish to stay on track to graduate in four years will need to average 15 hours per regular semester or 30 hours per academic year. Some university scholarships and awards may require enrollment in 15 hours per semester.

**CLASSIFICATION OF UNDERGRADUATE STUDENTS**

Freshman: 0-29 semester hours earned
Sophomore: 30-59 semester hours earned
Junior: 60-89 semester hours earned
Senior: 90 or more semester hours earned

**LATE ENROLLMENT**

Enrollment after the first full week of classes in any semester, summer or eight-week session or proportionate period of a special schedule is considered late enrollment. Late enrollments require permission from the instructor(s), chair(s), and dean(s) responsible for the course(s) in which a student wishes to enroll as well as the Vice President for Academic Affairs or designee. Any student enrolling late will be responsible for making up all work of the classes in which they enroll but is not guaranteed credit for any late work.

**CHANGING COURSE SCHEDULES**

Students who wish to make schedule changes must adhere to the following deadlines:

- **Adding Courses.** The first day of the second week of classes of a regular semester, summer, or eight-week session or proportionate period of a special schedule is the last day a course may be added.
- **Dropping Courses.** Courses dropped during the first ten days of a regular semester, first five days of a summer or eight-week session or proportionate period of a special schedule, will not be recorded on a student's academic record.
- **Withdrawing from Courses.** Courses from which a student withdraws after the drop period and prior to the end of the twelfth week of a regular semester or proportionate period of other sessions will be recorded on a student's academic record with a course status symbol of "W."

Students may not withdraw from classes after the twelfth week of a regular semester or proportionate period of other sessions.

To add, drop, or withdraw from a class, students may contact the Academic Advising Center, Student Support Services, the Registrar's Office, or CU-Duncan. Students with departmental advisors may process their own adds, drops and withdrawals in Aggie Access using a PIN number provided by an assigned advisor.

Non-attendance or ceasing to attend class does not constitute official withdrawal.

**AUDITING**

A student may enroll in a credit course as an auditor on a non-credit basis with the permission of the instructor teaching the course. Enrollment is done in the normal manner with the indication that it will be an audit. Auditors are not held responsible for the work expected of regular students and receive no grade or credit for the course. Test participation is the prerogative of the instructor. A student who audits a course agrees that they will not petition or ask in any way for the privilege of taking an examination to obtain credit after auditing the course.

A student enrolled as an auditor may change the enrollment from audit to a credit enrollment within the first week of a regular semester, summer, or eight-week session or proportionate period of a special schedule, with the permission of the instructor. A student enrolled for credit may change the enrollment to audit within the first eight weeks of a regular semester or proportionate period of other sessions only, with the permission of the instructor.

**ATTENDANCE**

A student is responsible for the content of each course in which they are officially enrolled. At the beginning of each course the instructor will define and quantify attendance standards, procedures for verifying unavoidable absences, and methods of dealing with missed assignments and examinations. Instructions for dropping courses without an entry on a student's academic record will be stated in writing and distributed.
It is a student’s responsibility to note these instructions and follow them consistently and carefully.

**LEAVE OF ABSENCE DUE TO MILITARY SERVICE**

Cameron University will grant a leave of absence, which shall not exceed a cumulative five (5) years, to a student who is a member of the active uniformed military services of the United States and called to active duty. The student shall be eligible to:

1. Withdraw from any or all courses for the period of active duty service without penalty to admission status or GPA and without loss of institutional financial aid; or
2. Receive an “I” for any or all courses for the period of active duty status irrespective of the student’s grade at the time the “I” is awarded; provided, however, that the student has completed a minimum of fifty percent (50%) of all coursework prior to being called to active duty and the student completes all courses upon return from active duty.

The student’s admission status and GPA shall not be penalized and the student shall not experience loss of institutional financial aid.

Military students (including students utilizing VA Educational benefits) encountering special circumstances impacting their academic enrollment with Cameron University may submit a Special Request form to Academic Affairs. Students may request financial and/or academic relief through this process. If the request is due to unexpected military deployment which interrupts or precludes the completion of course(s), it must be accompanied by military documentation. Requests for academic and financial relief are reviewed by the Office of Academic Affairs and by the Business Office, respectively, on a case-by-case basis.

**EXCUSED ABSENCES DUE TO RELIGIOUS HOLIDAYS**

It is the policy of the university to excuse the absences of students that result from religious observances and to provide without penalty for the rescheduling of examinations and additional required class work that may fall on religious holidays. Where applicable, it is assumed that students will consider the religious holiday schedule in advance of enrolling in courses and notify instructors in advance of any absence due to observance of religious holidays.

**WITHDRAWING FROM THE UNIVERSITY**

Non-attendance or ceasing to attend a class does not constitute official withdrawal. It is a student’s responsibility to complete the withdrawal process. A student may not withdraw during the last four weeks of a semester or proportionate period of other sessions. A student who is unable to personally complete the withdrawal process due to unavoidable circumstances should contact the Registrar’s Office as soon as possible.

**CREDITS**

Cameron University strictly adheres to the policies of the Oklahoma State Regents for Higher Education when defining academic sessions and credit hours (OSRHE Policy and Procedures Manual, Section 3.18.3.) Per OSRHE mandate, all classes taught during the standard term are expected to meet for sixteen, twelve, or eight weeks in the Fall or Spring semesters; four, six, or eight weeks in a summer session; or an equivalent number of days/weeks between a semester and/or session for intersession. No institution, academic department, or individual faculty member is authorized to reduce the number of academic weeks in the standard semester without specific approval of OSRHE.

The semester-credit-hour is the standard and traditional unit of credit to be used by Cameron University in evaluating a student’s educational attainment and progress for all programs. A semester-hour of credit is calculated as follows:

- One semester-hour of credit is normally awarded for completion of a course meeting for 800 instructional minutes, (50 minutes/week for sixteen weeks; 100 minutes/week for eight weeks; 200 minutes/week for four weeks), exclusive of enrollment, orientation, and scheduled breaks. Organized examination days may be counted as instructional days.
- Laboratory credit is normally awarded at a rate not to exceed one-half the instructional rate. One semester-hour of credit is normally awarded for completion of a laboratory meeting a minimum of 1600 minutes (100 minutes/week for sixteen weeks; 200 minutes/week for eight weeks).
- Instruction offered through a combination of class and laboratory meetings would normally observe the standards set forth above on a pro rata basis. For example, a course offered for four semester-hours of credit might meet for 100 minutes of organized instruction plus 200 minutes of laboratory per week for 16 weeks.
- Block or alternative course schedules may also occur within the dates set forth for a semester or summer session. Courses offered during academic terms shorter than a semester will observe the same academic standards involving instructional hours per semester-credit-hour as those courses offered during a standard academic semester. Institutions are encouraged to be flexible in offering courses in alternative schedules to meet student and employer needs.
- A student enrolled in a Study Abroad course is earning course credit, therefore, the course will be considered part of the student’s enrollment status for determining Title IV financial aid eligibility.

There are alternatives to reliance on time-in-class as the basis for determining academic credit-hours earned.
The achievement of academic credit-hours should be linked to demonstrated student learning either through regular class assignments and evaluations or demonstration of competencies. When determining the appropriate academic credit for non-traditional or accelerated format courses, institutions must adhere to the Higher Learning Commission (HLC) Handbook of Accreditation Standards. HLC requires institutions to rigorously assess student learning outcomes consistently across all formats. Institutions offering courses in accelerated or other non-traditional formats are expected to be especially diligent in documenting that students in these courses master the skills and knowledge expected of students in traditional courses.

**COURSE NUMBER SYSTEM**
Course numbers are four digits. The first digit indicates the class year in which the subject is ordinarily taken. A zero in the first digit indicates a non-college level course. The last digit indicates the credit hours awarded for the course. The two middle digits identify the course within the department. For example, a course numbered 2013 is a sophomore course carrying three semester hours of credit; a course numbered 0103 is a developmental (non-college level) course carrying three semester hours of enrollment (will not contribute to hours attempted or earned).

**DEVELOPMENTAL COURSES**
Developmental courses are taken to prepare students for college-level work. Courses cannot be used to meet degree requirements. All developmental coursework must be completed within the first 24 collegiate hours attempted. Successful course completion requires a grade of "RC" or better.

**PREREQUISITES AND COREQUISITES**
Enrollment in some courses is restricted to students who have taken or are taking certain other courses, who have attained a particular class standing, who have obtained the consent of the department, or who are pursuing a particular major or majors. In general, prerequisites are courses or conditions that must be completed prior to enrollment in a particular course; corequisites are courses or conditions that must be taken simultaneously with another course. Prerequisites and corequisites are listed with the course descriptions.

**GRADING SYSTEM**
Academic performance at Cameron University is evaluated using the following grading system:

### GRADES USED IN CALCULATING GPA

<table>
<thead>
<tr>
<th>GRADE</th>
<th>NOTE</th>
<th>PTS/HR</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>EXCELLENT</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>GOOD</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>AVERAGE</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>BELOW AVERAGE</td>
<td>1</td>
</tr>
<tr>
<td>F</td>
<td>FAILURE</td>
<td>0</td>
</tr>
</tbody>
</table>

### GRADES NOT USED IN CALCULATING GPA

<table>
<thead>
<tr>
<th>GRADE</th>
<th>NOTE</th>

<td>THESIS IN PROGRESS</td>
</tr>
</tbody>
</table>

### "RA-RB-RC-RD-RF" Grades
The grades of "RA-RF" are used in grading zero-level or developmental courses. Developmental courses are not applicable to any degree requirements and do not contribute to hours attempted or earned. The "RA-RF" grade is GPA neutral.

### "S-U" and "P-NP" Grades
The grades of S (satisfactory), U (unsatisfactory), P (Pass), and NP (No Pass) may be used in grading certain courses at the discretion of the instructor offering the course, with prior approval of the department chair. When a course is selected for S-U or P-NP grading, the entire class must be graded on the same basis. The grade of "S" also will be used to indicate passing in a credit course transferred to Cameron in which no letter grade has been assigned, and to designate awarded advanced standing credits. While all four grades “S, U, P, NP” are GPA neutral, they are counted in the total number of attempted hours for retention and the total number of attempted and earned hours for graduation.

### "W" Symbol
A "W" may be awarded only if the student initiated and completed withdrawal from a course during the allowable withdrawal period. The "W" grade is GPA neutral.

### "AW" Symbol
An "AW" is assigned by the Vice President for Academic Affairs or designee to indicate that the student was “involuntarily” administratively withdrawn from class(es) after the institution’s drop/add period for disciplinary or financial reasons or inadequate attendance. The “AW” grade is GPA neutral.
"AU" Symbol. Audit status is used for a student who is not interested in obtaining a course grade, but who is enrolled to get course content knowledge. The “AU” grade is GPA neutral.

"I" Symbol. An incomplete may be given (at an instructor’s discretion) to a student to indicate that additional work is necessary to complete the course. It is not a substitute for an “F,” and no student may be failing a course at the time an "I" grade is awarded. To receive an "I" grade, the student should have satisfactorily completed a substantial portion of the required course work for the semester or session. Students who receive an "I" will have no more than one year from the end of the semester in which the course was taken to complete the required work for the course. The instructor shall record the conditions and time limit for removing the “I” on the Incomplete Grade Form that is filed with the Registrar’s Office.

Changing an "I". It is the responsibility of the student to satisfy the requirements specified by the instructor at the time of the assignment of the "I". It is the responsibility of the instructor to submit a "Grade Correction" form to the Registrar. Students who receive an "I" will have no more than one year from the end of the semester in which the course was taken to complete the required work for the course. If, by the end of the year, no change in grade has been submitted, the grade of "I" will become permanent. In no case will an "I" be changed to an "F" after a student has graduated. "I" grades are neutral and not counted in GPA calculations.

"JA-JB-JC-JD-JF-JU-JS" Grades. Only 64 hours are allowed to transfer from a two-year institution. If more than 64 hours are earned, classes will be noted with the above grades and will not satisfy any credit hour requirement, but will be included in retention and cumulative grade point averages.

Changing Grades Reported in Error. The only reason to change a grade is to correct a grade reported in error. The instructor who submitted final grades may make such a change by submitting to the Registrar a "Grade Correction" form signed by their chair and dean. In the event of the instructor’s absence, death, or disability, the grade may be changed by the Department Chair.

Repeating Courses. Repeating a course does not remove the previous grade from the student’s record. Furthermore, repeated course credit hours may not be counted toward graduation requirements unless a course is so identified in the course description.

SCHOLASTIC REQUIREMENTS FOR CONTINUED ENROLLMENT

Retention Standards. Students must maintain a retention grade point average of 1.7 or greater during the first 30 attempted semester hours and a retention GPA of 2.0 or greater after 30 attempted semester hours.

Good Academic Standing. A student who meets the University’s retention standards is in good academic standing.

Academic Notice. Students with 0 to 30 semester hours attempted and a retention GPA of 1.7 to 1.99 will be placed on academic notice. Academic notice is not recorded on the transcript.

Academic Probation. A student who fails to meet the retention standards will be placed on academic probation and will remain on probation until the applicable retention standard is met or they are placed on academic suspension. Academic probation is recorded on the transcript.

Academic Suspension. Academic suspension will occur at the end of any semester during which a student who is on academic probation fails to meet the applicable retention standard or fails to earn a semester GPA of at least 2.0 in regularly graded work, not to include activity or performance courses. Suspended students may not be reinstated until one regular semester (fall or spring) has elapsed. Academic suspension is recorded on the transcript.

Suspension of Seniors. A student with 90 or more semester hours in a specified degree program who has failed to meet the retention standard for continued enrollment and has failed to earn a semester GPA of 2.0, which would allow continued enrollment, may enroll in an additional 15 semester hours in a further attempt to achieve the requirements for retention. A student will be afforded this extension one time only.

Academic Suspension Appeals and Re-admission. A student who has been academically suspended from the university for the first time may apply for re-admission after one regular semester (fall or spring) or appeal the suspension and apply for immediate reinstatement. There are two categories of students who may appeal a suspension and apply for immediate reinstatement with the understanding the reinstatement does not remove the record of suspension.

1. Appeals of academic suspension due to “extraordinary personal circumstances” will be considered by the Academic Appeals Committee. Students reinstated on this basis will be readmitted on probation and must maintain a 2.0 GPA each semester or summer session while on probation or raise their retention GPA to the retention standard.

2. Students suspended at the end of a spring semester may appeal to enroll in the summer session. Students in this category are automatically reinstated upon review and approval of a student’s summer enrollment schedule by a designated member or members of the Academic Appeals Committee.
Committee. Approved summer schedules will be limited to core academic courses that meet general education or degree requirements. To continue in the fall semester these students must make at least a 2.0 GPA in the summer session. Students who do not raise their cumulative GPA to retention standards in the summer session will be enrolled on probation in the fall semester. Students who fail to achieve a 2.0 or higher GPA in the summer session will remain suspended and may not be reinstated until after one regular semester.

Should a reinstated student be suspended a second time, they cannot return to the university until such time as they have demonstrated, by attending another institution, the ability to succeed academically by raising their GPA to retention standards.

Copies of appeals procedures and the conditions and procedures for readmission may be obtained from the Office of Admissions.

SUBSTITUTION AND WAIVER OF COURSES

Petitions to substitute or waive courses designated as necessary to fulfill general education requirements must be approved by the Vice President for Academic Affairs or designee. The dean of the school offering the major or minor is ultimately responsible for approving course substitutions and waivers for major or minor program requirements. This responsibility may be assigned to department chairs or faculty members under the supervision of the dean. Approved substitutions or waivers of major or minor requirements must be documented (by signature and date) on the Undergraduate Course Substitution/Waiver Request form. Permission for any other exception to stated requirements must be initiated through the dean responsible for the student’s major program and approved by the Vice President for Academic Affairs.

ACADEMIC ADVISORS

Cameron students pursuing an associate or baccalaureate degree will be assigned an academic advisor for assistance in course selection, exploration of college majors and careers, and planning of programs of study to achieve educational goals.

ACADEMIC FORGIVENESS POLICY

Academic forgiveness provides a means for classifying certain courses as “reprieved” or “forgiven” to exclude them from a retention/graduation grade point average (GPA). For students receiving forgiveness, the transcript will reflect a retention/graduation GPA, excluding forgiven courses/terms, and a cumulative GPA, which includes all regularly graded course work.

Academic Renewal. A student may request Academic Renewal by submitting a completed Request for Academic Renewal form to the Registrar’s Office.

The following guidelines apply:

1. Student must be currently enrolled.
2. At least five years must have elapsed between the last semester being renewed and the renewal request.
3. Prior to requesting Academic Renewal, the student must have earned a GPA of 2.0 or higher with no grade lower than a “C” in all regularly graded course work (a minimum of 12 hours) excluding activity or performance courses.
4. The request will be for all courses completed before the date specified in the request for renewal.
5. All courses remain on the student’s transcript, but are not calculated in the student’s retention/graduation GPA. Neither the content nor credit hours of renewed course work may be used to fulfill any degree or graduation requirements.

Academic Reprieve. A student may request academic reprieve by submitting a completed Request for Academic Reprieve form to the Registrar’s Office.

The following guidelines apply:

1. Student must be currently enrolled.
2. At least three years must have elapsed after the semester/term in which the grades were earned.
3. Subsequent to the semester/term for which reprieve is requested and prior to requesting the reprieve, a student must have earned a GPA of 2.0 or higher, with no grade lower than a “C” in all regularly graded course work (a minimum of 12 semester hours) excluding activity or performance courses.
4. Reprieve may be granted for no more than two consecutive semesters/terms of enrollment.
5. A student may not receive more than one academic reprieve.
6. All courses remain on the transcript, but are not calculated in the retention/graduation GPA. Course work with a passing grade included in a reprieved semester may be used to demonstrate competency in subject matter. However, the course work may not be used to fulfill credit hour requirements.

Forgiven Course: A student may have a course forgiven by submitting a completed Request for Forgiven Course form to the Registrar’s Office.

The following guidelines apply:

1. Student must be currently enrolled.
2. A student may repeat a limited number of courses in which a “D” or “F” was awarded and have the first grade earned forgiven (excluded) from calculation of a retention/graduation GPA. The second grade, as well as any subsequent grade, earned is used in calculating the retention/graduation GPA, even if the grade is lower than the first grade. The exclusion of forgiven courses from the retention/graduation GPA is limited to the first four repeated courses, not to exceed 18 hours.
3. Students repeating courses beyond the first 18
semester hours of “D” or “F” may do so with the original and repeat grades averaged in the GPA. Repeated courses will not be counted toward hours earned for graduation.

ACADEMIC TRANSCRIPT
The transcript is a full and accurate accounting of the facts of a student’s academic life. All courses, including those classified as developmental, reprieved, and forgiven, are recorded on the academic transcript.

APPEAL OF FINAL GRADE
The only basis for a formal appeal of a final grade is whether the student’s final grade was assigned fairly within the grading system adopted by the faculty member. The Grade Appeal Policy is published in the Student Handbook and the Faculty Handbook. A formal request for appeal of a final grade must be filed prior to the end of the first regular semester following the semester during which the course was taken.

THE DEAN’S AND PRESIDENT’S HONOR ROLLS
The Dean’s Honor Roll, published each semester, includes all full-time Cameron University students whose semester GPA is 3.0 or better. Full-time students earning a 4.0 semester GPA are included on the President’s Honor Roll. Full-time status is determined by semester hours earned in college credit classes.

STUDENT PROGRAMS AND SERVICES
A variety of university programs and services provide assistance to students. These programs and services are described in the following sections.

ORIENTATION
All entering students who have earned fewer than 15 semester credit hours, have graduated from high school in the last two years, and are seeking a degree at Cameron University may be required to attend an orientation session. The orientation introduces the student to the campus and provides information about resources, services, and activities. Contact the Office of Teaching and Learning (580-581-5900) to register for an orientation or to request additional information.

ACADEMIC ADVISING CENTER
The Academic Advising Center is a central location for academic information and resources for students. In addition to providing advising services to all new Cameron students, the Academic Advising Center helps students find the right major to meet their academic goals and interests. Students have access to Advising Specialists who provide timely and accurate academic advising for students’ academic success. The Academic Advising Center is located on the first floor of North Shepler and can be reached by calling (580) 581-6741. An academic advisor for Cameron University-Duncan students is located on the Duncan Campus and can be reached by calling 877-282-3626.

FINANCIAL RESOURCE SPECIALIST
Housed in the Academic Advising Center on the Lawton campus, the Financial Resource Specialist is available to answer questions about applying for financial aid, including federal grants and loans and institutional and external scholarships. The Financial Resource Specialist also offers coaching on financial literacy topics.

OFFICE OF FINANCIAL ASSISTANCE
The Office of Financial Assistance provides financial counseling, administers scholarships, grants, loans, and student employment. Interested students should reference the Financial Information section of this catalog. For further information on application procedures, contact the Financial Assistance Office, (580) 581-2293, or financialaid@cameron.edu.

ON-CAMPUS HOUSING
On-campus housing provides the opportunity for involvement within a living-learning community. Cameron University provides two options for on-campus living: Cameron Village and Shepler Center. Cameron Village combines all the amenities of an apartment complex with the convenience of on-campus living. Shepler Center, comprised of two ten-story high-rises, provides Cameron students with a more traditional living-learning environment. Contact Student Housing (580-581-2392; housing@cameron.edu) for further information about living on campus.

STUDENT DEVELOPMENT
The Office of Student Development offers services, programs and activities designed to enhance the collegiate experience and to foster both academic excellence and personal growth. The Office of Student Development is responsible for Career Services, Disability Services, Inclusion and Student Success, and Judicial Affairs. Comprehensive workshops, programs, and training opportunities for student engagement, student success, as well as global learning, cultural understanding, and professional development are offered. The Office of Student Development and our student organization, the Cameron University Diversity Diplomats, seek to foster equity and innovation and increase competencies among students to cultivate an inclusive and progressive university. For additional information, please call (580) 581-2209 or e-mail student.development@cameron.edu.

DISABILITY SERVICES
Cameron University recognizes that all students deserve an equal opportunity to participate in university life and attain a higher education. The Student Development Office coordinates accommodations for students with disabilities and develops programs to support disability awareness. If an accommodation on the
basis of a disability is required, please contact the office prior to the start of the semester or as soon as possible to complete the required documentation for accommodations. Please contact the office immediately (580-581-2209, studentdevelopment@cameron.edu) if you have any concerns or problems with an accommodation or need more information.

TESTING CENTER
The Testing Center is responsible for coordinating, administering, and scoring a wide range of national, international, and local tests for the Cameron community and the general public. Tests offered include: National and Residual ACT (American College Test), CLEP (College-Level Examination Program), DSST (DANTES Subject Standardized Tests), GRE (Graduate Record Exam) Subject Test, LSAT (Law School Admissions Test), MAT (Miller Analogy Tests), SAT (Scholastic Aptitude Test), and the Institutional TOEFL (Test of English as a Foreign Language).

Additionally, the Testing Center administers computerized placement tests (CPT) for English, reading, and math; provides opportunities for gaining credit for certain college courses; and furnishes proctors for both computer-based and paper-based tests for Cameron and other universities. The Testing Center is equipped to handle all testing needs by providing careful and precise test administrations, adhering to high test security standards, and providing a low-distraction, comfortable environment. For more information, contact the Testing Center at (580) 581-2502 or testingcenter@cameron.edu.

Cameron University–Duncan’s Testing Center offers the Residual ACT, CPT, and also furnishes proctors for both computer-based tests for Cameron and other universities. For scheduling or more information, call (877) 282-3626 or email Duncan@cameron.edu.

CAREER SERVICES
Career Services assists students and alumni in achieving their career goals by providing excellent career-related resources, programs, services, and opportunities that equip and empower them for the workforce. For more information, contact Career Services, located in the Office of Student Development, (580) 581-2209, hirecameronaggies@cameron.edu.

TRIO PROGRAMS
Cameron University hosts three TRIO programs that are funded under the Higher Education Act. They provide a comprehensive array of information, counseling, academic instruction, and support services to at-risk students in junior high, high school, and college.

Student Support Services
A part of the Cameron campus since 1987, Student Support Services (SSS) offers academic advisement, enrollment, peer mentoring, free tutoring, financial aid information, SSS sections of certain classes, and a variety of enrichment workshops and cultural activities to Cameron participants. Participation in SSS provides personal and academic enrichment for students who may face economic, social, and cultural barriers to higher education. SSS maintains information on campus and community resources and refers members to appropriate offices and agencies.

Applicants to the program must be a U.S. citizen or permanent resident AND meet at least one of the following criteria:

- Be a first generation college student pursuing a four-year degree.
- Meet federal guidelines for having an economic need.
- Have a documented learning or physical disability.

For more information, contact the Student Support Services Office, (580) 581-2352.

Open Doors
Open Doors (Educational Talent Search) is an outreach program that provides information, educational guidance counseling, and support for Lawton Public School high school graduates and secondary students who did not complete high school and/or come from low-income households. Offices opened for this community outreach project in 1991. For more information, contact Open Doors, (580) 581-5581.

Upward Bound
Upward Bound was established on campus in 1992 to provide rigorous academic instruction, individual tutoring and personal, career, and academic counseling for Lawton Public School, college-bound, high school students who come from low-income households. For more information, contact Upward Bound, (580) 581-5581.

ACADEMIC SUPPORT SERVICES
The Center for Academic Success, located on the first floor of Nance-Boyer Hall, is open to all Cameron students, providing assistance to students in all disciplines with an emphasis on general education courses. Center staff are available to help with general tutoring, computer literacy, study skills, time management skills, and test preparation strategies. Computers are available for student use.

The Language Learning Center is located on the second floor of Nance Boyer Hall in Room 2005. All CU students may use the Center’s media programs to study more than 36 foreign languages.

The Center for Writers is located on the second floor of Nance Boyer Hall in Room 2060. The center is open to all Cameron students, offering assistance for writing assignments of any kind, including course papers and applications for scholarships, awards, and graduate and professional schools. The Center for Writers provides individual tutorial help, assistance with word processing, and access to software and printed material addressing critical-thinking skills, usage, grammar, vocabulary,
documentation of research, development of personal style, and all stages of the writing process from pre-writing through final draft. Computers are available for student use. Similar services for a variety of writing assignments are available for Duncan campus students in the Tutorial Lab at Cameron University–Duncan. Call 877-282-3626 for more information and scheduling.

The Mathematics Tutorial Laboratory, located in Burch Hall 104, is available to students who are enrolled in lower level mathematics classes through MATH 2713 (Elementary Calculus). The lab is staffed by undergraduate students under the supervision of the Math Lab Director. While students may obtain assistance on a walk-in basis, it is recommended that they call for an appointment (580-581-2484). The informal atmosphere of the lab allows the students to work on homework assignments alone or with classmates and have immediate assistance available from the math tutors on duty. Participation by students is strictly voluntary and may be on an irregular, drop-in basis, or appointments can be made for a specific time.

Cameron University-Duncan’s Tutorial Lab offers similar services for Duncan area students. Lab hours are posted online and no appointment is necessary.

Cynthia Ross Hall Laboratory is located on the first floor of Ross Hall in Room 100, and provides computers for student use.

The Sarkeys Foundation Student Computer Lab, located in Academic Commons, is an open lab intended to serve the computing needs of students and faculty. Resources are available on a first-come, first-served basis at the convenience of users. All users must be able to justify their use of the lab. The lab also proctors online tests.

LIBRARY

Cameron University Library promotes scholarly inquiry and work by providing materials and services associated with the access and use of information. Access to print and electronic materials is available in the physical library and through the library’s webpage. The library houses comfortable work areas, a fully-equipped computer lab, and a group of friendly staff members trained to assist Cameron University patrons with their library needs.

RESEARCH

With the aim to support the teaching mission at Cameron University, research and scholarship at Cameron University are undertaken by faculty and students using a broad range of approaches. The quest for new knowledge, synthesis of existing information, and application of knowledge are shared experiences within the university community. In keeping with the institutional purpose of providing education through community service, research at Cameron is typically applied in nature. Students are afforded the opportunity to work on real world problems of relevance to the broader community of which the university is a constituent, under the mentorship of caring and highly qualified faculty.

HONOR SOCIETIES

Cameron University currently has 18 nationally and internationally recognized honor and professional societies that elect members based on scholastic achievement. The two university-wide honor societies are:

Phi Kappa Phi, recognizing outstanding juniors, seniors, and graduate students from all disciplines, and

Phi Eta Sigma, a national college scholastic honor society for freshmen.

For information on Cameron honor societies acknowledging outstanding achievement in specific disciplines, please contact the appropriate academic department.

CAMPUS LIFE

Cameron University recognizes the importance of co-curricular activities and the role they play in the college experience. The Office of Campus Life strives to provide a variety of activities and to engage students in campus life.

Student Activity Facilities

The Office of Campus Life, located in the McMahon Centennial Complex on University Drive, is the seat of all campus activities and houses the offices of the Programming Activities Council and the Student Government Association.

The McMahon Centennial Complex (MCC) is a state-of-the-art student activities facility located in the heart of the campus. The MCC houses the Clarence Davis Student Union, which provides students with a place to study, dine, and interact with each other, complete with a food court and game room. Other amenities include the Inasmuch Art Gallery, student activity area, study hall, meeting rooms, and the McCasland Ballroom, a divisible ballroom available to the community for proms, weddings, workshops, banquets, and other special events.

The McMahon Center, located adjacent to Cameron Village, provides students a place to relax and study. The facility features a fireplace, television, pool table, library, computer lab, and more. The facility also serves as host to press conferences, luncheons, dances and other social activities. The McMahon Center also houses the Office of Residence Life and a faculty-in-residence.

Cameron Stadium seats approximately 10,000 people around artificial turf and is the site of the university’s gala commencement ceremony each spring. The stadium is used by local area high schools on a regular basis for football games. In addition, marching band tournaments still fill the air with music, and concerts are often held here as well.
McCord Field is a baseball park complete with concession facilities, press box, and ample parking. It has a seating capacity of approximately 1,000.

The McMahon Field and Athletics Center is the home of the Aggie softball team and also provides a weight room for all Aggie athletes in addition to an indoor practice area with batting cages utilized by both softball and baseball teams. The complex also includes dressing and locker rooms for the softball team and umpires, a press box, a concession facility, an equipment storage room, covered bleachers, and landscaped patio spaces with sun shades for additional viewing areas.

Aggie Gym is located on the northern edge of campus across from the University’s administration building. In addition to the arena, the facility also houses a complete training room, weight room, classroom space, coaches’ offices, four locker room areas, and boasts a seating capacity of nearly 1,800.

The Streich-Henry Tennis Complex, built in 1978, houses the home courts of Cameron’s nationally ranked men’s and women’s tennis teams. The complex features eight courts, allowing the Aggies to host a variety of events ranging from dual matches to multi-team high school regional tournaments. The complex is located directly west of the Shepler Center dormitories, allowing for ample parking at Cameron tennis events, and features a multi-faceted structure that provides covered bleachers, restrooms and a locker room area for the Aggies.

The Aggie Rec Center is a 30,000 sq. ft. facility that has a gym for basketball; volleyball and other team activities; four racquetball courts; strength and cardio equipment; aerobic activities; running track; and a 25-yard indoor swimming pool. All areas are accessible.

Students who attend the Cameron University–Duncan campus may use the Simmons Center in Duncan for recreation and fitness classes. Online students who live in the Duncan area may also qualify for Simmons Center membership. More information is available online or by calling the Duncan campus at 877-282-3626.

Accommodations on the basis of disability at any campus facility are available by contacting the Office of Student Development, (580) 581-2209, North Shepler Room 314, or student_development@cameron.edu.

**Programming Activities Council**

The mission of the Programming Activities Council (PAC) is to improve the quality of activities and gain student input into the planning of programs, entertainment, and activities. PAC provides activities such as comedians, hypnotists, concerts, and trips for the university. Major events for the entire campus are coordinated and implemented by the council. For a complete list of activities sponsored by PAC, call (580) 581-2271 or go online. Cameron University-Duncan’s PAC provides a variety of activities on the Duncan campus. For more information about the Cameron University-Duncan PAC, (877) 282-3626.

**Student Government**

The Student Government Association (SGA) is the governing body representing all students in the shared governance process at Cameron University. This organization, comprised of senators from the academic departments and representatives from the student organizations, is presided over by a student-elected president. The purpose of the Student Government Association is to promote the interests and welfare of the student body. SGA officers can be reached by calling (580) 581-2444.

**Student and Departmental Organizations**

Cameron recognizes more than 60 student organizations with varying interests. The focus of the groups range from academic to social to religious to political. By participating in departmental clubs, honor societies, and special interest organizations, students develop life skills and enrich their college experience. Students interested in joining or starting a group should contact the Office of Campus Life, (580) 581-2217.

**Cultural Programs**

A wide range of cultural events are presented each year by various departments and special committees on campus.

The Lectures and Concerts Committee sponsors both popular and classical musical concerts while also bringing to campus a number of eminent speakers on many subjects, from politics to science.

The School of Arts and Sciences offers a variety of arts activities and opportunities, which are open to all Cameron students regardless of major. The Department of Art, Music, and Theatre Arts sponsors frequent student gallery shows as well as workshops and exhibits by well-known visiting professionals, offers multiple annual musical and theatrical productions, and offers student musicians a choice of wide array of instrumental ensembles and choirs. Cameron's award-winning Speech and Debate Team, sponsored by the Department of Communication, English and Foreign Languages, competes at the national level.

The Office of Campus Life and the Office of Student Development both bring prominent artists, programs, and seminars to the campus to provide a wide range of social and cultural events to Cameron University students, faculty, and staff.

Cameron University’s Academic Festivals are dynamic, privately funded symposia that provide in-depth study into a single topic over the course of an academic year. Held every three years, these festivals feature nationally recognized speakers and unique public events. Cameron’s academic festival series has established a reputation for bringing thought-provoking, informative and entertaining speakers to Southwest Oklahoma. More information about previous or upcoming Academic Festivals is available online.
Intercollegiate Athletics

The Athletics Department is supervised by the Director of Athletic Administration. The Intercollegiate Athletic Committee, a secondary committee of the Institutional Services Committee, serves in an advisory capacity to the Director of Athletic Administration.

The Cameron Aggies are proud members of both NCAA Division II and the Lone Star Conference and compete in 13 intercollegiate sports: Men’s baseball, basketball, cross country, track, golf, and tennis; women’s softball, basketball, volleyball, cross country, track, golf, and tennis. The Aggies have a long-standing tradition of excellence and have won a remarkable number of conference, regional, and national championships. Cheerleading and Sports Medicine are also included within the Athletic Department. Scholarships are available in each of these sports/areas. Information can be obtained by writing to the Director of Athletic Administration, who will forward inquiries to the appropriate head coach.

Intramural Sports

The Intramural Sports program offers students, faculty, and staff the opportunity to participate in many sports and activities on a competitive and recreational level. All skill levels are welcome, and there is no fee to participate. Sports include flag football, basketball, bowling, golf, soccer, and many more. For more information, contact Campus Life at (580) 581-2217.

Religious Organizations

Cameron University is a state-supported, non-sectarian institution, but it recognizes the importance of spiritual life and cooperates with many off-campus groups that fulfill the religious needs of the community. Several recognized student organizations are affiliated with denominational student centers. Each of these centers conducts student programs under the direction of professionally trained staff.

Who’s Who Among Students in American Universities and Colleges

Special university recognition is given each year to juniors and seniors chosen for this prestigious honor. Totaling approximately one percent of the student body, recipients are selected on the criteria of outstanding scholarship, leadership, citizenship, and potential by a committee representing students, faculty, and staff.

STUDENT PUBLICATIONS

The Collegian (University Newspaper)

Founded in 1926, The Collegian is the official student newspaper of Cameron University. The Collegian is written, designed, edited, and produced by student editors for the students, faculty, staff, and administration of the university. The Collegian serves both as a voice for the students of the university, and as a training ground for student journalists to hone the skills they develop in their courses. The Collegian, programming from CUTV, and several wikis and blogs are presented through AggieCentral, Cameron’s convergent journalism website. The Collegian is a member of the Oklahoma Collegiate Press Association, Columbia Scholastic Press Association, the Society of Professional Journalists and the Oklahoma Interscholastic Press Association.

The Gold Mine

The Gold Mine began in 2009 as a student produced journal. From the submissions, editing, layout and print—the entirety of the journal is a creation of volunteer Cameron University students. The journal features nonfiction and fiction stories, poetry, and art work from current CU students. The journal is available in print and online.

KCCU Radio

KCCU FM is the public radio voice of Cameron University, featuring programming from National Public Radio (NPR) and other public radio sources. KCCU is a nationally recognized, award-winning public radio station that serves numerous communities from its studios on the Cameron campus. KCCU is also a leader in the broadcast industry in innovative uses of radio technology, including HD Radio, FM stations, along with website streaming, provide public radio service to a large section of Western, Southwestern, and South-central Oklahoma, and parts of North Texas. The station features NPR news; Texas/Oklahoma news; classical music; jazz; and other specialty programming. KCCU is operated by a professional staff with the assistance of Cameron University students enrolled in communication courses and other majors. KCCU hires part-time student production assistants and news reporters to give them professional experience in the broadcast industry, and utilizes student interns each semester who enroll in communication courses. KCCU is also an outreach for Cameron University, building upon the university's community service efforts. KCCU is a non-commercial public radio network that relies upon financial support from individual members, local businesses, and area foundations.

CUTV

CUTV is a closed circuit television channel broadcasting to monitors located across campus on Channel 11. CUTV features a bulletin board of daily activities and events of interest to students, faculty, and staff members. The Department of Communication, English and Foreign Languages produces a weekly news program featuring campus events. Communication students also produce a weekly student government report, a news brief, and a feature program focusing on major campus events and campus leaders.
STUDENT HANDBOOK AND CONDUCT

The Student Handbook is an official publication that explains university policies and procedures and provides that information for all aspects of university life. Students are responsible for knowing its contents. For questions regarding the Student Handbook, please contact the Office of Student Services, North Shepler 324, (580) 581-2244.

Rules and regulations for the conduct of students attending Cameron University are listed in the Student Handbook. A primary purpose of these regulations is to help maintain a safe learning environment for members of the academic community. Student violations of these rules and regulations are reviewed by administrative officers having disciplinary responsibilities. The decisions made by these officers are subject to an appeal, either administratively or by proper referral to an appropriate judicial committee. When a student is suspended or dismissed for disciplinary reasons, the grades recorded for the student for that semester shall be determined in the same way as if the student had withdrawn voluntarily, and any refund of fees shall be determined by the regular refund policy.

ACCESS TO STUDENT RECORDS

Student records are filed in a variety of offices. The administrative officers are responsible for the records under their control and for the appropriate release of information contained in these records. Cameron University forwards educational records on request to other educational institutions in which a student seeks or intends to enroll without providing any further notice to the individual regarding the transfer of records.

Release of Student Information. Student records are confidential in the sense that the information contained in these records is given voluntarily by the student for the private use of the institution for educational purposes only. The information contained in student records is of two different types: Directory Information and Personally Identifiable Information.

Directory Information. This information may be freely released by university officials without the consent of the student. Upon written request by the student, this information will be treated as confidential and released only with the student's written consent. Forms for withholding student "directory information" are available in the Registrar's Office. This information consists of:

- Full name
- Mailing address
- Telephone number
- Enrollment status
- Academic classification
- Degrees and awards received
- Dates of attendance
- Date of graduation
- Athletic program information
- Previous institution most recently attended
- Participation in officially recognized organizations, activities

- Other similar information as permitted in the Family Education Rights and Privacy Act (FERPA) (Pub. L. 93-568, Sec. 99.3).

Personally Identifiable Information. All other information contained in student records and not listed as directory information falls into the second, or restricted category. This type of restricted information is found mainly in

1. the academic record maintained by the Registrar’s Office and controlled by the Registrar;
2. the student conduct record kept in the Office of Student Development; and
3. the records of the various other university offices of Financial Assistance, Student Development, Public Safety, and Student Housing, supervised by their respective directors.

To protect the rights of the student or graduate, it shall be the policy of the university to release this restricted information to other persons or agencies, only as provided by FERPA. However, a student may choose to release information to a third party by completing a FERPA waiver. Forms and information are available in the Office of Student Services, North Shepler 324, (580) 581-2244.

Emergency situations may develop which could necessitate release of restricted information without the approval of the student or proper legal action. In these emergency situations, where the immediate welfare of the student or the university may be in jeopardy, the administrative official in charge of the office maintaining the requested information will make the decision regarding release of the information. In cases where the responsible administrator is not available to make the decision, or if they decide not to release the information, an appeal to secure the information may be made to the university president.

CAMPUS DINING

Food service is provided at two locations, the McMahon Centennial Complex, which features a food court, and the Shepler Cafeteria. The McMahon Centennial Complex offers such items as pizza, deli subs and sandwiches, hot grill items, “grab and go” items, coffee, smoothies, and other drinks. Items may be purchased using cash, credit, or an AggieOne card. The Shepler Cafeteria, located between the two Shepler towers, is open to all students, staff, and faculty. This cafeteria operates on an “all you can eat” basis. Commuter meal plans are also available.

BOOKSTORE/POST OFFICE

The Cameron University Bookstore is conveniently located in the McMahon Centennial Complex. Here students will find their required course materials as well as a selection of recommended study aids, basic school supplies, educationally priced software, and electronic

2019-2021 UNDERGRADUATE CATALOG
equipment.

In addition to textbooks, the Bookstore carries a wide selection of clothing and gifts that students can purchase to show their school spirit. The Bookstore also stocks a selection of trade books. Students will find a selection of candy/snacks and cold drinks for purchase as well.

Graduation regalia, class rings, diploma frames, and announcements are also available through the Cameron Bookstore. Special orders can also be placed at no additional charge. Students can shop the bookstore online as well.

The Post Office is located in the McMahon Centennial Complex inside the Bookstore. Patrons can purchase postage here as well as money orders and post outgoing mail and packages.

CASHIERS

Cashiers for Cameron University are located at the One-Stop located in the McMahon Centennial Complex. Cashiers are responsible for releasing to students all financial assistance checks, such as loans, grants, scholarships, and work study. For faculty, staff, and students, this convenient location also accepts payments for charges incurred at the University and issues parking permits and ID cards. Cash, personal checks, and credit card payments using MasterCard, Visa, and Discover are accepted.

STUDENT WELLNESS CENTER

Cameron’s Student Wellness Center, located on the first floor of North Shepler Tower offers medical care to students for acute conditions, mental health counseling, monthly education programs, and interactive workshops. The Student Wellness Center is open Monday through Friday; daily hours vary. Medical services are provided on a walk-in basis. Counseling services are provided by appointment.

Most students who are actively enrolled on the main campus are eligible for medical services. All students who are enrolled in at least one course on the Lawton or Duncan campuses are eligible for counseling services.

HEALTH INSURANCE

The university recommends that all students acquire some form of health insurance to meet unexpected medical needs.

Please note that all international students attending Cameron are required to enroll in the Student Health Insurance Plan through Academic Health Plans. For information about this requirement or to request a waiver, please contact the International Admissions Office at (580) 581-2838 or international@cameron.edu.

CAMERON UNIVERSITY ALUMNI ASSOCIATION

The purpose of the Alumni Association is to cooperate with and assist in the promotion of the goals and purposes of Cameron University; to encourage a continuing and increasing interest in the university among graduates, former students, and friends; and to foster acquaintance and good fellowship through information, education, and service. Membership is open to anyone interested in supporting the association. Projects include reunions, alumni, and faculty awards. A benefit golf tournament and a membership drive support scholarships and various other campus activities. Further information may be obtained by contacting the CU Alumni Association, Office of Alumni Relations: (580) 581-2988; or alumni@cameron.edu.
GENERAL EDUCATION PURPOSE AND OUTCOMES

BACCALAUREATE, ASSOCIATE IN ARTS, AND ASSOCIATE IN SCIENCE PROGRAMS

In accordance with its mission, Cameron University's baccalaureate, AA, and AS programs are designed to prepare students for professional success, responsible citizenship, life-long learning, and meaningful contributions to a rapidly changing world. A university degree should go beyond preparing graduates for a profession; it should transform their lives and their communities.

The General Education program at Cameron University is a selection of courses designed to provide students with the common knowledge, intellectual concepts, breadth of skills, and attitudes that every college graduate with a baccalaureate, Associate in Arts, or Associate in Science degree should possess. By the time students complete the general education program for baccalaureate, AA and AS programs, they should be able to:

- Access information from credible sources and use it effectively and responsibly;
- Effectively communicate in written forms;
- Effectively communicate in oral forms;
- Apply critical thinking skills to make informed decisions and evaluations;
- Demonstrate an understanding of ethical conduct in a defined context;
- Demonstrate knowledge of similarities and differences among cultures;
- Make informed and reasoned responses to questions of aesthetics;
- Apply knowledge and logic to solve problems;
- Identify knowledge and skills needed to maintain a healthy lifestyle.

General education courses help students develop the skills essential for Information Literacy, Communication, Critical Thinking, Ethics, Diversity, Aesthetics, Problem Solving, and Wellness.

GENERAL EDUCATION REQUIREMENTS

BACCALAUREATE, ASSOCIATE IN ARTS, AND ASSOCIATE IN SCIENCE DEGREES

(44-46 HOURS)

COMMUNICATION........................................................................9 hours
ENGL 1113 and ENGL 1213
COMM 1113

MATHEMATICS......................................................................3-5 hours
MATH 1413, MATH 1513, MATH 1613, MATH 2215,
MATH 2713, or STAT 1513

SCIENCE.................................................................................8-9 hours
One course must be taken from each of the following two categories, one course must be a laboratory science:
- Biological Science (4 hours): BIOL 1004, BIOL 1114, BIOL
  1214, BIOL 1364, or ENSC 2004
- Physical Science (4-5 hours): ASTR 1104, CHEM 1004,
  CHEM 1105, CHEM 1364/1361, ESCI 1135, GEOG
  1014, GEOL 1014, PHYS 1004, PHYS 1115, or PSCI
  1054

Designated laboratory science course.

AMERICAN HISTORY.............................................................3 hours
HIST 1483 OR HIST 1493

POLITICAL SCIENCE.............................................................3 hours
PS 1113

HUMANITIES...........................................................................6 hours
One course must be taken from each of the following two categories with no more than one course taken from the discipline in which the student is majoring:
- Diversity (3 hours): ARBC 1113, ARBC 1223, CHNS 1113,
  CHNS 1223, ENGL 2313H, ENGL 2323H, ENGL 2343H,
  FNAR 1013H, FREN 1113, FREN 1223, GEOG 2243,
  GERM 1113, GERM 1223, HIST 1113, HIST 1123, HIST
  2113, HIST 2223, HON 2113, HON 2123, ITAL 1113,
  ITAL 1223, LATN 1113, LATN 1223, MUSC 1033H, PHIL
  1113, RUSN 1223, SOCI 3013, SPAN 1113, or SPAN
  1223
- Aesthetics (3 hours): ART 1013, ART 2613, ART 2623,
  ENGL 2013, ENGL 2053, ENGL 2313H, ENGL 2323H,
  ENGL 2343H, FNAR 1013H, MUSC 1013, MUSC 1023,
  MUSC 1033H, MUSC 1413, or THTR 1103

Courses listed in both categories may only be used to fulfill
one category.

BEHAVIORAL SCIENCE.......................................................3 hours
FAMS 1123, HON 2133, PSY 1113, or SOCI 1113

ECONOMICS..........................................................................3 hours
AGRC 2013, ECON 2003, ECON 2013, or GEOG 3023

HEALTH AND WELLNESS*.................................................4 hours
SES 2003, SES 2013, SES 2023, any course with the
following form: PE 1--1, PE 2--1, PE 2--2
*Requirement waived for students who are awarded credit
based on one year of active full-time military service,
completion of basic training, or successful completion of the
ROTC program.

GENERAL EDUCATION NON-PE ELECTIVES (TO
TOTAL AT LEAST 44 HOURS)**

**Gen Ed electives must be selected from the above list of
approved courses, exclusive of courses with the PE prefix.
GENERAL EDUCATION PURPOSE AND OUTCOMES

ASSOCIATE IN APPLIED SCIENCE PROGRAMS

By the time students complete the general education program for Associate in Applied Science programs, they should be able to:

- Access information from credible sources and use it effectively and responsibly;
- Effectively communicate in written forms;
- Effectively communicate in oral forms;
- Apply critical thinking skills to make informed decisions and evaluations;
- Demonstrate an understanding of ethical conduct in a defined context.

General education courses for AAS programs help students develop the skills essential for Information Literacy, Communication, Critical Thinking, and Ethics.

ASSOCIATE IN APPLIED SCIENCE DEGREE (18 HOURS)

Eighteen (18) hours of general education are required of each person who receives an Associate in Applied Science Degree from Cameron University.

UNIVERSITY REQUIREMENTS

UNIVERSITY SUCCESS

To better acquaint students with the educational and social environment of Cameron University, provide the skills necessary for transition to university life, and prepare students for college success, all entering freshman students will be required to successfully complete one of two university success courses. All entering students, including transfer students, with fewer than 24 earned collegiate hours, without performance or curricular deficiencies will be required to enroll in UNIV 1001, Introduction to University Life. All entering students and transfer students with fewer than 24 earned collegiate hours and developmental course needs will be required to take UNIV 1113, Study Strategies for College Success.

COMPUTER LITERACY

All undergraduate degree programs require students to achieve a minimum level of computer literacy. The means by which students acquire or demonstrate such literacy varies among programs, but acceptable means include:

1. successfully completing a high school computer science course that meets the Oklahoma State Regents for Higher Education high school curricular requirements, or

2. satisfactorily completing a computer literacy assessment, or

3. successfully completing courses designated as program requirements.

Courses such as CIS 1013 Introduction to Computer Information Systems, and MIS 2113 Microcomputer Applications typically satisfy computer literacy requirements. However, some programs require specific courses to fulfill the computer literacy requirement. Please see the program requirements for each major for details.

CAPSTONE EXPERIENCE

The baccalaureate undergraduate capstone experience is designed to bring reflection and focus to the whole of the university experience. It should encourage students to integrate and synthesize aspects of their chosen field of study with important concepts from related disciplines and provide resources for careers, professional programs, and graduate school programs. Assessment measures such as standardized tests or required key assignments may be required as part of the capstone experience.

Each department or program has designed the capstone experience for its majors to assist them in developing a broader understanding of the significance of the major within the framework of their overall undergraduate experience. This culminating experience should focus on some feature of the student's chosen field of study and should require the disciplined use of skills, methodology, and knowledge taught throughout the undergraduate curriculum.

Examples of possible capstone experiences include, but are not limited to, the following:

- A comprehensive examination.
- A senior seminar that requires a major project.
- An undergraduate thesis.
- A semester project that culminates in a paper, essay, presentation, or similar product.
- An internship to investigate a problem in the workplace, and a paper that asks students to analyze and evaluate the experience.
- A performance, show, or recital appropriate to the discipline, together with relevant supporting assignments.

Using one or more of the above components also allows departments to assess the effectiveness of their major programs and evaluate the learning of each student. All baccalaureate degree students must complete at least one credit hour in a capstone experience in his or her declared major. Please see the program requirements for each major for details.

MISSION STATEMENT

The Office of Teaching and Learning fosters student success in and beyond the first year of college by providing quality academic advising and discipline-specific tutoring, targeted university success coursework, and other academic support resources to assist both students and faculty.

PROGRAMS OF STUDY

Degrees & Majors: A.S. Interdisciplinary Studies
B.S. Interdisciplinary Studies

GENERAL INFORMATION

The Office of Teaching and Learning is comprised of the Academic Advising Center, Center for Academic Success, Center for Writers, Library, Mathematics Laboratory, Student Support Services, and the Testing Center.

UNIVERSITY INTERDISCIPLINARY DEGREES

PROGRAM ADMISSION

Prospective students are required to submit an application consisting of a title page, a list of all courses/credits previously earned that the student proposes to be applied to the Interdisciplinary Studies degree, and a two-page rationale (essay). The rationale (essay) should contain a clear statement of the student’s educational objectives, an explanation of how the selected concentrations are interdisciplinary in nature, what the student expects to be able to do as a result of their studies, and a statement explaining why the proposed program is worthy of a college degree.

PROCEDURES

1. Contact the Interdisciplinary Studies Advisor in the Academic Advising Center to make an appointment and create a plan of study. Plans must be approved by the academic department for each area of concentration and AVPAA.

2. Changes in the plan of study must be approved by the advisor and AVPAA.

3. Candidates for graduation must submit a copy of the approved plan of study to the Registrar two semesters prior to planned graduation date to check for compliance with graduation requirements.
Program Admission Requirements

Prospective students are required to submit an application consisting of a title page, a list of all courses/credits previously earned that the student proposes to be applied to the Interdisciplinary Studies degree, and a two-page rationale (essay). The rationale (essay) should contain a clear statement of the student’s educational objectives, an explanation of how the selected concentrations are interdisciplinary in nature, what the student expects to be able to do as a result of their studies, and a statement explaining why the proposed program is worthy of a college degree. A student may apply for admission to the program during or after the semester in which 12 hours of credit, including transfer and advanced standing, are completed.

### Program Admission Requirements

Prospective students are required to submit an application consisting of a title page, a list of all courses/credits previously earned that the student proposes to be applied to the Interdisciplinary Studies degree, and a two-page rationale (essay). The rationale (essay) should contain a clear statement of the student’s educational objectives, an explanation of how the selected concentrations are interdisciplinary in nature, what the student expects to be able to do as a result of their studies, and a statement explaining why the proposed program is worthy of a college degree. A student may apply for admission to the program during or after the semester in which 24 hours of credit, including transfer and advanced standing, are completed.

HONORS PROGRAM

GENERAL INFORMATION
The Cameron University Honors Program offers students the opportunity to graduate with honors. Based on specified admissions requirements and a formal application process, attainment of this academic distinction is open to Cameron University students seeking enriching, high impact, innovative, and experiential learning opportunities.

PROCEDURES
1. Contact the Office of Teaching and Learning to learn about the admissions requirements and the formal application process.
2. Each person admitted to the Cameron University Honors Program will receive additional advising support to ensure successful honors program graduation.

REQUIREMENTS
A student may apply to join the Cameron University Honors Program at any time during the semester. A minimum of 24 semester hours must be completed after admission to the honors program. Students must take the honors program core requirements and a certain number of electives.

I. HONORS CORE REQUIREMENTS (12 hours)
   HON 1001 Introduction to Honors Studies*
   HON 1102 Foundations of Leadership
   HON 2113 Honors Colloquium: Great Works I**
   HON 2123 Honors Colloquium: Great Works II**
   HON 3003 Honors Seminar 3 hours

II. HONORS ELECTIVE REQUIREMENTS (12 hours)

   Choices include:
   A. Elective courses approved by the Honors Council
   B. Experiential Learning Courses (max 3 hours):
      HON 4001-3 Research/Scholarly Activity
      UNIV 4593 Study Abroad
   C. Oklahoma Scholar-Leadership Enrichment Program (OSLEP) Course (max 3 hours):
      UNIV 3213 OSLEP

III. HONORS COMPONENT IN CAPSTONE AND HONORS SENIOR PROJECT (0 hours)
   HON 4300
   *Honors students will take HON 1001 in place of UNIV 1001.
   **Satisfies General Education, Humanities-Diversity requirement.
   
COURSE DESCRIPTIONS

HONORS (HON)

1001 INTRODUCTION TO HONORS STUDIES 1 credit hour
This course is designed to familiarize students with the educational and social environment of Cameron University, acquaint them with the expectation, standards, and opportunities associated with the Honors Program, and provide basic skill sets in the areas of decision making, time management, ethics in research, and other related academic activities in the honors program. Lecture 1 hour. Prerequisite: Permission of the Honors Director.

1102 FOUNDATIONS OF LEADERSHIP 2 credit hours
This course is designed to familiarize students with the theoretical and practical underpinnings of transformative leadership within the public and private sectors. This course provides the knowledge, skills, and foundation in leadership necessary to be an effective leader in a variety of settings. Lecture 2 hours. Prerequisite: Permission of the Honors Director.

2113 HONORS COLLOQUIUM: GREAT WORKS I 3 credit hours
This course is designed as a multi-disciplinary, team-taught colloquium and examines the great historical, cultural, scientific and mathematical achievements and discoveries of selected cultures before 1500. Seminar 3 hours. General Education, Humanities-Diversity.

2123 HONORS COLLOQUIUM: GREAT WORKS II 3 credit hours
This course is designed as a multi-disciplinary, team-taught colloquium and examines the great historical, cultural, scientific and mathematical achievements and discoveries of selected cultures since 1500. Seminar 3 hours. General Education, Humanities-Diversity.

2133 THE SCIENCE OF HUMAN NATURE 3 credit hours
This honors course is designed as a study of the basic facts and principles of human behavior. It examines various issues of interest to a wide variety of students from multiple perspectives, including psychology, anthropology, sociology, criminology, and biology. This course will introduce you to scientific concepts and critical thinking skills that are used in multiple disciplines. Each topic area will include a discussion of major theoretical perspectives, current research, and real-world applications related to that area. Lecture 3 hours. General Education, Behavioral Science. Prerequisite: Departmental permission required.

3003 HONORS SEMINAR 3 credit hours
This course is designed as an intensive, interdisciplinary, team-taught seminar that focuses on how the contributions from several disciplines illustrate the study of the selected topic; intensive study will focus on historical, cultural, and scientific aspects of the topic. Seminar 3 hours.

3113 INTERNATIONAL MANAGEMENT 3 credit hours
This honors course is designed to cover relevant aspects of management in an international context. Specifically,
students will learn about international business environments (political, economic, legal, technological, cultural) and international operations of multinational corporations. In addition, they will analyze strategic and operational issues that arise from the global nature of multinational corporations' activities. Topics covered will include but not be limited to strategic alliances, their implementation and management, international HRM, etc. Lecture 3 hours. Prerequisite: Departmental permission required.

3123 HISTORY AND PHILOSOPHY OF SCIENCE 3 credit hours This honors course is designed to be an intensive survey of the history of science from antiquity to modern times, with an emphasis on major milestones in the fields of physics, astronomy, chemistry, biology, geology, and medicine. Students will consider the influence of philosophy, culture, and discovery on the development of science. Specific topics and readings will vary by semester and instructor. Lecture 3 hours. Prerequisite: Departmental permission required.

4001-3 RESEARCH/SCHOLARLY ACTIVITY 1-3 credit hours This honors course is designed to allow honors students to engage in research and scholarly activities in their discipline by working with a faculty mentor on a research or scholarly activity project. Independent study/directed readings/field experience, 1-3 hours. Prerequisite: Permission from the Director of Academic Enrichment.

4300 HONORS SENIOR PROJECT 0 credit hours Honors students will complete their senior project under the direction of their major degree program. A faculty member from the student’s major typically serves as project advisor. The major capstone experience and honors senior project should be completed concurrently, during the student’s senior year. A signed contract between the student and a faculty member from the student's major, complete with requirements for the senior project, should be completed prior to enrollment. Capstone 0 hours. Prerequisites: Permission of Honors Program Director or Departmental Permission.

UNIVERSITY (UNIV)

1000 ORIENTATION 0 credit hours Designed to provide survival-level information to the new student. An overview of the physical facilities and organizations of the University, policy, procedures, student services, and the library are presented. Lecture 2 hours.

1001 INTRODUCTION TO UNIVERSITY LIFE. 1 credit hour. A course designed to acquaint the student with the educational and social environment of Cameron University and to provide the skills necessary for transition to university life. Recognition and development of interests and aptitudes; clarification of academic/career goals; and development of a student's academic plan are covered. Resources, decision making, and time management are also stressed. Restricted to those students required to take the course. Lecture 1 hour.

1011 CAREER DEVELOPMENT 1 credit hour Designed to encourage and assist students in the exploration of their interests, values, skills, personal assets, and life goals as they relate to general economic conditions and employment trends. Lecture 1 hour.

1113 STUDY STRATEGIES FOR COLLEGE SUCCESS. 3 credit hours. This course is designed to prepare students for success in college with emphasis on study strategies as applied in various content areas, academic reading/thinking strategies, and an evaluation of individual strengths and weaknesses as a student. Restricted to those students required to take the course. Lecture 3 hours.

2211-5 SPECIAL STUDIES 1-5 credit hours A study of special lower-division areas or problems. Individual course offerings will vary from department to department. Independent study/directed readings 1-5 hours.

2543 IDS AS CAPSTONE EXPERIENCE 3 credit hours This course provides students with an opportunity to integrate concepts and theories learned through studies in their designated concentrations. Students will select a faculty advisor from each of the student's designated areas of concentration (approved by the chairs of each impacted department), and will work with the advisors to design and implement capstone projects related to the concentrations, culminating in written reports, oral presentations and a degree achievement portfolio. Emphasis is on critical thinking and analysis, and decision making in an interdisciplinary environment. This course normally must be taken in the student's final enrollment period. Independent study/directed readings 3 hours. (Spring)

3001 JOB SEEKER SKILLS 1 credit hour Designed for students in their junior or senior year of the traditional four year degree program or the final semester of an associate degree program. Students explore career opportunities beyond graduation and develop a personal job search strategy. Correspondence, resume development, and interview techniques constitute a major portion of the course content. Lecture 1 hour. Prerequisite: Junior standing.

3211-3 OSLEP 1-3 credit hours OSLEP classes are an intensive study of creative, innovative, and contemporary problems or issues focusing on the theoretical and practical understanding of phenomena across the humanities, social sciences, and sciences. Designed as seminars that focus on different topics, OSLEP classes emphasize advanced reading and writing assignments. Readings and design of assignments are determined by the faculty resource person. The faculty resource person directs student preparation, evaluates student performance (oral and written), and assigns grades. Prerequisite: Permission of CU OSLEP Coordinator.

4211-5 SPECIAL STUDIES 1-5 credit hours An intensive study of special upper division areas or problems.
Individual course offerings will vary by department. 

**Independent study/directed readings 1-5 hours.**

**4543 IDS BS CAPSTONE EXPERIENCE 3 credit hours** This course provides students with an opportunity to integrate concepts and theories learned through studies in their designated concentrations. Students will select a faculty advisor from each of the student’s designated areas of concentration (approved by the chairs of each impacted department), and will work with the advisors to design and implement capstone projects related to the concentrations, culminating in written reports, oral presentations and a degree achievement portfolio. Emphasis is on critical thinking and analysis, and decision making in an interdisciplinary environment. This course normally must be taken in the student’s final enrollment period. Independent study/directed readings 3 hours. (Spring)

**4593 STUDY ABROAD 3 credit hours** This course is designed to allow students to learn about different countries across the world in terms of their culture, history, politics, and other country-specific characteristics and also experience these countries during study abroad opportunities. Lecture/field experience 3 hours. 
Prerequisite: Departmental Permission.

MISSION STATEMENT

The mission of the School of Graduate and Professional Studies is to provide a diverse and dynamic student body the opportunity to acquire a wide range of knowledge and skills so they can contribute to their profession and enrich their lives.

GENERAL INFORMATION

The School provides undergraduate coursework in the fields of Business, Computing and Technology, Education, Organizational Leadership, Psychology, Social Sciences, and Sports and Exercise Science. These primary areas of study encompass several specialties. In addition to supporting general education preparation and undergraduate degrees, the School provides graduate degrees in Business, Education, and Behavioral Sciences. Several disciplines blend academics with field based and practical experiences as a regular part of the educational process.

Excellence in teaching and learning is highly prized and is viewed as the most significant role of the School and University. Faculty, students, and administration work interactively with communities by providing economic research support, cultural opportunities, and educational outreach experiences.

B. Lonzanida

MISSION STATEMENT
The Cameron University Department of Business exists to educate and prepare the diverse students it serves to become skilled professionals who add value to their organizations, their professions, and their communities. The Department strives to expand understanding of the effective and efficient operation of organizations and their dynamic environments. The Department creates a student-centered approach to lifelong learning as well as innovative and experiential business-based learning opportunities.

PROGRAMS OF STUDY
Degrees & Majors:  
A.S. Business
B.Acc. Accounting  
B.B.A. Business Administration
  • Finance
  • General Business Administration
  • Management
  • Marketing
B.S. Organizational Leadership
M.B.A. Business Administration
M.S. Organizational Leadership

GENERAL INFORMATION
The Cameron University Department of Business is a department of the School of Graduate and Professional Studies and is accredited by ACBSP, a specialized accreditation association for business education which embraces teaching excellence.

The Department of Business offers education and experiences in a variety of business disciplines at the Associate, Bachelor and Master level. Programs are continually updated to ensure students are receiving cutting edge business knowledge to prepare them for successful careers in the business and entrepreneurial arenas.

STUDENT ORGANIZATIONS

Accounting Club
The purpose of the accounting and Business Club is to encourage growth and academic excellence, as well as bring a closer relationship among those who are business and accounting majors. We sponsor field trips to various Accounting and Business offices; we closely work with the Oklahoma Society of CPAs and the Oklahoma Accountancy Board; we are actively involved in volunteer efforts, university projects, and various community services.

Cameron University Chapter of the Society for Human Resource Management (CU SHRM)
CU SHRM provides Cameron University students with opportunity to gain knowledge and insight into the effective management of human capital in the field of Human Resource Management through affiliation with Great Plains SHRM (the local SHRM professional chapter) and the SHRM National organization.

Delta Mu Delta
Delta Mu Delta is a national honor society which recognizes students who have excelled in the field of business administration. Membership in Delta Mu Delta is available to juniors, seniors and graduate students only.

Delta Sigma Pi
Delta Sigma Pi is a professional fraternity organized to foster the study of business in universities; to encourage scholarship, social activity and the association of students for their mutual advancement by research and practice; to promote closer affiliation between the commercial world and students of commerce, and to further a higher standard of commercial ethics and culture and the civic and commercial welfare of the community.

COURSE DESCRIPTIONS

ACCOUNTING (ACCT)

2013* PRINCIPLES OF FINANCIAL ACCOUNTING 3 credit hours Basic principles of financial accounting, including how to record transactions, prepare financial statements, analyze selected accounts and use accounting information in decision-making. Lecture 3 hours. Prerequisite: sophomore standing or advisor consent. (Fall, Spring)

2023* PRINCIPLES OF COST/MANAGERIAL ACCOUNTING 3 credit hours Basic principles of cost accounting related to manufacturing and other enterprises. Use of management and cost accounting information in decision-making. Lecture 3 hours. Prerequisite: ACCT 2013. (Fall, Spring)

3013 INTERMEDIATE ACCOUNTING I 3 credit hours A review of the fundamental processes of accounting with an emphasis on the basic accounting process, procedures and working papers, statements, cash receivables, liabilities, and inventory pricing and planning. Lecture 3 hours. Prerequisite: ACCT 2023.

3023 INTERMEDIATE ACCOUNTING II 3 credit hours Continuation of Intermediate 3013, with emphasis on corporation capital stock, retained earnings, dividends, income taxes, and analysis and interpretation of accounting data. Lecture 3 hours. Prerequisite: ACCT 3013.

3113 FRAUD EXAMINATION 3 credit hours A study of occupational fraud including the pressures that compel potential fraudsters to commit fraud, how fraudsters rationalize their fraudulent acts, and how they find access to business assets. In addition, students will gain in-depth understanding of internal controls necessary to prevent fraud and deter fraudsters. Lecture 3 hours. Prerequisite: ACCT 3023.

3133 COST ACCOUNTING 3 credit hours Cost accounting systems that assist management in planning, decision-making and control. Cost-volume-profit analysis, cost behavior, standard job order and process costing, and inventory control using just-in-Time analysis. Lecture 3 hours. Prerequisite: ACCT 3023.

3313 GOVERNMENTAL ACCOUNTING 3 credit hours Accounting for governmental and non-profit entities. Analysis of budget systems, the use of funds, internal and external reporting requirements, and governmental accounting terminology. Lecture 3 hours. Prerequisite: ACCT 3023.

4013 INDIVIDUAL INCOME TAX 3 credit hours Federal income taxation of individuals; current tax laws and tax return preparation. Lecture 3 hours. Prerequisite: ACCT 3013.

4023 CORPORATE INCOME TAX 3 credit hours Federal taxation of partnerships and corporations; gift and estate taxes. Lecture 3 hours. Prerequisite: ACCT 4013.

4113 ADVANCED ACCOUNTING 3 credit hours Accounting for business combinations, multinational operations, partnerships and insolvent organizations; interim and segmental reporting. Lecture 3 hours. Prerequisite: ACCT 3023.

4213 AUDITING 3 credit hours The theory of and practices used in external audits. Coverage includes: audit planning, generally accepted auditing standards, collection and evaluation of audit evidence, understanding and testing of internal controls, risk assessment, transaction cycles, working papers, audit reports, professional responsibilities, and audit sampling. Lecture 3 hours. Prerequisite: ACCT 3023 and ACCT 4513.

4471-3 SEMINAR IN ACCOUNTING 1-3 credit hours Seminar presentation and special studies in topics of current interest to the accounting professional. Seminar 1-3 hours. Prerequisite: Permission of the Chair.

4483 ACCOUNTING INTERNSHIP 3 credit hours Supervised work experience in an organization. The internship will allow students to encounter practical workplace problems in accounting and gain experience in working in a professional setting. A minimum of 150 hours of on-the-job training is required to complete the course. Internship 3 hours. Prerequisites: 12 credit hours in accounting courses and Junior standing.

4513 ACCOUNTING INFORMATION SYSTEMS. 3 credit hours Structure, flow and use of accounting data and its relationship with other systems in a firm; systems design, analysis and security issues. Practical experience with a commercial accounting software package. Lecture 3 hours. Prerequisite: ACCT 3013 and MIS 3013.

BUSINESS (BUS)

1113* INTRODUCTION TO BUSINESS 3 credit hours A general survey of the more significant principles, problems, and practices involved in the administration of business enterprises. Students learn about the functional areas of business enterprises (Accounting, Economics, Finance, Management, and Marketing). Intended for Freshman or Sophomore students. Lecture 3 hours. (Fall, Spring)

2113* BUSINESS COMMUNICATIONS 3 credit hours Principles of effective business communication; organizational communication theory; document design; practice in preparing letters, memoranda, business reports, and employment-related messages; professional oral presentations. Lecture 3 hours. Prerequisite: ENGL 1213 or equivalent. (Fall, Spring)

2211-3 SPECIAL STUDIES 1-3 credit hours A study of special Business areas or problems. Areas of study will vary from semester to semester and from one discipline area of Business to another. The course may be repeated for additional credit with permission of Chair. Lecture 1-3 hours. Prerequisite: As listed for each separate offering and/or permission of the Chair.

2903* MANAGEMENT SKILLS 3 credit hours This course covers fundamental management processes in organizations as well as career planning and professionalism. Capstone/lecture 3 hours. Prerequisites: BUS 1113 and BUS 2113. (Spring)
3213 BUSINESS LAW I 3 credit hours An overview of the legal system, principles of contract law, Uniform Commercial Code and how it has changed contract law, rights of debtors and creditors, and bankruptcy. Lecture 3 hours. Prerequisite: Junior standing or permission of the Chair. (Fall, Spring)

3223 BUSINESS LAW II 3 credit hours A continuation of Business Law I. Agency, partnership, and corporate law with an emphasis on selecting the form of business organization. Sections on personal and real property, bailments, and real estate transactions. A brief look at wills, estates, and trusts. Lecture 3 hours. Prerequisite: BUS 3213.

3881-4 WORKSHOP 3 credit hours A course designed to emphasize specific Business and/or Economic topics. Combines the use of lectures and practical application exercises. May be repeated for a maximum of 6 credit hours. Lecture 1-4 hours. Prerequisites: Junior standing and permission of the Chair; permission of the Chair if taken for no credit.

4471-3 SEMINAR IN BUSINESS 1-3 credit hours Group projects designed to meet special needs of students in any of the disciplines of the Business Department. Seminar 1-3 hours. Prerequisite: Permission of the Chair.

4481-3 BUSINESS INTERNSHIP 1-3 credit hours Supervised work experience in a professional setting directly relating to the student's business discipline. The internship will allow students to encounter practical workplace situations within their major field and gain experience in corporate and other business settings. Student may earn up to 6 internship credit hours; however, a maximum of 3 credit hours can be earned at one business. Fifty hours of on-the-job training/work is required per credit hour for a maximum of 3 credit hours per semester. Internship 1-3 hours. Prerequisite: 30 credit hours in business courses and Junior standing.

4491-3 INDEPENDENT STUDY IN BUSINESS 1-3 credit hours Independent readings and/or study of specific problems or special subjects, based on pre-approved outlines of plans, with conferences and/or written reports. Independent study/directed readings 1-3 hours. Prerequisites: 9 upper division hours in the discipline of the independent study and permission of the Chair. A proposal must accompany the request when submitted for approval.

4632 BUSINESS CAPSTONE: PROFESSIONALISM & CAREERS 2 credit hours This course is the career and professionalism portion of the capstone for the Bachelors' degrees in Business. The students apply knowledge from their degree programs to career planning and professional skills development. Capstone/lecture 2 hours. Prerequisites: FIN 3603, MGMT 3013, MKTG 3413, graduating senior status, or permission of Chair. Corequisite: BUS 4633. (Fall, Spring)

4633 BUSINESS POLICY 3 credit hours A capstone course designed to integrate course work in various functional areas of business. The focus of the course is understanding business strategy and competitive environment. Emphasis is on critical thinking and analysis, and decision making for business. Group projects, cases, business plan exercises and/or business simulations are used to give students an opportunity to draw upon and integrate functional knowledge and skills. Both written and oral communications are stressed throughout the course. Lecture 3 hours. Prerequisites: FIN 3603, MGMT 3013, MKTG 3413, and graduating senior status, or permission of Chair. Corequisite: BUS 4632. (Fall, Spring)

ECONOMICS (ECON)

2003* ECONOMIC FOUNDATIONS OF FINANCE 3 credit hours A first course in the economic underpinnings of personal finance, incorporating the basic analytical frameworks used by economists and financial planners. The central topics typically include supply and demand, unemployment, inflation, interest rates, time value of money, taxation and tax strategy, savings and investments, debt instruments, insurance, and financial institutions. Recommended for non-Business majors. Lecture 3 hours. General Education, Economics.

2013* PRINCIPLES OF MACROECONOMICS 3 credit hours An introduction to, and analysis of, the basic principles of supply and demand, national income accounting, business cycle, inflation, unemployment, determinants of the level of output, employment, prices, money and banking, monetary and fiscal policies, economic growth, international trade, and finance. Lecture 3 hours. General Education, Economics.

2023* PRINCIPLES OF MICROECONOMICS 3 credit hours Basic principles of supply and demand, elasticity, production and costs, market structure, output and price determination, factor market, welfare effects of government regulations, and theory and policy related to international trade. Lecture 3 hours. Prerequisite: ECON 2013. (Fall, Spring)

3013* INTERMEDIATE MICROECONOMIC THEORY 3 credit hours This course is an extension of introductory microeconomics. The course will explore the decision making behavior of consumers and households and their interaction in the market place. The topics covered include consumer preference analysis and utility maximization; theory of a firm and production decision; different market structures and their implication for production, pricing, and distribution of goods. Other topics covered include input markets, government regulations, and strategic decision making. Lecture 3 hours. Prerequisite: ECON 2023 and MATH 1513 or higher.

3023* INTERMEDIATE MACROECONOMIC THEORY 3 credit hours National income concepts; aggregate demand by household, business, government, and foreign sectors; national income and employment determination in classical and Keynesian models; price level and inflation; money, interest rates and monetary policy; fiscal policy and public debt; exchange rate and balance of payments. Lecture 3 hours. Prerequisite: ECON 2023.
3313* MONEY AND BANKING 3 credit hours Evolution of money and banking; organization operation of chartered banks and other financial institutions; the role of the Federal Reserve System and financial institutions in the money supply process, demand for money; monetary policy, regulations of the financial system, foreign exchange market. Lecture 3 hours. Prerequisite: ECON 2023. (Cross-listed with FIN 3313.)

3823* QUANTITATIVE METHODS 3 credit hours Decision-making processes and techniques. This course emphasizes the quantitative skills needed in all areas of business and economics. These skills include statistical, econometric, forecasting and decision analysis. Computer utilization is used in analyzing and solving business and economic-related problems. Lecture 3 hours. Prerequisites: STAT 2613 and ECON 2023.

FINANCE (FIN)

2113 PERSONAL FINANCE 3 credit hours Problems and applications in personal finance. Study includes budgeting, credit use, financial institutions, insurance, real estate, taxes, investment, retirement, and estate planning. Lecture 3 hours. (Fall, Spring)

3313* MONEY AND BANKING 3 credit hours Evolution of money and banking; organization operation of chartered banks and other financial institutions; the role of the Federal Reserve System and financial institutions in the money supply process, demand for money; monetary policy, regulations of the financial system, foreign exchange market. Lecture 3 hours. Prerequisite: ECON 2023. (Cross-listed with ECON 3313.)

3603* PRINCIPLES OF FINANCE 3 credit hours An introductory course in financial management of a firm. Areas covered include an overview of financial management; financial markets, institutions and interest rates; time value of money, risk and return, valuation of stocks and bonds; long-term investment and financing decisions; working capital management and multinational financial management. Lecture 3 hours. Prerequisites: ACCT 2013 and MATH 1513 or higher. (Fall, Spring)

3623 INVESTMENTS 3 credit hours An introduction to the appraisal of securities and the management of investment in the various types of securities and on the concepts of asset and portfolio management. Lecture 3 hours. Prerequisite: FIN 3603 or permission of the Chair.

4333 FINANCIAL MANAGEMENT 3 credit hours A detailed examination of financial management decision making techniques. Topics include cash and profit planning, asset management, capital structure, capital budgeting, and firm valuation, including mergers and acquisitions. Lecture 3 hours. Prerequisite: FIN 3603.

4453 BOND ANALYSIS 3 credit hours Participation in the management of the ongoing BancFirst-Cameron Foundation Investment Portfolio. Activities center on administering a diversified portfolio of fixed income assets. Lecture 3 hours. Prerequisite: FIN 3603.

4553 STOCK ANALYSIS 3 credit hours Participation in the management of the ongoing BancFirst-Cameron Foundation Investment Portfolio. This course provides an opportunity for students to refine skills and pursue intensive study of investment in common stock and derivative securities. Lecture 3 hours. Prerequisite: FIN 3603.

4471-3 SEMINAR IN FINANCE 1-3 credit hours Seminar presentation and special studies in topics of current interest in finance. Seminar 1-3 hours. Prerequisite: Permission of the Chair.

MANAGEMENT (MGMT)

3013* PRINCIPLES OF MANAGEMENT 3 credit hours An introductory management course dealing with the fundamental principles of management: planning, organizing, and controlling. Lecture 3 hours. Prerequisite: BUS 1113 and Junior standing or department permission. (Fall, Spring)

3513 HUMAN RESOURCE MANAGEMENT 3 credit hours A comprehensive review of human resources policy development, along with a description and analysis of human resources techniques. The interdependence of human and operating functions is discussed. Focuses on the primary management functions as they relate to employment law, recruitment, selection, training, performance appraisal, compensation, and safety and health. Lecture 3 hours. Prerequisite: MGMT 3013 or permission of the Chair.

3613 OPERATIONS MANAGEMENT 3 credit hours Management of operations in manufacturing and service systems. Includes product, process and job design; planning facilities, quality assurance, and control systems; improvement of processes; materials management; budgetary and cost control; and associated quantitative techniques. Lecture 3 hours. Prerequisites: MGMT 3013 and STAT 2613.

3813 LABOR MANAGEMENT RELATIONS 3 credit hours Study of the relationships between management and labor: contract negotiations, grievance procedures, and arbitration in the public and private sectors. Lecture 3 hours. Prerequisite: MGMT 3513.

4013 ORGANIZATIONAL BEHAVIOR 3 credit hours Concerns the application of knowledge relating to human behavior theory as it applies to the business environment. Includes motivation theory, leadership patterns, organization climate, interpersonal relations, intergroup behavior, etc. Emphasis is on behavioral research findings. Lecture 3 hours. Prerequisite: MGMT 3013.

4033 SMALL ENTERPRISE MANAGEMENT 3 credit hours This course emphasizes principles and problems associated with starting and managing small enterprises. Lecture 3 hours. Prerequisite: MGMT 3013.

4053 BUSINESS, ETHICS, AND SOCIETY 3 credit hours An examination of the external environment of business, the need to ethically manage the external environment, and management's ethical responsibilities to the various elements of the environment. Lecture 3 hours. Prerequisite: MGMT 3013. (Fall, Spring)
4443 PROJECT MANAGEMENT 3 credit hours
Investigation and study of projects in organizations. Includes technical aspects pertaining to managing complex projects and systems. Emphasis placed on integrative concepts including topics such as project selection; planning and organization; negotiation and conflict resolution; budgeting and cost estimation; scheduling; resource allocation; monitoring and control; project auditing; and project termination. Lecture 3 hours. Prerequisite: MGMT 3013.

4471-4 SEMINAR IN MANAGEMENT 1-4 credit hours
Group study of specified topics in management for undergraduate students. Can be repeated for a maximum of 9 hours credit under different topic titles. Seminar 1-4 hours. Prerequisites: 9 hours of upper division management and permission of the Chair.

MARKETING (MKTG)

3413* PRINCIPLES OF MARKETING 3 credit hours
An introductory course utilizing a managerial approach to the study and development of marketing with emphasis on marketing strategy and development of marketing mix. Lecture 3 hours. Prerequisite: Junior standing or permission of the Chair. (Fall, Spring)

3423 CONSUMER MOTIVATION AND BEHAVIOR 3 credit hours
An examination of the internal and external influences on buyer behavior; analysis of the buying process; consumer decision-making; and aggregate consumer behavior over time. Lecture 3 hours. Prerequisite: MKTG 3413.

3433 RETAILING 3 credit hours
An investigation of the retailing field examining retail strategy, merchandise management and store management. Lecture 3 hours. Prerequisite: MKTG 3413.

3533 PERSONAL SELLING 3 credit hours
Students will earn how to become an effective sales professional through traditional and non-traditional approaches. Students will assess the current and potential value of an organization's offerings, develop skills in prospecting customers, craft unique selling propositions and design effective sales strategies to connect customers with needed satisfying products and services. Lecture 3 hours. Prerequisite: MKTG 3413.

4443 ADVERTISING 3 credit hour.
A survey of the various advertising media with an emphasis on planning and evaluating advertising themes and campaigns. To this end, the various elements of advertising, the types of advertising, and the objectives of advertising will be examined. Lecture 3 hours. Prerequisite: MKTG 3413 or permission of the Chair.

4443 MARKETING RESEARCH 3 credit hours
Development of statistical techniques applicable to marketing research. Includes a discussion of experimental design, planning research and investigations; formulation of hypothesis; logic and reasoning; conducting research investigations including formulation of the problem, sampling techniques, interviews, developing questionnaires; and the application of statistical techniques for reporting data. Lecture 3 hours. Prerequisites: MKTG 3413 and STAT 2613.

4481-3 SEMINAR IN MARKETING 1-3 credit hours
Study of specified topics in marketing. Can be repeated for a maximum of 9 hours credit under different topic titles. Seminar 1-3 hours. Prerequisites: MKTG 3413 and permission of the Chair.

4553 SPORT MARKETING 3 credit hours
A study of the business side of sports, including economic impact, the use of sports as a marketing tool for other products, the marketing of sports products, sport sponsorships, publicity, media and guest relations. Lecture 3 hours. Prerequisites: MKTG 3413 or HPET 3023.

4613 SERVICES MARKETING 3 credit hours
A study of the difference between expected and perceived service performance by investigating the listening gap, the service design and standards gap, the service performance gap and the communication gap. Lecture 3 hours. Prerequisite: MKTG 3413.

ORGANIZATIONAL LEADERSHIP (ORGL)

3113 FOUNDATIONS OF ORGANIZATIONAL LEADERSHIP AND PERSONAL DEVELOPMENT 3 credit hours
This course is an introduction to the Organizational Leadership Bachelor of Science Program. Essential components will include: overview of program expectations; principles of adult learning; resources for success including library, campus, online resources and mentoring relationships; personal wellness/stress and time management techniques; study and test-taking skills; and basic computer skills for working in an online environment. Lecture 3 hours. (Fall, Spring)

3223 PROFESSIONAL COMMUNICATION 3 credit hours
A study of communication in the workplace within a framework of organizational ethics. Essential components and course content include: listening, verbal and nonverbal communication, written expression, and professional presentation. Lecture 3 hours. (Fall, Spring)

3333 DATA ANALYSIS AND INTERPRETATION 3 credit hours
This course will enable the student to develop an understanding of the application and interpretation of basic data analysis. Essential components and course content will include basic data analysis from a user perspective. Hands-on exercises will enable students to utilize Excel to solve problems and interpret results. Lecture 3 hours. (Fall)

3443 FOUNDATION OF FISCAL MANAGEMENT 3 credit hours
A managerial overview of fiscal management within organizations. Essential components and coursework content will include: understanding the components and articulation of financial statements, knowledge and application of financial ratios leading to an understanding of organizational performance across time and in comparison to industry standards, utilization of financial information in the acquisition of capital and budgeting decisions, and rudimentary understanding of cash flows. Lecture 3 hours. (Spring)
4113 ETHICS AND ORGANIZATIONS 3 credit hours This course is designed to examine the dynamics of workplace and personal ethics through the study of basic philosophical theories. Essential components and course content will include: leadership in the context of self-governance, responsibility adherence to principles, integrity and constancy of purpose. Current case studies will be used to apply ethical theories. Lecture 3 hours. (Fall)

4223 THE INDIVIDUAL, THE ORGANIZATION, AND SOCIETY 3 credit hours An examination of contemporary issues that affect organizations. Essential topics include environmental stewardship, social responsibility of the organization, effects and implications of globalization, the status of individual freedom within the organization, diversity, and the ramifications of technological change. Lecture 3 hours. (Fall)

4333 LEADING AND MANAGING 3 credit hours This course is a study of theories that influence leadership and management with application to a variety of work situations. Essential components and coursework content will include: basic leadership and behavior styles, negotiation, critical thinking, change, conflict resolution, ethics and social responsibility and diversity in the workplace. Assessment of personal leadership abilities and personality traits will be included. Lecture 3 hours. (Spring)

4443 MARKETS AND STAKEHOLDERS 3 credit hours This course introduces the student to the concept of markets and stakeholders. Essential components and course content will include: an overview of competitive markets, buyer behavior, development of new markets and products, marketing communication, distribution channels, pricing and marketing mix strategies. It will include a discussion of external environmental factors and stakeholder analysis. Students will be able to evaluate market needs, select target markets and develop an appropriate market. Lecture 3 hours. (Spring)

4553 CAPSTONE 3 credit hours This course provides the student the opportunity to integrate concepts and theories covered in the core with their area of focus. Students will design and implement a capstone project related to their area of focus culminating in a written and oral presentation. This course must be taken in the student’s final enrollment period. Capstone/lecture 3 hours. (Spring)

4993 INTERNSHIP IN ORGANIZATIONAL LEADERSHIP 3 credit hours Supervised professional-level assignment with an organization, firm, government agency, or not-for-profit entity within the selected area of focus. Internship 3 hours. Prerequisites: All core courses except for ORGL 4553, Capstone. Permission of instructor.

*Liberal arts and sciences course.
DEPARTMENT OF COMPUTING AND TECHNOLOGY

FACULTY

CHAIR
Muhammad Javed, Associate Professor

PROFESSORS
M. Estep, A. Johari, C. Zhao

ASSOCIATE PROFESSORS
J. Drissi, F. Moinian

INSTRUCTORS
T. Hickerson, D. Smith, H. Kimberling

MISSION STATEMENT
The mission and vision of the Cameron University Department of Computing and Technology is to:

- Provide quality academic programs based on academic excellence, high ethical standards, and learning outcomes for each of the computing and technology disciplines;
- assist students in developing the skills and confidence to excel as life-long learners;
- prepare computing and technology graduates at both the A.A.S. and B.S. levels for success in a diverse and dynamic environment;
- provide faculty and staff with an atmosphere conducive to professional growth through an annual individualized appraisal program;
- support community efforts involving computing and technology disciplines relevant to the university, school, and department.
- The computing and the technology curricula are flexible, and provide opportunities that are interdisciplinary in nature allowing students to customize individual and professional experience with experiential learning components embedded throughout the curriculum. The curricula are easily adaptable to accommodate the fast-paced technological changes of our society.

PROGRAMS OF STUDY

Degrees & Majors: A.A.S. Information Technology
B.S. Computer Science
B.S. Information Technology
  • Computer Information Systems
  • Cyber Security/Info Assurance
  • Management Information Systems

GENERAL INFORMATION
The Department of Computing and Technology offers a variety of disciplines at the Associate and Baccalaureate level. These programs are continually updated to ensure students are receiving cutting edge technology knowledge to prepare them for a successful career.

We offer innovative and interdisciplinary programs deeply rooted in discovery, learning and student engagement. We are committed to prepare our students as life-long learners to succeed in a diverse and ever-changing environment.

STUDENT ORGANIZATIONS

Association of Information Technology Professionals (AITP)
AITP allows students who have an interest in data processing and information systems to share their ideas and talents with others. They meet with professionals in the information technology field and explore career possibilities.

Association of Computing Machinery (ACM)
ACM is the world’s largest computing society that brings together computing educators and students, researchers, and professionals to inspire dialogue, share resources, and address the field’s challenges.
### General Education Requirements 18 hours

<table>
<thead>
<tr>

*One course must be a lab science; see undergraduate catalog for list.

### General Education Non-PE Electives (To total at least 44 hours, if needed)*

General education electives must be selected from the list of approved general education courses, exclusive of those with the PE prefix (http://www.cameron.edu/catalog/general_ed.html.)

### University Requirements

- UNIV 1001 or 1113–1–3 hours
- Computer Literacy–CIS 1013 or MIS 2113
- Capstone Experience–CS 4233

### Major Requirements 68 hours

- **Required Courses–42 hours**
  - CS 1314/L Computer Sci I & Lab (SP)
  - CS 1514/L Computer Sci II & Lab (FA)
  - CS 1523 Discrete Math (FA)
  - CS 2413 Data Structures (SP)
  - CS 2513 Comp Organ & Architect (SP)
  - CS 3013 Network Programming (FA)
  - CS 3103 Database Design & Mgmt (SP)
  - CS 3513 Operating Systems (FA)
  - CS 3713 Algorithm Analysis (FA)
  - CS 4204/L Software Engin & Lab (FA)
  - CS 4233 Capstone Project (SP)
  - IAS 2233 Intro Info Assur/Security (SP)
  - IT 1063 Intro Networking (FA)
  - *FA=Fall; SP=Spring; SU=Summer*

- **Electives (13 hours)**
  - Choose from the following:
  - CS 2333 Web Systems Technologies
  - CS 3001-3 Seminar in Computer Sci
  - CS 3813 Parallel Computing
  - CS 3573 Computer Graphics
  - CS 4001-3 Seminar in Computer Sci
  - CS 4223 Prog Lang & Compilers
  - IAS- prefix courses
  - IT 2064/L Internetworking Tech & Lab
  - IT 3603 Human Comp Interface Devel
  - IT 4342 Legal/Ethical Issues for IT Pro

- **Mathematics (13 hours)**
  - (Some Students may also need to take some or all of the following courses as prerequisites: MATH 0013, 0103, 0213, 1513, or 1613.)
  - MATH 2215 Calc & Analytic Geom I
  - MATH 2235 Calc & Analytic Geom II
  - MATH 2613 Found of Mathematics

- **Additional Requirements–26 hours**
  - MATH 3333 College Geometry
  - MATH 4113 Intro Operations Research
  - MATH 4423 Number Theory
  - MATH 4433 Matrix Algebra
  - STAT 2013 Intro Prob & Stats I

### General Electives to Complete 124 hours

### Graduation Requirements

- Department Requirements
  - Minimum ½ of Major Upper Div Hours Completed at CU
  - Minimum 124 Total Credit Hours
  - Minimum 40 Upper Division Credit Hours
  - Minimum 55 Liberal Arts & Science Credit Hours
  - Minimum 30 Credit Hours in Residence at Cameron
  - Minimum 60 Credit Hours at a 4-Year Institution
  - Minimum 2.0 GPA

- Minimum 15 of last 30 Credit Hours or ½ of Major Completed at CU
  - Retention GPA 2.0
  - Cameron GPA 2.0

- Complete Graduation Application Online

COURSE DESCRIPTIONS

COMPUTER AIDED DRAFTING (CAD)

1013* COMPUTER AIDED DRAFTING 3 credit hours The use of computer systems to produce drawings in compliance with industrial standards. Emphasis on computer terminology, drafting practices, procedures, and techniques. Lecture 2 hours, laboratory 2 hours. Corequisite: CAD 1013L.

1013L* COMPUTER AIDED DRAFTING LAB 0 credit hours LAB: The use of computer systems to produce drawings in compliance with industrial standards. Emphasis on computer terminology, drafting practices, procedures, and techniques. Lecture 2 hours, laboratory 2 hours. Corequisite: CAD 1013.

COMPUTER INFORMATION SYSTEMS (CIS)

1013* INTRODUCTION TO COMPUTER INFORMATION SYSTEMS 3 credit hours This course is an overview of what students need to know to successfully navigate/adapt in the ever changing landscape of computing and communications technologies. Lecture 3 hours. Prerequisite: None. (Fall, Spring)

2001-3 SPECIAL PROBLEMS IN COMPUTER INFORMATION SYSTEMS 1-3 credit hours Assigned student projects which will include topics not covered in detail in the CIS curriculum and based on study needs. Laboratory 3-9 hours. Prerequisite: Sophomore standing and departmental permission.

2013* VISUAL BASIC PROGRAMMING 3 credit hours Elements of VISUAL BASIC programming language. Lecture 3 hours. Prerequisite: IT 1213.

2023 BUSINESS APPLICATIONS OF C++ 3 credit hours Elements of the C++ programming language with emphasis on business applications. Lecture 3 hours. Prerequisite: MATH 1513 or concurrent enrollment or permission of department.

2033* FUNDAMENTALS OF SYSTEMS ANALYSIS AND DESIGN 3 credit hours An in-depth study of the Systems Development Life Cycle (SDLC) to include study, design, development, and operation phases. A total quality management emphasis is stressed and computer assisted systems engineering (CASE) tools are introduced. Lecture 3 hours. Prerequisites: IT 1414/1414L or CS 1314/1314L. (Fall)

2043 GRAPHIC DESIGN BASICS 3 credit hours Basic graphic design theory and development are studied through the use of elements of design and principles of composition as applied to information system processes. Study includes basic color theory with emphasis on using design techniques and software tools to develop graphic outputs for business. Lecture 3 hours.

3011-3 SOFTWARE APPLICATIONS 1-3 credit hours A study of selected commercial software. Emphasis is on implementation, equipment requirements, integration capabilities and limitations of each software application. Course may be repeated for credit with different software packages. Lecture 1-3 hours. Prerequisites: department permission.

3023 ADVANCED BUSINESS APPLICATIONS OF C++ 3 credit hours Emphasizes classes, objects, object-oriented programming, arrays, string processing and file manipulation. Lecture 3 hours. Prerequisite: CIS 2023.

3033 MANAGING THE INFORMATION TECHNOLOGY CENTER 3 credit hours Managing the resources of the modern Information Center. Topics include: maximizing the value of data and information technology, IT architectures, digital, mobile and social commerce, enterprise systems and analytics, cybersecurity, compliance and business continuity, functional areas and compliance systems and IT planning, strategy, and IT ethics and responsible conduct. Lecture 3 hours. Prerequisite: CIS 2033.

3064 COBOL PROGRAMMING 4 credit hours Elements of COBOL programming language applied to business systems emphasizing file processing, control breaks, interactive processing, sub-programs and data validation. Software quality, use of multi-dimension tables, sorting and interaction with databases are covered. Lecture 3 hours, laboratory 2 hours. Prerequisite: IT 2413 or IT 2414/2414L or CS 1513 or CS 1514/1514L. Corequisite: CIS 3064L.

3064L COBOL PROGRAMMING LAB 0 credit hours Elements of COBOL programming language applied to business systems emphasizing file processing, control breaks, interactive processing, sub-programs and data validation. Software quality, use of multi-dimension tables, sorting and interaction with databases are covered. Lecture 3 hours, laboratory 2 hours. Prerequisite: IT 2413 or IT 2414/2414L or CS 1513 or CS 1514/1514L. Corequisite: CIS 3064L.

3083 DATABASE DESIGN AND MANAGEMENT 3 credit hours Emphasis on design and use of database systems to include UML and CASE tools. Lecture 3 hours. Prerequisite: IT 2414/2414L.

3183 STRUCTURED QUERY LANGUAGE 3 credit hours An in-depth study of the Structured Query Language (SQL) and relational database processing. Topics will include general application development using basic and advanced select statements. Other topics include queries involving multiple tables. Lecture 3 hours. Prerequisites: Junior standing and IT 2413 or IT 2414/2414L or CS 1513 or CS 1514/1514L.

4013 DATA WAREHOUSING 3 credit hours The strategies and processes for Data Warehousing of large relational databases. Topics include: understanding the role of data warehousing to businesses, understanding data warehousing as a management tool, data warehousing as an emerging architecture and a data warehouse as it is designed to support the decision support system (DSS) function. Lecture 3 hours. Prerequisite: CIS 3083 or MIS 3033 or CS 3183.

4023 DATA MINING 3 credit hours The strategies and processes for Data Mining of large relational databases.
The major focus of this course is data mining applications related to the corporate business world. Examples of discussion areas include banking and finance, retail, and health care. Lecture 3 hours. Prerequisite: CIS 3083 or MIS 3033 or CS 3183.

**COMPUTER SCIENCE (CS)**

**1113 INTRODUCTION TO COMPUTER ORGANIZATION 3 credit hours** An introductory course in hardware. Topics will include basic organization of a computer system, number representations, binary arithmetic, digital logic circuits, I/O, storage, processor, program execution, and miscellaneous hardware related issues. Lecture 3 hours.

**1301* OPERATING SYSTEM UTILITIES I 1 credit hour** The basic commands of the operating system currently in use. Lecture 1 hour.

**1314* COMPUTER SCIENCE I 4 credit hours** An introduction to programming using an object-oriented language and its use in solving simple problems. Topics include: pseudo-code, control structures, functions, arrays, simple searching and sorting techniques, basic classes. Lecture 3 hours, laboratory 2 hours. Prerequisite: MATH 1513 or concurrent enrollment. Corequisite: CS 1314L. (Spring)

**1314L* COMPUTER SCIENCE I LAB 0 credit hours** An introduction to programming using an object-oriented language and its use in solving simple problems. Topics include: pseudo-code, control structures, functions, arrays, simple searching and sorting techniques, basic classes. Lecture 3 hours, laboratory 2 hours. Prerequisite: MATH 1513 or concurrent enrollment. Corequisite: CS 1314L. (Spring)

**1514* COMPUTER SCIENCE II 4 credit hours** A continuation of programming using an object-oriented language. Topics include: searching, sorting, pointers, files, classes and object-oriented issues, recursion, and introduction to linked data structures. Lecture 3 hours, laboratory 2 hours. Prerequisites: IT 1413 or IT 1414/1414L or CS 1313 or CS 1314/1314L. Corequisite: CS 1514L. (Fall)

**1514L* COMPUTER SCIENCE II LAB 0 credit hours** A continuation of programming using an object-oriented language. Topics include: searching, sorting, pointers, files, classes and object-oriented issues, recursion, and introduction to linked data structures. Lecture 3 hours, laboratory 2 hours. Prerequisites: IT 1413 or IT 1414/1414L or CS 1313 or CS 1314/1314L. Corequisite: CS 1514L. (Fall)

**1523* DISCRETE MATH 3 credit hours** Fundamental mathematical concepts and algebraic structures. Introduction to the theory of graphs and trees. Emphasis on examples and applications rather than mathematical rigor. Lecture 3 hours. Prerequisites: IT 1413 or IT 1414/1414L or CS 1313 or CS 1314/1314L. (Fall)

**1733 OPERATING SYSTEMS TECHNOLOGIES 3 credit hours** An introduction to operating systems (Linux, Windows). Topics include: file system hierarchy, command set, application software, and administrative tasks. Lecture 3 hours.

**2001-3 SEMINAR IN COMPUTER SCIENCE 1-3 credit hours** Elementary current topics that are not part of the common core. Lecture 1-3 hours. Prerequisites: Announced prerequisites.

**2333 WEB SYSTEMS TECHNOLOGIES 3 credit hours** An introduction to web programming. Topics will include: HTML, CSS, JavaScript, server-side scripting, cascading styles, and CGI. Emerging technologies will be covered. Lecture 3 hours. Prerequisite: IT 1413 or IT 1414/1414L or CS 1313 or CS 1314/1314L.

**2413* DATA STRUCTURES 3 credit hours** An introduction to elementary data structures (stacks, queues, linked lists and trees) and their applications. A brief survey of sorting techniques. Lecture 3 hours. Prerequisites: CS 1523 or concurrent enrollment and IT 2413 or IT 2414/2414L or CS 1513 or CS 1514/1514L. (Spring)

**2513 COMPUTER ORGANIZATION AND ARCHITECTURE 3 credit hours** An introduction to the computer system, central processing unit, control unit, and parallel organization. Current architectural directions will be discussed. Lecture 3 hours. Prerequisites: IT 2413 or IT 2414/2414L or CS 1513 or CS 1514/1514L. (Spring)

**3001-3 SEMINAR IN COMPUTER SCIENCE 1-3 credit hours** Intermediate level current topics that are not part of a common core. Lecture 1-3 hours. Prerequisites: Announced prerequisites.

**3013 NETWORK PROGRAMMING 3 credit hours** Concepts of multiprocessing and interprocess communication, networking protocol architecture, construction of client/server software using low and high level system calls. Lecture 3 hours. Prerequisite: CS 2413 and IT 1063. (Fall)

**3100-6 COMPUTER SCIENCE INTERNSHIP 0-6 credit hours** This course is designed to give students practical work experience and on-the-job training in the field of Computer Science. This course is offered on a S/U basis only. A maximum of 6 credits may be taken. In addition to the satisfactory completion of the approved internship, a minimum of 50 hours’ work per credit hour is required. Department permission is required to enroll in this course. Before the student can enroll in the course, he or she must ask the employer to issue a “Letter of Appointment” to the Department Coordinator of Computer Science regarding their intent to hire the student. The letter shall describe the conditions under which the employer will hire the intern and the nature of the internship project. Upon approval by the Computer Science Coordinator, the student will be able to enroll in this course. Internship 0-6 hours. Prerequisite: Departmental permission and completion of substantial course work in computer science.

**3183 DATABASE DESIGN AND MANAGEMENT 3 credit hours** This course introduces the basic theories, concepts, skills, and techniques of data and database systems. The
course will primarily focus on database design and implementation. Lecture 3 hours. Prerequisite: CS 1314/1314L or CIS 2033 or MIS 2113 or MM 2033. (Cross-listed with MIS 3033.) (Spring)

3343 NUMERICAL ANALYSIS I 3 credit hours An introductory course in numerical analysis. Topics include: Accuracy in numerical calculations; evaluation of functions; numerical integration; solution of nonlinear equations; solution of systems of nonlinear equations and interpolation. Lecture 3 hours. Prerequisites: MATH 2235 and CS 1313 or CS 1314/1314L or department permission.

3443 NUMERICAL ANALYSIS II 3 credit hours A continuation of CS 3343. Topics include: Additional topics in numerical integration; ordinary differential equations; interpolation and curve fitting. Optional topics may include partial differential equations. Lecture 3 hours. Prerequisite: CS 3343.

3513 OPERATING SYSTEMS 3 credit hours Overview of hardware and software, process management, storage management, processor management, and auxiliary storage management. Lecture 3 hours. Prerequisite: CS 2413. (Fall)

3573 COMPUTER GRAPHICS 3 credit hours Computer representation, generation and display of images. Topics included are display of 2D and 3D images; color display; algorithms, and transformations for clipping, windowing, and perspective; survey of graphics display devices; and use of graphics packages. Lecture 3 hours. Prerequisite: CS 2413 and MATH 3013 or MATH 4433.

3713 ALGORITHM ANALYSIS 3 credit hours A mathematical analysis of common algorithms: common searches and sorting, graphs, and string matching. An introduction to the notion of complexity. Lecture 3 hours. Prerequisites: CS 2413 and MATH 2215. (Fall)

3813 PARALLEL COMPUTING 3 credit hours Parallel algorithms and implementations for sorting, searching, matrix processing and other problems. Efficiency issues of parallel algorithms on different architectures. Lecture 3 hours. Prerequisite: CS 2413.

4001-3 SEMINAR IN COMPUTER SCIENCE, 1-3 hours credit Advanced level current topics that are not part of a common core. Lecture 1-3 hours. Prerequisites: Announced prerequisites.

4013 FORMAL LANGUAGE THEORY 3 credit hours An introduction to grammars, finite state machines, push down automata, regular languages, parsing techniques and Turing machines. Lecture 3 hours. Prerequisites: CS 1523 and CS 2413.

4204 SOFTWARE ENGINEERING 4 credit hours This course emphasizes the software development life cycle. Topics will include: Uniform Modeling Language (UML), testing methods, and software correctness. Acquisition of the skills necessary to control complex programming projects. Lecture 3 hours, laboratory 2 hours. Prerequisite: CS 2413. Corequisite: CS 4204L. (Fall)

4204L SOFTWARE ENGINEERING LAB 0 credit hours This course emphasizes the software development life cycle. Topics will include: Uniform Modeling Language (UML), testing methods, and software correctness. Acquisition of the skills necessary to control complex programming projects. Lecture 3 hours, laboratory 2 hours. Prerequisite: CS 2413. Corequisite: CS 4204. (Fall)

4223 PROGRAMMING LANGUAGES AND COMPILERS 3 credit hours Coverage of the concepts and constructs of the major programming paradigms and an introduction to the theory and techniques of compiler construction. Lecture 3 hours. Prerequisite: CS 2413.

4233 CAPSTONE PROJECT 3 credit hours This course provides students the opportunity to complete a comprehensive software project. The project will be done through team effort, and may involve the use of multiple programming languages. Emphasis will be on professional communication, team work, and comprehensive utilization of computing knowledge obtained in previous courses. This is a hands-on and lecture combined course. Capstone/lecture 3 hours. Prerequisite: Senior standing and CS 4204/4204L. (Spring)

4443 COMPUTER USAGE FOR ELEMENTARY TEACHERS 3 credit hours A course specifically designed to introduce the elementary teacher to micro-computers and programming concepts using a structured programming language (BASIC). The course includes construction and evaluation of software suitable for use in the elementary school. Does not apply toward a major or minor in Computer Science. Lecture 3 hours. Prerequisite: MATH 3353, elementary teaching experience, or department permission.

4491-3 SPECIAL PROBLEMS IN COMPUTER SCIENCE 1-3 credit hours Individual and group projects in computer science based on proposals by students which are approved and supervised by faculty members. May be repeated as often as desired with permission of the department chair. Independent study 1-3 hours. Prerequisite: Approval by department chair and faculty member supervising the project.

CYBER SECURITY & INFORMATION ASSURANCE (IAS) 2013* HISTORY OF INFORMATION ASSURANCE/SECURITY 3 credit hours The historical impact of viruses, Trojans, worms and other information security threats as well as anti-virus efforts will be examined. Students will exhibit a mastery of communication skills by writing several significant research papers and several significant oral presentations concerning the history of information assurance/security. Students will learn effective uses of technology for communicating. This is a communications intensive course. Lecture 3 hours. Prerequisites: CIS 1013 and ENGL 1113.

2233* INTRODUCTION TO INFORMATION ASSURANCE/SECURITY 3 credit hours Best practices, basic policies and procedures, ethics, and fundamental legal issues will be explored. Risk Management and
Disaster Recovery as applied to Information Assurance/Security will be investigated. Ethics and vulnerability issues will also be covered. Lecture 3 hours.

Prerequisite: IT 1063. (Spring)

2333 COMPUTER FORENSICS 3 credit hours Procedures for the identification, preservation, and extraction of electronic evidence. Modes of hidden data, cryptography, steganography, compression. Investigating Windows and Linux computers. Lecture 3 hours. Prerequisite: IAS 2233.

3063 INFORMATION ASSURANCE NETWORKING FUNDAMENTALS 3 credit hours Students will analyze and design a secure network. Intrusion Detection, fundamental forensics, incident handling and privacy issues will be examined. Lecture 3 hours. Prerequisite: IAS 2233.

3233* E-COMMERCE AND WEB SECURITY 3 credit hours Electronic commerce technology, standards and issues. Introduction to security architectures for electronic commerce: digital signatures, certificates, and public key infrastructure. Vulnerabilities in e-commerce and web applications will be studied as well as the security countermeasures. Lecture 3 hours. Prerequisite: IAS 2233.

3263 SECURITY ARCHITECTURE AND DESIGN 3 credit hours Students will configure a secure network and an intrusion detection system. Network monitoring plans and bandwidth management plans will be created. Policies and procedures will be created. A basic forensics data report will be designed. Lecture 3 hours. Prerequisite: IAS 3063.

4063* CURRENT TOPICS IN INFORMATION ASSURANCE AND NETWORK SECURITY 3 credit hours Students will research current literature and compare and summarize current Information Assurance Issues, legal issues, and events. A Disaster Recovery Plan and a Risk Assessment Plan will be created. Audit Plans will be created. Acceptable Use Policies will be assessed. Policies and procedures will be assessed. Lecture 3 hours. Prerequisite: IAS 3063.

INFORMATION TECHNOLOGY (IT)

1063 INTRODUCTION TO NETWORKING 3 credit hours An overview of computer networking. Topics include network topologies, network software, the client-server model, the OSI/ISO model, network components, TCP/IP, and network security. Lecture 3 hours. Prerequisite: CIS 1013 or concurrent enrollment. (Fall)

1213 PROGRAMMING LOGIC 3 credit hours A basic introduction to the knowledge and skills that are used in computer programming. Topics include: the third generation programming environment, program design and pseudocode, coding, debugging, basic control structures, basic classes and objects, and methods. Lecture 3 hours.

1414 PROGRAMMING I 4 credit hours The first course in computer programming using an Object Oriented approach. Topics include: the third generation programming environment, program design and pseudocode, coding, debugging, basic control structures including conditional statements, loops, methods, basic classes and objects. Other topics include array processing and basic GUI issues. Lecture 3 hours, laboratory 2 hours. Prerequisite: MATH 1513 or concurrent enrollment or permission of department. Corequisite: IT 1414L. (Spring)

1414L PROGRAMMING I LAB 0 credit hours The first course in computer programming using an Object Oriented approach. Topics include: the third generation programming environment, program design and pseudocode, coding, debugging, basic control structures including conditional statements, loops, methods, basic classes and objects. Other topics include array processing and basic GUI issues. Lecture 3 hours, laboratory 2 hours. Prerequisite: MATH 1513 or concurrent enrollment or permission of department. Corequisite: IT 1414. (Spring)

2064 INTERNETWORKING TECHNOLOGIES 4 credit hours The installation, configuration, and administration of operating systems in a network of computers. Allocation of IP addresses and configuration of routers. Current and relevant software will be studied to include both server software and client software. Lecture 3 hours, laboratory 2 hours. Prerequisite: IT 1063. Corequisite: IT 2064L. (Fall)

2064L INTERNETWORKING TECHNOLOGIES LAB 0 credit hours LAB: The installation, configuration, and administration of operating systems in a network of computers. Allocation of IP addresses and configuration of routers. Current and relevant software will be studied to include both server software and client software. Lecture 3 hours, laboratory 2 hours. Prerequisite: IT 1063. Corequisite: IT 2064. (Fall)

2414 PROGRAMMING II 4 credit hours The second course in computer programming using an Object Oriented approach. Topics include: programming in the GUI environment, Classes, Objects, fast sorts, Abstract Data Types, Strings, recursion, and file processing. Lecture 3 hours, laboratory 2 hours. Prerequisite: IT 1413 or IT 1414/1414L or CS 1313 or CS 1314/1314L. Corequisite: IT 2414L. (Fall)

2414L PROGRAMMING II LAB 0 credit hours LAB: The second course in computer programming using an Object Oriented approach. Topics include: programming in the GUI environment, Classes, Objects, fast sorts, Abstract Data Types, Strings, recursion, and file processing. Lecture 3 hours, laboratory 2 hours. Prerequisite: IT 1414/1414L. Corequisite: IT 2414. (Fall)

3603 HUMAN COMPUTER INTERFACE DEVELOPMENT 3 credit hours An exploration of Graphical User Interface development and human computer interaction using a current RAD tool. Issues of good and bad design of both Web and Application GUIs. Lecture 3 hours. Prerequisite: IT 2413 or IT 2414/2414L or CS 1513 or CS 1514/1514L. (Fall)

4013 RESEARCH TOPICS IN IT 3 credit hours Applied scholarly research in IT related areas will be conducted.
Skills will be developed in utilizing available campus, library, research, and writing resources, as well as external resources. Iterative creation and review of a scholarly paper will be undertaken, using formats common to computing conference publications. Students will be required to present research findings, as is common in computing conference proceedings. Lecture 3 hours. Prerequisite: Must be a bachelor's degree seeking major of the Department of Computing and Technology. Junior or Senior standing. (Spring)

4342* LEGAL AND ETHICAL ISSUES FOR THE IT PROFESSIONAL 2 credit hours The course is designed to give students an ability to distinguish and analyze information systems legal, social and ethical issues. Through class lecture, case study analysis, class discussion, final project preparation, and outside readings, students will become versed in the logical/critical thinking skills required to make ethical decisions as an information technology professional. Lecture 2 hours. Prerequisite: Junior standing. (Spring)

4444 IT CAPSTONE 4 credit hours The IT Capstone course is designed to integrate course work in various specializations of IT classes. This class emphasizes critical thinking and analysis for business decision-making. Students will work in teams to solve/create/implement a service learning group project. This project will be used to demonstrate functional knowledge and skill. Capstone/lecture 4 hours. Prerequisites: Senior standing and IT 3603 and CIS 3083 or CS 3183 or MIS 3033. (Spring)

MANAGEMENT INFORMATION SYSTEMS (MIS) 2001-3 SPECIAL PROBLEMS IN MANAGEMENT INFORMATION SYSTEMS 1-3 credit hours Assigned student projects which will include topics not covered in detail in the MIS curriculum and based on study needs. Lecture 1-3 hours.

2013 PROGRAMMING I 3 credit hours Introduction to and use of application development tools for object-oriented programming. Emphasizes step-wise refinement of fourth generation computer languages (4GLs) and introduces CASE (Computer-Aided-Software Engineering) tools during the developmental process. Student designs elementary business solutions using general application development software, report generation, macro, query, and other application features. Lecture 3 hours. Prerequisite: CIS 1013.

2113 FUNDAMENTAL MIS TOOLS AND SKILLS 3 credit hours A study of major microcomputer application software packages, including operating systems, word processing, and spreadsheet software. The emphasis is on hands-on use of these packages to develop software applications for solving basic business problems. Lecture 3 hours. (Fall, Spring)

3013 MANAGEMENT INFORMATION SYSTEMS 3 credit hours An overview of the current principles and practices of information systems and solving problems from a managerial perspective. Lecture 3 hours. Prerequisites: CIS 1013 or MIS 2113 or computer proficiency. (Fall, Spring)

3021-3 BUSINESS SOFTWARE APPLICATIONS 1-3 credit hours A study of selected software for microcomputer systems. Course may be repeated for credit with different software packages. Lecture 1-3 hours. Prerequisite: MIS 2113.

3033 DATABASE DESIGN AND MANAGEMENT 3 credit hours This course introduces the basic theories, skills, and techniques of data and database systems. The course will primarily focus on database design and implementation. Lecture 3 hours. Prerequisites: CS 1314 or CIS 2033 or MIS 2113 or MM 2033. (Cross-listed with CS 3183.) (Fall)

3083 SYSTEMS ANALYSIS AND DESIGN 3 credit hours Systems development using modern methods and tools. Recent advances in software technologies such as distributed hypermedia systems (World Wide Web), CASE tools, GUI tools, DBMSs, 4GLs, and the Systems Development Life Cycle (SDLC). Study of object-oriented development and Web-based information systems development issues. Students write a business application program. Lecture 3 hours. Prerequisite: CIS 3083 or MIS 3033 or CS 3183.

3123 ADVANCED BUSINESS APPLICATIONS OF MICROCOMPUTER SOFTWARE 3 credit hours Study of advanced features of major microcomputer application software packages, including word processing, spreadsheet, graphics, and database software. Emphasis on hands-on use of these packages to develop software applications for solving complex business problems. Lecture 3 hours. Prerequisite: MIS 2113.

3223 BUSINESS DATA COMMUNICATION/TELECOMMUNICATIONS 3 credit hours Introduction to data communications and networking in a business environment while emphasizing current advances in telecommunications technology, regulation, and international standards. Topics include TCP/IP and the OSI model; current data communications protocols; network architecture including client/server networks; and operating systems. Student becomes conversant in data communication terminology and concepts. Knowledge and skills gained will be applied in an end-of-course business scenario. Lecture 3 hours. Prerequisite: MIS 3013.

4033 ELECTRONIC COMMERCE 3 credit hours This course will involve a comprehensive look at electronic commerce. Students will gain theoretical exposure to the complex field as well as practical experience in basic web programming. Course topics include: business models, revenue models, e-commerce security, payment systems, as well as legal, social and ethical issues. Lecture 3 hours. Prerequisite: MIS 2113.

4433 PROJECT MANAGEMENT 3 credit hours The course presents basic principles of project management, tools of project management, and the role of project manager in the successful completion of a project. Lecture 3 hours. Prerequisite: Junior standing.
4471-3 SEMINAR IN MANAGEMENT INFORMATION SYSTEMS 1-3 credit hours Study of specified topics in Management Information Systems such as advanced telecommunications, advanced database, data warehousing, information security, web page design, decision support systems, and other topics. Can be repeated for maximum of nine (9) hours credit under different topic titles. Seminar 1-3 hours. Prerequisite: Permission of the Chair.

4491-3 INDEPENDENT STUDY IN MANAGEMENT INFORMATION SYSTEMS 1-3 credit hours Independent reading and/or study of specific problems or special subjects, based upon pre-approved outlines of plans, with conferences and/or written reports. Independent study/directed readings 1-3 hours. Prerequisites: 9 upper division hours in the discipline of the independent study and department permission. A proposal must accompany the request when submitted for approval.

4533 APPLIED PROBLEMS IN MANAGEMENT INFORMATION SYSTEMS 3 credit hours A capstone course designed to integrate course work in various functional areas of MIS applications. Emphasizes teamwork, analytical and critical thinking, technical and managerial skills in the creation and management of an information systems application. Lecture 3 hours. Prerequisite: CIS 3083 or MIS 3033 or CS 3183.

MULTIMEDIA DESIGN (MM)

1013 FUNDAMENTALS OF MULTIMEDIA DESIGN 3 credit hours An introduction to the study of multimedia design, including principles of graphic design; introduction to authoring; on-screen layout; and introduction to authoring tools. With a basic understanding of Instructional Systems Design, students will learn to create desktop and on-screen multimedia applications. This class will also include a brief introduction to authoring software. Lecture 2 hours, laboratory 2 hours. Prerequisite: CIS 1013 or concurrent enrollment.

1133 MULTIMEDIA PRODUCTION TECHNIQUES 3 credit hours This course familiarizes students with basic techniques, using hardware and software tools to create various media for multimedia productions. Students will learn basic techniques such as scanning and enhancing photographs, creating simple animations and incorporating graphics into presentations with an understanding of display color. Lecture 2 hours, laboratory 2 hours. Prerequisite: MM 1013.

1143 INSTRUCTIONAL DESIGN 3 credit hours Introduction to the systematic design of instruction that includes learner, task and content analysis, writing performance objectives, developing instructional strategies, materials and assessment instruments, and evaluating and revising instructional materials. Lecture 2 hours, lab 2 hours. Prerequisite: ENGL 1113 or concurrent enrollment.

1154 INTRODUCTION TO MULTIMEDIA AUTHORING 4 credit hours Introduction to program logic, problem solving techniques, scripting, and the design theories on which authoring is based within the context of an authoring tool. This course makes extensive use of structure charts, flow charts, and storyboarding to illustrate the logic necessary to create instructional materials using authoring software. Lecture 2 hours, lab 4 hours. Prerequisite: MM 1143 and completion or concurrent enrollment in MM 1133.

2023 CORPORATE MULTIMEDIA PRODUCTION I 3 credit hours Planning and development of modern interactive educational applications in a corporate environment using modern learning theory. Students will plan projects using industry best practices in a client-centered, corporate context. They will also produce educational programs conforming to e-learning principles based on cognitive learning theory. This course will incorporate a second authoring tool. Lecture 2 hours, lab 2 hours. Prerequisites: MM 1154; concurrent enrollment: JRMP 1313.

2033 WEB COMMUNICATIONS AND DESIGN 3 credit hours This course introduces students to purpose-driven web browsing and web page creation. Students will incorporate multimedia components into created pages. Lecture 2 hours, lab 2 hours. Prerequisite: CIS 1013.

2123 CORPORATE MULTIMEDIA PRODUCTION II 3 credit hours An advanced course emphasizing practice in the use of more advanced authoring and delivery techniques while studying current issues in corporate and government instructional media production. Lecture 2 hours, lab 2 hours. Prerequisite: MM 2023.

2132* LEGAL AND ETHICAL ISSUES 2 credit hours A survey of current ethical and legal issues, such as copyright, that impact the development and use of multimedia instructional material. Lecture 2 hours.

2191-3 SPECIAL PROBLEMS IN MULTIMEDIA 1-3 credit hours Individual and group projects in multimedia. May be repeated with permission of the department chair. Independent study/directed readings 1-3 hours. Prerequisite: Permission of the department chair and faculty member supervising the project. May be taken for a maximum of 6 hours.

2803 CAPSTONE PROJECT 3 credit hours A reflection and expansion on the skills and knowledge gained from Technical-Occupational Specialty courses of the AAS in Multimedia Design program. Students’ written and oral communication skills will be assessed and they will develop their first portfolio of Multimedia Design skills. Capstone/lecture 3 hours. Prerequisite: MM 2123 or concurrent enrollment.

3013* ADVANCED COMPUTER GRAPHICS 3 credit hours A study of artistic elements and software techniques used to create advanced 2D/3D computer graphics for multimedia products. Lecture 2 hours, laboratory 2 hours. Prerequisite: MM 1013.

3023 WEB PUBLISHING AND GRAPHICS 3 credit hours This course helps students develop the creative and critical thinking skills required in a web/animation design
and development environment. Students learn to plan for and implement interactivity in their web and animation designs. They are required to incorporate a mixture of audio, video, graphics, and animation dependent on website objectives (e.g., marketing, instructing, or entertainment). Techniques for automating the design process will be covered. State-of-the-art web animation and web-development tools are introduced and used as the catalyst for learning. Lecture 2 hours, laboratory 2 hours. Prerequisite: Instructor permission.

3031 MOTION GRAPHICS I 1 credit hour Concepts and practice in developing motion graphics with special effects using a non-linear, 2D, layer-oriented editing system. Motion graphics will be combined with audio for use in 3D animation projects and displayed via electronic media. Students will animate, alter and composite media in 2D and 2.5D space with an editing system’s built-in tools and third-party plug-ins. Special attention will be given to basic editing skills and motion curves. Lecture 1 hour. Prerequisite: Sophomore status and Department permission.

3041 MOTION GRAPHICS II 1 credit hour Refinement of concepts and skills learned in MM 3031 with an emphasis on the use of 3D animation, spatial effects and 2.5D camera angle adjustment. Lecture 1 hour. Prerequisite: MM 3031.

3051 MOTION GRAPHICS III 1 credit hour A Competency-Based Learning course emphasizing the completion of a major project involving 3D animation and a motion graphics editing system. The project will demonstrate students’ readiness to pursue more advanced 3D animation and motion capture courses by demonstrating their motion graphic, modeling, and texturing skills. Lecture 1 hour. Prerequisite: MM 3041.

3063 3D ANIMATION AND MOTION CAPTURE I 3 credit hours Building on the skills from existing animation courses, students will be challenged to model objects (vehicles) with curved, aerodynamic features. Other areas of emphasis include modeling the human form and organic modeling techniques, modeling for motion, and the use of 3D geometry for accuracy of animation. Students will explore the capabilities of two or more motion capture systems. Lecture 2 hours, lab 2 hours. Prerequisite: Sophomore status, advisor permission, and either 1) AAS in an animation or motion graphics field or completion of a 2-year Great Plains Technology Center 3D Animation program, or 2) completion of MM 3051.

3073 3D ANIMATION AND MOTION CAPTURE II 3 credit hours Advanced animation post-production techniques and tools found in post-production software. Students will stitch together video clips, stills, and animations using editing, compositing, and composition techniques. Students will learn when it is appropriate to use 3D, video, still imagery, or motion graphics and in what combinations. In addition, basic theories and practices of post-production (including rendering solutions) and finalization of video and 3D animation will be covered. Lecture 2 hours, lab 2 hours. Prerequisite: MM 3063.

3113 DISTANCE LEARNING DEVELOPMENT 3 credit hours Development of multimedia instructional materials for distance learning using current technology. Lecture 2 hours, lab 2 hours. Prerequisites: MM 1143, MM 2033 or department permission.

3203 ADVANCED INSTRUCTIONAL DESIGN 3 credit hours An advanced course in instructional systems design (ISD) exploring the relationships between the ADDIE process and various ISD models. Also explored are learning theories underpinning ISD and their application in professional-level designs. Lecture 2 hours, laboratory 2 hours. Prerequisite: MM 1143.

3991-3 WORKSHOP 1-3 credit hours Multimedia workshops are designed to give intensive emphasis to a specific area of media design and development. Course may be repeated with a different topic for additional credit up to a maximum of 6 hours. Workshop 1-3 hours.

4003 ADVANCED AUTHORING 3 credit hours Advanced authoring using scripting languages. Lecture 2 hours, laboratory 2 hours. Prerequisites: MM 1154 and MM 3013 or concurrent enrollment.

4023 ADVANCED WEB COMMUNICATIONS 3 credit hours Advanced web authoring using programming languages. Lecture 2 hours, laboratory 2 hours. Prerequisite: MM 2033.

4191-3 ADVANCED PROBLEMS IN MULTIMEDIA 1-3 credit hours Individual and group projects in multimedia. May be repeated with permission of the department chair. Independent study/directed readings 1-3 hours. Prerequisite: Permission of the department chair and faculty member supervising the project. May be taken for a maximum of 6 hours.

4414 SIMULATION 4 credit hours Demonstration of effective methods for visualizing objects and data through designing and creating animations for use in video, multimedia and virtual environments. Lecture 2 hours, laboratory 4 hours. Prerequisite: MM 3013.

4804 CAPSTONE 4 credit hours A reflection on the skills and knowledge at the culmination of Multimedia Design studies. Students will work on teams to analyze requirements, design, implement, and test a large multimedia project suitable for publication. During the course, students will complete a portfolio demonstrating their multimedia design skills suitable for viewing by potential employers. In addition, students will work in and may manage a major project. They may complete a needs analysis, develop objectives and/or write specifications for an instructional, marketing, or entertainment product. They will also develop all or part of the product. Prerequisites: MM 4003 and completion or concurrent enrollment in MM 4414 and MM 4023.

TECHNOLOGY (TECH)

3000-3 TECHNOLOGY WORKSHOP 0-3 credit hours Designed to give intensive emphasis to a specific area of technology. May be repeated with a change of content for
a maximum of 6 hours credit. Lecture 0-3 hours.  
Prerequisite: Junior standing.  
**3013* TECHNICAL COMMUNICATIONS 3 credit hours**  
Principles of organizing information into clear and concise audience centered technical reports and presentations. Writing as a process, collaboration, and presentations are emphasized. Lecture 3 hours.  
Prerequisite: ENGL 1213 and Junior standing. (Fall)  
**4001-6 SCIENCE AND TECHNOLOGY INTERNSHIP 1-6 credit hours**  
Directed observation and on-the-job internship served in area directly related to the student’s major in the School of Graduate and Professional Studies. The job must be approved by the major advisor prior to starting the internship. Can be repeated for maximum of (6) hours credit. Internship 1-6 hours. Prerequisites: Major advisor permission.  
**4033 INDUSTRIAL MANAGEMENT SYSTEMS 3 credit hours**  
Study of the interrelationship of machines and employees in the workplace. Topics include facilities, equipment, constraints, and personnel management systems. Lecture 3 hours. Prerequisite: Junior standing.  
**4143 WORKPLACE SAFETY 3 credit hours**  
An in-depth study of the necessary skills for the improvement, expansion, and enrichment of employer health and safety policies to promote accident-free work experiences for American workers in various settings. Lecture 3 hours. Prerequisite: Junior standing.  
**4443 TECHNOLOGY CAPSTONE 3 credit hours**  
A culminating experience based on previous required major TECH coursework. Students will work individually and in teams to analyze technology issues through research and application. Capstone/lecture 3 hours. Prerequisite: TECH 3013; Prerequisite or Concurrent Enrollment: TECH 4033 and TECH 4143.  
**4491-3 INDEPENDENT STUDY IN TECHNOLOGY 1-3 credit hours**  
Assigned research, reading, and reports based on the needs of the individual student and directly related to the student’s technical specialty. Individual guidance will be provided by a faculty member. Independent study/directed readings 1-3 hours. Prerequisite: Department permission. The total number of hours earned in Independent Study may not exceed four.

DEPARTMENT OF EDUCATION

FACULTY

CHAIR
Dana Hilbert, Associate Professor

PROFESSORS
J. Dennis, C. Glazer, R. Hall, R. Vanderslice

ASSOCIATE PROFESSORS
H. Rice, E. Richardson, L. Robinson, M. Smith

ASSISTANT PROFESSORS
S. Garrett

MISSION STATEMENT
The Department of Education believes that competent, caring, and committed educators are successful in their careers.

- Educators who are competent use pedagogical and content knowledge to support learning for all, provide instruction based on standards and student needs, and use assessment and strategies for active engagement so that all can learn.
- Educators who are caring are responsive to individual needs and create learning environments that promote positive social interactions and motivation.
- Educators who are committed collaborate with others by using effective communication skills while being reflective decision makers and lifelong learners who are willing to change in order to continuously improve.

We believe that all of these qualities are fostered through standards-based coursework with coordinated field experiences.

PROGRAMS OF STUDY

Degrees & Majors:  B.S. Early Childhood Education  
B.S. Elementary Education  
M.Ed. Education  
- Literacy  
- Special Education  
- Teaching and Learning  
M.Ed. Reading  
M.S. Educational Leadership

GENERAL INFORMATION
The Department of Education at Cameron University is dedicated to producing COMPETENT, CARING, and COMMITTED educators who can successfully work with diverse students.

TEACHER EDUCATION
Teacher Education Programs at Cameron University are accredited by the Office of Educational Quality and Accountability and the National Council for the Accreditation of Teacher Education (NCATE). Approved graduates will be recommended for teaching licenses in the elementary and secondary schools of Oklahoma. Cameron University also holds membership in the American Association of Colleges for Teacher Education.

TEACHER LICENSING AND CERTIFICATION
Cameron University offers programs of study which prepare students to teach at the early childhood, elementary, elementary-secondary, and secondary levels. The student who satisfactorily completes such a course of study is recommended to the State Department of Education for an Oklahoma teaching license upon meeting state requirements for certification.

NOTE: Rules and regulations governing teacher education established by the Oklahoma State Regents for Higher Education, Office of Educational Quality and Accountability, Oklahoma State Board of Education, and the state legislature are being modified. The programs outlined in this catalog meet current interpretation of these policies. Students should frequently check with their advisors for up-to-date information regarding teacher education.

Early Childhood (PK-3)
Cameron University offers a Teacher Education program to prepare students to teach at PK-3 level in the schools of Oklahoma.

Early Childhood Education majors must demonstrate foreign language proficiency (listening and speaking) at the novice-high level. (Please contact department for details).

Elementary (1-8)
Students majoring in Elementary Education may be recommended for a Standard Oklahoma Elementary Teaching License. See the catalog section which deals with the Department of Education.
Elementary Education majors must demonstrate foreign language proficiency (listening and speaking) at the novice-high level. (Please contact department for details).

Secondary
Students attending Cameron University may pursue programs of study for an Oklahoma teaching license at the secondary level. Teacher Education programs are available to Cameron students in the following areas: English and Social Studies.
Secondary Education majors must demonstrate foreign language proficiency (listening and speaking) at the novice-high level. (Please contact department for details).

Elementary–Secondary (PK-12)
Students may pursue a program of study in Music, which will allow them to be recommended for a teaching license for the elementary-secondary levels. For a list of the required courses in this field of specialization, refer to the specific discipline area in this catalog.
Elementary-Secondary Education majors must demonstrate foreign language proficiency (listening and speaking) at the novice-high level. (Please contact department for details).

Admission to Teacher Education
Admission to teacher education is achieved through a formal process. Requirements for admission to Teacher Education are as follows:

a. A grade of C or better in: ENGL 1113, ENGL 1213, COMM 1113, MATH 1413 or higher, HIST 1483 or 1493, PS 1113 and 2 Humanities.
b. A grade of S in EDUC 1800.
c. Concurrent enrollment OR a grade of C or better in EDUC 3003, EDUC 3733, Science (Biological or Physical Science). (Students concurrently enrolled in EDUC 3003 must provide a grade check of C or better.)
d. Passing scores on the Nelson Denny reading test (taken during Intro class) and OGET.
e. Maintain GPA of 2.5 at all times.
f. Passing score on EDUC 3003 Lesson Plan Rubric.
g. Three positive recommendations with unit dispositions.
h. Satisfactory completion of entry interview.
*Students must maintain a GPA of 2.5 or better to remain in Teacher Education program. See the Office of Teacher Education for criteria for re-admission.

STUDENT ORGANIZATIONS
Cameron University Council for Exceptional Children (CUCEC)
CUCEC is a student chapter of the Council for Exceptional Children. The dues include two journals. This group meets monthly and students attend one state meeting a year. In addition to the meetings there are activities with children with disabilities. Anyone who is interested is eligible for membership and encouraged to participate.

Kappa Delta Pi
The mission of Kappa Delta Pi is to sustain an honored community of diverse educators by promoting excellence and advancing scholarship, leadership, and service. The vision of Kappa Delta Pi is to help committed educators be leaders in improving education for global citizenship. Individually and collectively, Society members recognize and honor achievement; strive to a high degree of professional fellowship, leadership, and growth in the field of education; and serve their students and educational community.

Students in Early Childhood Education (SECE)
SECE promotes the development of Early Childhood Education students and provides opportunities for those who are going to become educators of young children.

Student Oklahoma Education Association (SOEA)
SOEA promotes the development of professional attitudes among students preparing to enter the teaching profession.
# Degree Plan: Early Childhood Education (355)–Bachelor of Science

**School of Graduate and Professional Studies**

2019-2021 UNDERGRADUATE CATALOG
COURSE DESCRIPTIONS

EARLY CHILDHOOD EDUCATION & CARE (ECEC)

1113 CHILD GROWTH AND DEVELOPMENT 3 credit hours The principles of physical, intellectual, emotional, social and linguistic development of children from diverse cultural backgrounds are studied. Lecture 3 hours. (Spring)

1123 INTRODUCTION TO EARLY CARE AND EDUCATION 3 credit hours An introduction to the profession of early childhood education focusing on developmentally appropriate practices, types of programs, historical perspectives, ethics, current issues, and what it means to be a professional. Lecture 3 hours. (Fall)

1213 CURRICULUM RESOURCES AND ACTIVITIES 3 credit hours The course focuses on a developmentally appropriate activity-oriented approach to curriculum for young children. Lecture 3 hours. (Fall)

1223 CHILD GUIDANCE 3 credit hours An exploration of common behavioral problems of young children with emphasis on positive guidance techniques. Lecture 3 hours. (Fall)

2211 SCHOOL AGE PRACTICUM 1 credit hour Supervised practical experiences with school age children (5-8 years) in the workplace. This course requires 100 clock hours in the workplace. Practicum 1 hour. Prerequisites: ECEC 1213 or concurrent enrollment and consent of instructor, which includes arrangements for the practicum site prior to enrollment.

2881-3 SPECIAL TOPICS 1-3 credit hours Directed individual or group study of selected topic(s) in Early Childhood Education Care. The course may be repeated for additional credit with department permission. Lecture 1-3 hours. Prerequisite: as listed for each separate offering and/or department permission.

3233 LITERACY FOR CHILDREN 3 credit hours A study of principles, methods, and materials for helping young children develop literacy using developmentally appropriate practices. The course focuses on emergent literacy best practices through the examination and application of current research in early literacy. Lecture 3 hours. (Spring)

4223 ADMINISTRATION OF EARLY CHILDHOOD PROGRAMS 3 credit hours An in-depth study of the management procedures for operating, supervising, and evaluating programs for young children. Lecture 3 hours. (Fall)

4333 DEVELOPMENTAL ASSESSMENT AND OBSERVATION 3 credit hours Students will explore observation and assessment instruments, as well as recommended practices and available resources for infants, toddlers, and preschoolers. Content includes an emphasis on observing young children and assessing their early childhood learning environments. Lecture 3 hours. (Spring)

EARLY CHILDHOOD EDUCATION (ECE)

2163 HEALTH, SAFETY AND NUTRITION FOR YOUNG CHILDREN 3 credit hours A course for students working in an early childhood educational setting, for child care givers, and for adults and parents who desire additional information about current concepts in the fields of health, safety, and nutrition and their relationship to the young child. Lecture 3 hours. (Spring)

3154 METHODS AND PRACTICUM IN EARLY CHILDHOOD EDUCATION 4 credit hours Methods and practice in instruction and guidance of young children. Emphasis on developmental processes and motor skills. A field component is required. Lecture 3 hours. (Fall)

3303 HOME, SCHOOL AND COMMUNITY 3 credit hours Overview of the impact of home, school, and community relationships as they affect the total educational experience of the child from birth through age eight. Examines the importance of parental involvement in the schools and a variety of community resources available to both educators and parents that enhance the educational experiences of the child. Techniques to develop and maintain home, community, and school communications will be explored. Lecture 3 hours. (Fall)

3801-3 WORKSHOP IN EARLY CHILDHOOD EDUCATION 1-3 credit hours Course designed to give intensive emphasis of specific topic(s) related to early childhood education. May be repeated with different topics for a total of 3 hours. Workshop 1-3 hours. Prerequisite: Junior standing.

3841-3 SELECTED TOPICS IN EARLY CHILDHOOD EDUCATION 1-3 credit hours Directed study on a special subject or problems in early childhood education. May be repeated with different topics for a total of 3 hours. Independent study/directed readings 1-3 hours. Prerequisite: Junior standing.

4144 METHODS AND PRACTICUM IN COGNITIVE DEVELOPMENT 4 credit hours Focuses on designing and delivering appropriate experiences in early literacy, math, science, social studies and language for the young child. Additionally requires field experience in early childhood settings arranged with instructor. Lecture 4 hours. Prerequisite or concurrent enrollment with: ECE 2163, ECE 3303, and ECE 3154. (Spring)

4653 ASSESSMENT OF YOUNG CHILDREN 3 credit hours Includes selection, design, administration, and interpretation of a variety of assessment methods, including alternative, authentic assessment of young children. Focuses on current research and practical guides for integrating assessment with teaching. Use of assessment results to make instructional decisions, plan instructional activities and develop appropriate grading practices. Communication of results to students, parents, educators, and the community. Lecture 3 hours. Prerequisite: Admission to Teacher Education.
**EDUCATION (EDUC)**

**1800 EDUCATION INTRODUCTORY SEMINAR** 0 credit hours A required seminar for all declared education majors to be taken before admission to teacher education. Provides overview of the teacher education program's conceptual framework, academic requirements, certification requirements and guidelines for development of the professional portfolio. Seminar 0 hours.

**2881-3 SELECTED TOPICS IN EDUCATION** 1-3 credit hours Directed individual or group study of selected topics in education. The course may be repeated for additional credit with departmental permission. Independent study/directed readings 1-3 hours. Prerequisite: as listed for each separate offering and/or departmental permission.

**3003* INTRODUCTION TO TEACHING** 3 credit hours An introductory course in education; prerequisite to most education courses; introduces students to role of education in a democratic society, basic principles and techniques of teaching, scope and organization of public school system in the United States, and place of teacher in school and community. Additionally requires field component in the public schools. Lecture 3 hours. Prerequisite: ENGL 1113.

**3013* CULTURAL FOUNDATIONS OF EDUCATION** 3 credit hours A survey of the development of education in the United States with emphasis on the influence of culture on educational theory and practice. Both philosophies and practices historically dominant in education in the United States and perspectives arising from cultural diversity will be explored. Lecture 3 hours.

**3023 CREATIVE EXPERIENCES FOR EARLY CHILDHOOD AND ELEMENTARY SCHOOL: AN INTEGRATED APPROACH** 3 credit hours The study of art, music, drama, and dance appropriate for early childhood and elementary school children. Emphasis will be placed on the fundamentals of art, music, drama, and dance as well as the integration of aesthetic and creative experiences into the elementary curriculum. Lecture 3 hours. (Fall, Spring)

**3513 TEACHING PRIMARY READING** 3 credit hours Principles and practice of teaching reading grades K through 3 with emphasis on emerging literacy, phonics, and other beginning reading skills. Lecture 3 hours. Prerequisite or concurrent enrollment: LIBS 3423. (Fall, Spring)

**3533 TEACHING INTERMEDIATE/MIDDLE SCHOOL READING** 3 credit hours Principles and practices of teaching reading in grades 4 through 8 with emphasis on development of vocabulary and comprehension and the place of literature in the reading program. Lecture 3 hours. Prerequisite or concurrent enrollment with: EDUC 3513. (Spring)

**3612 CLASSROOM MANAGEMENT** 3 credit hours The study of effective practices of classroom management, motivation, and disciplinary methodologies. Lecture 2 hours. Prerequisite: admission to professional semester.

**3673 MEDIA AND TECHNOLOGY IN EDUCATION** 3 credit hours The study of Instructional Technology as a theory and practical process for aiding in the learning process. The course includes techniques and technology used in planning, selection, production, utilization, and evaluation of a variety of instructional materials and computer-related technologies. Lecture 3 hours.

**3733* DEVELOPMENTAL PSYCHOLOGY** 3 credit hours A survey of the physical, mental, social, moral, and emotional development of the individual from conception through adolescence. For students in Teacher Education programs. Will not count toward major or minor in Psychology. Lecture 3 hours. Prerequisite: PSY 1113.

**3753* EDUCATIONAL PSYCHOLOGY** 3 credit hours Introduction to the behavioral and cognitive sciences in education; application of current research and theories of learning, intelligence and motivation to classroom practice. Additionally requires field component in the public schools. Lecture 3 hours. Prerequisites: EDUC 3733 and admission to Teacher Education.

**3881-2 WORKSHOP** 1-2 credit hours Course designed to give intensive emphasis of specific topic(s) related to elementary and/or secondary education. May be repeated for a maximum of 4 hours credit. Workshop 1-2 hours. Prerequisites: Junior standing and department permission.

**4313 PRACTICUM IN ASSESSMENT AND INSTRUCTION** 3 credit hours A pre-service teaching experience in the public school, taught in conjunction with a lecture class on campus. Observation and participation under public school teacher guidance. Additionally, requires (60) sixty hours field component in the public schools. Practicum 3 hours. Prerequisite: Admission to Teacher Education and completion of EDUC 4653 or ECE 4653 with a grade of C or better.

**4423 LANGUAGE ARTS METHODS** 3 credit hours An elementary methods course emphasizing language arts integrated with other content areas. Focus on listening, speaking, reading, writing, viewing and visually representing with elementary school applications. Lecture 3 hours. Prerequisite: Admission to Teacher Education. (Spring, Odd Years)

**4443 SOCIAL STUDIES METHODS** 3 credit hours An elementary methods course emphasizing social studies integrated with other content areas. Focus on history, geography, economics, sociology, anthropology, and civics with intermediate/middle school applications. Lecture 3 hours. Prerequisite: Admission to Teacher Education. (Fall)

**4463 MATHEMATICS METHODS** 3 credit hours An elementary methods course emphasizing mathematics integrated with other content areas. Focus on arithmetic and mathematical processes with elementary school applications. Additionally requires a supervised field
component. Lecture 3 hours. Prerequisite: Admission to Teacher Education. (Fall, Spring)

**4483 SCIENCE METHODS 3 credit hours** An elementary methods course emphasizing science integrated with other content areas. Focus on physical, life, and earth disciplines of science with elementary school applications. Lecture 3 hours. Prerequisite: Admission to Teacher Education. (Summer)

**4553 DIAGNOSIS AND REMEDIATION OF READING DIFFICULTIES 3 credit hours** A study of reading difficulties and techniques of remediation of such difficulties. Additionally requires 10 hours supervised field component with a child with reading problems. Lecture 3 hours. Prerequisites: EDUC 3513 and admission to Teacher Education. (Fall, Spring)

**4653 CLASSROOM ASSESSMENT 3 credit hours** Selection, design, administration, and interpretation of a variety of assessment methods. Use of assessment results to make instructional decisions, plan instructional activities, and develop appropriate grading practices. Communication of results to students, parents, educators, and the community. Lecture 3 hours. Prerequisite: Admission to Teacher Education or EDUC 3003 and Departmental Permission.

**4881-3 SELECTED TOPICS IN EDUCATION 1-3 credit hours** Directed group study on a special subject or problem, based upon existing methods and/or instructional techniques which are applicable to teaching in all content areas. Independent study/directed readings 1-3 hours. Prerequisite: EDUC 3003. May be repeated with department permission.

**4891-3 SPECIAL STUDIES 1-3 credit hours** Directed individual study in selected areas of education through research, readings, reports and/or on-site internship. Evaluation will be based on completion of an approved plan of study, with conferences and/or written reports. May be repeated for a total of 3 hours credit. Independent study/directed readings 1-3 hours. Prerequisites: Junior standing and department permission.

**4935 CLINICAL EXPERIENCE IN TEACHING I 5 credit hours** Education preparation program majors engage in full-time clinical/student teaching experiences with particular emphasis on the learner and learning context, content knowledge, and instructional practice under the supervision and guidance of a mentor teacher and university supervisor. A professional education seminar is included. Clinical Practice 5 hours. Prerequisite: Admission to professional semester.

**4945 CLINICAL EXPERIENCE IN TEACHING II 5 credit hours** Education preparation program majors engage in full-time clinical/student teaching experiences with particular emphasis on instructional practice, professional responsibility, and connecting theory to practice under the supervision and guidance of a mentor teacher and university supervisor. A professional education seminar is included. Clinical Practice 5 hours. Prerequisite: Admission to professional semester.

**LIBRARY SCIENCE (LIBS)**

**3423* CHILDREN’S LITERATURE 3 credit hours** General survey of the literature available for children. Criteria for evaluation of materials in terms of needs, interests, and abilities of children. Methods of selecting books and introducing them to children. Lecture 3 hours. (Fall, Spring)

**READING (READ)**

**0223 READING FUNDAMENTALS** Developmental course, no credit. This course is designed to improve the student’s ability to read academic materials, by learning to apply a step-by-step academic reading process and improving skills in critical reading and thinking. DOES NOT COUNT TOWARD GRADUATION. Lecture 3 hours.

**SPECIAL EDUCATION (SPED)**

**2103 THE YOUNG CHILD WITH SPECIAL NEEDS 3 credit hours** This course introduces teachers, service providers and paraeducators to early childhood special education and intervention methods. The course will focus on children from birth to age five who are at risk for school success due to such factors as congenital disorders, developmental problems, and environmental factors such as poverty, abuse, and cultural linguistic differences. License 3 hours. (Spring)

**3103* THE EXCEPTIONAL CHILD 3 credit hours** Introduces pre-service teachers to characteristics, problems and special needs of exceptional children with specific application to the education of special needs students in general education classrooms (inclusion). Includes adaptation of curriculum and materials by the regular classroom teacher for students with exceptionalities and methods for teaching exceptional children and youth. Additionally requires ten (10) hour field component. Lecture 3 hours. Prerequisite or Concurrent Enrollment: EDUC 3733 or PSY 3353.

**3203 CHARACTERISTICS OF EXCEPTIONAL CHILDREN 3 credit hours** A comprehensive overview of the characteristics of all exceptional children (Mild-Moderate and Severe-Profound/Multiple Disabilities), the influence of the disability and other factors on the learning, behavior, and social interaction skills of students. Also requires a 4 hour field component. Lecture 3 hours.

**3223 ASSESSMENT AND EVALUATION IN SPECIAL EDUCATION 3 credit hours** Psychological and educational diagnostic evaluation of exceptional learners. Study of assessment instruments: their construction, selection, administration, use in diagnosis and placement of exceptional individuals (ages 0-21). Lecture 3 hours.

**3243 BEHAVIOR INTERVENTION AND MANAGEMENT 3 credit hours** Methods for managing behavior problems and developing social-emotional skills including behavior modifications, precision teaching techniques, organization of classroom and materials to promote student learning, methods to motivate students, and contingency contracting. Lecture 3 hours.
3263 Foundations of Special Education 3 credit hours Philosophical, historical and legal foundations of special education. Professionalism, ethical practices, individualized education plans, least restrictive environment, and communication and collaboration skills will be addressed. Lecture 3 hours.

3803 Special Topics in Special Education 3 credit hours Topics of special interest in special education. May be repeated once with a change of topic. Prerequisite: Department permission. Lecture 3 hours.

3821-3 Workshop in Special Education 1-3 credit hours Selected educational procedures and policies and/or activities for use in classrooms. Course may be repeated with different topics. May be repeated for a maximum of 4 hours credit. Lecture 1-3 hours. Prerequisites: Junior standing and department permission.

4413 Teaching Students with Mild/Moderate Disabilities 3 credit hours Techniques of diagnosis and remediation of learning problems in academic areas with emphasis on reading, language arts, mathematics and functional academics. The application of educational interventions and how to locate, construct, select, use, and evaluate media and materials, including assistive and adaptive devices. The course also equips participants with skills needed for instructional programming and improving behavior for students who are behaviorally challenged. Also requires a 4 hour field component. Lecture 3 hours. Prerequisite: SPED 3203 or department permission.

*Liberal arts and sciences course.
DEPARTMENT OF PSYCHOLOGY

FACULTY

CHAIR

INSTRUCTORS
K. Stephens

MISSION STATEMENT
The mission of the Department of Psychology at Cameron University is to prepare the diverse student body for entry level and advanced positions in the field of psychology, family studies, research, and service; to provide education that is focused on the principles of psychology and counseling that apply to work, family and responsible citizenship; and to prepare students for further education in the field, licensure, or related careers in order to support the cultural life and economic development of the region.

PROGRAMS OF STUDY
Degrees & Majors:  B.S. Family and Child Studies
                  B.S. Psychology
                  M.S. Behavioral Science
                  • Counseling
                  • General Psychology
                  • Marriage and Family

GENERAL INFORMATION
Psychology is the scientific study of human and animal behavior. Psychologists are interested in such diverse areas as drug addiction, obesity, sexual behavior, attitudes toward smoking, learning, individual growth, and adjustment, motivation, mental retardation, aggression, the dynamics of group behavior, physical performance, dreaming, memory, psychological disorders, and counseling. Psychology is a diverse field with both scientific and professional aspects. As a science, psychology focuses on research: psychologist collect, quantify, analyze and interpret data describing human and animal behavior. As a profession, psychology focuses on the application of knowledge, skills and techniques to solve individual and social problems. Possible careers with a bachelor degree in Psychology include case manager, social worker, career counselor, rehabilitation specialist, and psychiatric technician.

The Psychology Department at Cameron University is dedicated to preparing students for the professional world and for graduate school. We have high standards, and we work with our students to reach those standards.

Students have the opportunity to work with faculty members to do research and possibly publish or present the research. Research interests of the faculty include general experimental psychology, social psychology, developmental psychology, cognitive psychology, counseling psychology, and neuropsychology.

STUDENT ORGANIZATION
Psi Chi (Psychology)
Psi Chi is the national psychology honor society established to promote the field of psychology and to recognize students for their scholastic excellence in the field.
### General Education Requirements–44–46 hours

<table>

### General Education Non-PE Electives (To total at least 44 hours, if needed)*

- General education electives must be selected from the list of approved general education courses, exclusive of those with the PE prefix (http://www.cameron.edu/catalog/general_ed.html.)

### University Requirements

- UNIV 1001 or 1113–1–3 hours
- Computer Literacy–CIS 1013 or EDUC 3673
- Capstone Experience–FAMS 4702

### Major Requirements–56 hours

#### Required Courses–47 hours

- **Early Childhood Education (3 hours)**
  - ECE 2163 Hlth, Safety & Nutrition for Young Children (SP)
- **Early Childhood Education and Care (21 hours)**
  - ECEC 1113 Child Growth & Development (SP)
  - ECEC 1123 Intro to Early Care & Education (FA)
  - ECEC 1213 Curriculum Resources & Activities (FA)
  - ECEC 1223 Child Guidance (FA)
  - ECEC 3233 Literacy for Children (SP)
  - ECEC 4223 Administration of Early Childhood Programs (FA)
  - ECEC 4333 Developmental Assessment & Observation (SP)
- **Education (3 hours)**
  - EDUC 3023 Creative Experiences for ECE/El Sch (FA, SP)

- **Family Science (11 hours)**
  - FAMS 1123 Family Relations (FA, SP)
  - FAMS 3143 Parenthood Education (SP)
  - FAMS 4333 Current Issues in Family Diversity (FA, SP)
- **Psychology (6 hours)**
  - PSY 3363 Psychology of Early & Middle Childhood (FA)
  - PSY 3373 Psy of Adolescence & Emerging Adulthood (SP)

- **Special Education (3 hours)**
  - SPED 2103 The Young Child with Special Needs (SP)

#### Major Electives–9 hours

Select from the following list (Min. 5 hours upper division courses):

- ECEC 3303 Home, School & Community
- FAMS 4143 Crisis Management and Resources
- LIBS 3423 Children’s Literature
- SOCI 4403 Family Violence

### Minor Requirements–18 hours

For a full list of available minors, see: http://www.cameron.edu/catalog/minors.html.

### General Electives–to Complete 124 hours

### Graduation Requirements

- Department Requirements
- Minimum 124 Total Credit Hours
- Minimum 40 Upper Division Credit Hours
- Minimum 55 Liberal Arts & Science Credit Hours
- Minimum 30 Credit Hours in Residence at Cameron
- Minimum 60 Credit Hours at a 4-Year Institution
- Minimum 1/2 of Major Upper Division Hours Completed at CU
- Minimum 15 of last 30 Credit Hours or 1/2 of Major Completed at CU
- Retention GPA 2.0
- Cameron GPA 2.0
- Complete Graduation Application Online

COURSE DESCRIPTIONS

FAMILY SCIENCE (FAMS)

1123* FAMILY RELATIONS 3 credit hours An examination of research, issues, challenges, opportunities, and trends relating to family interaction and decision making over the life-span. Lecture 3 hours. General Education, Behavioral Science. (Fall, Spring)

2153* HUMAN SEXUALITY 3 credit hours A general investigation of human sexuality against a background of changing sexual mores for physiological, psychological, and sociological perspective. Exploration of current issues and implication for future trends in human interaction. Special emphasis on the development of healthy interpersonal relationships. Lecture 3 hours.

3143* PARENTHOOD EDUCATION 3 credit hours Education as to the decisions, responsibilities and social issues related to parent-child relationships. Understanding the role of the parent with emphasis on communication, creativity and discipline. Lecture 3 hours. Lecture 3 hours. Prerequisite: FAMS 1123, junior standing or permission of the department. (Spring)

4123* MARRIAGE 3 credit hours Identification and analysis of stressors in contemporary marriages. Strategies for enrichment will be emphasized. Lecture 3 hours. Prerequisite: FAMS 1123 or PSY 1113.

4133* MIDDLE AND LATER ADULT YEARS 3 credit hours Emphasis on development processes and generational relationships. Individuals in middle and later stages of the family life cycle will be studied. Changing family composition, role transitions, support systems and potentials for enhancement will also be investigated. Lecture 3 hours. Prerequisite: FAMS 1123 or PSY 1113 or SOCI 1113.

4143* CRISIS MANAGEMENT AND RESOURCES 3 credit hours Examination of crisis and management theories and strategies used to help individuals and families deal productively with crises producing situations. Identification and mobilization of pertinent personal, family, and community resources. Lecture 3 hours. Prerequisite: Junior standing or permission of the department.

4163 HEALTHY AGING 3 credit hours Emphasis on demographic changes due to longevity; differences between aging and illness; and effects of aging that may be reversible. Lecture 3 hours. Prerequisite: Prerequisite: FAMS 1123 or PSY 1113.

4173 FUNCTIONAL FAMILY SYSTEMS 3 credit hours Emphasizes the family unit as a communicational, instructional, and interactional system. Lecture 3 hours. Prerequisite: FAMS 1123, junior standing, or permission of the department.

4333 CURRENT ISSUES IN FAMILY DIVERSITY 3 credit hours An in-depth study of the historical, current, and projected demographic trends of American families. Students will examine the impact of increasing cultural diversity of American families on family theory, research, and service delivery. Lecture 3 hours. Prerequisite: FAMS 1123. (Fall, Spring)

4702 FIELD EXPERIENCE IN CHILD CARE 2 credit hours Supervised study and field experience in a child care facility. Internship/field experience/capstone 2 hours. Prerequisite: Approval from Family and Child Studies major advisor, ECEC 1213, ECE 2163, ECEC 3233, EDUC 3023, ECEC 4333, and ECEC 4223. (Fall, Spring)

4801-4 FIELD EXPERIENCE IN FAMILY SCIENCE 1-4 credit hours Supervised study and/or work experience in the field relating to the student's special interest or area of concentration. Internship/field experience 1-4 hours. Prerequisite: Permission of the department.

4881-4 INDEPENDENT STUDY IN FAMILY SCIENCE 1-4 credit hours Directed research and intensive study on selected problems or special topics. No more than four credit hours of independent study may be counted toward the requirements for a major in the department. Independent study/directed readings 1-4 hours. Prerequisite: Permission of the department.

4901-3 SEMINAR IN FAMILY SCIENCE 1-3 credit hours A course designed to meet the special needs within the department. May be repeated with a different topic for a total of 6 hours. Seminar 1-3 hours. Prerequisite: Permission of the department.

PSYCHOLOGY (PSY)

1113* GENERAL PSYCHOLOGY 3 credit hours A study of the basic facts and principles of behavior. Lecture 3 hours. General Education, Behavioral Science. (Fall, Spring)

2001-3* SELECTED TOPICS IN PSYCHOLOGY 1-3 credit hours Contemporary and historical concerns of Psychology are explored. A different topic may be presented each semester. Lecture 1-3 hours. Prerequisite: PSY 1113.

2113* HISTORY OF PSYCHOLOGY 3 credit hours A study of modern psychology as a science with emphasis on past and present schools of psychological thought. Lecture 3 hours. Prerequisite: PSY 1113. (Fall, Spring)

2223* APPLIED PSYCHOLOGY 3 credit hours Psychological principles in relation to problems of Business, Industry, Education, Mental Health, or other human enterprises. Lecture 3 hours. Prerequisite: PSY 1113.

2373* INTRODUCTION TO HEALTH PSYCHOLOGY 3 credit hours Comprehensive inquiry focusing on the branch of psychology that concerns individual behaviors and lifestyles affecting a person's physical health. Professional issues, gender and cultural issues, within an application orientation include: enhancement of health, the prevention and treatment of disease, the identification of health risk factors, the improvement of the health care system and the shaping of public opinion with regard to health. Lecture 3 hours. Prerequisite: PSY 1113.

3313* COGNITIVE PSYCHOLOGY 3 credit hours Examines cognition involving language, thinking, problem solving, memory, intelligence, and categorization. Lecture 3 hours. Prerequisite: PSY 1113.
3333 COUNSELING AND CLINICAL PSYCHOLOGY 3 credit hours An introduction to the helping profession for students considering counseling or clinical psychology as a career. Lecture 3 hours. Prerequisite: PSY 1113.

3353* LIFESPAN HUMAN GROWTH AND DEVELOPMENT 3 credit hours Survey of the psychological changes across the life span. Cognitive, social, emotional, and physical changes from birth to death will be examined. Lecture 3 hours. Prerequisite: PSY 1113. (Fall, Spring)

3363* PSYCHOLOGY OF EARLY AND MIDDLE CHILDHOOD 3 credit hours An in-depth study of the theories, research, and findings in the biological, psychological, and social development of early and middle childhood (conception to age 11). Prerequisite: PSY 1113. (Fall)

3373* PSYCHOLOGY OF ADOLESCENCE AND EMERGING ADULTHOOD 3 credit hours An in-depth study of the theories, research, and findings in the biological, psychological, and social development of adolescence and emerging adulthood (ages 12-30). Prerequisite: PSY 1113. (Spring)

3383* SOCIAL PSYCHOLOGY 3 credit hours The study of human behavior as affected by social stimuli. Lecture 3 hours. Prerequisite: PSY 1113.

3413* PSYCHOLOGY OF LEARNING 3 credit hours Investigations into the processes of learning in humans and animals. Emphasis is given to behavioral and cognitive approaches. Lecture 3 hours. Lecture 3 hours. Prerequisite: PSY 1113. (Fall, Spring)

3423 APPLIED QUANTITATIVE METHODS 3 credit hours A strong emphasis will be placed on inferential procedures used in published articles in psychological journals. Topics include correlational testing, linear regression, simple and factorial ANOVAs, tests for outliers, normalcy, randomness, heterogeneity of variance, and post-hoc analysis. Lecture 3 hours. Prerequisites: PSY 1113 and STAT 1513. (Fall, Spring)

3453 QUANTITATIVE ANALYSIS AND INTERPRETATION 3 credit hours A strong emphasis will be placed on inferential analysis and interpretation procedures used in published articles in psychological journals. Students will become familiar with various software packages (e.g., Excel, SPSS, and PowerPoint) and their use in the analysis and interpretation process. Analyses, interpretation, and presentation of independent and dependent t-tests, correlation testing, linear regression, simple and factorial ANOVAs, tests for outliers, normalcy, randomness, heterogeneity of variance, and post-hoc analyses will be included. Prerequisites: A grade of "C" or higher in PSY 3423.

4313 PSYCHOLOGICAL TESTING 3 credit hours A general survey of the principles, backgrounds, and procedures of psychological testing. Attention is given to interpretation of measuring instruments in the fields of personality and intelligence. Lecture 3 hours. Prerequisite: PSY 1113.

4323* SENSATION AND PERCEPTION 3 credit hours An in-depth study of the biological properties of sensory systems and major phenomena in sensation and perception (e.g., adaptation, brightness, color and binocular vision, audition, taste, touch, imagery, individual differences, time and motion, attention and theories of psychophysical judgment including STD and classical). Lecture 3 hours. Prerequisite: PSY 1113.

4331-3 SEMINAR IN PSYCHOLOGY 1-3 credit hours Specific problems or issues of concern to Psychology are given in depth exploration and analysis. A different topic may be presented each semester. (May be repeated for a total of six hours credit.) Seminar 1-3 hours.

4363* ABNORMAL PSYCHOLOGY 3 credit hours The study of various abnormalities as described in DSM. Lecture 3 hours. Prerequisite: PSY 1113. (Fall, Spring)

4393* PERSONALITY 3 credit hours Factors determining and affecting personality, its development and assessment. Lecture 3 hours. Prerequisite: PSY 1113. (Fall, Spring)

4423 EXPERIMENTAL PSYCHOLOGY 3 credit hours Studies in the major designs, methods employed and problems in conducting experiments in psychological research. Lecture 3 hours. Prerequisite: PSY 1113. (Fall, Spring)

4433 PSYCHOLOGICAL RESEARCH 3 credit hours Students will design and conduct a psychological research project of sufficient quality for conference presentation. Material covered will include APA format research ethics, data analysis and conference presentation preparation. Lecture/capstone 3 hours. Prerequisites: PSY 1113, grade of "C" or higher in PSY 3423, and grade of "C" or higher in PSY 4423. (Fall, Spring)

4443* BIOPSYCHOLOGY 3 credit hours Explains behavior in terms of the physiological events inside the body with emphasis on vision, audition, psychoactive drugs, eating, sex, and sleep. Lecture 3 hours. Prerequisite: PSY 1113.

4453 PROFESSIONAL RESEARCH IN PSYCHOLOGY 3 credit hours Students will work individually with a department faculty member to develop and present a psychological research project of professional quality. The presentation will take place as a conference paper, conference poster, or by submission of a manuscript to a peer-reviewed psychological journal. Independent study/directed readings 3 hours. Prerequisite: PSY 4423.

4501 PSYCHOLOGY OF LOVE 1 credit hour This workshop focuses on the psychological theories of love relationships within heterosexual relationships in marriage, courting, dating, attraction, cohabitation, and such. Theoretical models of Fehr, Lee, Rubin, Kelley, Grey, Smalley, Harley, and others are discussed. Seminar 1 hour.

4511 DIFFERENCES IN RELATIONSHIPS BETWEEN MEN AND WOMEN 1 credit hour We always hear the words "he said...she said" in relationships between the sexes. In this workshop we investigate the many differences in relationships between a man and a woman.
involving friendship, dating, courtship, engagement, marriage, parenting, attraction, jealousy, sex, thought-processing, needs assessment, separation models, and infidelity issues. Seminar 1 hour.

4521 PSYCHOLOGY OF DREAMING 1 credit hour This workshop focuses on the psychological theories of dreams according to Freud, Jung, Adler, and other theorists. Other areas will include sleep stages and physical characteristics influencing psychological dream states. Seminar 1 hour.

4531 STEPFAMILIES 1 credit hour Even Cinderella had to deal with step-sisters. Divorce or death, and then remarriage involves many new complexities and relationships. This workshop investigates the family dynamics of step-families, relationships in step-families, step-parenting, power and equality within the blended family, children's issues of "intact and step" relationships, financial pressures in step-families, and issues involved in being the step-child. Seminar 1 hour.

4541 BOYS TO MEN: THE CREATION OF MASCULINITY IN LITTLE BOYS 1 credit hour "Me Tarzan... You Jane!" Mothers, watch out. Your little boy wants to grow up. The student will investigate the masculine needs of the male gender and developmental stages involving male maturity, as well as the issues that surround this wonderful part of life! The student will be challenged to look at concepts and theoretical models portraying boys that are "wild at heart" and the boy's need to "capture the key" from their mothers to run with the "wild man." Seminar 1 hour.

4551 PARAPSYCHOLOGY 1 credit hour This course has been designed to cover one of the (sometimes) controversial areas of psychology, that of parapsychological phenomenon. We will first study how each of the phenomena is defined, and then look at the research supporting that area, as well as some of the criticisms that have arisen. Seminar 1 hour.

4561 PSYCHOLOGY OF BEHAVIORAL ADDICTION 1 credit hour Ever hear "I just can't stop" or "It doesn't hurt me or anyone else" or "Why don't I change"? This workshop will investigate many aspects and concepts of "Behavior Addiction" in a psychological reference. Gambling, sex, internet and cell phone use, shopping, video games, food, and such are just a few areas of discussion. The student will dive into the theoretical study of personality, family, relationships, compulsiveness, pleasure and arousal, rituals, and other concepts to study the addiction cycle and to gain more knowledge of this topic. Seminar 1 hour.

4571 PSYCHOLOGY OF FEAR 1 credit hour "Lions, Tigers and Bears... Oh MY!!!" Why do we show fear? Why do we show fear when we shouldn't? This seminar investigates the psychological theories of fear, the five basic types of fears, categorization of fear and phobia, biological and neurological concepts of fear, social learning and conditioning of fear, fear addiction and magnetism, and overcoming fear. Seminar 1 hour.

4581 ANGER MANAGEMENT 1 credit hour Anger is neither good nor bad. Anger is a resource, and signal, letting us know that something needs to change. Anger is a tool it can manipulate. It can protect. Anger is something that we feel, both emotionally, and physically. When we are angry, we are some-other-emotion, too. This workshop will discuss the effective techniques that can be used to manage anger. Seminar 1 hour.

4591 ANXIETY AND DEPRESSION MANAGEMENT 1 credit hour Anxiety and depression are powerful human emotions that many people have experienced at one time or another. Cognitive-Behavioral (basically thinking and action oriented) treatment approaches, which can help an individual learn to manage his or her life, as well as other treatment approaches will be discussed in this workshop. Seminar 1 hour.

4601 INFIDELITY 1 credit hour Is it cheating... adultery... having an affair? Is it the subjective feeling that my spouse or lover has violated the rules of the relationship? This seminar will investigate different theories and concepts involving "infidelity" such as betrayal, jealousy, rivalry, emotional and physical issues, assumptions, and expectations that develop and are assumed in relationships. Seminar 1 hour.

*Liberal arts and sciences course
DEPARTMENT OF SOCIAL SCIENCES

FACULTY

CHAIR
Lance Janda, Professor

PROFESSORS

ASSOCIATE PROFESSORS
S. Lee, E. Montalvo

INSTRUCTORS
T. Childs, R. Lowe, D. Smith, C. Leija, S. Hooper

MISSION STATEMENT
The mission of Cameron University’s Department of Social Sciences is to provide high quality instruction to students at the undergraduate level using a multi-disciplinary approach that emphasizes active learning, problem solving, and critical thinking.

PROGRAMS OF STUDY
Degrees & Majors:
- A.A.S. Criminal Justice
  - Corrections
  - Law Enforcement
- B.A. History
- B.A. Political Science
- B.A. Social Studies Education
- B.S. Criminal Justice
- B.S. Sociology
  - General Sociology
  - Human Services

GENERAL INFORMATION
The department is dedicated to excellence in teaching, scholarship, and service. We offer degrees and minors in Criminal Justice, Geography, History, the Humanities, Political Science, Pre-Law, Social Studies Education and Sociology, and a broad array of required and elective general education courses.

Our academic programs empower students to explore their interests, express their ideas, and experience the pride of uncovering new knowledge.

The department strives to develop students into scholars, mentors, and responsible citizens of their community, state and country who make a positive difference in society through their involvement in their particular field in the social sciences.

STUDENT ORGANIZATIONS

Criminal Justice Association
The Criminal Justice Association is dedicated to the furthering of professionalism and the fostering of assistance and understanding between the community and students/scholars in Criminal Justice.

History Club
The History Club is for any student who has an interest in history. The club’s primary purpose is to promote intellectual improvement among students. The secondary purpose is to provide students with the opportunity to get to know other students and professors who are interested in the field through social gatherings and activities.

Model U. N. Club
Model United Nations is an international organization that allows students in college to experience what it’s like to be diplomats working on international issues. The main goal of the Model UN team is to go to conferences which simulate the workings of the United Nations.

Phi Alpha Theta
Phi Alpha Theta, an international Historical Honor Society, promotes the study of history through the exchange of learning and ideas among historians, excellent teaching, and the encouragement and publication of research.

Pi Sigma Alpha
Pi Sigma Alpha is the national honor society for political science. It promotes curricular and extra-curricular activities and stimulates scholarship and intelligent interest in political science.
Degree Plan: Criminal Justice (550)–Associate in Applied Science

### General Education Non-PE Electives (To total at least 44 hours, if needed)*.

General education electives must be selected from the list of approved general education courses, exclusive of those with the PE prefix (http://www.cameron.edu/catalog/general_ed.html.)

### University Requirements

| UNIV 1001 or 1113–1-3 hours | Computer Literacy–CIS 1013 or MIS 2113 | Capstone Experience–CJ 4033 |

### Major Requirements 42 hours

#### Required Core Courses—30 hours

- CJ 1013 Intro to Criminal Justice (FA, SP)
- CJ 2013 Intro to Law Enforcement (FA, SP)
- CJ 2073 Intro to Corrections (FA, SP)
- CJ 2113 Criminal Law (FA, SP)
- CJ 2233 American Courts (FA, SP)
- CJ 3003 Juvenile Justice System (FA, SP)
- CJ 3103 Theories of Crime (FA, SP)
- CJ 4033 Research Methods & Statistics (FA, SP)
- CJ 4133 Criminal Justice Administration (FA, SP)
- CJ 4913 Criminal Justice Capstone (SP)

*FA=Fall; SP=Spring; SU=Summer*

#### Support Courses—12 hours

- At least 9 hours must be upper division CJ courses.
- The remaining 3 hours may be upper division CJ courses, or any other upper division hours.
- Departmental approval is required for use of lower division hours.

### Minor Requirements 18 hours

An Associate in Applied Science in Criminal Justice or an equivalent Associate degree may be used to satisfy the requirements for a minor. Otherwise courses used to satisfy requirements may not be used to satisfy minor requirements. For a full list of available minors, see: http://www.cameron.edu/catalog/minors.html.

### General Electives to Complete 124 hours

### Graduation Requirements

- Department Requirements
- Complete Departmental Assessment Exam
- Minimum 124 Total Credit Hours
- Minimum 40 Upper Division Credit Hours
- Minimum 55 Liberal Arts & Science Credit Hours
- Minimum 30 Credit Hours in Residence at Cameron

- Minimum 60 Credit Hours at a 4-Year Institution
- Minimum ½ of Major Upper Division Hours Completed at CU
- 15 of last 30 Credit Hours or ½ of Major Completed at CU
- Retention GPA 2.0
- Cameron GPA 2.0
- Complete Graduation Application Online

COURSE DESCRIPTIONS

CORRECTIONS (CORR)

2003* CORRECTIONAL TREATMENT METHODS 3 credit hours A study of correctional institutions, methods of correctional treatment and the social services provided to convicted persons and their dependents. An analysis of the criminal behavior that characterizes the different types of offenders. Lecture 3 hours. Prerequisites: CJ 1013.

2023* CASE MANAGEMENT 3 credit hours This course focuses on the basic principles of case management, including the case manager's duties and responsibilities, case reports and records, and case management in several types of agencies. The course also includes treatment of issues of confidentiality, human rights, and ethics. Lecture 3 hours.

2043* COUNSELING ADULT AND JUVENILE OFFENDERS 3 credit hours Techniques involved in counseling and supervising adult and juvenile offenders. Emphasis is on development of effective communication models and treatment oriented programs for counseling clients in a correctional environment. Focus is on the development of rapport with court directed or court committed adult and juvenile offenders. Lecture 3 hours. Prerequisites: CJ 1013.

2053* COMMUNITY CORRECTIONS 3 credit hours Role and structure of state pardon and parole boards; options of the governor; legal duties of pardon and parole boards, parole probation officers, rights of inmates to be considered for parole; effects of parole actions on the community; legal limitations placed on parolees, revocation of parole. Lecture 3 hours. Prerequisite: CJ 1013.

2103* LAW OF CORRECTIONS 3 credit hours An in-depth analysis of the evolution and current status of law governing correctional institutions, prisoner’s rights, and relationship to society. Lecture 3 hours. Prerequisite: CJ 1013.

CRIMINAL JUSTICE (CJ)

1013* INTRODUCTION TO CRIMINAL JUSTICE 3 credit hours A study of the historical development of the criminal justice system, contemporary agencies, and processes involved in the system. Introduction to the three main components of the criminal justice system: police, courts and corrections. Lecture 3 hours. (Fall, Spring)

2001-3* SPECIAL PROBLEMS IN CRIMINAL JUSTICE 1-3 credit hours An analysis of a selected problem or special topic in criminal justice, corrections and/or law enforcement. May be repeated, with different topics, for a total of 6 hours credit. Lecture 1-3 hours. Prerequisites: CJ 1013.

2013* INTRODUCTION TO LAW ENFORCEMENT 3 credit hours An introduction to the philosophy and application of law enforcement. An examination of the types and methods of patrol activities and their tactical considerations. The powers and limitations of the law enforcement officer as revealed in case studies and the decision-making considerations required by law enforcement officers. Lecture 3 hours. (Fall, Spring)

2023* CRIMINAL JUSTICE REPORTING 3 credit hours This course focuses on the preparation and use of standardized criminal justice reports and forms used to document facts and circumstances. The application of these documents in corrections, law enforcement, the judiciary, and the private sector is included. Lecture 3 hours. Prerequisites: CJ 1013.

2073* INTRODUCTION TO CORRECTIONS 3 credit hours A general introduction to American corrections, including theories of punishment, social systems within correctional institutions, correctional history, contemporary prison issues, juvenile corrections and community corrections. Lecture 3 hours. (Fall, Spring)

2113* CRIMINAL LAW 3 credit hours A review of criminal law. The administration of justice as it exists in the municipality under state statutes. The rights and privileges of the accused and the jurisdiction of violators. Prerequisite: CJ 1013. Lecture 3 hours. (Fall, Spring)

2233* AMERICAN COURTS 3 credit hours This course provides students with an understanding of the recognized functions of Courts in the American Criminal Justice System. It will address jurisdiction, policies, and procedures of courts in the administration of criminal justice, including trial and appellate courts. Courts will be examined at the local, state, and federal levels. Lecture 3 hours. Prerequisite: CJ 1013. (Fall, Spring)

3003* JUVENILE JUSTICE SYSTEM 3 credit hours The study of the juvenile justice system in the United States. Juvenile crime, the courts, community services, including prevention and rehabilitation of juveniles. Lecture 3 hours. Prerequisites: CJ 1013. (Fall, Spring)

3013* ORGANIZED AND WHITE COLLAR CRIME 3 credit hours A study of organized and white collar crime strategies and techniques used to combat them. Lecture 3 hours. Prerequisites: CJ 1013.

3023* VICTIMOLOGY 3 credit hours Comprehensive study of victimization; analysis of contemporary victim-assistance and victim compensation programs and related research; review of the historical importance of victim restitution as a basis for punitive criminal law. Lecture 3 hours. Prerequisites: CJ 1013.

3033* CONCEPTS OF CRIMINAL JUSTICE 3 credit hours A study of current and emerging theories and concepts in criminal justice. May be repeated with different topics for a total of 6 hours credit. Lecture 3 hours. Prerequisite: CJ 1013.

3043* MANAGEMENT OF CORRECTIONAL SYSTEMS 3 credit hours The management of correctional systems, public and private. Includes organizational theory supervision, planning, management styles, public relations, security issues, information systems and liability issues in correctional agencies. Lecture 3 hours. Prerequisite: CJ 1013.
3063* CRIMINAL EVIDENCE AND PROCEDURES 3 credit hours A study of the procedures for conducting civil litigation and criminal trials, and an examination of constitutional case law as decided by the Appellate Courts and the U.S. Supreme Court. Focus is on the criminal justice system and its relation to government powers and citizen’s constitutional rights. Lecture 3 hours. Prerequisites: CJ 1013 and CJ 2113.

3103* THEORIES OF CRIME 3 credit hours Theoretical explanations of etiology of crime (i.e., theories from biological, psychological, sociological, geographic, economic, and political perspectives). The nature and extent of crime, historical development of criminological theory, and analysis of crime control and its implications. Lecture 3 hours. Prerequisite: CJ 1013. (Fall, Spring)

3133* ETHICS IN CRIMINAL JUSTICE 3 credit hours This course discusses professional conduct of Criminal Justice practitioners. The institutional actors of the Criminal Justice system are granted a certain degree of discretion required for performing their jobs and this course will analyze the ethical boundaries of such discretion. Lecture 3 hours. Prerequisite: CJ 1013.

3723 INTERNSHIP IN CRIMINAL JUSTICE 3 credit hours Placement of advanced criminal justice majors in community-based agencies for career development. Involves frequent contact with faculty supervisor and off-campus supervisor evaluation. May be repeated for a total of 6 hours credit. Internship 3 hours. Prerequisites: CJ major, junior standing, and instructor permission.

4023* TERRORISM 3 credit hours An analysis of terrorism and how our criminal justice system deals with this problem in both the national and international arenas. Definition, structure, causes, methods and treatment/prevention of terrorism, and coping with hostage situations. Lecture 3 hours. Prerequisite: CJ 1013.

4033* RESEARCH METHODS AND STATISTICS 3 credit hours This course is an introduction to Social Science research. Basic methodological and statistical (applied) issues in Criminology and Criminal Justice will be discussed. Designed to provide students with a foundation in Social Science research methods. Lecture 3 hours. Prerequisite: MATH 1413 or higher and CJ 1013. (Fall, Spring)

4133* CRIMINAL JUSTICE ADMINISTRATION 3 credit hours The administration of criminal justice agencies. Includes organization theory, supervision, planning, personnel policies, management styles, public relations and budgeting in law enforcement, judicial and corrections agencies. Lecture 3 hours. Prerequisite: CJ 1013. (Fall, Spring)

4143* SEXUAL ABUSE AND THE CRIMINAL JUSTICE SYSTEM 3 credit hours An examination of the problems of sexual abuse and its treatment by the criminal justice system. Sexual abuse issues including legal definition, causes, identification, prevention/treatment for victims and perpetrators, types and how the criminal justice system responds. Lecture 3 hours. Prerequisite: CJ 1013.

4153* DEATH PENALTY 3 credit hours An examination of the problems and issues related to the death penalty in the United States, including the history of capital punishment, important Supreme Court decisions, how the various jurisdictions (state, federal and military) deal with the capital cases, the comparative costs of incarceration and execution, miscarriages of justice in capital cases and how the criminal justice responds to these issues. Lecture 3 hours. Prerequisites: CJ 1013.

4491-3* SELECTED TOPICS IN CRIMINAL JUSTICE 1-3 credit hours An intensive analysis of a selected problem related to criminal behavior and the commission of crime or another special topic in criminal justice. May be repeated with different topics for a total of 6 hours credit. Lecture 1-3 hours. Prerequisite: CJ 1013.

4503* COMPARATIVE CRIMINAL JUSTICE SYSTEMS 3 credit hours A comparative study of selected criminal justice systems existing in the world. Lecture 3 hours. Prerequisites: CJ 1013.

4591-3* INDEPENDENT STUDY IN CRIMINAL JUSTICE 1-3 credit hours Intensive independent reading on or study of a specific criminal justice problem or subject, based on a pre-approved outline or plan, with regular conferences with the instructor and submission of extensive written work. May be repeated with different topics for a total of 6 hours credit. Independent study/directed readings 1-3 hours. Prerequisites: CJ major, junior standing, and instructor’s permission.

4911-3* CRIMINAL JUSTICE CAPSTONE 1-3 credit hours CJ 4911-3 is a 1-3 hour course for graduating seniors in Criminal Justice. This course is designed to enhance students’ knowledge in the fields of Criminology and Criminal Justice. It also serves as an introduction to careers in the Criminal Justice field, graduate schools, and other pertinent considerations for prospective CJ graduates. Capstone 1-3 hours. Prerequisite: CJ 1013 and SOCI 1113. (Spring)

GEOGRAPHY (GEOG)

1014* PHYSICAL GEOGRAPHY 4 credit hours A basic introduction to the physical elements of the Earth as they relate to humans. The influence of such factors as soils and minerals, landforms, and hydrography, vegetation, weather, and climate are emphasized. This course is designed for non-science majors. Lecture/Demonstration, 4 hours. General Education, Physical Science.

2243* HUMAN GEOGRAPHY 3 credit hours The principles of geography in its human aspects and its relationship to the cultural patterns of the world. Lecture 3 hours. General Education, Humanities-Diversity. (Fall)

3023* ECONOMIC GEOGRAPHY 3 credit hours A study of the resource base and economic activities with emphasis on production, distribution, and consumption of various types of commodities of the world. Lecture 3 hours. General Education, Economics. (Fall, Spring)

3033* HISTORICAL GEOGRAPHY OF THE UNITED STATES 3 credit hours Geographic environment of
America and its influence on the historical evolution of the United States. Lecture 3 hours.

3213* WORLD REGIONAL GEOGRAPHY 3 credit hours Comparative study of the world’s major geographic regions as defined by interrelated complexes of physiographic and cultural elements. Lecture 3 hours. (Spring)

3243* ETHNIC GEOGRAPHY OF THE UNITED STATES 3 credit hours A study of the geographic origins of individual groups and of the impact of migration upon their cultural traditions and ways of life. Lecture 3 hours.

3391-3* INDEPENDENT STUDY 1-3 credit hours Intensive independent readings on or study of a specific topic in geography, based upon a pre-approved plan of study and action, with regular conferences and written and/or oral reports required. Independent study/directed readings 1-3 hours. Prerequisites: junior standing, prior completion of at least 6 credit hours in geography, and permission of instructor. May not be taken for elective credit for the Social Studies Education major. May be repeated with a different topic for a total of 6 hours of credit.

3401-3* SELECTED TOPICS IN GEOGRAPHY 1-3 credit hours An intensive analysis of a selected problem or topic in geography. May be repeated with a different topic for additional credit. Independent study/directed readings 1-3 hours. Prerequisite: permission of instructor.

HISTORY (HIST)

1113* EARLY WORLD HISTORY 3 credit hours Survey of world history from the earliest times to 1400. Lecture 3 hours. General Education, Humanities–Diversity. (Fall)

1123* MODERN WORLD HISTORY 3 credit hours Survey of world history from 1400 to the present. Lecture 3 hours. General Education, Humanities–Diversity. (Spring)

1483* UNITED STATES HISTORY TO 1865 3 credit hours Introductory survey from European backgrounds through the Civil War. Lecture 3 hours. Prerequisite: Students must be eligible for ENGL 1113. General Education, U.S. History. (Fall, Spring)

1493* UNITED STATES HISTORY SINCE 1865 3 credit hours A survey of the development of the United States from 1865 to the present. Lecture 3 hours. Prerequisite: Students must be eligible for ENGL 1113. General Education, U.S. History. (Fall, Spring)

2113* WESTERN CIVILIZATION I 3 credit hours Using an interdisciplinary approach that incorporates material chiefly from history but also from philosophy, art, and music, this course will provide the student a firm grounding in the History of Europe, including the history of those regions that influenced it such as northern Africa, the Middle East, and the Near East. Lecture 3 hours. General Education, Humanities–Diversity. (Fall)

2133* AN INTRODUCTION TO HISTORICAL RESEARCH AND WRITING 3 credit hours An introduction to the research methods used in history, with emphasis on the gathering and evaluation of evidence, the organization and interpretation of such evidence, and the effective presentation of this research. Lecture 3 hours. Prerequisite: ENGL 1213 and HIST 1483 or HIST 1493. (Fall)

2223* WESTERN CIVILIZATION II 3 credit hours Using an interdisciplinary approach that incorporates material chiefly from history but also from philosophy, art, and music, this course will provide the student a firm grounding in the History of Europe from the Renaissance to the present. Lecture 3 hours. General Education, Humanities–Diversity. (Spring)

3033* RACE AND THE ATLANTIC WORLD, 1400-1850 3 credit hours This course examines the relationships which developed among Africa, the Americas and Europe between 1400 and 1850. Students will examine European exploration and colonization, African state-building and the Atlantic slave trade, and the destruction of old and the creation of new American societies and cultures. Lecture 3 hours. Prerequisites: ENGL 1213, and HIST 1113, or HIST 1123, or HIST 2113, or HIST 2223, or HUM 2713, or ENGL 3063, or ENGL 3073, or ART 2613, or ART 2623. HIST 2133 strongly recommended.

3043* OKLAHOMA HISTORY 3 credit hours A survey of the development of Oklahoma from the time of the discovery of America to the present. Lecture 3 hours. Prerequisites: ENGL 1213 and HIST 1483 or HIST 1493. HIST 2133 strongly recommended. (Spring)

3123* THE CRUSADERS, 1095-1798 3 credit hours From the middle of the 10th century C.E. through the early 16th century, Europeans and the peoples of North Africa and the Eastern Mediterranean interacted with a greater intensity than ever before, inaugurating a complex history of interaction that has been with us ever since. In origin a religiously motivated enterprise on the European side that aimed at nothing less than the reclamation of the Holy Land for Christianity, the Crusades rapidly became both more and less than this. Less in the sense that conflict did not always happen for religious reasons, more in that the practices of crusading spread far beyond the Holy Land to encompass the Iberian peninsula, Eastern Europe, and, perhaps most ironically of all, the Christian Byzantine empire. In this course we will address crusading in all of its forms form the High Middle Ages to the dawn of the Reformation. We will also seek to tell the stories of all involved to explore crusading as a cultural, economic, and social phenomenon as well as examining its more familiar military, religious, and political sides. In the process we will explore current controversies among scholars and in popular culture concerning what the Crusades were and what they mean to people today. Lecture 3 hours. Prerequisites: ENGL 1213, and HIST 1113, or HIST 1123, or HIST 2113, or HIST 2223, or HUM 2713, or ENGL 3063, or ENGL 3073, or ART 2613, or ART 2623. HIST 2133 strongly recommended.

3133* AMERICAN MILITARY HISTORY 3 credit hours A survey of American military history from American Revolution to the present. Lecture 3 hours. Prerequisites: ENGL 1213 and HIST 1483 or 1493.

2019-2021 UNDERGRADUATE CATALOG
3243* BRITAIN SINCE 1689 3 credit hours Emergence of cabinet government, the Industrial Revolution, the Napoleonic era and empire problems, and the development of Britain to the present. Lecture 3 hours. Prerequisites: ENGL 1213, and HIST 1113, or HIST 1123, or HIST 2113, or HIST 2223, or HUM 2713, or ENGL 3063, or ENGL 3073, or ART 2613, or ART 2623. HIST 2133 strongly recommended.

3391-3* INDEPENDENT STUDY 1-3 credit hours Intensive independent readings or study on definite problems or special historical subjects, based upon pre-approved outlines or plans, with regular conferences and with written and/or oral reports required. Independent study/directed readings 1-3 hours. Prerequisites: HIST 2133, 15 additional hours of history and permission of instructor. May be repeated with a different topic for a total of 6 hours credit.

3483* PUBLIC HISTORY INTERNSHIP 3 credit hours An intensive exposure to and involvement in work done by public historians at area museums. Students will work with primary sources, document collections, artifacts, public displays, educational and marketing publications, and make presentations to the public or to museum staff under the direction of a Cameron University faculty member in partnership with a supervising historian or other qualified professional at the museum. The student, the supervisor at the museum, and the directing Cameron faculty member will sign an agreement stipulating terms of the internship in advance. Internship 3 hours. Prerequisite: 3.0 Retention GPA, ENGL 1213, 18 hours of history, and the permission of the directing faculty member and the chair of the department. HIST 2133 strongly recommended.

4123* AMERICAN WOMEN AND POLITICS 3 credit hours A survey of American women from the colonial period to present with emphasis on their changing socio-economic and political roles. Lecture 3 hours. Prerequisites: ENGL 1213 and HIST 1483 or HIST 1493. HIST 2133 strongly recommended.

4243* AMERICAN COLONIAL HISTORY 3 credit hours The political, economic, social, and cultural history of the colonies in North America from the earliest settlements through 1763. Lecture 3 hours. Prerequisites: ENGL 1213 and HIST 1483 or HIST 1493. HIST 2133 strongly recommended.

4253* THE AMERICAN REVOLUTION AND EARLY NATIONAL PERIOD 3 credit hours A history of the causes and consequences of the War for American Independence and the early years of the United States. Includes the drafting and adoption of the U.S. Constitution, the organization of the first national government, the formation of political parties, territorial expansion, foreign policy, economic development, and the emerging conflict between nationalism and sectionalism through 1815. Lecture 3 hours. Prerequisite: ENGL 1213 and HIST 1483 or HIST 1493. HIST 2133 strongly recommended.

4273* THE AGE OF JACKSON AND AMERICAN EXPANSION, 1815-1848 3 credit hours A political history of the period between 1815 and 1848. The impact of nationalism, liberalism, and sectionalism upon American life in the middle period. Lecture 3 hours. Prerequisites: ENGL 1213 and HIST 1483 or HIST 1493. HIST 2133 strongly recommended.

4283* THE CIVIL WAR AND RECONSTRUCTION, 1848-1877 3 credit hours The coming of the war; the political, military, diplomatic, economic, and social problems encountered by the Union and the Confederacy; leading personalities and events of the war between the states; and an intensive study of the major challenges facing the United States in the aftermath of the Civil War. Lecture 3 hours. Prerequisites: ENGL 1213 and HIST 1483 or HIST 1493. HIST 2133 strongly recommended.

4293* THE GILDED AGE AND PROGRESSIVE ERA, 1877-1920 3 credit hours A study of the major events and movements in the United States between 1877 and approximately 1920. Special attention is given to the rise of modern industrialism and the organization of labor and farmers. Lecture 3 hours. Prerequisites: ENGL 1213 and HIST 1483 or HIST 1493. HIST 2133 strongly recommended.

4313* WAR AND DEPRESSION, 1917-1945 3 credit hours The United States in the aftermath of World War I; the Roaring Twenties; the Great Depression; and World War II. Lecture 3 hours. Prerequisites: ENGL 1213 and HIST 1483 or HIST 1493. HIST 2133 strongly recommended.

4323* COLD WAR AMERICA, 1945-1991 3 credit hours A study of the political, economic, social, cultural and diplomatic changes in America between 1945 and 1991. Topics include civil rights, the Cold War, consumerism, social change, and others. Lecture 3 hours. Prerequisites: ENGL 1213 and HIST 1483 or HIST 1493. HIST 2133 strongly recommended.

4353* FRONTIER EUROPE, 1300-1800 3 credit hours Europe, too, had a frontier that definitively shapes its pre-modern foundations. This course focuses on the major cultural, social, political and economic developments in those European cultures bordering on the Baltic Sea and the North Sea, with particular emphasis on Britain, Denmark-Norway, northern Germany, Sweden, Poland, and the northern Low Countries, which collectively, constituted the heart of the European frontier. Lecture 3 hours. Prerequisites: ENGL 1213, and HIST 1113, or HIST 1123, or HIST 2113, or HIST 2223, or HUM 2713, or ENGL 3063, or ENGL 3073, or ART 2613, or ART 2623. HIST 2133 strongly recommended.

4373* EUROPE 1789-1914 3 credit hours Europe during the French Revolution and Napoleonic Era; the Congress of Vienna and the Congress system; the revolutions of 1830 and 1848; the unification of Italy and Germany; industrialism, social change, and the coming of World War I. Lecture 3 hours. Prerequisites: ENGL 1213, and HIST 1113, or HIST 1123, or HIST 2113, or HIST 2223, or HUM
2713, or ENGL 3063, or ENGL 3073, or ART 2613, or ART 2623. HIST 2133 strongly recommended.

**4413* RELIGION AND MAGIC IN EARLY MODERN EUROPE, 1400-1650 3 credit hours** From the 15th to the mid-17th centuries, religious relationships changed dramatically within European societies. One path of change led to the Reformation, producing Protestant alternatives to what we now know as Catholicism. Another path led to bureaucratized and centralized power that tied community membership to shared religious outlooks. From care for the poor, the sick, and the elderly to marriage and tolerance of diversity, peoples' lives were transformed, while politics took on a more religious and, often, deadly turn, culminating in the Thirty Years' War. Perhaps the most dramatic path of all concerned the reform, even repression of popular religion as European societies attempted to root out witchcraft and newly vigilant and pious elites struggled to stamp out what they saw as superstition and worse. In this course, we explore these and other manifestations of the cataclysmic change that characterized this era. Lecture 3 hours. Prerequisites: ENGL 1213, and HIST 1113, or HIST 1123, or HIST 2113, or HIST 2223, or HUM 2713, or ENGL 3063, or ENGL 3073, or ART 2613, or ART 2623. HIST 2133 strongly recommended.

**4443* 20th CENTURY EUROPEAN HISTORY 3 credit hours** The quest for security in the 1920's; the rise of the dictators; the road to World War II; the emergence of an integrated Europe; and the Cold War and its aftermath. Lecture 3 hours. Prerequisites: ENGL 1213, and HIST 1113, or HIST 1123, or HIST 2113, or HIST 2223, or HUM 2713, or ENGL 3063, or ENGL 3073, or ART 2613, or ART 2623. HIST 2133 strongly recommended.

**4473* HEROES AND VILLAINS OF THE FRENCH REVOLUTION, 1780-1815 3 credit hours** The French Revolution is, in the minds of some, the first modern revolution, making it one of the pivotal moments informing the shape of modernity. In this course we take a unique approach to this era by looking at the Revolution through the eyes of those who most influenced it. Using biographies, memoirs, diaries, and other first-hand accounts, we will explore the unfolding and wider implications of the French Revolution by trying to understand each of their particular perspectives on its own terms, even as we acknowledge that in an event such as the French Revolution, some have come down to us as heroic figures and some as villains. Lecture 3 hours. Prerequisites: ENGL 1213, and HIST 1113, or HIST 1123, or HIST 2113, or HIST 2223, or HUM 2713, or ENGL 3063, or ENGL 3073, or ART 2613, or ART 2623. HIST 2133 strongly recommended.

**4773 METHODS OF TEACHING SOCIAL STUDIES 3 credit hours** An intensive study of the problems and methods associated with teaching Social Studies at the Secondary level. Lecture 3 hours. Offered fall semester only. Prerequisite: EDUC 3003 and Admission to Teacher Education. (Fall)

**4793* SENIOR SEMINAR IN HISTORY 3 credit hours** An intensive study of a historical event or person and the historiography concerning that event or person. Research to gather and evaluate historical facts and interpretations, the organization of this information, and a formal oral and written presentation of the results of the research are required. A formal research paper is required. Capstone/lecture 3 hours. Prerequisites: 18 hours of history including HIST 2133 strongly recommended. (Spring)

**4961-3* SELECTED TOPICS IN UNITED STATES HISTORY 1-3 credit hours** An intensive analysis of a selected problem or topic in United States history. May be repeated, with a different topic, for additional credit. Lecture 3 hours. Prerequisites: ENGL 1213 and HIST 1483 or HIST 1493. HIST 2133 strongly recommended.

**4971-3* SELECTED TOPICS IN EUROPEAN AND WORLD HISTORY 1-3 credit hours** An intensive analysis of a selected problem or topic in European or World history. May be repeated, with a different topic, for additional credit. Lecture 3 hours. Prerequisites: ENGL 1213 and HIST 1113 or HIST 1123 or HIST 2113 or HIST 2223 or HUM 2713 or ENGL 3063 or ENGL 3073 or ART 2613 or ART 2323. HIST 2133 strongly recommended.

**LAW ENFORCEMENT (LE)**

**2003* SECURITY CONCEPTS 3 credit hours** A study of techniques used in providing security to government, industry, business, and private institutions. The functions of criminal justice personnel in crime prevention management. Lecture 3 hours. Prerequisite: CJ 1013.

**2043* COMMUNITY POLICING 3 credit hours** The concept and application of community policing in law enforcement. The course will include a discussion of the role of community involvement, interaction with community organizations, complex problem solving, and effective techniques for the reduction of opportunities for crime. Lecture 3 hours. Prerequisite: CJ 1013.

**2053* METHODS OF INVESTIGATION I 3 credit hours** The duties of law enforcement personnel who initially respond to different categories of crime scenes. Specific topics include crime scene protection, interviewing witnesses, and chain of custody issues. Lecture 3 hours. Prerequisites: CJ 1013.

**2063* METHODS OF INVESTIGATION II 3 credit hours** The role of law enforcement personnel in the preparation of a case for presentation in court. Coverage will include successful case management techniques that encompass current and emerging forensic technologies. Lecture 3 hours. Prerequisites: LE 2053.

**2073* LEGAL ASPECTS OF POLICING 3 credit hours** The exploration of substantive and procedural laws as the foundation of police functions and services to society. The course will explain how the Bill of Rights and democratically inspired legal restraints on police help ensure personal freedoms in our society. Lecture 3 hours.
PHILOSOPHY (PHIL)

1113* INTRODUCTION TO PHILOSOPHY 3 credit hours
This class aims to introduce students to philosophy as an academic discipline and as a distinctive intellectual and moral attitude towards the world and oneself, one marked by the belief that the use of reason in the search for truth is the most important human activity. We will consider questions such as the relation between philosophy and society, the existence of God, the character of and grounds for human knowledge, and the nature and status of morality. Throughout we will concentrate on close readings of the texts under discussion. Representative readings: Plato, Aquinas, Descartes, Nietzsche. Lecture 3 hours. General Education, Humanities–Diversity.

2713* INTRODUCTION TO WORLD RELIGIONS 3 credit hours
One of the most widespread forms of human thought and behavior is religious belief and practice. This course will survey the history, practices, and beliefs of several religions, giving most attention to those enjoying current and widespread practice. Religions covered will include Hinduism, Buddhism, Judaism, Christianity, and Islam, plus others. The approach will be historical, with some use of other disciplines such as sociology, philosophy, and anthropology. Some attention will also be given to various definitions of religion, and various explanations for religious practice. The perspective used will be non-sectarian, with no particular religion, nor secularism, given priority of place. Lecture 3 hours.

POLITICAL SCIENCE (PS)

1113* AMERICAN FEDERAL GOVERNMENT 3 credit hours
A study of the American government system. The American experiment in federalism and democracy; origin and development of the United States Constitution; federal-state relations, civil liberties, the individual as a citizen; political parties; governmental services. Lecture 3 hours. Prerequisite: Students must be eligible for ENGL 1113. General Education, Political Science.

2013* INTRODUCTION TO INTERNATIONAL STUDIES 3 credit hours
An introduction to the history, theories, and practices of international studies. Students will be exposed to the analytical tools of international relations as a means of helping them understand and analyze global events and issues. Lecture topics will include terrorism, human rights, the environment, war, collective security, nationalism, imperialism, foreign policy, gender and income inequality, development and aid, and globalization among others. Lecture 3 hours. Prerequisite: ENGL 1213.

2023* STATE AND LOCAL GOVERNMENT 3 credit hours
A study of the various political units in the United States with emphasis on states, counties, and municipalities. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

2113* CONCEPTS OF POLITICAL SCIENCE 3 credit hours
An introduction to basic political concepts, institutions and processes, as well as a review of career opportunities for political scientists. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213. (Fall, Odd Years)

2793* RESEARCH METHODS IN POLITICAL SCIENCE 3 credit hours
The study and application of empirical research methods in political science. The course will include an overview of research designs, the conduct of empirical research, and the organization and preparation of research papers. Lecture 3 hours. Prerequisites: STAT 1513. (Spring, Odd Years)

3013* POLITICAL PARTIES AND INTEREST GROUPS 3 credit hours
An analysis of the history, functions, and structure of American political parties and interest groups with a special focus on the interrelationships between parties, groups, campaigns, governmental institutions, public policy formation, and voting behavior. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

3023* PUBLIC OPINION 3 credit hours
A study of the measurement and nature of public opinion in America. Topics include a methodology critique of public opinion survey research, fundamentals and enduring opinions, and public opinion research on contemporary issues. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

3043* THE MEDIA IN AMERICAN POLITICS 3 credit hours
A comprehensive analysis of the media in American politics, including an analysis of media modes, news development, restraints on the media, the people and the media, intermediaries and the media, and how the branches of government interact with the media. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

3113* PUBLIC ADMINISTRATION AND POLICY 3 credit hours
An analysis of the development of public policies in the solution of national problems. Lecture topics include the process of making, implementing, and evaluating public policies. Students select a policy issue of interest and prepare a thoughtful paper on the subject. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

3213* GLOBAL POLITICAL ECONOMY 3 credit hours
An introduction to the economic and international relations issues of trade, finance, production networks, state economic policies, development economics, inequality, international finance organizations, and globalization. The course introduces students to perspectives of economic liberalism, mercantilism, and structuralism that they can use to analyze global political problems. Lecture 3 hours. Prerequisite: PS 1113 and ENGL 1213.

3333* COMPARATIVE GOVERNMENT 3 credit hours
A survey of concepts, approaches, and models used in comparative political research. The course includes an analysis of selected political systems in the modern world including liberal democracies, communist/post-communist systems, and developmental authoritarian regimes. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

3483* THE AMERICAN PRESIDENCY 3 credit hours
A comprehensive study of the American Presidency with emphasis on the office's powers, influence and selection process. The course will also deal with relations between the President and other branches of government. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.
3513* THE LEGISLATIVE PROCESS 3 credit hours An analysis of the legislative process in the U.S. with a focus on the structure and function of the U.S. Congress. Comparisons between Congress, state legislatures, and foreign legislative bodies will be developed. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

3603* INTRODUCTION TO POLITICAL THOUGHT 3 credit hours Introduction to the philosophical analysis of politics through study of selected central questions of political thought (such as the nature of justice, power, liberty, or the best regime) in relation to the principles of classical liberalism. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

3633* AMERICAN POLITICAL THOUGHT 3 credit hours Main currents and cross-currents in American political thought from Puritanism to the present with emphasis on those concepts and ideas which have most decisively influenced the evolution of the federal system of government. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

3721-3 INTERNSHIP IN POLITICAL SCIENCE 1-3 credit hours Placement of advanced political science majors in applied job settings. Involves frequent contact with faculty supervisor and off-campus supervisor evaluation. May be repeated for a total of 6 hours credit. Internship 1-3 hours. Prerequisites: PS 1113 and ENGL 1213, Political Science major, junior standing, and instructor permission.

3813* CONSTITUTIONAL LAW AND GOVERNMENT: THE AMERICAN EXPERIENCE 3 credit hours A comprehensive analysis of American constitutionalism and constitutional law, to include development of governmental powers, federalism, and civil rights and civil liberties. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

4023* SPECIAL TOPICS: WORLD REGIONAL POLITICS 3 credit hours A comparative analysis of the political institutions and processes of a selected world region. The course will be taught with a different regional focus, including the Middle East, Latin America, Asia and Eastern Europe. The course may be taken twice, given a different regional focus. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

4053* U.S. FOREIGN POLICY 3 credit hours An examination of the content, formulation, and execution of U.S. foreign policy, with emphasis on the post-World War II period. The course also explores the relationship of U.S. foreign policy to its domestic foundations and to the larger international system. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

4253* THE JUDICIAL PROCESS 3 credit hours An analysis of the court system in the United States, focusing on the United States Supreme Court, lower federal courts, federal-state judicial relations, and the role of the judicial system in American policy processes. Lecture 3 hours. Prerequisites: PS 1113 and ENGL 1213.

4491-3* SELECTED TOPICS IN POLITICAL SCIENCE 1-3 credit hours An intensive analysis of a selected political problem or special topic in political science. May be repeated with a different topic for a total of 6 hours credit. Lecture 1-3 hours. Prerequisites: PS 1113 and ENGL 1213.

4591-3* INDEPENDENT STUDY IN POLITICAL SCIENCE 1-3 credit hours Intensive independent reading on or study of a specific problem or subject in political science, based on a pre-approved outline or plan, with regular conferences with the instructor and submission of extensive written work. May be repeated with different topics for a total of 6 hours credit. Independent study/directed readings 1-3 hours. Prerequisites: PS 1113 and ENGL 1213, Political Science major, junior standing, and instructor permission.

4683* POLITICAL SCIENCE CAPSTONE 3 credit hours This course consists of relevant readings and discussion to assist seniors majoring in Political Science with developing a more complete understanding of the discipline as a whole and in applying knowledge gained throughout their studies to create an original written thesis. The course also provides an opportunity for students to examine career opportunities and graduate education in political science and to complete a series of examinations designed to assess their overall knowledge of political science as well as their critical thinking and writing skills. The class should be taken during the final semester prior to graduation if possible. Capstone/lecture 3 hours. Prerequisite: ENGL 1213, PS 1113, and 18 hours of Political Science. PS 2113 and PS 2793 strongly recommended. (Spring)

SOCIOLGY (SOCI)

1113* INTRODUCTION TO SOCIOLOGY 3 credit hours A survey of the fundamental concepts and scope of sociology focusing on the understanding of human behavior and social organization. Topics include the sociological perspective, culture, social interaction, social inequality, social institutions, and social change. Lecture 3 hours. General Education, Behavioral Science. (Fall, Spring)

2023* SOCIAL PROBLEMS 3 credit hours An overview of the subjective and objective aspects of social problems. Topics include: poverty, various forms of inequality, population, work, crime, substance abuse, health, education, and the environment. Lecture 3 hours.

2513* INTRODUCTION TO SOCIAL WORK 3 credit hours An overview and history of the profession of social work. Topics include a survey of social work values and professional ethics, in addition to the history of social welfare and human services in the U.S. Lecture 3 hours. Prerequisite: None.

3003* DEVIAN'T BEHAVIOR 3 credit hours The course consists of an overview of sociological theories of deviant behavior, along with a discussion of various types of deviant behavior, including violent and property crime, mental illness, diverse lifestyles, substance use and abuse, and white-collar/corporate crime. Lecture 3 hours. Prerequisite: SOCI 1113.
3013* RACE AND ETHNIC RELATIONS 3 credit hours An examination of the historical, political, economic, and sociological dynamics of race and ethnic relations in the United States. The course includes an emphasis on how race and ethnicity are created and re-created in society, particularly by culture and social institutions, and the manner in which these processes create and perpetuate social inequality. Lecture 3 hours. Prerequisite: Must be ENGL 1113 eligible (i.e., have no English deficiencies). General Education, Humanities-Diversity.

3113* SOCIAL STATISTICS 3 credit hours An overview of descriptive and inferential statistics and their application in sociological research. Topics include: measures of central tendency and variability, probability, sampling distributions, Chi-square, correlation, and simple regression. Lecture 3 hours. Prerequisites: SOCI 1113 and STAT 1513 or MATH 1413 or higher. (Fall)

3123* SOCIological THEORY 3 credit hours A study of major explications on social conflict, change, integration, interaction, network, and modernity. Attention is given to general orientations and basic concepts underlying Marxism, critical theory, world-system theory, interactionism, ethnmethodology, and functionalism. The course stresses Marx, Weber, and Durkheim in relation to social criticism, social evolution, and social modernity respectively, on one hand and, on the other, their contemporary relevance and theoretical offshoots in the field. Lecture 3 hours. Prerequisite: SOCI 1113. (Spring)

3133* SOCIological RESEARCH METHODS 3 credit hours Introduction to the basic concepts of sociological research. Topics include research design, conceptualization and measurement, sampling, qualitative and quantitative data collection techniques, and analyses of data. Lecture 3 hours. Prerequisite: SOCI 1113. (Spring)

3223 SOCIAL PSYCHOLOGY 3 credit hours This course examines social psychological phenomena from a sociological perspective. Topics covered include socialization, attitudes, communication, aggression, group behavior, and gender roles. Lecture 3 hours. Prerequisite: SOCI 1113.

3323* COLLECTIVE BEHAVIOR AND SOCIAL MOVEMENTS 3 credit hours A study of the episodic and enduring collective actions through various research and perspectives on fad, riot, crowd, protest, public, and social movements. Attention is given to how collective actions unfold and how they are sustained in relation to emergence, participation, mobilization, organization, strategy, outcome, movement ideology, and social-political environments. The course stresses the questions that competing perspectives and different research ask about collective actions and characteristic ways that they try to answer them. Lecture 3 hours. Prerequisite: SOCI 1113.

3343* POLITICAL SOCIOLOGY 3 credit hours A study of politics as politicized everyday social world and as interrelated activities that shape and are shaped by established institutions. Attention is given to: (a) politics at the level of nation-states such as politics and religion, forms of political rule and authority, globalization and its political outcomes; (b) politics at the level of politicized social world such as contentious protests of historically marginalized minorities and the broadening of political arena toward the realm of culture and identity; and (c) corporate-class politics or the preponderant power of corporate communities over policy issues. Lecture 3 hours. Prerequisite: SOCI 1113.

3353* SOCIAL DEMOGRAPHY 3 credit hours An analysis of the influence of social and cultural settings on natality, mortality and migration. This course also includes an assessment of the impact of demographic change on social systems. Lecture 3 hours. Prerequisite: SOCI 1113.

3373* SOCIOLOGY OF THE COMMUNITY 3 credit hours The community, its structure, systems and processes. This course covers the influence of geography, demography and patterns of settlement upon social life. Lecture 3 hours. Prerequisite: SOCI 1113.

3403* SOCIOLOGY OF THE FAMILY 3 credit hours This course introduces the student to a historical overview of the American family, along with the intersections of social class, gender, and race/ethnicity in family contexts. Topics include mate selection, connections between work and family life, marriage, parenting, divorce, stepfamilies, and violence in families. Lecture 3 hours. Prerequisite: SOCI 1113.

3413* GERONTOLOGY 3 credit hours An in-depth study of various aspects of aging from a broad interdisciplinary perspective. Lecture 3 hours. Prerequisite: SOCI 1113.

3503* POPULAR CULTURE 3 credit hours A study of culture as the mass production, circulation, and consumption of visual texts and behavioral practices in multiple forms. Attention is given to what forms of social life popular culture depicts, how it molds and fractures local cultures, how it solidifies group identities and blends individual differences, how it is incorporated into social criticisms of power and domination, what standardizations creates, and what it reveals about class-gender-race relations. The course stresses interpretive analyses and theories advanced in the field. Lecture 3 hours. Prerequisite: SOCI 1113.

3513* INTRODUCTION TO SOCIAL WELFARE AND HUMAN SERVICES 3 credit hours An introduction to social welfare institutions, including the purposes, concepts, methods, and theories used in the delivery of human services. Lecture 3 hours. Prerequisite: SOCI 1113.

3733* SOCIOLOGY OF GENDER 3 credit hours This course will examine the processes by which gender is socially constructed, along with the distinction between biological sex and sociological gender, the causes and consequences of gender inequality, and a historical overview of gender relations in different social institutions and societies. Lecture 3 hours, Prerequisite: SOCI 1113.
3853* Selected Topics in Sociology 3 credit hours
An intensive analysis of a selected problem or topic in Sociology. May be repeated with a different topic for a total of 6 hours credit. Lecture 3 hours. Prerequisites: SOCI 1113.

3991-3 Internship in Sociology 3 credit hours
The placement of sociology majors in various applied job settings. The course involves frequent contact with a faculty supervisor and an off-campus supervisor evaluation. May be repeated for a total of 3 credit hours. Internship 1-3 hours. Prerequisites: Student must be a sociology major, have completed 12 credit hours of sociology coursework, and have junior standing.

4003* Criminology 3 credit hours
This course introduces the student to the study of criminal behavior, including theoretical explanations of this behavior from a sociological perspective. Topics include: violent crime, property crime, occupational crime, corporate crime, and political crime. Lecture 3 hours. Prerequisites: SOCI 1113.

4013* Juvenile Delinquency 3 credit hours
This course examines the trends and nature of delinquency in the U.S., with an emphasis on theoretical explanations of delinquency from a sociological perspective. Larger social contexts will also be considered, including the role of schools, peers, community, and the family. Aspects of the juvenile justice system in the U.S. will also be examined. Lecture 3 hours. Prerequisite: SOCI 1113.

4103* Sociology of Religion 3 credit hours
A study of religion as a social institution organized into groups. Attention is given to social explanations of religious beliefs and rituals. The course stresses how the principles of group life impinge on religion, how conflict figures commonly in religious organization, what constitutes church-sect continuum, what differentiates denominations from "alternative" religions, how religion relates to race/ethnicity, class, politics, economy, social reproduction, and social change, and what explains secularization and fundamentalism. Lecture 3 hours. Prerequisites: SOCI 1113.

4213* Social Stratification 3 credit hours
A study of social inequality, with emphasis on the class structure of the United States and its consequences for the individual, groups, and society. Lecture 3 hours. Prerequisites: SOCI 1113. (Spring)

4303* Globalization and Development 3 credit hours
This course examines the causes and consequences of globalization. Issues are examined from a changing historical context of economy, politics, and culture. Lecture 3 hours. Prerequisites: SOCI 1113.

4403* Family Violence 3 credit hours
A sociological analysis of child abuse, intimate partner violence, and elder abuse, with an emphasis on causes and trends. Lecture 3 hours. Prerequisites: SOCI 1113.

4491-3* Independent Study 1-3 credit hours
Independent study of sociologically relevant topics not covered in current sociology courses. May be repeated with a different topic for a total of 3 credit hours. Independent Study 1-3 hours. Prerequisites: SOCI 1113, Junior standing, and Sociology major.

4533 Human Services Counseling Strategies 3 credit hours
A study of counseling and interviewing strategies useful in a human service context. Role playing using such techniques as paraphrasing, reflecting, and open questions will be part of the classroom experience. Lecture 3 hours. Prerequisites: SOCI 1113.

4903* Sociology Capstone 3 credit hours
This course provides an overview of the major concepts in sociology with an emphasis on the integration of these concepts at an advanced level. This course will also cover career options and graduate education in sociology. Sociology program assessment is a component of the course. Sociology majors are required to take this course during their Senior year. Capstone 3 hours. Prerequisites: Student must be a sociology major, have taken SOCI 1113, SOCI 3113, SOCI 3133, and completed at least 18 credit hours of sociology coursework. (Spring)

*Liberal arts and sciences course.
DEPARTMENT OF SPORTS AND EXERCISE SCIENCE

FACULTY

CHAIR
Stephanie Boss, Assistant Professor

ASSISTANT PROFESSORS
K. Mahlock, M. Thacker

INSTRUCTORS
T. Chambers, R. Hollandsworth

MISSION STATEMENT
The mission of the Department of Sports & Exercise Science at Cameron University is to prepare students for successful careers in corporate, medical, and/or community based settings that embrace lifetime health and wellness of its constituents.

PROGRAM OF STUDY

Degrees & Majors: B.S. Sports and Exercise Science

GENERAL INFORMATION
Our undergraduate program offers a mixture of academic coursework and fieldwork opportunities that encompass the exercise science discipline. Emphasis of preparation includes placement of the student ‘early on’ within the real world setting. To achieve this outcome, our commitment relies in the ability to collaborate with community based businesses/school sites and surrounding institutions with the intent to build upon the student’s unique skill set throughout the degree program.

Students who are interested in pursuing a BS in Sports & Exercise Science acquire a strong foundation in science based curriculum that integrates research, education, and practical application within a variety of contexts to enhance personal fitness, health, and sport performance.

CAREERS AND FIELDS OF STUDY
Common fields of study include: Teaching, Coach/Scout, Fitness Trainer/Instructor, Health Educator, Recreation, or Accredited Certifications.

For students who are interested in becoming a physical therapist assistant, the Sports & Exercise Science curriculum includes all prerequisite courses required by Physical Therapy Assistant (PTA) Programs in the state of Oklahoma.

Earning a Bachelor’s Degree in Sports & Exercise Science provides a solid foundation for students who are interested in pursuing professional degrees in the following health-related disciplines: Registered Nurse, Dietitian, Chiropractor, Athletic Trainer, Exercise Physiologist, Occupational Therapist, Physical Therapist, Physician Assistant, Prosthetics and Orhtotics Specialist, Recreational Therapist, or Sports Psychologist.

STUDENT ORGANIZATION
Sports and Exercise Science Club
Provides service projects for the community, educates people about ideals and benefits of physical education, provides academic and social activities for its members and promotes unity among those members.

### General Electives to Complete 124 hours

### Graduation Requirements

- Department Requirements
- Minimum 124 Total Credit Hours
- Minimum 124 Total Credit Hours
- Minimum 40 Upper Division Credit Hours
- Minimum 55 Liberal Arts & Science Credit Hours
- Minimum 30 Credit Hours in Residence at CU
- Minimum 60 Credit Hours at a 4-Year Institution

- Minimum ½ of Major Upper Division Hours Completed at CU
- 15 of last 30 Credit Hours or ½ of Major Completed at CU
- Retention GPA 2.0
- Cameron GPA 2.0
- Minimum grade of "C" in major and guided electives
- Complete Graduation Application Online
COURSE DESCRIPTIONS

PHYSICAL EDUCATION ACTIVITY (PE)

1021 TEAM SPORTS – COED 1 credit hour Refine team sport skills through drill instruction and class participation. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

1081 PHYSICAL EDUCATION ACTIVITY 1 credit hour Individual and group activities for general physical improvement. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

1091 TOTAL FITNESS 1 credit hour Low impact exercise that combines strength and cardiovascular conditioning that lead to improved exercise outcomes. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

1111 WATER EXERCISE 1 credit hour To improve overall cardiovascular fitness level through aquatic based exercise modalities. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

1171 VOLLEYBALL 1 credit hour Fundamentals and techniques of volleyball. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

1181 RACQUET SPORTS 1 credit hour Basic skills and knowledge associated with playing a variety of racquet sports. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

1231 WALKING AND JOGGING I 1 credit hour Participation in introductory exercise programs that involve walking and jogging to promote physical fitness. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

1241 WALKING AND JOGGING II 1 credit hour Participate in intermediate exercise programs that involve walking and jogging to help maintain physical fitness. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

1271 WEIGHT TRAINING 1 credit hour Participate in an exercise program with emphasis on muscular strength and endurance. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

1361 SPin 1 credit hour Low to moderate intensity workout for building strength. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

1441 WEIGHT LOSS YOGA 1 credit hour Discuss current eating trends and perform breathing exercises, yoga poses and meditation techniques that support weight loss. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

1531 LINE DANCING 1 credit hour Introduction to line dancing using fundamental skills to execute rhythmic dances in social settings to include exposure to several genres of music, dance terminology, and a brief history of dance. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

1601 INTRODUCTION TO HIKING 1 credit hour Review safety guidelines and develop basic skills for exploring popular hiking trails. A medical release is required for students who may need exercise accommodations due to a medical condition. Laboratory 2 hours. General Education, Health and Wellness.

SPORTS AND EXERCISE SCIENCE (SES)

2003* HEALTH 3 credit hours Active process of becoming aware of and making choices that lead to improved health outcomes. Lecture 3 hours. General Education, Health and Wellness.

2013* WELLNESS 3 credit hours Active process of becoming aware of and making choices that lead to improved exercise outcomes. A physical activity component is required. A medical release is required for students who may need accommodations due to a medical condition. Lecture 3 hours. General Education, Health and Wellness.

2023* NUTRITION 3 credit hours Active process of becoming aware of and making choices that lead to improved dietary outcomes. Lecture 3 hours. General Education, Health and Wellness. (Fall, Spring)

2033 FIRST AID 3 credit hours Respond to life-threatening emergencies in multiple populations and provide life-saving interventions until emergency medical services arrive. (Optional certification in First Aid, CPR and AED). Lecture 3 hours. (Fall, Spring)

2043 INTRODUCTION TO SPORTS AND EXERCISE SCIENCE 3 credit hours Examine basic terms, current trends, career pathways and potential employment opportunities in the field. Lecture 3 hours. (Recommended for Freshman and Sophomore SES majors.) (Fall, Spring)

3003* SPORTS NUTRITION 3 credit hours Examine energy needs for various levels of physical activity and
effect of dietary intake on performance. Lecture 3 hours. Prerequisite: SES 2023. (Spring)

**3013** APPLIED ANATOMY AND KINESIOLOGY 3 credit hours Examine musculoskeletal anatomy as it applies to simple and complex motor tasks and proper execution of joint movement during common exercises. (May not be used as a Biology course.) Lecture 3 hours. (Fall, Spring)

**3023** CARE AND PREVENTION OF ATHLETIC INJURIES 3 credit hours Examine preventative measures and practice proper treatment of specific sports injuries resulting from activities in the home, recreational, intramural and extramural settings. Lecture 3 hours. Prerequisite: SES 3013. (Fall, Spring)

**3033** PHYSIOLOGY OF EXERCISE 3 credit hours Examine how the body, from a functional standpoint, responds, adjusts and adapts to exercise. Lecture 3 hours. Prerequisite: SES 3023. (Fall, Spring)

**3043** BIOMECHANICS 3 credit hours Analyze how external forces interact with internal forces to control human motion. Lecture 3 hours. Prerequisite: SES 3013. (Spring)

**3053** FACILITY MANAGEMENT 3 credit hours Examine principles of business that support the operation of physical activity programs. Lecture 3 hours. Prerequisite: SES 3023. (Fall)

**3063** HEALTH AND BEHAVIOR CHANGE 3 credit hours Apply behavior modification strategies to help guide and support individuals in making sustainable lifestyle changes that lead to improved health outcomes. Lecture 3 hours. Prerequisite: SES 3013.

**3073** RECREATION FOR SPECIAL POPULATIONS 3 credit hours Programming of recreational activities for special populations. Lecture 3 hours. Prerequisite: SES 2013.

**3083** COMMUNITY RECREATION PROGRAMS 3 credit hours Examine supervisory role of various recreational programs with emphasis in leadership, program planning, budgeting, managerial techniques, and environmental awareness. Lecture 3 hours. Prerequisite: SES 2043.

**3093** GENERAL MEDICAL CONDITIONS 3 credit hours Examine the pharmacological, behavioral and psychological effects of some of the most commonly used legal and illegal drugs in modern society. Lecture 3 hours. Prerequisite: SES 2003.

**3103** LEADERSHIP AND COACHING 3 credit hours Develop individual skills in the practice of coaching as well as a broad understanding of leadership within the larger context of organizational performance and change. Lecture 3 hours. Prerequisite: SES 2043.

**3113** EVENT PLANNING AND FUNDRAISING 3 credit hours Planning and management of special events. Overview of fundraising components and operation, as well as guidelines to implement and manage effective sports related events. Lecture 3 hours. Prerequisite: SES 2043.

**3123** SPORT PSYCHOLOGY 3 credit hours Explore the psychological factors involved in sport and physical activity with an emphasis on performance enhancement. Lecture 3 hours. Prerequisite: SES 2003.

**3131-3** SPECIAL STUDIES 1-3 credit hours Special studies courses, of one to three credits, that are designed to give variety to the present curriculum or educational activities under the direct supervision of a faculty member. Up to 12 hours of special studies courses may be applied to a student’s program. (A special studies course may be repeated if a different topic is offered.) Independent study, 1-3 hours. Prerequisite: SES 3023.

**3143** PERSONAL TRAINING 3 credit hours Examine training principles and develop appropriate exercise plan based on the goals, indications, contraindications, and physical evaluation of the individual. Lecture 3 hours. Prerequisite: SES 3033.

**3153** STRENGTH TRAINING 3 credit hours Examine and apply the proper strength training and conditioning exercises for the athletic or sedentary populations. Lecture 3 hours. Prerequisite: SES 3033.

**4003** MOTOR LEARNING 3 credit hours Examine variables that affect the learning processes associated with the acquisition and performance of motor skills. Lecture 3 hours. Prerequisite: SES 3043. (Fall)

**4013** PHYSIOLOGY OF EXERCISE LAB 3 credit hours Apply practical skills and cutting-edge technologies to evaluate the effects of exercise and physical activity on health. Lecture 3 hours. Prerequisite: SES 3033. (Fall)

**4023** EXERCISE PRESCRIPTION 3 credit hours Examine and apply principles used in exercise testing and prescription for normal healthy individuals and special populations. Lecture 3 hours. Prerequisite: SES 4013. (Spring)

**4033** LEGAL ASPECTS 3 credit hours Examine legal and social policy issues most often encountered in sport and physical activity. Lecture 3 hours. Prerequisite: SES 3023. (Fall)

**4043** RESEARCH METHODS 3 credit hours Analyze scientific literature and apply appropriate methods for reading, presenting, and interpreting data involved in research design. Lecture 3 hours. Prerequisite: SES 3043. (Spring)

**4053** PRACTICUM 3 credit hours Intensive, senior-level work experience at an approved internship site while under the direction of a qualified site supervisor. Workshop and practicum component is required. Internship/Capstone 3 hours. Prerequisites: SES 2033 and completion of or concurrent enrollment in SES 4013 and SES 4023 and SES 4043. (Fall, Spring)

*Liberal arts and sciences course
SCHOOL OF ARTS AND SCIENCES

Narayan Thapa–Chair

DEPARTMENT OF MILITARY SCIENCE
LTC Seth Hall–Chair

MISSION STATEMENT

The mission of the School of Arts and Sciences is to offer quality associate and baccalaureate programs in the fine arts, humanities, and sciences. The School also plays an important role in general education. In our programs and course offerings, the School of Arts and Sciences fosters a student-centered academic environment, in keeping with the mission of the University, and is dedicated to guiding students to the highest possible standard of achievement.

GENERAL INFORMATION

The School of Arts and Sciences offers degree programs in Art, Music and Theatre Arts; Agriculture, Biology and Health Sciences; Communication, English and Foreign Languages; Chemistry, Physics, and Engineering; and Mathematics and a minor in Military Science.

Our faculty members believe strongly in creating student-centered learning environments and engaging students in exploration and discovery. We engage students in undergraduate research, internships, and special programs which extend beyond the traditional classroom.

We take pride in being innovative and creative teachers and scholars in guiding and mentoring students to the highest possible standards of academic achievement. We prepare students for a lifetime of learning and contributing in professional and cultural life.

We have within our school several state-of-the-art facilities with particularly well equipped labs in the Sciences, including our Gross Anatomy lab, and the new broadcast and newsroom facilities in the Academic Commons.

Each year we present a broad array of university events such as theatre productions, art exhibits, concerts, public lectures, readings, film showings and other events to which we invite the campus community and the public.

Faculty in the school are also advisors for a wide range of student organizations. We feel strongly that important aspects of a university education take place outside the classroom. We urge all students to be full participants in campus life and to take advantage of the activities and organizations available on our campus.

Please contact any of the departments in the School of Arts and Sciences for additional information regarding our degree programs. We wish you every success and are here to guide and to help as you pursue your education.
DEPARTMENT OF AGRICULTURE, BIOLOGY, AND HEALTH SCIENCES

FACULTY

CHAIR
Terry Conley, Professor

PROFESSORS
J. Dodd, M. Dunn, M. Husak

ASSOCIATE PROFESSOR
M. Van Sant

ASSISTANT PROFESSORS
R. Gaines, D. Lee, A. Miller

INSTRUCTORS
C. Baxter, J. Bricker, L. Gaines, D. Ousley, A. Reid, K. Smith, S. Walls

MISSION STATEMENT
The mission of Cameron University's Department of Agriculture, Biology and Health Sciences is to provide high quality instruction to students at the undergraduate level using a multi-disciplinary approach that emphasizes active learning, problem solving, and critical thinking.

The department is committed to research and scholarly activities that advance, integrate, broaden, and communicate knowledge to our students and colleagues in the natural sciences. Our vision is to achieve excellence in education through creative use of traditional and innovative instructional methods, technology, and research. The department strives to develop students into scholars, mentors, and responsible citizens of their community, state and country who make a positive difference in society by enhancing agricultural productivity, environmental sustainability, and proper management of natural resources.

PROGRAMS OF STUDY

Degrees & Majors: A.A.S Radiologic Technology
A.A.S. Respiratory Care
A.S. Allied Health Sciences
B.S. Agriculture
- Agribusiness Management
- Agronomy
- Animal Science
- General Agriculture
B.S. Biology
- Cell and Molecular
- Organismal Biology
- Medical Laboratory Science

as well as preparation for pursuing the graduate degrees that are required by many careers in advanced professions.

POSITION STATEMENT ON EVOLUTION
Evolution is the generation to generation change in the frequency of alleles in the gene pool and the division of populations into lineages. That this occurs is a fact. Evidence for the modes and tempos of evolution coming from laboratory genetics, population genetics, natural history, systematics, and paleontology, is so overwhelming that no scientific discipline refutes evolution. Understanding this concept is crucial to understanding all disciplines of biology including but not limited to ecology and evolutionary biology, cellular and molecular biology, and medicine. Therefore, the Biological Sciences program integrates evolution into all of its courses and does not teach non-scientific concepts based on mythology or literature.

STUDENT ORGANIZATIONS

Aggie Club
The Cameron University Aggie Club, built on tradition, hard work, fun and friendliness, has been a part of the university from its beginnings and has gained recognition as an outstanding organization that provides a wide variety of events that are fun for everyone.

Biology Club
The Biology Club provides fellowship for biology students and other individuals interested in biological sciences.

Beta Beta Beta
Tri Beta is an honor society which provides fellowship for biology students and promotes interest in graduate and professional studies.

Health Professions Society (HPS)
Health Professions Society (HPS) promotes student enrichment for all Cameron University students interested in pursuing a health career.
**Degree Plan: Radiologic Technology (S85)–Associate in Applied Science**
School of Arts and Sciences  
Department of Agriculture, Biology, and Health Sciences  
Catalog Year: 2019-2021

### General Education Requirements 19 hours
**Required Courses–19 hours**
- BIOL 1214/1214L Human Biology with lab
- COMM 1113 Principles of Communication
- ENGL 1113 English Composition I
- MATH 1413, 1513, 1613, 2215, 2713, or STAT 1513
- HIST 1483 or 1493 U.S. History To or Since 1865
- PS 1113 American Federal Government

### University Requirements 4–6 hours
- UNIV 1001 or 1113–1-3 hours
  - Computer Literacy–CIS 1013 or MIS 2113

### Major Requirements 61 hours
**NOTE:** All Courses Listed Below are Required

#### Technical-Occupational Specialty Courses–7 hours
- BIOL 2013 Medical Terminology (FA, SP)*
- BIOL 2034/2034L Human Anatomy with Lab (FA, SP)†

#### Technical-Occupational Specialty Courses–54 hours‡,§
- RAD 2013 Intro to Radiologic Sci & Hlth Care (FA)
- RAD 2113 Patient Care in Radiologic Sciences (FA)
- RAD 2123 Radiation Physics (FA)
- RAD 2133 Radiographic Proc & Image Analysis I (FA)
- RAD 2204 Clinical Practice I (SP)
- RAD 2214 Principles of Exposure (SP)
- RAD 2224 Radiographic Proc & Image Analysis II (SP)
- RAD 2302 Clinical Practice II (SU)
- RAD 2311 Basic Princ of Computed Tomography (SU)
- RAD 2323 Radiographic Proc & Image Analysis III (SU)
- RAD 2402 Radiographic Pathology (FA)
- RAD 2414 Clinical Practice III (FA)
- RAD 2423 Digital Image Acquisition & Display (FA)
- RAD 2433 Radiographic Proc & Image Analysis IV (FA)
- RAD 2503 Clinical Practice IV (SP)
- RAD 2513 Radiation Biology & Protection (SP)
- RAD 2523 Pharmacology & Veniculture (SP)
- RAD 2533 Radiologic Technology Seminar (SP)

*FA=Fall; SP=Spring; SU=Summer
†A minimum grade of C in BIOL 2013 and BIOL 2034/2034L is required for admission to the Radiologic Technology program.
‡Credit to contact hour ratios for RAD courses are as follows:  
Didactic (Lecture): 1 credit hour = 16 contact hours  
Lab: 1 credit hour = 40 contact hours  
Clinical: 1 credit hour = 82.5 contact hours  
§RAD courses will undergo revision in Fall 2019.

### General Electives to Complete 124 hours

### Graduation Requirements

- Minimum 124 Total Credit Hours
- Minimum 40 Upper Division Credit Hours
- Minimum 55 Liberal Arts & Science Credit Hours
- Minimum 30 Credit Hours in Residence at Cameron
- Minimum 60 Credit Hours at a 4-Year Institution
- Minimum ½ of Major Upper Division Hrs Completed at CU 15 of last 30 Credit Hours or ½ of Major Completed at CU
- Retention GPA 2.0
- Cameron GPA 2.0
- Complete Graduation Application Online
### Agribusiness Management (20 hours)

**Required Courses (9 hours)**
- ACCT 2013 Principles of Financial Accounting
- AGRC 3303 Agricultural Marketing
- AGRC 4333 Agricultural Finance

**Electives (11 hours)**
Minimum of 11 hours selected from ACCT, BUS, ECON, FIN, MKTG, or MGMT courses or AGRC 4421-3 (maximum of 3 hours).

(Courses in the Department of Business may require additional prerequisites.)

### Agronomy (20 hours)

**Required Courses (9 hours)**
- AGRC 4223 Integrated Pest Management
- AGRN 3213 Forage, Range, and Pasture Crops
- AGRN 3513 Fiber and Oilseed Crops

**Electives (11 hours)**
Minimum of 11 hours selected from AGRC, AGRN, ANIM, BIOL, or ENSC courses with a maximum of 3 hours each in AGRC 4321-3 and AGRC 4421-3.

(BIOL courses must be above the level of BIOL 1364 and may require additional prerequisites.)

### Animal Science Option (20 hours)

**Required Courses (10 hours)**
- AGRC 4223 Integrated Pest Management
- ANIM 3653 Animal Nutrition
- ANIM 4434 Animal Reproduction

**Electives (10 hours)**
Minimum of 10 hours selected from AGRC, AGRN, ANIM, BIOL, or ENSC courses with a maximum of 3 hours each in AGRC 4321-3 and AGRC 4421-3.

(BIOL courses must be above the level of BIOL 1364 and may require additional prerequisites.)

### General Agriculture (20 hours)

**Required Course (3 hours)**
- AGRC 4223 Integrated Pest Management

**Electives (17 hours)**
Minimum of 17 hours selected from AGRC, AGRN, ANIM, BIOL, or ENSC courses with a maximum of 3 hours each in AGRC 4321-3 and AGRC 4421-3.

(BIOL courses must be above the level of BIOL 1364 and may require additional prerequisites.)

Additional Requirements 25–37 hours

- CHEM 1361/1364 General Chemistry I & General Chemistry I Lab
- CHEM 1471/1474 General Chemistry II & General Chemistry II Lab
- CHEM 3314/3314L Organic Chemistry I & Lab
- CHEM 3324/L Organic Chemistry II & Lab (Conc A & C only)
- CHEM 4403 Biochemistry I (Conc A & C only)
- MATH 1613 Plane Trigonometry (or higher) (Conc A & B only)
- MATH 1513 or higher (Conc C only)
- MIS 2113 Fundamental MIS Tools and Skills
- PHYS 1115/L Physics I & Lab OR PHYS 2015/L Physics I for Science and Engineering Majors I & Lab (Conc A & B only)
- PHYS 1215/L Physics II & Lab OR PHYS 2025/L Physics II for Science and Engineering Majors I & Lab (Conc A only)

General Electives to Complete 124 hours

Graduation Requirements

- Minimum 124 Total Credit Hours
- Minimum 40 Upper Division Credit Hours
- Minimum 40 Liberal Arts & Science Credit Hours
- Minimum 30 Credit Hours in Residence at Cameron
- Minimum 60 Credit Hours at a 4-Year Institution

- Minimum ½ of Major Upper Div Hours Completed at CU
- 15 of last 30 Credit Hours or ½ of Major Completed at CU
- Retention GPA 2.0
- Cameron GPA 2.0
- Complete Graduation Application Online

COURSE DESCRIPTIONS

AGRICULTURE (AGRC)

1124 INTRODUCTION TO ANIMAL SCIENCE 4 credit hours Species adaptability, product standards and requirements, areas and types of production, processing and distribution of products; (includes meat animals, dairy and poultry). Lecture 3 hours, laboratory 2 hours. Corequisite: AGRC 1124L. (Fall)

1124L INTRODUCTION TO ANIMAL SCIENCE LAB 0 credit hours LAB: Species adaptability, product standards and requirements, areas and types of production, processing and distribution of products; (includes meat animals, dairy and poultry). Lecture 3 hours, laboratory 2 hours. Corequisite: AGRC 1124. (Fall)

1214 INTRODUCTION TO PLANT SCIENCE 4 credit hours Factors determining growth, distribution, culture, improvement and utilization of economic plants. Lecture 3 hours, laboratory 2 hours. Corequisite: AGRC 1214L. (Spring)

1214L INTRODUCTION TO PLANT SCIENCE LAB 0 credit hours LAB: Factors determining growth, distribution, culture, improvement and utilization of economic plants. Lecture 3 hours, laboratory 2 hours. Corequisite: AGRC 1214. (Spring)

2013* INTRODUCTION TO AGRICULTURAL ECONOMICS 3 credit hours A study of economic principles as they relate to the national economy, production, marketing and consumption of agricultural products. Lecture 3 hours. General Education, Economics. (Fall, Spring)

2123 PRINCIPLES OF LIVESTOCK FEEDING 3 credit hours An introductory study of livestock feeding problems. The selection and preparation of feeds for the different classes of livestock. Practical feeding methods, balancing rations for various livestock species. Lecture 3 hours. Prerequisite: AGRC 1124.

2124* FUNDAMENTALS OF SOIL SCIENCE 4 credit hours A general course dealing with the origin, chemical, physical, and biological properties of soils in relation to plant growth, engineering and environmental uses. Lecture 3 hours, laboratory 2 hours. Prerequisite: CHEM 1004 or equivalent. Corequisite: AGRC 2124L. (Spring)

2124L* FUNDAMENTALS OF SOIL SCIENCE LAB 0 credit hours LAB: A general course dealing with the origin, chemical, physical, and biological properties of soils in relation to plant growth, engineering and environmental uses. Lecture 3 hours, laboratory 2 hours. Prerequisite: CHEM 1004 or equivalent. Corequisite: AGRC 2124. (Spring)

3001-2 AGRICULTURAL WORKSHOP 1-2 credit hours A course designed to emphasize innovations in the field of Agriculture. Flexible format to include the use of lectures or demonstrations combined with practical applications, field studies, or other forms of experiential learning. May be repeated with a change in course topic up to a maximum of 4 credit hours. Workshop, 1-2 hours.

Prerequisite: Completion of General Education Biological Science OR Physical Science requirements.

3303 PRINCIPLES OF AGRICULTURAL MARKETING 3 credit hours Analysis of the marketing system; its importance to the economy and the role of the individual firm. Understanding of basic concepts, problems, and decision aids is emphasized. Lecture 3 hours. Prerequisite: AGRC 2013.

3413 FARM AND RANCH MANAGEMENT 3 credit hours Production planning with budgeting, market planning, financial records, and income tax management for the individual farm-ranch business. Lecture 3 hours. Prerequisite: AGRC 2013.

3513 PRINCIPLES OF AGRICULTURAL MANAGEMENT 3 credit hours An introduction to fundamental concepts associated with management of agribusiness firms, including finance, management, marketing and human resources. Special emphasis will be placed on the development of business plans. Computer applications and simulations will be utilized to model performance of agribusiness firms. Prerequisite: AGRC 2013. (Fall)

3613 AGRICULTURAL AND FOOD POLICY 3 credit hours Applications of economic principles to policy analysis related to agricultural and food issues facing the United States and the world. Includes study of the nature, causes, and effects of governmental participation in agriculture, and the interrelationships of the American agricultural and agribusiness sectors with the political and economic system, public administration, and interest group representation. Prerequisite: AGRC 2013. (Spring)

3813 MODERN PRECISION AGRICULTURE 3 credit hours Principles of acquisition and analysis of geographically referenced data for the management of crop and livestock production systems. Topics include: mapping, global positioning systems, geographic information systems, crop modeling, livestock monitoring, applications of technology including fixed wing, single rotor, and multi-rotor drones, and selection of appropriate sensor systems. Field trips are an integral and required part of the course. Lecture 3 hours. Prerequisite: AGRC 2124/2124L.

4223 INTEGRATED PEST MANAGEMENT 3 credit hours Management of pests in agricultural situations. Topics include fundamentals of pest management, selection and safe use of herbicides and insecticides, control of weed species, insect species, rodents, and nuisance wildlife, and regulatory agency considerations. Lecture 3 hours. Prerequisites: AGRC 2124/2124L and CHEM 1004, CHEM 1105/1105L, or CHEM 1364/1361.

4321-3 SPECIAL STUDIES IN AGRICULTURE 1-3 credit hours Independent study based on the review of literature, laboratory problems, or field investigations. Independent study 1-3 hours. Prerequisite: Junior or Senior standing.

4333 AGRICULTURAL FINANCE 3 credit hours An introduction to the planning, analyzing and controlling of business performance in agriculture and on the related
financial markets. The topics covered include financial statements, capital structure, capital budgeting, financial markets, and commercial lending for farms and ranches as well as for agribusiness firms. Special emphasis will be placed on liquidity and credit, risk management, financial intermediaries, and outside equity capital. Lecture 3 hours. Prerequisite: AGRC 2013 and ACCT 2013.

**4421-3 AGRICULTURAL INTERNSHIP** 1-3 credit hours Supervised work experience in a professional setting directly related to a sub-discipline in the field of agriculture. The internship will allow students to encounter practical workplace situations within their major field and gain experience in a business setting. Students may apply up to 3 credit hours of internship credit to a major in agriculture. A minimum of 32 hours of training or work is required per credit hour. Internship 2-6 hours. Prerequisite: Department permission.

**4572 AGRICULTURAL CAPSTONE** 2 credit hours Required capstone course in the agriculture major. Designed to bring reflection and focus to the whole of the university experience and to encourage students to integrate and synthesize aspects of agriculture with important concepts from related disciplines. Provides resources for careers, professional programs, and graduate school. Includes required program assessment. Capstone/Lecture 2 hours. Prerequisite: Senior standing and departmental permission. (Fall)

**AGRONOMY (AGRN)**

**3213 FORAGE, RANGE, AND PASTURE CROPS** 3 credit hours Principles of production management, utilization, and improvement of forages for livestock. Lecture 3 hours. Prerequisites: AGRC 1214/1214L.

**3312 CROP SCIENCE LABORATORY** 2 credit hours LAB: Application of principles of field crop science in laboratory and field to include seed and plant identification, implement calibration, and field research techniques. Laboratory 4 hours. Prerequisites: Concurrent enrollment in AGRN 3213, AGRN 3513, or AGRN 4673.

**3434* SOIL MORPHOLOGY, GENESIS, AND CLASSIFICATION** 4 credit hours Taxonomy of Soils. A study of the internal differentiating characteristics of soils and their causal processes; the U. S. comprehensive system of soil classification; soil survey techniques. Lecture 3 hours, laboratory 2 hours. Prerequisites: AGRC 2124/2124L. Corequisite: AGRN 3434L.

**3434L* SOIL MORPHOLOGY, GENESIS, AND CLASSIFICATION LAB** 0 credit hours LAB: Taxonomy of Soils. A study of the internal differentiating characteristics of soils and their causal processes; the U. S. comprehensive system of soil classification; soil survey techniques. Lecture 3 hours, laboratory 2 hours. Prerequisites: AGRC 2124/2124L. Corequisite: AGRN 3434.

**3513 FIBER AND OILSEED CROPS** 3 credit hours Principles of Fiber and oilseed crop production, distribution, classification, and improvement. Lecture 3 hours. Prerequisites: AGRC 1214.

**4673 GRAIN CROPS** 3 credit hours Principles of grain crop production, classification, and improvement. Lecture 3 hours. Prerequisites: AGRC 1214/1214L.

**ALLIED HEALTH SCIENCES (AHS)**

**1003 INTRODUCTION TO PUBLIC HEALTH** 3 credit hours Introduction to Public Health introduces the major concepts and principles of public health and the options for intervention to promote health and prevent disease. It is not applicable to the Biology major or minor. Lecture 3 hours. Prerequisites: Must be MATH 1513 eligible. (Fall, Spring)

**ANIMAL SCIENCE (ANIM)**

**3103 LIVESTOCK EVALUATION** 3 credit hours Instruction in selection, evaluating, fitting, showing, and judging of multiple species of commercial livestock. Lecture 2 hours, laboratory 2 hours. Prerequisite: AGRC 1124/1124L. Corequisite: ANIM 3103L.

**3103 LIVESTOCK EVALUATION LAB** 0 credit hours LAB: Instruction in selection, evaluating, fitting, showing, and judging of multiple species of commercial livestock. Lecture 2 hours, laboratory 2 hours. Prerequisite: AGRC 1124/1124L. Corequisite: ANIM 3103.

**3133 BREEDS OF LIVESTOCK** 3 credit hours Study of the origin, history, development and characteristics of livestock breeds and of the specific purposes of each breed. Lecture 3 hours. Prerequisite: AGRC 1124/1124L. (Fall)

**3143 EQUINE SCIENCE** 3 credit hours Scientific principles of equine anatomy, physiology, genetics, reproduction, breeding, nutrition, and health; current management practices based on these principles. Overview of the equine industry including career choices. Lecture 3 hours.

**3653 PRINCIPLES OF ANIMAL NUTRITION** 3 credit hours Principles of animal nutrition including composition, characteristics, digestion, absorption, and metabolism of various feedstuffs and ration additives, qualitative and quantitative nutrient requirements of each of the classes of livestock, formulation of rations for each of the classes of livestock. Lecture 3 hours. Prerequisites: AGRC 1124/1124L and CHEM 1004, CHEM 1105/1105L, or CHEM 1364/1361.

**4113 BEEF CATTLE SCIENCE** 3 credit hours Application of scientific principles and recent advances to the production, feeding, breeding, management, and marketing of commercial and purebred cattle. Lecture 2 hours, laboratory 2 hours. Prerequisites: ANIM 3653, 4434 and senior standing. Corequisite: ANIM 4113L.

**4113L BEEF CATTLE SCIENCE LAB** 0 credit hours LAB: Application of scientific principles and recent advances to the production, feeding, breeding, management, and marketing of commercial and purebred cattle. Lecture 2 hours, laboratory 2 hours. Prerequisites: ANIM 3653/3653L, ANIM 4434/4434L, and Senior standing. Corequisite: ANIM 4113.
SWINE SCIENCE 3 credit hours The application of genetics, physiological, nutritional and engineering principles to the efficient production of swine. Swine evaluation and marketing. Lecture 2 hours, laboratory 2 hours. Prerequisites: ANIM 3653/3653L, ANIM 4434/4434L. Corequisite: ANIM 4123L.

SWINE SCIENCE LAB 0 credit hours LAB: The application of genetics, physiological, nutritional and engineering principles to the efficient production of swine. Swine evaluation and marketing. Lecture 2 hours, laboratory 2 hours. Prerequisites ANIM 3653 and ANIM 4434. Corequisite: ANIM 4123.

SHEEP SCIENCE 3 credit hours Breeding, feeding, management, and marketing of commercial and purebred sheep. Lecture 2 hours, laboratory 2 hours. Prerequisites: ANIM 3653/3653L, ANIM 4434/4434L. Corequisite: ANIM 4133.

SHEEP SCIENCE LAB 0 credit hours LAB: Breeding, feeding, management, and marketing of commercial and purebred sheep. Lecture 2 hours, laboratory 2 hours. Prerequisites: ANIM 3653/3653L, ANIM 4434/4434L. Corequisite: ANIM 4133L.

LIVESTOCK DISEASES AND SANITATION 3 credit hours The recognition and study of common diseases and parasitic infestations together with their prevention and control in domestic animals. Lecture 3 hours. Prerequisite: AGRC 1124/1124L.

ANIMAL REPRODUCTION 4 credit hours Physiological processes of reproduction in farm animals, gonadal function, endocrine relationships, fertility, and factors affecting reproduction efficiency. Emphasis is given to principles of artificial insemination in the laboratory. Lecture 3 hours, laboratory 2 hours. Prerequisite: AGRC 1124/1124L. Corequisite: ANIM 4434L.

ANIMAL REPRODUCTION LAB 0 credit hours LAB: Physiological processes of reproduction in farm animals, gonadal function, endocrine relationships, fertility, and factors affecting reproduction efficiency. Emphasis is given to principles of artificial insemination in the laboratory. Lecture 3 hours, laboratory 2 hours. Prerequisite: AGRC 1124/1124L. Corequisite: ANIM 4434.

BIOLOGY (BIOL)

GENERAL BIOLOGY 4 credit hours A life science laboratory course for non-science majors. Students should learn the principles of cell structure/function, genetics, evolution and organismal diversity, ecology, and the scientific method. Such principles will be applied in discussions of biotechnology, conservation of biodiversity and natural resources, human population growth, and global environmental changes. Not applicable to the Biology major or minor, Medical Technology major, or Allied Health Science major. Lecture 3 hours, laboratory 2 hours. Prerequisites: Student must be eligible to take MATH 1413 or higher. Corequisite: BIOL 1004L. General Education Laboratory Science, Biological Science.

GENERAL BIOLOGY LAB 0 credit hours LAB: A life science laboratory course for non-science majors. Students should learn the principles of cell structure/function, genetics, evolution and organismal diversity, ecology, and the scientific method. Such principles will be applied in discussions of biotechnology, conservation of biodiversity and natural resources, human population growth, and global environmental changes. Not applicable to the Biology major or minor, Medical Technology major, or Allied Health Science major. Lecture 3 hours, laboratory 2 hours. Prerequisites: Student must be eligible to take MATH 1413 or higher. Corequisite: BIOL 1004. General Education Laboratory Science, Biological Science.

ESSENTIAL HUMAN ANATOMY & PHYSIOLOGY 2 credit hours Introductory one-semester survey of the structure and function of the human body, with emphasis on internal organs. Strongly recommended for students requiring math/English remediation before taking BIOL 2034/2034L and BIOL 2134/2134L. Does not fulfill pre-health-care requirements (pre-nursing, pre-physical therapy, etc.) except for respiratory care. Lecture 2 hours. (Fall)

PLANTS AND CULTURE 4 credit hours A general education course that will explore the historical, social, and economic relationships between plants and people. Topics covered in class include a brief introduction to the plant kingdom and plant anatomy and morphology with more in depth coverage of human plant usage including foods, beverages, spices, fibers, and medicines. The lab portion of the course will in part involve hands-on production of plant products, and where appropriate (and legal) include sampling these products. Not applicable to biology major or minor or medical technology major. Lecture 3 hours, laboratory 2 hours. Corequisite: BIOL 1114L. General Education Laboratory Science, Biological Science.

PLANTS AND CULTURE LAB 0 credit hours LAB: A general education course that will explore the historical, social, and economic relationships between plants and people. Topics covered in class include a brief introduction to the plant kingdom and plant anatomy and morphology with more in depth coverage of human plant usage including foods, beverages, spices, fibers, and medicines. The lab portion of the course will in part involve hands-on production of plant products, and where appropriate (and legal) include sampling these products. Not applicable to biology major or minor or medical technology major. Lecture 3 hours, laboratory 2 hours. Corequisite: BIOL 1114. General Education Laboratory Science, Biological Science.
1214* HUMAN BIOLOGY 4 credit hours Human Biology is a general education science lab course that introduces the basic concepts of biology, using humans and society as a focus. After establishing the molecular and cellular basis of life, the course describes and investigates the structure and function of the human body with an emphasis on homeostasis. It concludes with an examination of the principles of evolution and ecology, again focusing on human impact on the environment. It is not applicable to the Biology major or minor. Lecture 3 hours, laboratory 2 hours. Prerequisites: Student must be eligible to take MATH 1513. Corequisite: BIOL 1214L. General Education Laboratory Science, Biological Science.

1214L* HUMAN BIOLOGY LAB 0 credit hours LAB: Human Biology is a general education science lab course that introduces the basic concepts of biology, using humans and society as a focus. After establishing the molecular and cellular basis of life, the course describes and investigates the structure and function of the human body with an emphasis on homeostasis. It concludes with an examination of the principles of evolution and ecology, again focusing on human impact on the environment. It is not applicable to the Biology major or minor. Lecture 3 hours, laboratory 2 hours. Prerequisites: Student must be eligible to take MATH 1513. Corequisite: BIOL 1214. General Education Laboratory Science, Biological Science.

1364* PRINCIPLES OF BIOLOGY I 4 credit hours An introduction to the physical, chemical and biological principles associated with life from the subcellular to ecosystem level. Lecture 3 hours, laboratory 3 hours. Prerequisites: Student must be eligible to take MATH 1513. Corequisite: BIOL 1364L. General Education Laboratory Science, Biological Science. (Fall, Spring)

1364L* PRINCIPLES OF BIOLOGY I LAB 0 credit hours LAB: An introduction to the physical, chemical and biological principles associated with life from the subcellular to ecosystem level. Lecture 3 hours, laboratory 3 hours. Prerequisites: Student must be eligible to take MATH 1513. Corequisite: BIOL 1364. General Education Laboratory Science, Biological Science. (Fall, Spring)

1474* PRINCIPLES OF BIOLOGY II 4 credit hours A continuation of BIOL 1364. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 1364/1364L. Coreerequisite: BIOL 1474L. Will not satisfy general education science requirements. (Fall, Spring)

1474L* PRINCIPLES OF BIOLOGY II LAB 0 credit hours LAB: A continuation of BIOL 1364. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 1364/1364L. Corequisite: BIOL 1474. Will not satisfy general education science requirements. (Fall, Spring)

Biological Science courses at the 2000-, 3000-, or 4000-level may not be used to fulfill General Education science requirements.

2013 MEDICAL TERMINOLOGY 3 credit hours An introduction to the prefixes, roots, and suffixes used to construct medical terms. A systems approach will be used to survey the basic anatomy and physiology of the human body, followed by selected terms defining the pathology, diagnostic procedures, and treatment procedures of each system. Emphasis will be on learning to pronounce, spell, and define all terms. Lecture 3 hours. Will not satisfy general education science requirements. (Fall, Spring)

2034* HUMAN ANATOMY 4 credit hours Introductory anatomy with emphasis on histology and human gross anatomy. Includes cadaver dissection and study. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 1004/1004L or 1214/1214L or 1364/1364L. Corequisite: BIOL 2034L. Student must be eligible to take MATH 1513 or higher. Will not satisfy general education science requirements. (Fall, Spring)

2034L* HUMAN ANATOMY LAB 0 credit hours LAB: Introductory anatomy with emphasis on histology and human gross anatomy. Includes cadaver dissection and study. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 1004/1004L or 1214/1214L or 1364/1364L. Corequisite: BIOL 2034L. Student must be eligible to take MATH 1513 or higher. Will not satisfy general education science requirements. (Fall, Spring)

2121-2 SPECIAL STUDIES 1-2 credit hours Selected topics in biology which may include lecture, laboratory and/or field trips. May be repeated for a maximum of 3 credit hours. Lecture 1-2 hours. Will not satisfy general education science requirements.

2124* MICROBIOLOGY 4 credit hours A survey of the principles and techniques of microbiology with emphasis on disease prevention and health maintenance. Lecture 3 hours, laboratory 3 hours. Prerequisites: BIOL 1004/1004L or BIOL 1214/1214L or BIOL 1364/1364L or AGRC 1124/1124L and AGRC 1214/1214L and CHEM 1105/1105L or CHEM 1364/1361, and MATH 1513 or higher. Corequisite: BIOL 2124L. Will not satisfy general education science requirements.

2124L* MICROBIOLOGY LAB 0 credit hours LAB: A survey of the principles and techniques of microbiology with emphasis on disease prevention and health maintenance. Lecture 3 hours, laboratory 3 hours. Prerequisites: BIOL 1004/1004L or BIOL 1214/1214L or BIOL 1364/1364L or AGRC 1124/1124L and AGRC 1214/1214L and CHEM 1105/1105L or CHEM 1364/1361, and MATH 1513 or higher. Corequisite: BIOL 2124. Will not satisfy general education science requirements.

2134* HUMAN PHYSIOLOGY 4 credit hours Emphasis is on concepts and principles that serve as a foundation for understanding human physiology. Laboratory experiences demonstrate physiological mechanisms and serve as a basis for understanding clinical applications of physiology. Lecture 3 hours, laboratory 3 hours. Prerequisites: CHEM 1105/1105L or CHEM 1364/1361, and MATH 1513 or higher, and BIOL 2034/2034L or both BIOL 1364/1364L and BIOL 1474/1474L. Corequisite: BIOL 2134L. Will not satisfy general education science requirements. (Fall, Spring)
2134L* HUMAN PHYSIOLOGY LAB 0 credit hours LAB: Emphasis is on concepts and principles that serve as a foundation for understanding human physiology. Laboratory experiences demonstrate physiological mechanisms and serve as a basis for understanding clinical applications of physiology. Lecture 3 hours, laboratory 3 hours. Prerequisites: CHEM 1105/1105L or CHEM 1364/1361, and MATH 1513 or higher, and BIOL 2034/2034L or both BIOL 1364/1364L and BIOL 1474/1474L. Corequisite: BIOL 2134. Will not satisfy general education science requirements. (Fall, Spring)

2144* BOTANY 4 credit hours A survey of the plant kingdom stressing structure, function, life histories, and ecology. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 1474/1474L or AGRC 1214/1214L and AGRC 1214/1214L. Corequisite: BIOL 2144. Will not satisfy general education science requirements. (Spring)

2144L* BOTANY LAB 0 credit hours LAB: A survey of the plant kingdom stressing structure, function, life histories, and ecology. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 1474/1474L or AGRC 1214/1214L and AGRC 1214/1214L. Corequisite: BIOL 2144L. Will not satisfy general education science requirements. (Spring)

2154* ZOOLOGY 4 credit hours A phylogenetic and comparative survey of the animal kingdom that treats evolutionary, ecological, zoogeographical and morphological aspects of each phylum. Emphasis is on classification as it reflects evolutionary adaptation. Economic impact of wild animals on society and natural resource conservation are considered. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 1474/1474L or AGRC 1214/1214L and AGRC 1214/1214L. Corequisite: BIOL 2154L. Will not satisfy general education science requirements. (Fall)

2154L* ZOOLOGY LAB 0 credit hours LAB: A phylogenetic and comparative survey of the animal kingdom that treats evolutionary, ecological, zoogeographical and morphological aspects of each phylum. Emphasis is on classification as it reflects evolutionary adaptation. Economic impact of wild animals on society and natural resource conservation are considered. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 1474/1474L or AGRC 1214/1214L and AGRC 1214/1214L. Corequisite: BIOL 2154L. Will not satisfy general education science requirements. (Fall)

3012* PRACTICUM IN HUMAN ANATOMY 2 credit hours Students will serve as a teaching assistant for BIOL 2034L. Human Anatomy Lab and will obtain additional dissection experience and anatomical knowledge beyond material covered in that course. Prerequisites: Grade of “A” or “B” in BIOL 2034 or BIOL 3104 and permission of instructor and department chair. Will not satisfy general education science requirements.

3014* GENETICS 4 credit hours A general course in the cellular and molecular mechanisms of heredity. Lecture 3 hours, laboratory 3 hours. Prerequisites: BIOL 1474/1474L or AGRC 1214/1214L and AGRC 1214/1214L. Corequisite: BIOL 3014L. Will not satisfy general education science requirements. (Fall, Spring)

3041L* GENETICS LAB 0 credit hours LAB: A general course in the cellular and molecular mechanisms of heredity. Lecture 3 hours, laboratory 3 hours. Prerequisites: BIOL 1474/1474L or AGRC 1214/1214L and AGRC 1214/1214L. Corequisite: BIOL 3014L. Will not satisfy general education science requirements. (Fall, Spring)

3043* EVOLUTION 3 credit hours Historical development of evolutionary concepts, and current theories to account for speciation, evolutionary mechanisms, and phylogenetic relationships. Lecture 3 hours. Prerequisite: BIOL 2124/2124L and BIOL 2144/2144L or BIOL 2154/2154L. Will not satisfy general education science requirements. (Fall)

3054* PLANT TAXONOMY 4 credit hours Classification of flowering plants with emphasis on the flora of the area. Lecture 3 hours, laboratory 3 hours, and field trips. Prerequisite: BIOL 2144/2144L. Corequisite: BIOL 3054L. Will not satisfy general education science requirements.

3054L* PLANT TAXONOMY LAB 0 credit hours LAB: Classification of flowering plants with emphasis on the flora of the area. Lecture 3 hours, laboratory 3 hours, and field trips. Prerequisite: BIOL 2144/2144L. Corequisite: BIOL 3054L. Will not satisfy general education science requirements.

3064* ECOLOGY 4 credit hours General principles of biotic and abiotic interrelationships including sampling techniques, productivity, energy flow, interspecific association and biomes. Field trips arranged. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 2144/2144L or BIOL 2154/2154L. Corequisite: BIOL 3064L. Will not satisfy general education science requirements.

3064L* ECOLOGY LAB 0 credit hours LAB: General principles of biotic and abiotic interrelationships including sampling techniques, productivity, energy flow, interspecific association and biomes. Field trips arranged. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 2144/2144L or BIOL 2154/2154L. Corequisite: BIOL 3064L. Will not satisfy general education science requirements.

3074* NATURAL HISTORY OF THE VERTEBRATES 4 credit hours Ecology, taxonomy and life histories of vertebrates. Field trips arranged. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 2154/2154L. Corequisite: BIOL 3074L. Will not satisfy general education science requirements.

3074L* NATURAL HISTORY OF THE VERTEBRATES LAB 0 credit hours LAB: Ecology, taxonomy and life histories of vertebrates. Field trips arranged. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 2154/2154L. Corequisite: BIOL 3074L. Will not satisfy general education science requirements.

3084* ORNITHOLOGY 4 credit hours Identification, ecology, distribution and population dynamics of birds,
with emphasis on locally occurring species. Family and ordinal characters are stressed. Lecture 3 hours, laboratory 3 hours, field trips arranged. Prerequisite: BIOL 2154/2154L. Corequisite: BIOL 3084L. Will not satisfy general education science requirements.

**3084L* ORNITHOLOGY LAB 0 credit hours LAB:** Identification, ecology, distribution and population dynamics of birds, with emphasis on locally occurring species. Family and ordinal characters are stressed. Lecture 3 hours, laboratory 3 hours, field trips arranged. Prerequisite: BIOL 2154/2154L. Corequisite: BIOL 3084L. Will not satisfy general education science requirements.

**3093* IMMUNOLOGY 3 credit hours** Nature and mechanisms of natural and acquired resistance including humeral and cellular immunity. Characteristics of antigens and antibodies and of their interaction; transplantation reactions and hypersensitivities. Lecture 3 hours. Prerequisite: BIOL 2124/2124L. Will not satisfy general education science requirements.

**3104* COMPARATIVE VERTEBRATE ANATOMY 4 credit hours** Functional morphology and evolution of organ systems in representative chordates. This course emphasizes biomechanics and environmental adaptation, and fulfills the needs of pre-professionals and biology majors. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 2154/2154L. Corequisite: BIOL 3104L. Will not satisfy general education science requirements.

**3104L* COMPARATIVE VERTEBRATE ANATOMY LAB 0 credit hours LAB:** Functional morphology and evolution of organ systems in representative chordates. This course emphasizes biomechanics and environmental adaptation, and fulfills the needs of pre-professionals and biology majors. Lecture 3 hours, laboratory 3 hours, field trips arranged. Prerequisite: BIOL 2154/2154L. Corequisite: BIOL 3104L. Will not satisfy general education science requirements.

**3114* MAMMALOGY 4 credit hours** Classification, life histories, and distribution of mammals. Methods of collection and preservation. Lecture 3 hours, laboratory 3 hours, field trips arranged. Prerequisite: BIOL 2154/2154L. Corequisite: BIOL 3114L. Will not satisfy general education science requirements.

**3114L* MAMMALOGY LAB 0 credit hours LAB:** Classification, life histories, and distribution of mammals. Methods of collection and preservation. Lecture 3 hours, laboratory 3 hours, field trips arranged. Prerequisite: BIOL 2154/2154L. Corequisite: BIOL 3114L. Will not satisfy general education science requirements.

**3124* HISTOLOGY 4 credit hours** Structure of animals at tissue and organ levels with emphasis on recognition and function of mammalian tissues and organs. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 2034/2034L or BIOL 2154/2154L or BIOL 4004/4004L. Corequisite: BIOL 3124L. Will not satisfy general education science requirements.

**3124L* HISTOLOGY LAB 0 credit hours LAB:** Structure of animals at tissue and organ levels with emphasis on recognition and function of mammalian tissues and organs. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 2034/2034L or BIOL 2154/2154L or BIOL 4004/4004L. Corequisite: BIOL 3124L. Will not satisfy general education science requirements.

**3174* MOLECULAR BIOLOGY 4 credit hours** Structural and functional organization of prokaryotic and eukaryotic cells at the molecular level. Regulation of transcription and translation, DNA repair mechanisms, and cancer genetics are also considered. Lecture 3 hours, laboratory 3 hours. Prerequisites: BIOL 3014/3014L. Corequisite: BIOL 3174L. Will not satisfy general education science requirements.

**3174L* MOLECULAR BIOLOGY LAB 0 credit hours LAB:** Structural and functional organization of prokaryotic and eukaryotic cells at the molecular level. Regulation of transcription and translation, DNA repair mechanisms, and cancer genetics are also considered. Lecture 3 hours, laboratory 3 hours. Prerequisites: BIOL 3014/3014L. Corequisite: BIOL 3174L. Will not satisfy general education science requirements.

**3901 BIOLOGY CAPSTONE I 1 credit hour** The first course in a two-semester biology capstone sequence. Includes required program assessment. Lecture 1 hour. Prerequisites: BIOL 1364/1364L, BIOL 1474/1474L, BIOL 2144/2144L, BIOL 2154/2154L, and BIOL 3014/3014L or BIOL 3043 or concurrent enrollment. Will not satisfy general education science requirements. (Fall)

**4004* PHYSIOLOGY 4 credit hours** Homeostatic mechanisms of human organ systems are emphasized, including some aspects of comparative physiology. Lecture 3 hours, laboratory 3 hours. Prerequisites: BIOL 1474/1474L and CHEM 3314/3314L. BIOL 2154 is recommended. Corequisite: BIOL 4004L. Will not satisfy general education science requirements.

**4004L* PHYSIOLOGY LAB 0 credit hours LAB:** Homeostatic mechanisms of human organ systems are emphasized, including some aspects of comparative physiology. Lecture 3 hours, laboratory 3 hours. Prerequisites: BIOL 1474/1474L and CHEM 3314/3314L. BIOL 2154 is recommended. Corequisite: BIOL 4004L. Will not satisfy general education science requirements.

**4054* VASCULAR PLANT MORPHOLOGY 4 credit hours** Morphology, evolution and ecology of vascular plants. Field trips arranged. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 2144/2144L. Corequisite: BIOL 4054L. Will not satisfy General Education science requirements.

**4054L* VASCULAR PLANT MORPHOLOGY LAB 0 credit hours LAB:** Morphology, evolution and ecology of vascular plants. Field trips arranged. Lecture 3 hours, laboratory 3 hours. Prerequisite: BIOL 2144/2144L. Corequisite: BIOL 4054L. Will not satisfy General Education science requirements.

**4064* ADVANCED ECOLOGY 4 credit hours** Ecological principles as related to population dynamics, ecosystems, effects of radiation and pollution. Emphasis on production, energy flow, and cycling within ecosystems. Lecture 3 hours, laboratory 3 hours. Field trips arranged.
Prerequisite: BIOL 3064/3064L. Corequisite: BIOL 4064L. Will not satisfy general education science requirements. **4064L* ADVANCED ECOLOGY LAB 0 credit hours** Ecological principles as related to population dynamics, ecosystems, effects of radiation and pollution. Emphasis on production, energy flow, and cycling within ecosystems. Lecture 3 hours, laboratory 3 hours. Field trips arranged. Prerequisite: BIOL 3064/3064L. Corequisite: BIOL 4064. Will not satisfy general education science requirements.

**4114* ADVANCED MICROBIOLOGY 4 credit hours** This course will present a modern view of advanced topics in microbiology, such as advanced bacteriology, virology, and microbial genetics. This course is intended for biology majors. Lecture 3 hours, laboratory 3 hours. Prerequisites: BIOL 2124/2124L and CHEM 3314. Corequisite: BIOL 4114L. Will not satisfy general education science requirements. **4114L* ADVANCED MICROBIOLOGY LAB 0 credit hours** This course will present a modern view of advanced topics in microbiology, such as advanced bacteriology, virology, and microbial genetics. This course is intended for biology majors. Lecture 3 hours, laboratory 3 hours. Prerequisites: BIOL 2124/2124L and CHEM 3314. Corequisite: BIOL 4114L. Will not satisfy general education science requirements.

**4121-4 SPECIAL STUDIES 1-4 credit hours** Term paper and/or oral examination required. Independent study/directed readings 1-4 hours. Prerequisite: department permission. Will not satisfy general education science requirements.

**4153* BIOMETRY 3 credit hours** An introduction to the application of basic probability theory, descriptive statistics, and statistical inference, including estimation and hypothesis testing, to biological data. Analysis of variance and regression analysis of simple experimental designs are also considered. Lecture 3 hours. Prerequisites: Junior Biology Major or Department Permission. Will not satisfy general education science requirements.

**4163* PHYSIOLOGY AND MOLECULAR BIOLOGY OF PLANTS 3 credit hours** The chemical and cellular organization of higher plants including selected aspects of their metabolism, growth, responses to stress, and molecular biology. Lecture 3 hours. Prerequisite: BIOL 2144/2144L and BIOL 3104/3104L or Department permission. Will not satisfy general education science requirements.

**4174* CELL BIOLOGY 4 credit hours** Structural and functional organization of eukaryotic with an emphasis on human cells. Biological membranes, organelles, intracellular trafficking, cellular interactions, the cytoskeleton, and signal transduction are considered. Lecture 3 hours, laboratory 3 hours. Prerequisites: BIOL 3014/3014L. Corequisites: BIOL 4174L. Will not satisfy general education science requirements.

**4174L* CELL BIOLOGY LAB 0 credit hours** LAB: Structural and functional organization of eukaryotic with an emphasis on human cells. Biological membranes, organelles, intracellular trafficking, cellular interactions, the cytoskeleton, and signal transduction are considered. Lecture 3 hours, laboratory 3 hours. Prerequisites: BIOL 3014/3014L. Corequisites: BIOL 4174. Will not satisfy general education science requirements.

**4901* BIOLOGY CAPSTONE II 1 credit hour** The second course in a two-semester biology capstone sequence. Includes required program assessment. Capstone/lecture 1 hour. Prerequisites: BIOL 3901 and senior standing in Biology. Will not satisfy general education science requirements. (Spring)

**EARTH SCIENCE (ESCI)**

**1135* EARTH SCIENCE 5 credit hours** A survey of earth and environmental sciences including topics selected from geology, meteorology, climatology, oceanography, and astronomy. Lecture 4 hours, laboratory 2 hours. General Education Laboratory Science, Physical Science. Corequisite: ESCI 1135L.

**1135L* EARTH SCIENCE LAB 0 credit hours** LAB: A survey of earth and environmental sciences including topics selected from geology, meteorology, climatology, oceanography, and astronomy. Lecture 4 hours, laboratory 2 hours. General Education Laboratory Science, Physical Science. Corequisite: ESCI 1135.

**ENVIRONMENTAL SCIENCE (ENSC)**

**2004* INTRODUCTION TO ENVIRONMENTAL SCIENCE 4 credit hours** An introductory course that emphasizes the impacts of increasing human populations and resource consumption patterns on the world’s atmosphere, soils, oceans, agricultural and native land based ecosystems, biological diversity, and the health and welfare of humans. Themes and means of sustainable development and uses of resources, environmental policy, and global change are repeated throughout the course. Lecture 4 hours. General Education, Biological Science.

**3103 PRINCIPLES OF WATER RESOURCES 3 credit hours** An introduction to the science and policy related to managing fresh water resources. Fundamental hydrologic processes, how the United States has managed water throughout history, and the environmental impact of water resources management. Lecture 3 hours. Will not satisfy general education science requirements.

**3203 PRESCRIPTION BURNING AND GRAZING MANAGEMENT 3 credit hours** Applications of principles and recent advances in knowledge in fire ecology and in applications of prescription burning and livestock grazing to the sustainable management of rangelands. Field trips are required. Lecture 3 hours. Prerequisite: ENSC 2004, BIOL 1004/1004L, BIOL 1474/1474L or Department permission. Will not satisfy general education science requirements.
MEDICAL LABORATORY SCIENCE (MLS)

4117 CLINICAL MICROBIOLOGY  7 credit hours The theory and laboratory study of pathogenic bacteria, viruses, rickettsiae, fungi and parasites. Includes isolation, identification, antimicrobial susceptibility testing, and medical significance. Department permission required. Lecture/laboratory 7 hours. Will not satisfy general education science requirements.

4125 CLINICAL CHEMISTRY 5 credit hours The theory and laboratory methodology of analytical biochemistry, clinical microscopy, routine and special procedures and medical significance. Department permission required. Lecture/laboratory 5 hours. Will not satisfy general education science requirements.

4236 CLINICAL HEMATOLOGY 6 credit hours Systematized study of disease and abnormal derivation, maturation and function, principles of homeostasis; methodology used in routine and special hematology studies; and correlation of hematological findings with physiological conditions. Department permission required. Lecture/laboratory 6 hours. Will not satisfy general education science requirements.

4246 CLINICAL IMMUNOLOGY 6 credit hours The theory of immunologic responses and procedures used in serological determinations; the study of immunohematology, fundamentals of antigen-antibody reactions, blood groups and types, compatibility testing, blood components, and the laboratory methods used as they relate to the medical significance of immunology and infectious disease. Department permission required. Lecture/laboratory 6 hours. Will not satisfy general education science requirements.

4325 CLINICAL CHEMISTRY II 5 credit hours The theory and laboratory methodology of analytical biochemistry, instrumentation, and lab mathematics, routine and special procedures and medical significance. Department permission required. Lecture/laboratory 5 hours. Will not satisfy general education science requirements.

4351 TOPICS IN MEDICAL LAB SCIENCE 1 credit hour Principles and practices of the medical laboratory including basic management, special education methodology, and special projects in selected areas. Department permission required. Lecture/laboratory 1 hour. Will not satisfy general education science requirements.

RADIOLOGIC TECHNOLOGY (RAD)

2013 INTRODUCTION TO RADIOLOGIC SCIENCES AND HEALTH CARE 3 credit hours Content provides an overview of the foundations of radiography and the practitioner's role in health care delivery. Principles, practices and policies of health care organizations are examined and discussed in addition to the professional responsibilities of the radiographer and will include a lab component. Lecture 3 hours. Prerequisite: Acceptance into Radiologic Technology Program and departmental permission. Will not satisfy general education science requirements. (Fall)

2113 PATIENT CARE IN RADIOLOGIC SCIENCES 3 credit hours Content provides the concepts of optimal patient care, including consideration for the physical and psychological needs of the patient and family. Routine and emergency patient care procedures are described, as well as infection control procedures during standard precautions. The role of the radiographer in patient education is identified and will include a lab component. Additionally, the course content provides a foundation in ethics and law related to the practice of medical imaging. An introduction to terminology, concepts and principles will be presented. Students will examine a variety of ethical and legal issues found in clinical practice. Lecture 3 hours. Prerequisite: Acceptance into Radiologic Technology Program and departmental permission. Will not satisfy general education science requirements. (Fall)

2123 RADIATION PHYSICS 3 credit hours Content establishes a basic knowledge of radiation production and characteristics of atomic structure and terminology. Also presented are the nature and characteristics of radiation, x-ray production and the fundamentals of photon interactions with matter. Additionally the course establishes a knowledge base in imaging equipment of radiographic, fluoroscopic and mobile equipment requirements and design. The content also provides a basic knowledge of quality control and will include a lab component. Content and clinical practice experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize and evaluate concepts and theories in the performance of radiologic procedures within the corresponding semester. Through structured, sequential, competency-based clinical assignments, concepts of team practice, patient-centered clinical practice and professional development are discussed, examined, and evaluated. Clinical practice experiences are designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement will be taught to ensure the well-being of the patient prior to, during, and following the radiologic procedure. Lecture 3 hours. Prerequisite: Acceptance into Radiologic Technology Program and departmental permission. Will not satisfy general education science requirements. (Fall)

2133 RADIOGRAPHIC PROCEDURES AND IMAGE ANALYSIS 1 3 credit hours Content provides the knowledge base necessary to perform standard imaging procedures and special studies within the corresponding semester. Consideration is given to the evaluation of optimal diagnostic images. Content provides a basis for analyzing radiographic images. Included are the importance of optimal imaging standards, discussion of a problem-solving technique for image evaluation and the factors than can affect image quality. Actual images will be included for analysis. Additionally this course establishes a knowledge base in radiography anatomy and physiology taught within the semester and will include a lab
Component. Components of the cells, tissues, organs and body systems are described and discussed. The fundamentals of sectional anatomy relative to routine radiography are addressed. Lecture 3 hours. Prerequisite: Acceptance into Radiologic Technology Program and department permission. Will not satisfy general education science requirements. (Fall)

2204 CLINICAL PRACTICE I 4 credit hours Content and clinical practice experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize and evaluate concepts and theories in the performance of radiologic procedures within the corresponding semester. Through structured, sequential, competency-based clinical assignments, concepts of team practice, patient-centered clinical practice and professional development are discussed, examined and evaluated. Clinical practice experiences are designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement will be taught to ensure the well-being of the patient prior to, during, and following the radiologic procedure. Lecture 2 hours, laboratory 1 hours. Prerequisite: RAD 2244. Will not satisfy general education science requirements. (Summer)

2311 BASIC PRINCIPLES OF COMPUTED TOMOGRAPHY 1 credit hour Content is designed to provide entry-level radiography students or radiologic technologists with an introduction to and basic understanding of the operation of a computed tomography (CT) device. Content is not intended to result in clinical competency, but when available, radiography programs with sufficient local resources will do their best to provide students with clinical exposure to computed tomography. Lecture 1 hour. Prerequisite: RAD 2244. Will not satisfy general education science requirements. (Summer)

2323 RADIOGRAPHIC PROCEDURES AND IMAGE ANALYSIS II 3 credit hours Content provides the knowledge base necessary to perform standard imaging procedures and special studies within the corresponding semester. Consideration is given to the evaluation of optimal diagnostic images. Content provides a basis for analyzing radiographic images. Included are the importance of optimal imaging standards, discussion of a problem-solving technique for image evaluation and the factors than can affect image quality. Actual images will be included for analysis. Additionally this course establishes a knowledge base in radiography anatomy and physiology taught within the semester and will include a lab component. Components of the cells, tissues, organs and body systems are described and discussed. The fundamentals of sectional anatomy relative to routine radiography are addressed. Lecture 2 hours, laboratory 2 hours. Prerequisite: RAD 2244. Will not satisfy general education science requirements. (Summer)
patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement will be taught to ensure the well-being of the patient prior to, during, and following the radiologic procedure. Lecture 3 hours, laboratory 2 hours. Prerequisite: RAD 2323. Will not satisfy general education science requirements. (Fall)

**2423 DIGITAL IMAGE ACQUISITION AND DISPLAY 3 credit hours** Content imparts and understanding of the components, principles, and operation of digital imaging systems found in diagnostic radiology. Factors that impact image acquisition, display, archiving and retrieval are discussed. Principles of digital system quality assurance and maintenance are presented. Lecture 3 hours. Prerequisite: RAD 2323. Will not satisfy general education science requirements. (Fall)

**2433 RADIOGRAPHIC PROCEDURES AND IMAGE ANALYSIS IV 3 credit hours** Content provides the knowledge base necessary to perform standard imaging procedures and special studies within the corresponding semester. Consideration is given to the evaluation of optimal diagnostic images. Content provides a basis for analyzing radiographic images. Included are the importance of optimal imaging standards, discussion of a problem-solving technique for image evaluation and the factors that can affect image quality. Actual images will be included for analysis. Additionally this course establishes a knowledge base in radiography anatomy and physiology taught within the semester and will include a lab component. Components of the cells, tissues, organs and body systems are described and discussed. The fundamentals of sectional anatomy relative to routine radiography are addressed. Lecture 2 hours, laboratory 2 hours. Prerequisite: RAD 2323. Will not satisfy general education science requirements. (Fall)

**2503 CLINICAL PRACTICE IV 3 credit hours** Content and clinical practice experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize and evaluate concepts and theories in the performance of radiologic procedures within the corresponding semester. Through structured, sequential, competency-based clinical assignments, concepts of team practice, patient-centered clinical practice and professional development are discussed, examined and evaluated. Clinical practice experiences are designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement will be taught to ensure the well-being of the patient prior to, during, and following the radiologic procedure. Lecture 2 hours, laboratory 2 hours. Prerequisite: RAD 2433. Will not satisfy general education science requirements. (Spring)

**RESPIRATORY CARE (RESP)**

**2100 RESPIRATORY CARE RECITATION I 10 credit hours** Review and integrated discussion of information presented in lecture, labs, and clinical experiences during semester one of the clinical training program. Lecture/discussion 0 hours. Prerequisites: Acceptance into the Respiratory Care Clinical Training Program and departmental permission. Corequisites: RESP 2111, RESP 2124, RESP 2133, RESP 2143, RESP 2153, and RESP 2161. Will not satisfy general education science requirements. (Fall)

**2111 ETHICS AND HEALTH CARE SYSTEMS FOR RESPIRATORY CARE PRACTITIONERS 1 credit hour** Includes key organizational and operational elements of health care delivery organization and delivery of respiratory care services in the acute care setting. This course also explores the ethics and legal standards applied to the practice of respiratory care. Lecture 1 hour. Prerequisites: Acceptance into the Respiratory Care Clinical Training Program and departmental permission.
Corequisite: RESP 2100. Will not satisfy general education science requirements. (Fall)

2124 RESPIRATORY THERAPY PROCEDURES I 4 credit hours An introduction to respiratory therapy, this course includes microbiology, infection control and sterilization, physical assessment and chart review, radiologic assessment of the chest, gas physics, medical gas therapy and delivery systems, humidity and aerosol therapy, lung expansion therapy and coughing techniques, secretion clearance techniques and manual resuscitation. Lecture 3 hours, laboratory 2 hours. Prerequisites: Acceptance into the Respiratory Care Clinical Training Program and departmental permission. Corequisite: RESP 2100. Will not satisfy general education science requirements. (Fall)

2133 CARDIOPULMONARY ANATOMY AND PHYSIOLOGY 3 credit hours An in-depth study of the function of the respiratory system. It includes pulmonary mechanics and circulation, ventilation, gas transport, Neuro-control of breathing and acid base balance. Lecture 3 hours. Prerequisites: Admission to the Respiratory Care Clinical Training Program and departmental permission. Corequisite: RESP 2100. Will not satisfy general education science requirements. (Fall)

2143 RESPIRATORY PHARMACOLOGY 3 credit hours This course is a comprehensive and practical understanding of current information in respiratory pharmacology. This course provides a basis of theoretic concepts of the physio-pharmacologic functions of the lungs, heart, and kidneys, applicable to both the chronic pulmonary disease patient and the intensive care patient. A wide range of classes of drugs is given full consideration with emphasis on practical choices of individual situations. Lecture 3 hours. Prerequisites: Admission into the Respiratory Care Clinical Training Program and departmental permission. Corequisite: RESP 2100. Will not satisfy general education science requirements. (Fall)

2153 RESPIRATORY PATHOLOGY 3 credit hours An in-depth study of specific respiratory disease covering the method of diagnosis, treatment, clinical manifestation, prognosis, pathology, and incidence of occurrence in the general population. Lecture 3 hours. Prerequisites: Admission into the Respiratory Care Clinical Training Program and departmental permission. Corequisite: RESP 2100. Will not satisfy general education science requirements. (Fall)

2161 PULMONARY FUNCTION TESTING 1 credit hour An introduction of pulmonary function testing to include: lung volumes and capacities, equipment, calibration and quality control, ATS standards, spirometry and lung volume tests, gas distribution and diffusion tests, exercise testing and bronchoscopy testing. Lecture 1 hour. Prerequisites: Admission into the Respiratory Care Clinical Training Program and departmental permission. Corequisite: RESP 2100. Will not satisfy general education science requirements. (Fall)

2200 RESPIRATORY CARE RECITATION II 0 credit hours Review and integrated discussion of information presented in lecture, labs, and clinical experiences during semester two of the clinical training program. Lecture/discussion 0 hours. Prerequisites: Completion of RESP 2100, RESP 2111, RESP 2124, RESP 2133, RESP 2143, RESP 2153, and RESP 2161. Corequisites: RESP 2213, RESP 2224, RESP 2233, RESP 2242, and RESP 2253. Will not satisfy general education science requirements. (Spring)

2213 RESPIRATORY THERAPY PROCEDURES II 3 credit hours A continuation of Respiratory Therapy Procedures I, this course offers information on arterial and capillary blood gas sampling techniques and analysis, arterial line insertions, electrocardiograms, capnography, transcutaneous O2/CO2 monitoring, apnea monitoring, defibrillators, bronchial hygiene, airway management, endotracheal intubation and extubation, pulmonary rehabilitation and home care. Laboratory 4 hours. Prerequisite: RESP 2124. Corequisite: RESP 2200. Will not satisfy general education science requirements. (Spring)

2224 RESPIRATORY CLINICAL PRACTICE I 4 credit hours Respiratory procedures practiced in specialty areas of the hospital with supplemental information received through physician and faculty lectures. The clinical experience is coordinated to cover the areas of infection control and sterilization, physical assessment and chart review, radiologic assessment of the chest, medical gas therapy and delivery systems, humidity and aerosol therapies, pulmonary function testing, lung expansion therapy and coughing techniques, secretions clearance techniques, and manual resuscitators and CPR. Clinical Practice/Practicum 4 hours. Prerequisites: RESP 2100, RESP 2111, RESP 2124, RESP 2133, RESP 2143, RESP 2153, and RESP 2161. Corequisite: RESP 2200. Will not satisfy general education science requirements. (Spring)

2233 CRITICAL CARE 3 credit hours A survey of procedures and principles utilized in the diagnosis and management of the critically ill patient, physical assessment, psychological aspects, fluid and electrolyte balance, clinical laboratory studies, nutrition and hemodynamic monitoring. Lecture 3 hours. Prerequisites: RESP 2100, RESP 2111, RESP 2124, RESP 2133, RESP 2143, RESP 2153, and RESP 2161. Corequisite: RESP 2200. Will not satisfy general education science requirements. (Spring)

2242 PEDIATRIC RESPIRATORY CARE 2 credit hours A survey of general introductory concepts to disease states that are specific to the neonatal and pediatric patients, equipment and theory necessary for providing respiratory care, care during transport and developmental outcomes. Lecture 2 hours. Prerequisites: RESP 2100, RESP 2111, RESP 2124, RESP 2133, RESP 2143, RESP 2153, and RESP 2161. Corequisite: RESP 2200. Will not satisfy general education science requirements. (Spring)

2253 MECHANICAL VENTILATION 3 credit hours This course offers information on the principle of mechanical ventilation and the effects of positive pressure ventilation,
including non-invasive ventilation, and the effects of positive pressure ventilation. The operating modes, initiation of and monitoring of mechanical ventilation is also covered. The student will become proficient in interpreting wave forms as well as managing the mechanical ventilation. Weaning techniques will be covered. Laboratory 4 hours. Prerequisites: RESP 2100, RESP 2111, RESP 2124, RESP 2133, RESP 2143, RESP 2153, and RESP 2161. Corequisite: RESP 2200. Will not satisfy general education science requirements. (Spring)

2313 CLINICAL PRACTICE II 3 credit hours Continuation of clinical experience with intensive care involvement. Clinical practice is coordinated to cover adult, pediatric and neonatal critical care, advanced airway care, mechanical ventilation, blood gas sampling techniques and analysis and critical care monitoring. Clinical Practice/Practicum 3 hours. Prerequisites: RESP 2200, RESP 2213, RESP 2224, RESP 2233, RESP 2242, and RESP 2253. Will not satisfy general education science requirements. (Summer)

2324 CLINICAL PRACTICE III 4 credit hours Continuation of clinical experience with intensive care involvement. Clinical practice is coordinated to cover adult, pediatric and neonatal critical care, advanced airway care, mechanical ventilation, blood gas sampling techniques and analysis and critical care monitoring. Clinical Practice/Practicum 4 hours. Prerequisites: RESP 2200, RESP 2213, RESP 2224, RESP 2233, RESP 2242, and RESP 2253. Will not satisfy general education science requirements. (Fall)

*Liberal arts and sciences course.

MISSION STATEMENTS

The Department of Art, Music, and Theatre Arts actively seeks to make the university a driving force in the cultural life and economic development of our community by producing art exhibitions, concerts, recitals, and theatre productions to enrich the intellectual and cultural lives of our constituents. The disciplines of Art, Music, and Theatre Arts energize the cultural life of the Cameron Campus and surrounding communities. We believe in the power of aesthetics and in the unique talents of each student. We strive to inspire and guide artists, educators, musicians, actors, designers, and scholars to achieve success as well as to become citizens of the world.

The mission of the discipline of Art is to support and enhance the university’s educational process by offering learning opportunities in art to the people of Southwest Oklahoma through appropriate degree programs and concomitant service curricula and activities.

Cameron University’s Music programs have a three-fold mission of (a) service to the Music major, (b) service to the non-Music major (including the music minor), and (c) service to the community. The Cameron University Music Unit programs goals, and objectives emphasize the acquisition of music skills, knowledge, values, and professional attitudes.

The Bachelor of Arts degree with a Major in Theatre provides a program of study focusing on opportunities for personal and artistic development and growth, as well as opportunities to develop collaboration, communication, reasoning, and leadership skills required for professional careers in theatre or related areas. Students pursuing the program in Theatre Arts should achieve a level of competence in performance, technical theatre, and the academic areas of theatre history, literature, and criticism/analysis. They acquire skills in each of these areas through the department’s course offerings, as well as through its production program. The production aspect of the program also provides an important community outreach opportunity. Non-majors may select Theatre Arts courses to fulfill humanities requirements or as electives.

PROGRAMS OF STUDY

Degrees & Majors: B.A. Art
   - B.A. Music
   - B.A. Theatre Arts
     - Performance
     - Technical
   - B.F.A. Art
     - Graphic Design
     - Painting
     - Printmaking
     - Sculpture
   - B.M. Music
     - Composition
     - Piano Performance
     - Instrumental Performance
     - Vocal Performance
   - B.M.E. Music Education
     - Instrumental/General
     - Vocal/General

GENERAL INFORMATION

STUDENT ORGANIZATIONS

Alpha Psi Omega
Alpha Psi Omega is the National Theatre Honor Society.

Kappa Kappa Psi
Kappa Kappa Psi serves as the honors society for collegiate band programs.

Mu Phi Epsilon
Mu Phi Epsilon is a co-educational International Professional Music Fraternity. Its purpose is the recognition of scholarship and musicianship, and the development of a bond of friendship among its members.
Degree Plan: Art (110)–Bachelor of Arts

COURSE DESCRIPTIONS

ART (ART)

1013* ART APPRECIATION 3 credit hours An introduction to various aspects of the visual arts with illustrated lectures and studio demonstrations. Lecture 3 hours. General Education, Humanities–Aesthetics.

1023* FUNDAMENTALS OF ART 3 credit hours An introduction to art through studio experience for non-majors. Studio 6 hours.

1031-3 WORKSHOP 1-3 credit hours A concentrated course of specific exploration at the introductory level of various art forms, designed to provide intensive experience in studio projects. May be repeated for credit under different subtitle. No more than 4 hours of ART 1031-3 may be credited toward a major/minor in Art. Studio 2-6 hours.

1113* DRAWING I 3 credit hours Introduction to the basic principles, techniques and media of drawing/perception. Studio 6 hours. (Fall)

1123 DRAWING II 3 credit hours Drawing experiences that coordinate drawing skills with perception and creativity. Studio 6 hours. Prerequisite: ART 1113 or Permission of instructor. (Spring)

1213* DESIGN I 3 credit hours An introductory class concentrating on two and three dimensional forms which emphasizes design elements and their organizational principles. Studio 6 hours. (Fall)

1223 DESIGN II 3 credit hours Application and analysis of three-dimensional elements and principles of design. Studio 6 hours. (Spring)

1231 COMPUTER-STUDIO LAB 1 credit hour An introduction to computer graphics and appropriate software for use in foundation studio art courses. For Art majors only. Studio 2 hours. Prerequisite: Concurrent enrollment in ART 1113 and/or ART 1213 or permission of the Chair. (Fall, Spring)

2243* COLOR 3 credit hours Exploration and analysis of color. Studio 6 hours. (Fall)

2253 COMPUTER GRAPHIC DESIGN 3 credit hours An introduction to the processes of creatively translating concepts from words to effective visual communication through graphic design, layout, and technical illustration. Studio 6 hours. Prerequisite: ART 1213.

2313 PAINTING 3 credit hours Painting courses exploring the principles, techniques, media and creative potential of painting. Studio 6 hours. May be repeated for credit under a different subtitle. Prerequisites: ART 1113, ART 1123, ART 1213, and ART 2243. (Spring)

2413 PRINTMAKING 3 credit hours An introduction to various printmaking processes: collagraphs, monoprints, intaglio, serigraphy, lithography, relief printing. Studio 6 hours. Prerequisite: ART 1113, ART 1123, and ART 2243. (Spring)

2513 SCULPTURE 3 credit hours A beginning class that emphasizes sculptural form and aesthetics through various media and techniques. Studio 6 hours. Prerequisite: ART 1213. (Fall)

2613* HISTORY OF ART I 3 credit hours A survey of the painting, sculpture and architecture from prehistoric times through the Gothic period. Lecture 3 hours. General Education, Humanities–Aesthetics. (Fall)

2623* HISTORY OF ART II 3 credit hours A survey of the painting, sculpture and architecture from the Renaissance through the 20th Century. Lecture 3 hours. General Education, Humanities–Aesthetics. (Spring)

2733 ILLUSTRATION 3 credit hours Introduction to historic and contemporary illustration and consideration of a wide range of illustrative styles. Required experiments with media and consideration of alternate ways of illustrating a message through conceptual and compositional variations. Studio 6 hours. Prerequisites: ART 1113 and ART 1213.

2743 TYPOGRAPHY 3 credit hours An investigation of letter forms and their characteristics and a study of spacing, leading, type selection, layout alternatives, type specification and copy fitting. Preliminary introduction to typography as a communication medium. An understanding to typographic terminology and measuring systems while developing hand skills and introducing computer technology. Studio 6 hours. Prerequisites: ART 1113, ART 1123 and ART 1213.

2813 BEGINNING CERAMICS 3 credit hours Introduction to ceramic techniques, with focus on exploration, ideas, and the aesthetics of form. Studio 6 hours.

3133 FIGURE DRAWING 3 credit hours A studio course emphasizing drawing concepts and techniques. Studio 6 hours. Prerequisite: ART 1113 and ART 1123. (Fall)

3213 GRAPHIC DESIGN 3 credit hours Exploration of basic design principles-line, form and color, as visual communication. Problem solving, generation of ideas, development of concepts and the integration of word and image. Technical and presentation skills. Studio 6 hours. Prerequisite: ART 2253.

3713 ART FOR ELEMENTARY TEACHERS 3 credit hours Lecture and laboratory experience in two and three dimensional media designed for the understanding and application of art as an element of the elementary curriculum. Lecture/studio 3 hours.

3723 PUBLIC SCHOOL ART 3 credit hours Elementary and Secondary theory in two and three dimensional media designed for the application and understanding of art as an element of the school curriculum with lecture laboratory and field experience. Teacher Certification students must be admitted to teacher education prior to enrollment. Studio 6 hours.

3743 ADVANCED COMPUTER GRAPHICS AND IMAGE ENHANCEMENT 3 credit hours Use of computer software to capture, create and alter electronic images for use in graphic design and illustration applications with an emphasis on concept and thematic development. Skillful production of portfolio pieces via learned software. Studio
6 hours. Prerequisites: ART 2733, ART 3213, Graphic Design concentration/consent of instructor.

3753 LAYOUT/PRODUCTION 3 credit hours Use of computer and traditional methods to enhance production skills and solution of design projects from concept to the comprehensive. Evaluation and design of symbols and logos and their various applications, leading to an understanding of system design. Introduction to graphic design production and the preparation of art for reproduction. Studio 6 hours. Prerequisites: ART 2253, ART 2743, and ART 3213.

3833 CRAFTS 3 credit hours A studio course that relates material to form and function, with an emphasis on one of several materials: weaving, beadwork, textiles, etc. May be repeated under a different subtitle. No more than 6 hours may be counted toward a major in Art. Studio 6 hours.

4143 ADVANCED DRAWING 3 credit hours Advanced studio courses exploring the principles, techniques, media and creative potential of drawing. May be repeated for credit under a different subtitle. Studio 6 hours. Prerequisite: ART 1113 and ART 1123. (Spring)

4213 ADVANCED GRAPHIC DESIGN 3 credit hours Design problems with special attention to signage, exhibition design, packaging, display, and point of purchase. Use of model-building tools and study of structure and form to introduce the student to problem-solving and finishing techniques. Development of concepts into models. Studio 6 hours. Prerequisites: Art Foundation and ART 3213 and ART 3743.

4323 ADVANCED PAINTING 3 credit hours Advanced studio courses in a variety of painting techniques which may include incursions of other media such as photography and print. May be repeated for credit under a different subtitle. Studio 6 hours. Prerequisite: ART 2243 and ART 2313.

4423 ADVANCED PRINTMAKING 3 credit hours Advanced studio course exploring the principles, techniques, media and creative potential of printmaking. Areas of concentration include etching, lithography, serigraphy, block printing, collagraphs. Studio 6 hours. May be repeated for credit under a different subtitle. Prerequisite: ART 2413.

4523 ADVANCED SCULPTURE 3 credit hours Advanced studio courses emphasizing personal exploration and involvement with sculptural form and techniques. May be repeated for credit under a different subtitle. Studio 6 hours. Prerequisite: ART 2513.

4633* HISTORY OF ART SEMINAR 3 credit hours Advanced Art History courses with an emphasis on one or more of the following areas: Contemporary Art, American Art, Oriental Art, Principles of Art History. May be repeated for credit under a different subtitle. Lecture 3 hours. Prerequisites: ENGL 1213 and 3 hours of History. (Fall, Spring)

4713 HISTORY OF GRAPHIC DESIGN 3 credit hours Evolution of graphic communication from prehistoric times to the present. Investigation of the origins of printing and typography in Europe leading to the design of the printed page, the impact of industrial technology upon visual communication and the study of the growth and development of modern graphic design. Lecture 3 hours.

4733 ART PORTFOLIO CAPSTONE 3 credit hours Final preparation of a professional portfolio, culminating in an extensive design project and the design, organization and production of an exhibition of work. Professional study on setting fees, writing contracts, working with an agent and other business practices. Studio/capstone 6 hours. Prerequisites: ART 3213, ART 3743, ART 4213, and ART 4713.

4823 ADVANCED CERAMICS 3 credit hours Advanced studio courses in the application of clay techniques emphasizing the aesthetics of form. May be repeated for credit under a different subtitle. Studio 6 hours. Prerequisite: ART 2813.

4911-4 WORKSHOP 1-4 credit hours A concentrated course of specific exploration of various art forms, designed to provide intensive experience in studio projects. May be repeated for credit under different subtitle. No more than 6 hours of ART 4911-4 may be credited toward a major in Art. Studio 2-8 hours.

4921-3* INDEPENDENT STUDY 1-3 credit hours Independent study and guided research in a selected area of Art. May be repeated for credit. Independent study 1-3 hours. Prerequisite: Permission of the Chair.

4933 SENIOR ART STUDIO 3 credit hours Senior level art experience in a major studio area. May be repeated for credit. Studio 6 hours, as assigned by department chair. Prerequisites: Senior standing in Art and permission of the Chair.

4991 SENIOR ART EXHIBITION 1 credit hour A capstone course that emphasizes the development and documentation of professional credentials and culminates in a final exhibition of art. Capstone/lecture 1 hour. (Spring)

FINE ARTS (FNAR)

1013* EXPLORING MULTICULTURALISM THROUGH THE ARTS 3 credit hours An interdisciplinary course which presents a cross-cultural exploration of the world through a study of representative art forms - art, communications, dance, music, and theatre. Lecture 3 hours. General Education, Humanities–Aesthetics and Humanities–Diversity.

MUSIC (MUSC)

1000 CONCERT AND RECITAL ATTENDANCE 0 credit hours Each semester the music faculty will compile a list of concerts and recitals occurring in the Lawton area. To qualify for graduation, music majors must complete seven satisfactory semesters. Concert/recital 0 hours. (Fall, Spring)

1013* AMERICAN POPULAR MUSIC 3 credit hours The study of the various styles in American popular music. An
2301* MUSIC FUNDAMENTALS 1 credit hour An introduction to the basic signs and symbols and the theory of music. Lecture 1 hour, laboratory 1 hour.

2312* HARMONY AND STRUCTURE I 2 credit hours The study of the harmony and structure of music through music analysis, composition and the development of associated functional keyboard skills. Lecture 1 hour, laboratory 1 hour. Recommended for music majors only. (Fall)

2321* SIGHT-SINGING AND EAR TRAINING I 1 credit hour The study and development of sight singing and ear training skills through the mastery of written, visual, singing and aural techniques. Laboratory 2 hours. Concurrent enrollment with MUSC 2312 recommended. (Fall)

2332* HARMONY AND STRUCTURE II 2 credit hours A continuation of MUSC 2312. Lecture 1 hour, laboratory 2 hours. Prerequisite: MUSC 2312. (Spring)

2341* SIGHT-SINGING AND EAR TRAINING II 1 credit hour A continuation of MUSC 2321. Laboratory 2 hours. Prerequisite: MUSC 2321. Concurrent enrollment with MUSC 2332 recommended. (Spring)

3160–1 SMALL ENSEMBLE 0-1 credit hour Participation in instrumental, keyboard, vocal or guitar ensemble. Rehearsal 2-4 hours per week. Prerequisite: Departmental permission. May be repeated for credit or non-credit.

3171 ACCOMPANYING 1 credit hour Piano performance experience through accompanying soloists, small and large ensembles and musical/ opera productions. Rehearsal 2-4 hours plus practice each week. Prerequisite: Department permission. May be repeated for credit.

3313* HARMONY AND STRUCTURE III 3 credit hours A continuation of MUSC 2332. Lecture 3 hours. Prerequisite: MUSC 2332. (Fall)

3321* SIGHT-SINGING AND EAR TRAINING III 1 credit hour A continuation of MUSC 2341. Laboratory 2 hours. Prerequisite: MUSC 2341. Concurrent enrollment with MUSC 3313 recommended. (Fall)

3333* HARMONY AND STRUCTURE IV 3 credit hours A continuation of MUSC 3313. Lecture 3 hours. Prerequisite: MUSC 3313. (Spring)

3341* SIGHT-SINGING AND EAR TRAINING IV 1 credit hour A continuation of MUSC 3321. Laboratory 2 hours. Prerequisite: MUSC 3321. Concurrent enrollment with MUSC 3333 recommended. (Spring)

3351-3 COMPOSITION I-3 credit hours An exploration of various compositional styles and techniques. One half-hour lesson per week per credit hour enrolled. Prerequisite: MUSC 2312.

3513* MUSIC HISTORY I: ANTIQUITY THROUGH BAROQUE 3 credit hours A study of music development from antiquity through the Baroque era. Lecture 3 hours. Prerequisite: MUSC 1413. (Spring)

3523* MUSIC HISTORY II: CLASSICAL THROUGH MID-19TH CENTURY 3 credit hours A continuation of MUSC
3513 from the Classical era through the mid-19th century. Lecture 3 hours. Prerequisite: MUSC 1413. (Fall)
3533* MUSIC HISTORY III: MID-19TH CENTURY TO PRESENT 3 credit hours A continuation of MUSC 3523. A study of music development from the mid-19th century to the present. Lecture 3 hours. Prerequisite: MUSC 1413. (Spring)
3612* FUNDAMENTALS OF CONDUCTING 2 credit hours A beginning course in the principles of both choral and instrumental conducting. Lecture 1 hour, laboratory 1 hour. Prerequisite: Recommended for music majors only. (Fall)
3622 ADVANCED CONDUCTING 2 credit hours The techniques of reading scores, use of the baton and interpretation. Practical experience in conducting. Lecture 1 hour, laboratory 1 hour. Prerequisite: MUSC 3612. (Spring)
3642 WOODWIND METHODS 2 credit hours The study of flute, oboe, clarinet, bassoon, and saxophone. Basic concepts of playing and teaching woodwind instruments; survey of methods, materials and field experience. Lecture 1 hour, laboratory 1 hour. Prerequisite: Instructor permission.
3652 BRASS METHODS 2 credit hours Study of trumpet, French horn, euphonium, trombone and tuba. Basic concepts of playing and teaching brass instruments; survey of methods, materials and field experience. Lecture 1 hour, laboratory 1 hour. Prerequisite: Instructor permission.
3662 STRING METHODS 2 credit hours The study of the violin, viola, violoncello, double bass and guitar. Basic concepts of playing and teaching string instruments; survey of methods, materials and field experiences. Lecture 1 hour, laboratory 1 hour. Prerequisite: Instructor permission.
3672 PERCUSSION METHODS 2 credit hours Study of fundamentals of all percussion instruments. Basic concepts of playing and teaching percussion instruments; survey of methods, materials and field experiences. Lecture 1 hour, laboratory 1 hour. Prerequisite: Instructor permission.
3761* ITALIAN, FRENCH, GERMAN DICTION 1 credit hour An introduction to diction in Italian, German, and French based on the song literature and using the International Phonetic Alphabet. Each language offered separately. Laboratory 2 hours.
3801-4 PRIVATE LESSONS 1-4 credit hours Private instruction in an orchestral instrument, keyboard, voice or guitar. One half-hour lesson per week per credit hour enrolled, maximum one hour lesson per week. Requires minimum 5 hours per week of practice per hour enrolled. May be repeated to a maximum of 12 hours per instrument. Private lessons 1-4 hours. Prerequisite: Departmental permission. Open to music majors only.
3812 INSTRUMENTAL METHODS FOR VOCAL AND KEYBOARD EDUCATION 2 credit hours A study of brass, woodwind, stringed, fretted and percussion instruments for Vocal Music Education and Keyboard Music Education majors. Students will learn basic techniques, performance skills, and methodology for all instrumental families. Lecture 1 hour, laboratory 2 hours.
3981-3 SEMINAR 1-3 credit hours A course designed to give students the opportunity to study a subject not covered in the regular course offerings or not covered in sufficient depth for their needs. Seminar 1-3 hours. Prerequisite: Department permission.
3990 JUNIOR RECITAL 0 credit hours A pre-senior performance in the student’s major area of study, normally one half-hour in length. Performance 0 hours. Prerequisite: Permission of the Chair.
4312* COUNTERPOINT 2 credit hours A study of Eighteenth Century species counterpoint through analysis and composition. Lecture 2 hours. Prerequisite: MUSC 3333.
4322* POST TONAL TECHNIQUES 2 credit hours A study of 20th Century harmonic and melodic techniques approached through original composition, analysis and performance. Lecture 2 hours. Prerequisite: MUSC 3333. (Spring, Odd Years)
4332* FORM AND ANALYSIS 2 credit hours A study of the standard polyphonic and homophonic forms of the 18th and 19th centuries. Lecture 2 hours. Prerequisite: MUSC 3333. (Fall, Odd Years)
4343* ARRANGING 3 credit hours The study of the art of arranging for instrumental and vocal ensembles. Lecture 3 hours. Prerequisite: MUSC 3333.
4351-3 COMPOSITION 1-3 credit hours An exploration of various compositional styles and techniques. One half-hour lesson per week per credit hour enrolled. Lecture 1-3 hours. Prerequisite: Junior standing in composition. May be repeated for credit. Open to music composition majors only.
4362 COMPUTER MUSIC 2 credit hours An introduction to the literature, equipment and techniques of computer music. This course is designed to provide the student with practical experience in the manipulation of sound in a computerized music studio. Lecture 1 hour, laboratory 2 hours. Prerequisite: Department permission.
4712 ELEMENTARY METHODS 2 credit hours A professional training course for students preparing to teach elementary school music. Includes philosophies and practices of current leading music educators with classroom experience relating to conceptual approach. Teacher Certification students must be admitted to teacher education prior to enrollment in this course. Lecture 2 hours. Prerequisite: Restricted to students admitted to teacher education.
4722 SECONDARY INSTRUMENTAL METHODS 2 credit hours A professional training course for students preparing to teach secondary school instrumental music. Study of philosophy, psychology and pedagogy as applied to the teaching of instruments. Teacher Certification students must be admitted to teacher education prior to
enrollment in this course. Lecture 2 hours. Prerequisite: Restricted to students admitted to teacher education.

**4732 SECONDARY VOCAL METHODS** 2 credit hours A professional training course for students preparing to teach secondary school vocal music. Study of philosophy and pedagogy as applied to the teaching of vocal music. Teacher Certification students must be admitted to teacher education prior to enrollment in this course. Lecture 2 hours. Prerequisite: Restricted to students admitted to teacher education.

**4733* KEYBOARD LITERATURE** 3 credit hours Survey of keyboard literature. Lecture 3 hours.

**4743 KEYBOARD PEDAGOGY** 3 credit hours The study of teaching techniques and materials for class and private instruction. Lecture 3 hours. Prerequisite: department permission.

**4753 VOCAL PEDAGOGY** 3 credit hours The study of vocal training techniques including anatomy of vocal tract, physiological process and acoustical properties, methods and materials. Lecture 3 hours. Prerequisite: Department permission.

**4801-4 PRIVATE LESSONS** 1-4 credit hours Private instruction in an orchestral instrument, keyboard, voice or guitar. One half-hour lesson per week per credit hour enrolled, maximum one hour lesson per week. Requires minimum 5 hours per week of practice per hour enrolled. May be repeated to a maximum 16 hours per instrument. Private lessons 1-4 hours. Prerequisite: Junior standing. Open to music majors only.

**4900 SENIOR MUSIC CAPSTONE** 0 credit hours A composite synthesis of focused topics including the music department's internal music examination, the Educational Testing Service online exit examination for music, the Collegiate Assessment of Academic Proficiency (university writing and critical thinking exit examination), and the strengthening of the individual student portfolio for potential career advancement and/or entry into graduate studies. Required of all music degrees (B.A., B.M., and B.M.E.) Capstone/lecture 0 hours. Prerequisite: Permission of the Chair after completion of Music Theory (MUSC 2312, 2321, 3313, 3333) and Music History Sequence (MUSC 3513, 3523, and 3533). (Fall, Spring)

**4910-4 WORKSHOP** 0-4 credit hours A concentrated specific activity utilizing lectures and practical application exercises. May be repeated for credit to a maximum of 8 credit hours. Lecture 0-4 hours.

**4981-3 INDEPENDENT STUDY** 1-3 credit hours A special study based on the needs of the individual student directly related to the student's major. Individual guidance will be provided by a faculty member. Independent study/directed readings 1-3 hours. Prerequisite: Department permission. The total number of hours earned in independent study may not exceed four.

**4990 SENIOR RECITAL** 0 credit hours Culminating performance in the student's major area of study. Normally one hour in length. Performance 0 hours. Prerequisite: Permission of the Chair. (Fall, Spring)

**THEATRE ARTS (THTR)**

**1001 THEATRE PRACTICUM** 1 credit hour A required course open only to theatre majors. Each theatre major, while in residence, must contribute a minimum of three hours per week per semester to assignments in one or more of the following areas: Box Office, Costuming, Promotion, and Scenery Construction. These three hours are independent of and in addition to any other course, work-study, or laboratory assignments. Practicum 1 hour. (Fall, Spring)

**1103* INTRODUCTION TO THEATRE** 3 credit hours An exploration of the theatre as an art form including forms of drama, styles of production, relationship of performer to audience, basic acting/directing techniques and theories, technical theatre, responsibilities of personnel and performers and how to view a play. Primarily a discussion and observation course with emphasis on building a vocabulary of theatre terms. Lecture 3 hours. General Education, Humanities-Aesthetics. (Fall, Spring)

**1133* VOICE AND DICTION** 3 credit hours A general study of the structure of the vocal mechanism; principles of vocal quality, articulation, and pronunciation. Lecture 3 hours.

**1203* TECHNICAL PRODUCTION** 3 credit hours An introduction to technical theatre: stage management, scenery, and lighting. Responsibilities and procedures of the stage manager; methods and materials used in construction and rigging of stage scenery; lighting techniques, instruments and principles; stage terminology. Lecture 3 hours. Prerequisite: THTR 1103 or concurrently enrolled in THTR 1103. (Fall, Even Years)

**1503* MAKE-UP** 3 credit hours Principles and practice of application of stage make-up; corrective, character, old age, likeness, and fantasy. Lecture 2 hours, laboratory 2 hours.

**1603 STAGE MOVEMENT** 3 credit hours A general understanding of the use and connection of the body and mind as an expressive instrument. Through various theories and techniques to be introduced, a student will develop physically and mentally in strength, agility, flexibility, coordination, flow and balance. The student will also be introduced to current movement theories used in actor training. Lecture 1 hour, laboratory 2 hours.

**1901-3 THEATRE LAB** 1-3 credit hours Open to all University students. Laboratory experience in performance, technical production, and management. Arranged around the student's schedule. May be repeated for credit. Laboratory 1-3 hours. Permission of instructor.

**2203* STAGECRAFT** 3 credit hours Intensive study and practice in planning, layout, construction, and painting of the stage setting. Tools, materials, and resources used by the stage technician. Lecture 2 hours, laboratory 2 hours.

**2403 STAGE MANAGEMENT** 3 credit hours The techniques of production stage management, including preparing the prompt script, rehearsal procedures, organizing the technical elements, cueing and running the performance. Lecture 3 hours. (Fall, Even Years)
2503* COSTUME TECHNIQUES 3 credit hours Basic costumeing skills and sewing techniques will be studied. Various types of sewing and construction will be explored along with work in pattern development. Other costume skills which include script analysis, costume plots, renderings and presentation of costume designs will be studied. Lecture 2 hours, laboratory 2 hours.

2603* ACTING I 3 credit hours Development of basic acting skills including self-awareness, movement, verbal and non-verbal communication, improvisation and working within an ensemble. Lecture 2 hours, laboratory 2 hours. Prerequisite: THTR 1103 or concurrently enrolled in THTR 1103. (Fall, Even Years)

3303* LIGHTING 3 credit hours Mechanics of stage lighting: instrumentation, basic electricity, control systems, color mixing, and graphic presentation. Involves participation in preparing lighting for major productions. Lecture 2 hours, laboratory 2 hours.

3403* DIRECTING 3 credit hours A study of directing fundamentals including script selection and analysis, concept development, casting, rehearsing, and staging a production. Lecture 2 hours, laboratory 2 hours. Prerequisites: THTR 1203 and THTR 2603 or permission of instructor. (Spring, Even Years)

3603*ACTING II 3 credit hours Basic acting skills applied to memorized scene work. Techniques of character development and script analysis using scenes from contemporary scripts. Scene study. Lecture 2 hours, laboratory 2 hours. Prerequisite: THTR 2603.

3703* AUDIO 3 credit hours The nature of sound; operating principles and choice of equipment; design of reinforcement, effects and communications systems. Aesthetic use of sound and role of the sound designer. Projects in practical application. Lecture 3 hours.

3803* THEATRE AND DRAMA: THE BEGINNINGS 3 credit hours A study of the evolution of drama, theatre architecture, technical theatre, acting and directing from the beginnings of theatre and drama to the Italian Renaissance. Lecture 3 hours. (Fall, Even Years)

3813* THEATRE AND DRAMA: THE RENAISSANCE AND JAPAN 3 credit hours A study of the evolution of drama, theatre architecture, technical theatre, acting, and directing during the Renaissance (1400-1700) and an overview of Japanese theatre history and drama. Lecture 3 hours. (Spring, Odd Years)

3823* THEATRE AND DRAMA: THE 18TH AND 19TH CENTURIES 3 credit hours A study of the evolution of drama, theatre architecture, technical theatre, acting, and directing from 1660 England to the birth of realism. Lecture 3 hours. (Fall, Odd Years)

3833* THEATRE AND DRAMA: THE 20TH AND 21ST CENTURIES AND CHINA 3 credit hours A study of the evolution of drama, theatre architecture, technical theatre, acting, and directing in the 20th and 21st Centuries, including an overview of China. Lecture 3 hours. (Spring, Even Years)

3901-3 WORKSHOP 1-3 credit hours Experimentation, reading, research, lecture and/or discussion in various areas of theatre history, technology, performance and practice. Designed to give intensive emphasis to a specific area of theatre including improvisation, directing projects, designs, original scripts, etc. Laboratory 2-6 hours. Prerequisite: Permission of the department. May be repeated for credit.

4203* SCENE DESIGN 3 credit hours Theories and principles of design for the stage. History, styles, and aesthetics of scenic elements. Projects in analysis, research, and communication of a concept through graphic means. Lecture 3 hours. Prerequisite: THTR 2203.

4303* LIGHTING DESIGN 3 credit hours Investigation and evaluation of lighting practice and artistry. Creation of the design concept, light plots, and schemes of execution. The role of the lighting designer in the contemporary theatre. Lecture 3 hours. Prerequisite: THTR 3303.

4503* COSTUME DESIGN 3 credit hours Principles of costume design for the stage; development and rendering of design concepts; use of historic, stylistic and fantasy elements in stage realization. Lecture 3 hours. Prerequisite: THTR 2503.

4603* ACTING III: PERIOD STYLES 3 credit hours Lecture, monologue, and scene work in period acting styles with a concentration on the works of William Shakespeare in order to develop an appreciation and understanding of the different acting styles from antiquity to the present day. Lecture 2 hours, laboratory 2 hours. Prerequisite: THTR 3603.

4901-3 INDEPENDENT STUDY 1-3 credit hours An individual study course of advanced nature. Subject matters vary with background and interest of student. Independent study 1-3 hours. Prerequisite: Permission of department. May be repeated for credit.

4911-3 SEMINAR 1-3 credit hours Concentrated investigation of specific problems and/or areas in theatre. Seminar 1-3 hours. Prerequisite: Permission of department. May be repeated for credit.

4921-8 INTERNSHIP 1-8 credit hours Off-campus work with regional or national theatre companies and firms specializing in theatrical goods and services. Open only to juniors and seniors with permission of the department. May be repeated for credit. Internship 1-8 hours.

4993 THEATRE ARTS CAPSTONE 3 credit hours A reflection on the skills and knowledge at the culmination of Theatre Arts studies. The student will complete in-depth research and analysis in order to realize a project in the production program. In addition, the student will document their progress of collaboration and artistic choices. As part of this process, the student will finalize their portfolio(s) which should be at the level to be submitted to graduate school and/or as a working professional. The student will also make an oral presentation of their portfolio and an oral defense of their
project. Capstone/lecture 3 hours. Prerequisite: Senior standing. (Fall)

*Liberal arts and sciences course.
DEPARTMENT OF CHEMISTRY, PHYSICS, AND ENGINEERING

FACULTY

CHAIR
Danny McGuire, Professor

PROFESSORS
C. Bryan, A. Nalley, K. Vitense

ASSOCIATE PROFESSORS
K. Moore, R. Youngblood

ASSISTANT PROFESSORS
S. Hazra, J. Kelsey, R. Nayak

INSTRUCTOR
M. Polson

MISSION STATEMENT
The Department of Chemistry, Physics, and Engineering at Cameron University provides both a liberal arts and professional education in the Physical Sciences and Engineering at the undergraduate level by providing:
1) a rigorous basic education in chemistry and physics both in theory and practice at various levels appropriate for students to prepare to become professionals in their selected fields of study as a major in chemistry or physics;
2) an education appropriate for those students preparing to teach science in the secondary schools;
3) provide two years of education for students within the field of engineering;
4) coursework appropriate for students to understand physical science as part of their general education curriculum; and
5) theory and practice in the physical sciences for those students preparing for healthcare and other careers requiring chemistry and physics.

PROGRAMS OF STUDY
Degrees & Majors: A.A.S. Engineering
- Civil Engineering
- Electrical Engineering
- Environmental Engineering
- Industrial Engineering
- Mechanical Engineering
B.S. Chemistry
- ACS Certified
- Non-ACS Certified
- Health Profession
B.S. Physics

GENERAL INFORMATION
The Department of Chemistry, Physics, and Engineering is dedicated to excellence in education and undergraduate research. Many faculty members are involved in research and mentor undergraduate projects spanning a diverse area of chemistry, physics, and engineering. Much of this research is supported through grants and the department facilities. Our facilities include modern instrumentation techniques using spectroscopy, electrochemistry, chromatography, mass spectroscopy, calorimetry, and thermogravimetric analysis.

STUDENT ORGANIZATIONS
American Chemical Society (ACS)/Chi Lambda Upsilon (Cameron University Chemistry Club)
ACS/Chi Lambda Upsilon, collectively known as the Cameron University Chemistry Club, seeks to educate the community and our members about chemistry. The club also promotes awareness of Cameron’s Department of Chemistry, Physics, and Engineering throughout Southwest Oklahoma through the judging of science fairs, the production of Chemquest and the presentation of speakers.

Engineering Club
The Cameron Engineering Club introduces students to the modern concepts of engineering through demonstrations, building projects, and hosting of engaging speakers. The club’s goal is to educated students and to foster interest in the field of engineering in the community.

Sigma Pi Sigma Society of Physics Students
Sigma Pi Sigma is an American honor society in physics. The society is an organization within the American Institute of Physics. It is the oldest honor society at Cameron University. The goals of the society are to honor outstanding scholarship in physics, to encourage students’ interest in physics, to promote public service, and to provide a fellowship of persons who have excelled in physics.
# Degree Plan: Engineering (545)–Associate in Applied Science

**School of Arts and Sciences**  
Department of Chemistry, Physics, and Engineering  
Catalog Year: 2019-2021

## General Education Requirements 27 hours

### Required Courses–27 hours

- ENGL 1113 English Composition I
- ENGL 1213 English Composition II
- PS 1113 American Federal Government
- HIST 1483 U.S. History To 1865 OR HIST 1493 U.S. History Since 1865
- MATH 2215 Calculus and Analytic Geometry
- CHEM 1361/1364 General Chemistry I and Lab
- PHYS 2015/L Physics I for Science and Engineering Majors

## University Requirements

- UNIV 1001 or 1113–1-3 hours
- Computer Literacy–ENGR 1412

## Major Requirements 23–26 hours

### Required Core Courses–12 hours

- ENGR 1411 Introduction to Engineering (FA)
- ENGR 1412 Engineering Design and CAD (FA)
- ENGR 2113 Statics (SP)
- ENGR 2223 Fluid Mechanics (FA)
- ENGR 2723 Electrical Circuits (SP)

### Option–11-14 hours

- **Mechanical Engineering Option (11 hours)**
  - ENGR 2002 Professional Development in Engineering
  - ENGR 2213 Thermodynamics
  - ENGR 2533 Dynamics
  - PHYS 2213 Selected Topics in General Physics or Higher*

- **Electrical Engineering Option (13 hours)**
  - CS 1314/1314L Computer Science I and Lab
  - ENGR 2002 Professional Development in Engineering
  - ENGR 2314 Intro to Digital Design
  - ENGR 2713 Digital Signals and Processing

- **Civil Engineering Option (14 hours)**
  - GEOL 1014/L Physical Geology and Lab
  - CHEM 1471/1474 General Chemistry II and Lab
  - ENGR 2002 Professional Development in Engineering
  - ENGR 2153 Mechanics of Materials

- **Environmental Engineering Option (14 hours)**
  - CHEM 1471/1474 General Chemistry II and Lab
  - CHEM XXX4 Above Freshman Chemistry**
  - ENGR 2002 Professional Development in Engineering
  - ENGR 2153 Mechanics of Materials

### Industrial Engineering Option (12 hours)

- CS 1314/1314L Computer Science I and Lab
- ENGR 2002 Professional Development in Engineering
- ENGR 2213 Thermodynamics
- ENGR 2533 Dynamics

- **Additional Requirements 17 hours**
  - MATH 2235 Calculus and Analytic Geometry II
  - MATH 2244 Calculus and Analytic Geometry III
  - MATH 2613 Foundations of Mathematics or Higher***
  - PHYS 2025/L Physics II for Science and Engineering Majors
  - ***MATH 3253 strongly encouraged.

### General Electives to Complete 68–71 hours

### Graduation Requirements

- Department Requirements
- Minimum 68 Total Credit Hours
- Minimum 15 Credit Hours in Residence at Cameron
- Retention GPA 2.0
- Cameron GPA 2.0
- Complete Graduation Application Online

---

2019-2021 UNDERGRADUATE CATALOG
### General Education Requirements 44–46 hours

</tr>
</tbody>
</table>

**General Education Non-PE Electives (To total at least 44 hours, if needed)***

General education electives must be selected from the list of approved general education courses, exclusive of those with the PE prefix ([http://www.cameron.edu/catalog/general_ed.html](http://www.cameron.edu/catalog/general_ed.html)).

### University Requirements

| UNIV 1001 or 1113–1–3 hours | Computer Literacy–CHEM 1361 | Capstone Experience–CHEM 4541 |

### Major Requirements 56–66 hours

#### Required Core Courses–25 hours

- CHEM 1361/1364 General Chemistry Lab I (FA, SP)
- CHEM 1471/1474 General Chemistry Lab II (FA, SP)
- CHEM 2541 Introduction to Chemical Literature (FA)
- CHEM 3113 Fund of Analytical Chemistry (FA, Odd SP)
- CHEM 3232 Quantitative Analysis Lab (FA, Odd SP)
- CHEM 3314 Organic Chemistry I (FA, SP)
- CHEM 3324 Organic Chemistry II (FA, SP)
- CHEM 4541 Chemistry Capstone (SP)

*Students must maintain an overall 2.0 GPA for all Major courses.
FA=Fall; SP=Spring; SU=Summer

#### Concentration or Options–31–41 hours

- Majors must select from the following options:
  - American Chem Society Certified Chemistry Degree
  - Chemistry Degree (non-ACS Certified) (must select minor)
  - Health Profession Chemistry Degree Option
  (See next page for course list)

### Additional Requirements 10 hours

- PHYS 1115 Physics I OR 2015 Physics I for Sci & Engineering Majors (preferred)
- PHYS 1215 Physics II OR PHYS 2025 Physics II for Sci & Engineering Majors (preferred)

### Minor Requirements 18 hours

For a full list of available minors, see: [http://www.cameron.edu/catalog/minors.html](http://www.cameron.edu/catalog/minors.html)

### General Electives to Complete 124 hours

### Graduation Requirements

- Minimum ½ of Major Upper Division Hours Completed at CU
- Minimum 124 Total Credit Hours
- Minimum 40 Upper Division Credit Hours
- Retention GPA 2.0
- Minimum 55 Liberal Arts & Science Credit Hours
- Cameron GPA 2.0
- Minimum 30 Credit Hours in Residence at Cameron
- Complete Graduation Application Online
- Minimum 60 Credit Hours at a 4-Year Institution

### Additional Requirements 21 hours

- CHEM 1471/1474 General Chemistry II and Lab
- CS 1314/L Computer Science I and Lab (or similar)
- MATH 2235 Calculus & Analytic Geometry II
- MATH 2244 Calculus & Analytic Geometry III
- MATH 3253 Differential Equations

Depending upon high school background some students may also need: MATH 0013, 0103, 0213 and/or 0115, MATH 1513, MATH 1613 as prerequisites. Some of these courses may be used to satisfy general education requirements.

### Minor Requirements 18 hours

For a full list of available minors, see: http://www.cameron.edu/catalog/minors.html.

### General Electives to Complete 124 hours

### Graduation Requirements

- Minimum 124 Total Credit Hours
- Minimum 40 Upper Division Credit Hours
- Minimum 55 Liberal Arts & Science Credit Hours
- Minimum 30 Credit Hours in Residence at Cameron
- Minimum 60 Credit Hours at a 4-Year Institution

Minimum ½ of Major Upper Division Hours Completed at CU
15 of last 30 Credit Hours or ½ of Major Completed at CU Retention GPA 2.0
Cameron GPA 2.0
Complete Graduation Application Online
COURSE DESCRIPTIONS
The course curricula to complete a degree in the Department of Chemistry, Physics, and Engineering is designed to be studied in a sequential manner. The prerequisites are advisory and reflect this sequence. These courses are taught using knowledge and skills that the student is expected to retain from previous studies. Taking Chemistry, Physics, and Engineering courses in an improper sequence, without the recommended prerequisites, and/or with an extended period of time between these courses will require significant additional effort by the student and increase the difficulty of the program.

ASTRONOMY (ASTR)
1104* CONTEMPORARY ASTRONOMY 4 credit hours A one-semester survey course in astronomy. Topics are developed around observational astronomy, how astronomers understand the universe using models, astronomical and physical concepts which provide a fundamental understanding. The course surveys the solar system, our galaxy and near stars, and stellar characteristics. Lecture 4 hours. Prerequisite: At least one year of high school algebra. General Education, Physical Science.

CHEMISTRY (CHEM)
1004* DESCRIPTIVE CHEMISTRY 4 credit hours A one-semester introductory course in chemistry. Principal concepts and theories of chemistry are examined from the layman's point of view. This course is highly recommended for those planning to take CHEM 1364/1361 who have not had previous chemistry. Credit earned in this course cannot be counted towards a science major or minor. This course does not fulfill chemistry requirements for pre-professional programs. Lecture 4 hours. General Education, Physical Science.

1105* INTRODUCTION TO CHEMISTRY 5 credit hours Introduction to Chemistry, a one-semester course for students with degree plan that has a one-semester chemistry requirement. This course includes fundamental knowledge of inorganic chemistry, with laboratory. Lecture 4 hours, lab 2 hours. Recommended prerequisite: College Algebra. Corequisite: CHEM 1105L. General Education Laboratory Science, Physical Science.

1105L* INTRODUCTION TO CHEMISTRY LAB 0 credit hours LAB: Introduction to Chemistry, a one-semester course for students with degree plan that has a one-semester chemistry requirement. This course includes fundamental knowledge of inorganic chemistry, with laboratory. Lecture 4 hours, lab 2 hours. Recommended prerequisite: College Algebra. Corequisite: CHEM 1105L. General Education Laboratory Science, Physical Science.

1361* GENERAL CHEMISTRY LABORATORY I 1 credit hour Selected laboratory experiences to test application of chemical theory. Laboratory 2 hours. Prerequisite: Successful completion of or concurrent enrollment in CHEM 1364. General Education Laboratory Science, Physical Science. (Fall, Spring)

1364* GENERAL CHEMISTRY I 4 credit hours Principles of general chemistry, with emphasis on theory and its application to structure and reactions. Lecture 4 hours. Students are strongly recommended to take MATH 1513 (College Algebra) or higher as it is a prerequisite for CHEM 1474 (General Chemistry II). It is also strongly advised that students who have not successfully passed high school chemistry take CHEM 1004 Descriptive Chemistry prior to taking this course. General Education, Physical Science. (Fall, Spring)

1471* GENERAL CHEMISTRY LABORATORY II 1 credit hour Selected laboratory experiments to test applications of kinetics, thermodynamics, equilibrium, and quantitative analysis. Laboratory 2 hours. Prerequisite: Successful completion of or concurrent enrollment in CHEM 1474. Will not satisfy general education science requirements. (Fall, Spring)

1474* GENERAL CHEMISTRY II 4 credit hours A continuation of CHEM 1364. Lecture 4 hours. Prerequisite: CHEM 1364 and MATH 1513 or higher. CHEM 1471 must be successfully completed before credit is given in this course. Will not satisfy general education science requirements.

Chemistry courses at the 2000-, 3000-, or 4000-level may not be used to fulfill general education science requirements.

2441 WORKING SAFELY WITH CHEMICALS 1 credit hour Seminars, discussion, and real-world activities will focus on regulations and protocols governing laboratory safety and working safely with chemicals. Students will be assessed on compliance regulations, identification of exposures, and safeguarding exposures. Each student will also be asked to evaluate safety policies, emergency preparedness, and hazard recognition. The objective is to prepare students for a safe laboratory experience and be more responsible and knowledgeable employees after graduation. Will not satisfy general education science requirements. Lecture 1 hour.

2541* INTRODUCTION TO CHEMICAL LITERATURE 1 credit hour This course is designed for students to distinguish between different types of literature sources, accomplish literature searches, prepare poster presentations, and write technical papers and resumes. Lecture 1 hour. Prerequisite: CHEM 1474. Will not satisfy general education science requirements. (Fall)

3113* FUNDAMENTALS OF ANALYTICAL CHEMISTRY 3 credit hours An introductory course in analytical chemistry emphasizing volumetric and electrochemical methods. Techniques for the analysis of samples based on instrumental methods are also introduced. Lecture 3 hours. Prerequisites: CHEM 1474 or equivalent. Will not satisfy general education science requirements. (Fall, Spring Odd Years)

3232* QUANTITATIVE ANALYSIS LABORATORY 2 credit hours Laboratory techniques of quantitative
analysis including volumetric and spectroscopic methods. Laboratory 6 hours. Prerequisite: CHEM 3113 or concurrent enrollment. CHEM 3113 must be successfully completed before credit is received in this course. Will not satisfy general education science requirements. (Fall, Spring Odd Years)

3314* ORGANIC CHEMISTRY I 4 credit hours
Nomenclature, structure, reactions, stereochemistry, and mechanisms of both aliphatic and aromatic compounds. The first semester of a two semester sequence. Lecture 3 hours, laboratory 3 hours. Prerequisites: CHEM 1474 and CHEM 1471 or equivalent. Corequisite: CHEM 3314L. Will not satisfy general education science requirements. (Fall, Spring)

3314L* ORGANIC CHEMISTRY I LAB 0 credit hours LAB:
Nomenclature, structure, reactions, stereochemistry, and mechanisms of both aliphatic and aromatic compounds. The first semester of a two semester sequence. Lecture 3 hours, laboratory 3 hours. Prerequisites: CHEM 1474 and CHEM 1471 or equivalent. Corequisite: CHEM 3314. Will not satisfy general education science requirements. (Fall, Spring)

3324* ORGANIC CHEMISTRY II 4 credit hours
A continuation of CHEM 3314. The second semester of a two-semester sequence. Lecture 3 hours, laboratory 3 hours. Prerequisite: CHEM 3314. Corequisite: CHEM 3324L. Will not satisfy general education science requirements. (Fall, Spring)

3324L* ORGANIC CHEMISTRY II LAB 0 credit hours LAB:
A continuation of CHEM 3314. The second semester of a two-semester sequence. Lecture 3 hours, laboratory 3 hours. Prerequisite: CHEM 3314. Corequisite: CHEM 3324. Will not satisfy general education science requirements. (Fall, Spring)

3334* CHEMISTRY OF WATER AND WASTEWATER 4 credit hours
Inorganic chemistry of natural water supplies, pollution and water treatment. Standard methods and state environmental quality references are used. Lecture 2 hours, laboratory 6 hours. Prerequisites: CHEM 1471 and CHEM 1474. Corequisite: CHEM 3334L. Will not satisfy general education science requirements.

3334L* CHEMISTRY OF WATER AND WASTEWATER LAB 0 credit hours LAB:
Inorganic chemistry of natural water supplies, pollution and water treatment. Standard methods and state environmental quality references are used. Lecture 2 hours, laboratory 6 hours. Prerequisites: CHEM 1471 and CHEM 1474. Corequisite: CHEM 3334. Will not satisfy general education science requirements.

3343* ORGANIC ANALYSIS 3 credit hours
Characterization, derivatization, and identification of unknowns consisting of one or more organic compounds. Instrumental methods of analysis as applied to the identification of organic compounds, including practical laboratory work with IR, NMR, GLC, and TLC. Lecture 1 hour, laboratory 6 hours. Prerequisite: CHEM 3324 or concurrent enrollment. Corequisite: CHEM 3343L. Will not satisfy general education science requirements.

3343L* ORGANIC ANALYSIS LAB 0 credit hours
Characterization, derivatization, and identification of unknowns consisting of one or more organic compounds. Instrumental methods of analysis as applied to the identification of organic compounds, including practical laboratory work with IR, NMR, GLC, and TLC. Lecture 1 hour, laboratory 6 hours. Prerequisite: CHEM 3324 or concurrent enrollment. Will not satisfy general education science requirements.

4025* INSTRUMENTAL METHODS OF ANALYSIS 5 credit hours
Theoretical and laboratory study of modern analytical techniques, both qualitative and quantitative, with emphasis on instrument types, their components and methodology. Lecture 3 hours, laboratory 6 hours. Prerequisites: CHEM 3113 and CHEM 3232. Corequisite: CHEM 4025L. Will not satisfy general education science requirements.

4025L* INSTRUMENTAL METHODS OF ANALYSIS LAB 0 credit hours LAB:
Theoretical and laboratory study of modern analytical techniques, both qualitative and quantitative, with emphasis on instrument types, their components and methodology. Lecture 3 hours, laboratory 6 hours. Prerequisites: CHEM 3113 and CHEM 3232. Corequisite: CHEM 4025. Will not satisfy general education science requirements.

4332* ADVANCED INORGANIC CHEMISTRY LAB, 2 hours credit
An introduction to classical inorganic chemical syntheses, purification methods and analyses. Techniques utilized in the identification of compounds include Fourier transform infrared, ultra-violet and visible, multinuclear magnetic resonance and mass spectrosopies. Some synthetic procedures utilize an inert atmosphere approach. Laboratory 6 hours. Prerequisite: CHEM 4334 or concurrent enrollment. Will not satisfy general education science requirements.

4334* ADVANCED INORGANIC CHEMISTRY 4 credit hours
An advanced study of the principles of inorganic chemistry. Theoretical concepts to be included in the study are chemical bonding, acid-base chemistry, coordination chemistry, crystal field theory, and molecular orbital theory. An investigation into periodicity of the elements in terms of the effect of atomic size, ionic size, and charge on various chemical properties will be pursued. Lecture 4 hours. Prerequisites: CHEM 3324, PHYS 1215, and MATH 2215. Will not satisfy general education science requirements.

4351* PHYSICAL CHEMISTRY LABORATORY I 1 credit hour
Apparatus, method and calculations employed in physicochemical measurements. Laboratory 3 hours. Prerequisites: CHEM 4353 or concurrent enrollment and CHEM 3232. Will not satisfy general education science requirements.

4353* PHYSICAL CHEMISTRY I 3 credit hours
The study of thermodynamics particularly as applied to chemical systems. Lecture 3 hours. Prerequisites: CHEM 1474/1471, MATH 2215 and PHYS 1215 or PHYS 2025. Will not satisfy general education science requirements.
4361* PHYSICAL CHEMISTRY LABORATORY II 1 credit hour A continuation of CHEM 4351. Laboratory 3 hours. Prerequisite: CHEM 4363 or concurrent enrollment. Will not satisfy general education science requirements.

4363* PHYSICAL CHEMISTRY II 3 credit hours A continuation of CHEM 4353. Study of kinetics, quantum mechanics, and statistical thermodynamics as related to chemical systems. Lecture 3 hours. Prerequisite: CHEM 4353. Will not satisfy general education science requirements.

4401* BIOCHEMISTRY I LABORATORY 1 credit hour Qualitative and quantitative examination of biochemical materials and reactions. Laboratory 3 hours. Prerequisite: CHEM 4403 or concurrent enrollment. Will not satisfy general education science requirements.

4403* BIOCHEMISTRY I 3 credit hours An introduction to the chemistry and metabolism of carbohydrates, lipids, and proteins. Basic concepts of biochemistry of vitamins and enzymes, biological oxidations, bioenergetics. Lecture 3 hours. Prerequisite: CHEM 3324 or concurrent enrollment. Will not satisfy general education science requirements.

4411* BIOCHEMISTRY II LABORATORY 1 credit hour A continuation of Biochemistry Laboratory CHEM 4401. Laboratory 3 hours. Prerequisites: CHEM 4401, CHEM 4413 or concurrent enrollment. Will not satisfy general education science requirements.

4413* BIOCHEMISTRY II 3 credit hours A continuation of Biochemistry, CHEM 4403, with emphasis on the catabolic routes of metabolism. Lecture 3 hours. Prerequisite: CHEM 4403. Will not satisfy general education science requirements.

4481-3 ADVANCED TOPICS IN CHEMISTRY 1-3 credit hours This lecture-based course will focus on a topic or topics of current interest to the chemical profession. Lecture 1-3 hours. Prerequisite: CHEM 3324 or CHEM 3345 or concurrent enrollment. Will not satisfy general education science requirements.

4491-4 SPECIAL PROBLEMS IN CHEMISTRY 1-4 credit hours Training in independent work. Experimental investigations of an assigned problem. Normally graded on S/U basis. Laboratory 3-12 hours. Prerequisite: Department approved application. Will not satisfy general education science requirements.

4541* CHEMISTRY CAPSTONE 1 credit hour The course involves student preparation and presentation of original and/or library chemical research topics. The course will also explore issues related to becoming a morally responsible scientist to ethical problem solving. Oral presentations and written reports are required. One scheduled presentation will be given outside of class time. Program assessment is also a component. Capstone/lecture 1 hour. Prerequisite: CHEM 2541 and Senior standing. Will not satisfy general education science requirements. (Spring)

ENGINEERING (ENGR)

1411 INTRODUCTION TO ENGINEERING 1 credit hour Introduction to engineering disciplines and available career paths. Topics covered: majors, study habits, career planning, advising, professional societies, and student programs. Student must be eligible to take MATH 2215 or higher. Lecture 1 hour. (Fall)

1412 ENGINEERING DESIGN AND CAD 2 credit hours Introduction to engineering design using modern design methodologies and computer-aided tools. By using computer aided design/drafting software, SolidWorks/AutoCAD, students will learn basic principles of engineering graphics and geometric modeling to assist in design problem visualization and planning. Design, construction and testing through participation in a team-based design project contest. Lecture 2 hours. Student must be eligible to take MATH 2215 or higher. (Fall)

2002 PROFESSIONAL DEVELOPMENT 2 credit hours Introduction to real world applications of engineering skills learned in the Engineering curriculum, including speakers from industry and studying projects driven from industry needs. Lecture 2 hours. Prerequisites: ENGR 1411 and ENGR 1412.

2113 STATICS 3 credit hours A study of vector representation of forces and movement. Resultants of force systems, static equilibrium of rigid bodies, statics of structures, and fluid statics. Free body, shear and moment diagrams. Lecture 3 hours. Prerequisites: MATH 2215 and PHYS 2015 or concurrent enrollment. (Spring)

2153 MECHANICS OF MATERIALS 3 credit hours Introduction to basic principles of mechanics. Topics in stress and strain, transformations, kinematic relations and review of conservation equations will be covered. Hooke’s Law, Young’s modulus and Poisson’s ratio will be utilized. Solutions of one and two dimensional mechanics problems, including thermal stresses and strains, torsion, and beam flexure, shear and deflection, and buckling of columns. Lecture 3 hours. Prerequisites: ENGR 2113.

2213 THERMODYNAMICS 3 credit hours First and Second Laws of Thermodynamics are developed and applied to the solution of problems from a variety of engineering fields. The study of properties of substances and principles governing changes in form of energy. Extensive use is made of partial differential calculus to interrelate the thermodynamic functions. Lecture 3 hours. Prerequisites: ENGR 2113 and CHEM 1364/1361.

2223 FLUID MECHANICS 3 credit hours The study of fluid properties, statics, conservation equations, dimensional analysis and similitude, viscous flow in ducts, inviscid flow, boundary layer theory, open channel flow, turbomachinery and fluid measurement techniques: e.g., Navier-Stokes Equations, Euler’s Equations, Bernoulli Equations, etc., and their applications. It will also include examples of ideal fluid flow and viscous fluid flow, such as flow in open and closed conduits. Lecture 3 hours. Prerequisites: ENGR 2113. (Fall)
2314 INTRODUCTION TO DIGITAL DESIGN 4 credit hours This course involves the study of number systems and their applications, Boolean algebra, minimization procedures, combinatorial logic functions, introduction to sequential logic design, finite state machines and clocked (synchronous) sequential circuits. Analysis, synthesis and implementation are appropriately emphasized. Lecture 3 hours, laboratory 3 hours. Prerequisite: MATH 2235. Corequisite: ENGR 2314L.

2314L INTRODUCTION TO DIGITAL DESIGN LAB 0 credit hours LAB: This course involves the study of number systems and their applications, Boolean algebra, minimization procedures, combinatorial logic functions, introduction to sequential logic design, finite state machines and clocked (synchronous) sequential circuits. Analysis, synthesis and implementation are appropriately emphasized. Lecture 3 hours, laboratory 3 hours. Prerequisite: MATH 2235. Corequisite: ENGR 2314L.

2533 DYNAMICS 3 credit hours This course is an introduction to basic principles of engineering. Topics include kinematics and kinetics of particles, systems of particles, and rigid bodies from a Newtonian viewpoint using vector algebra and calculus. Work-energy and impulse-momentum principles and planar and three-dimensional kinetics and kinematics of rigid bodies will be studied. Lecture 3 hours. Prerequisites: ENGR 2113.

2713 DIGITAL SIGNALS AND FILTERING 3 credit hours This course involves the study of digital signals and filters, discrete Fourier and Z transforms and sampling. Lecture 3 hours. Prerequisites: ENGR 1411 and MATH 2235.

2723 ELECTRICAL CIRCUITS 3 credit hours The study of the elements of electrical engineering: AC and DC circuits, mech and node formulation of network equations, steady-state response to sinusoids, energy, power and power factor. Lecture 3 hours. Prerequisites: ENGR 2113 and MATH 2235. (Spring)

GEOL (GEOL)

1014* PHYSICAL GEOLOGY 4 credit hours Emphasis is on plate tectonics, the rock cycle, and the hydrologic cycle. Discussion involved igneous, sedimentary and metamorphic rocks; results of erosion of the earth’s surface by streams, oceans, winds, glaciers; phenomena of mountains, volcanoes, earthquakes and interior of the earth. Available field trips. Lecture 3 hours, laboratory 2 hours. Corequisite: GEOL 1014L. General Education Laboratory Science, Physical Science.

1014L* PHYSICAL GEOLOGY LAB 0 credit hours LAB: Emphasis is on plate tectonics, the rock cycle, and the hydrologic cycle. Discussion involved igneous, sedimentary and metamorphic rocks; results of erosion of the earth’s surface by streams, oceans, winds, glaciers; phenomena of mountains, volcanoes, earthquakes and interior of the earth. Available field trips. Lecture 3 hours, laboratory 2 hours. Corequisite: GEOL 1014. General Education Laboratory Science, Physical Science.

PHYS (PHYS)

1004* DESCRIPTIVE PHYSICS 4 credit hours A survey course in general physics. Topics include mechanics, heat, sound, electricity, magnetism, light, and modern physics. For students who wish only four semester hours of physics. Credit earned in this course cannot be counted towards a science major or minor. Lecture 4 hours. Prerequisite: At least one year of high school algebra. General Education, Physical Science.

1115* PHYSICS I 5 credit hours A beginning lecture and laboratory study of the fundamental principles of mechanics, heat, and sound. Lecture 4 hours, laboratory 2 hours. Prerequisite: MATH 1613 or 2215. Corequisite: PHYS 1115L. General Education Laboratory Science, Physical Science. (Fall)

1115L* PHYSICS I LAB 0 credit hours LAB: A beginning lecture and laboratory study of the fundamental principles of mechanics, heat, and sound. Lecture 4 hours, laboratory 2 hours. Prerequisite: MATH 1613 or 2215. Corequisite: PHYS 1115. General Education Laboratory Science, Physical Science. (Fall)

1215* PHYSICS II 5 credit hours A continuation of PHYS 1115. A lecture and laboratory study of the fundamental principles of electricity, magnetism, light, and modern physics. Lecture 4 hours, laboratory 2 hours. Prerequisite: PHYS 1115. Corequisite: PHYS 1215L. Will not satisfy general education science requirements. (Spring)

1215L* PHYSICS II LAB 0 credit hours LAB: A continuation of PHYS 1115. A lecture and laboratory study of the fundamental principles of electricity, magnetism, light, and modern physics. Lecture 4 hours, laboratory 2 hours. Prerequisite: PHYS 1115. Corequisite: PHYS 1215. Will not satisfy general education science requirements. (Spring)

2015* PHYSICS I FOR SCIENCE AND ENGINEERING MAJORS 5 credit hours A lecture-laboratory course of general physics taught with calculus. Includes topics from mechanics, heat and sound. Lecture 4 hours, laboratory 2 hours. Prerequisite: MATH 2215 or concurrent enrollment. Corequisite: PHYS 2015L. General Education Laboratory Science, Physical Science. (Spring)

2015L* PHYSICS I FOR SCIENCE AND ENGINEERING MAJORS LAB 0 credit hours LAB: A lecture-laboratory course of general physics taught with calculus. Includes topics from mechanics, heat and sound. Lecture 4 hours, laboratory 2 hours. Prerequisite: MATH 2215 or concurrent enrollment. Corequisite: PHYS 2015. General Education Laboratory Science, Physical Science. (Spring)

2025* PHYSICS II FOR SCIENCE AND ENGINEERING MAJORS 5 credit hours A continuation of PHYS 2015. Includes topics from electricity, light, and modern physics. Lecture 4 hours, laboratory 2 hours. Prerequisite: PHYS 2015. Corequisite: PHYS 2025L. Will not satisfy general education science requirements. (Fall)

Physics courses at the 2000-, 3000-, or 4000-level may not be used to fulfill General Education science requirements (except PHYS 2015/2015L.  

2025* PHYSICS II FOR SCIENCE AND ENGINEERING MAJORS 5 credit hours A continuation of PHYS 2015. Includes topics from electricity, light, and modern physics. Lecture 4 hours, laboratory 2 hours. Prerequisite: PHYS 2015. Corequisite: PHYS 2025L. Will not satisfy general education science requirements. (Fall)

2025* PHYSICS II FOR SCIENCE AND ENGINEERING MAJORS 5 credit hours A continuation of PHYS 2015. Includes topics from electricity, light, and modern physics. Lecture 4 hours, laboratory 2 hours. Prerequisite: PHYS 2015. Corequisite: PHYS 2025L. Will not satisfy general education science requirements. (Fall)
2025L* PHYSICS II FOR SCIENCE AND ENGINEERING MAJORS LAB 0 credit hours LAB: A continuation of PHYS 2015. Includes topics from electricity, light, and modern physics. Lecture 4 hours, laboratory 2 hours. Prerequisite: PHYS 2015. Corequisite: PHYS 2025. Will not satisfy general education science requirements. (Fall)

2213* SELECTED TOPICS IN GENERAL PHYSICS 3 credit hours A survey treatment of the basic topics in general physics using calculus. Designed for those students who have taken the non-calculus general physics sequence as preparation for the upper division physics courses. NOT open to students with credit in PHYS 2015 or PHYS 2025. Lecture 3 hours. Prerequisites: PHYS 1215 and MATH 2215. Will not satisfy general education science requirements.

2541* INTRODUCTION TO PHYSICS LITERATURE 1 credit hour This course is designed for students to distinguish between different types of literature sources, accomplish literature searches, prepare poster presentations, and write technical papers. Lecture 1 hour. Prerequisite: PHYS 1215 or PHYS 2025. Will not satisfy general education science requirements. (Fall)

3003* MODERN PHYSICS 3 credit hours An introduction to the ideas and experiments of 20th Century physics. Topics include special relativity, particle properties of waves, wave properties of particles, the Bohr Theory of the atom, and an introduction to quantum mechanics. Lecture 3 hours. Prerequisites: MATH 2215 or concurrent enrollment and PHYS 1215 or PHYS 2025. Will not satisfy general education science requirements. (Spring)

3011* MODERN PHYSICS LABORATORY 1 credit hour Selected experiments in modern physics, such as Bragg's Law experiment, Michelson's Interferometer, Gamma Ray Spectroscopy, Hall Effect, Statistics of Data. Laboratory 3 hours. Prerequisite: PHYS 3003 or concurrent enrollment. Will not satisfy general education science requirements. (Spring)

3024 ELECTRICAL MEASUREMENTS AND ELECTRONICS 4 credit hours Principles and application of dc and ac circuits analysis, measuring instruments, operational amplifiers, and various solid state devices. The physics of solid state electronic devices and their applications. Lecture 4 hours. Prerequisites: PHYS 1215 or PHYS 2025 and MATH 2215. Will not satisfy general education science requirements.

3031 ELECTRICAL MEASUREMENTS AND ELECTRONICS LABORATORY 1 credit hour Construction and testing of electrical circuits which are applications of the devices studied in PHYS 3024. Laboratory 3 hours. Prerequisite: PHYS 3024 or concurrent enrollment. Will not satisfy general education science requirements.

3043 INTRODUCTION TO QUANTUM MECHANICS 3 credit hours An introduction to quantum mechanics. Schrodinger equation, probabilities, Heisenberg uncertainty principle, and angular momentum. Applications to atomic physics, molecular physics, condensed matter and nuclear physics. Lecture 3 hours. Prerequisites: PHYS 1215 or 2025 and MATH 3253 or concurrent enrollment. Will not satisfy general education science requirements. (Spring, Even Years)

3303* CLASSICAL MECHANICS 3 credit hours A vector analytical approach to the mechanics of particles, systems of particles, and rigid bodies. Lecture 3 hours. Prerequisite: PHYS 1115 or PHYS 2015 and MATH 3253. Will not satisfy general education science requirements. (Fall, Even Years)

3403* THERMAL PHYSICS 3 credit hours An examination of the principles of energy transfer due to temperature differences. Topics include temperature and temperature scales, equations of state, the three laws of thermodynamics, entropy, thermodynamic potentials, and kinetic theory. Lecture 3 hours. Prerequisites: MATH 2235 and PHYS 1215 or PHYS 2025. Will not satisfy general education science requirements. (Fall, Odd Years)

4113* ELECTRICITY AND MAGNETISM 3 credit hours A study of electrostatic fields and potentials, dielectrics, currents, magnetic fields, and Maxwell's equations. Methods of vector calculus are introduced and used extensively. Lecture 3 hours. Prerequisites: PHYS 1215 or PHYS 2025 and MATH 2244. Will not satisfy general education science requirements. (Spring, Odd Years)

4243 SOLID STATE PHYSICS 3 credit hours This is a thorough introductory course in modern solid state physics. Main topics of the course include principles of behavior of electrons in solids, crystal structure and diffraction, free electron gas, elementary band theory, semiconductors, magnetism and superconductivity. Lecture 3 hours. Prerequisites: PHYS 1215 or 2015 and MATH 3253 or concurrent enrollment. Will not satisfy general education science requirements.

4401 OPTICS LABORATORY 1 credit hour Selected experiments in ray optics, diffraction, refraction, image formation, interference, lenses, mirrors, lasers, dispersion, polarization and holography. Laboratory 2 hours. Prerequisite: PHYS 4403 or concurrent enrollment. Will not satisfy general education science requirements. (Fall)

4403* LIGHT AND OPTICS 3 credit hours A study of geometrical and physical optics. Topics include reflection, refraction, lenses, wave theory, interference, diffraction, dispersion, and polarization. Lecture 3 hours. Prerequisites: PHYS 1215 or PHYS 2025 and MATH 2215. Will not satisfy general education science requirements. (Fall)

4481-3 ADVANCED TOPICS IN PHYSICS 1-3 credit hours This lecture-based course will focus on a topic or topics of current interest in physics. Lecture 1-3 hours. Prerequisite: PHYS 3003. Will not satisfy general education science requirements. (Fall)

4491-3 SPECIAL PROBLEMS IN PHYSICS 1-3 credit hours An individual study course of advanced nature. Subject material varies with background and interests of the student, and may be either class work or laboratory. Laboratory work will be of research quality with
individual guidance from a faculty member. Normally graded on S/U basis. Independent study 1-3 hours. Prerequisites: 10 hours of Physics and department permission. Will not satisfy general education science requirements.

4541* PHYSICS CAPSTONE 1 credit hour The course involves student preparation and presentation or original and/or library research topics. The course will also explore issues related to becoming a morally responsible scientist to ethical problem solving. Oral presentations and written reports are required. One scheduled presentation will be given outside of class time. Program assessment is also a component. Capstone/lecture 1 hour. Prerequisite: PHYS 2541 and Senior standing. Will not satisfy general education science requirements. (Spring)

PHYSICAL SCIENCE (PSCI)

1054* GENERAL PHYSICAL SCIENCE 4 credit hours A lecture-demonstration course designed for students with a non-scientific background. The course attempts to integrate the various areas of physical science (physics, chemistry, astronomy and geology) into a comprehensible whole. This course is designed for non-science majors. Lecture/demonstration 4 hours. General Education, Physical Science.

*Liberal arts & sciences course.
DEPARTMENT OF COMMUNICATION, ENGLISH, AND FOREIGN LANGUAGES

FACULTY

CHAIR
Christopher Keller, Professor

PROFESSORS
W. Carney, M. Jenkins, M, Kingsley, Y. Liu, J. Morris, J. Walton, V. Underwood

ASSOCIATE PROFESSORS
J. Heflin, J. Hodgson, S. Tyrrell, Y. Zhao

ASSISTANT PROFESSORS
D. Bublitz, L. Chaffins, J. Gonzalez, C. Schneider

INSTRUCTORS
F. Godwin, S. Goode, M. Hamilton

MISSION STATEMENT
The Department of Communication, English, and Foreign Languages supports Cameron University’s mission of offering educational opportunities for a diverse student body. The program strives to develop students’ intellectual capacities, prepares students for entry into graduate school and individual discipline-related professions, and plays a role in general education. The department faculty value free expression of ideas both oral and written, critical thought, and civil discourse.

PROGRAMS OF STUDY
Degrees & Majors: A.A. Strategic Communication
B.A. English
B.A. English Education
B.A. International Languages
B.A. Journalism and Media Production
B.A. Strategic Communication

GENERAL INFORMATION
The Department of Communication, English and Foreign Languages supports Cameron University's mission by providing student-centered courses designed by dedicated faculty members who have extensive knowledge and experience in their fields and a deep commitment to teaching, scholarship, and service. The Department prides itself on exposing students to an array of studies in the fields of communication, journalism, language, literature, media, and writing which will prepare them to contribute to communities at home and abroad by fostering cultural awareness; developing individual critical, analytical, and creative capacities; and encouraging habits of the mind that will facilitate success in rapidly changing academic and professional worlds.

STUDENT ORGANIZATIONS
Lambda Pi Eta
Lambda Pi Eta (LPH) is the National Communication Association’s official honor society at Cameron University. Alpha Psi is the CU Lambda Pi Eta chapter.

Sigma Tau Delta—English Honor Society
Beta Omicron is the CU Chapter of Sigma Tau Delta, the national English Honor Society.

Society of Professional Journalists
The Society of Professional Journalists is the nation’s most broad-based journalism organization, dedicated to encouraging the free practice of journalism and stimulating high standards of ethical behavior.

Phi Sigma Iota—Foreign Languages Honor Society
Delta Rho is the CU Chapter of Phi Sigma Iota. Phi Sigma Iota recognizes outstanding accomplishment in the study or teaching of any of the academic fields related to foreign language, literature, or culture. Phi Sigma Iota is the highest academic honor in the field of foreign languages.
Degree Plan: Strategic Communication (541)–Associate in Arts
School of Arts and Sciences
Department of Communication, English, and Foreign Languages
Catalog Year: 2019-2021

COURSE DESCRIPTIONS

ALBANIAN (ALBN)
4153* INTENSIVE STUDIES IN ALBANIAN 3 credit hours An intensive introductory study of Albanian combining guided independent study of the written language with regular oral practice of the spoken language. Two hours independent study, one hour lab. Prerequisites: ENGL 1213 and six hours study of another foreign language or permission of the department.

ARABIC (ARBC)
1113* BEGINNING MODERN STANDARD ARABIC I 3 credit hours An introductory course in the language and culture of Arabic-speaking countries. Lecture 3 hours. General Education, Humanities–Diversity. (Fall)
2223* BEGINNING MODERN STANDARD ARABIC II 3 credit hours Continuation of ARBC 1113. Lecture 3 hours. Prerequisite: ARBC 1113 or equivalent. General Education, Humanities–Diversity. (Spring)
2113* INTERMEDIATE MODERN STANDARD ARABIC I 3 credit hours An intermediate course in the language and culture of the Arabic-speaking countries. Lecture 3 hours. Prerequisite: ARBC 2113 or equivalent. (Fall)
2223* INTERMEDIATE MODERN STANDARD ARABIC II 3 credit hours Continuation of ARBC 2113. Lecture 3 hours. Prerequisite: ARBC 2113 or the equivalent. (Spring)
3113* ADVANCED MODERN STANDARD ARABIC I 3 credit hours An advanced course in the language and culture of the Arabic-speaking countries. Lecture 3 hours. Prerequisite: ARBC 2223 or the equivalent. (Fall)
3223* ADVANCED MODERN STANDARD ARABIC II 3 credit hours A continuation of ARBC 3113. Lecture 3 hours. Prerequisite: ARBC 3113 or equivalent. (Spring)
4961-3* DIRECTED READINGS IN MODERN STANDARD ARABIC 1-3 credit hours This course provides an opportunity for students to work on individualized topics in Arabic language, linguistics, and literature. Course may be repeated to a total of six hours with departmental permission. Independent study/directed readings 1-3 hours. Prerequisite: ARBC 3223 or equivalent.

CATALAN (CTLN)
4153* INTENSIVE STUDIES IN CATALAN 3 credit hours An intensive study of Catalan, with the goal of reaching near-native fluency in reading and writing the language. Some conversational practice. Two hours independent study, one hour lab. Prerequisite: Study of another Romance language or department permission.

CHINESE (CHNS)
1113* BEGINNING CHINESE (MANDARIN) I 3 credit hours An introductory course in the language and culture of the People’s Republic of China. Lecture 3 hours. General Education, Humanities–Diversity.
1223* BEGINNING CHINESE (MANDARIN) II 3 credit hours Continuation of Chinese (Mandarin) CHNS 1113. Lecture 3 hours. Prerequisite: CHNS 1113. General Education, Humanities–Diversity.
2113* INTERMEDIATE CHINESE I 3 credit hours An intermediate-level course in Chinese (Mandarin). Lecture 3 hours. Prerequisite: CHNS 1223 or equivalent.
2223* INTERMEDIATE CHINESE II 3 credit hours Continuation of CHNS 2113. Lecture 3 hours. Prerequisite: CHNS 2113 or equivalent.

CLASSICS (CLSC)
4153* WOMEN IN ANCIENT ROME 3 credit hours Course provides an introduction to the lives of women and the roles that women played in everyday life both in ancient Rome and in the Roman provinces. Texts studied will provide insight into the attitudes of early Roman writers towards women and women’s roles. Lecture 3 hours.
4163* ROMAN MYTHOLOGY 3 credit hours This course provides an introduction to the content of Roman mythology, to the role of myths in literature and art, and to modern ways of interpreting and using myths. Lecture 3 hours.
4171-3* SPECIAL TOPICS IN CLASSICS 1-3 credit hours Directed individual or group study of selected topics or problems in Classics. Areas of study will vary from semester to semester. The course may be repeated for a total of 6 hours with departmental permission. Independent study/directed readings 1-3 hours.

COMANCHE LANGUAGE (CMCH)
1113* COMANCHE LANGUAGE I 3 credit hours An introductory course in the language and culture of the Comanche people. Lecture 3 hours.
1223* COMANCHE LANGUAGE II 3 credit hours Continuation of CMCH 1113. Lecture 3 hours. Prerequisite: CMCH 1113 or equivalent.

COMMUNICATION (COMM)
1113* PRINCIPLES OF COMMUNICATION 3 credit hours Principles of Communication is an introductory course designed to acquaint students with the basic theories of human communication and provide a comprehensive look at the communication field. The course will deliver a summary overview of the interrelated components of communication, to include verbal communication, mass communication, organizational communication, intercultural communication and digital communication. Lecture, 3 hours. General Education, Communication.
1133* VOICE AND DICTION 3 credit hours A general study of the structure of the vocal mechanism; principles of vocal quality, articulation and pronunciation. Lecture 3 hours.
2143* DEBATE 3 credit hours Acquaints the student with the complexity of social problems, methods of research, methods of logical analysis and development, construction of briefs, and techniques of refutation; practice in preparation and delivery of sustained arguments. Lecture 3 hours.
2213* PROFESSIONAL SPEAKING 3 credit hours
Emphasis is placed on both theory and application of public speaking, speech criticism, and listening skills in culturally diverse business and professional settings. Students will employ presentation software when delivering a variety of business presentations such as informative, after dinner, persuasive, sales, and team speeches. Lecture 3 hours. (Spring)

2313* SMALL GROUP COMMUNICATION 3 credit hours
A systems based approach to the study of group communication. Social bases of group development and dynamics, including norms, leadership, role structures, conflict, and social climates. Special consideration given to methods of group participation and decision-making. Lecture 3 hours. (Spring)

2393* INTERPERSONAL COMMUNICATION 3 credit hours
Improving communication between persons. Discovering and overcoming obstacles in person-to-person communication. Self-awareness of the student's own communication behavior as well as that of others. Projects in listening, speaking and communicating nonverbally. Lecture 3 hours. (Fall)

2593* COMMUNICATION RESEARCH 3 credit hours
Basic quantitative and qualitative research methods used in communication, journalism, broadcasting and public relations. Focus on researching public opinion and communication behaviors using experimental, survey, critical, and ethnographic designs. Includes hypothesis construction, empiricism, and data gathering techniques. Lecture 3 hours. (Fall)

2901* STRATEGIC COMMUNICATION CAPSTONE 1 credit hour
A reflection and expansion on the skills and knowledge gained from Strategic Communication courses of the AA in Strategic Communication program. Students will develop a portfolio of Strategic Communication skills, including a writing sample, a recorded presentation and a digital artifact. Capstone/Lecture 1 hour. Prerequisite: Departmental permission. (Fall, Spring)

3113* ARGUMENTATION AND ADVOCACY 3 credit hours
Acquaints students with forms and methods of argument construction. Emphasis is placed on the nature of argumentative controversies with application to such contexts as policy making, organizational decision-making, political rhetoric, and personal inquiry. The primary goal of the course is to help students become better producers and consumers of arguments as they appear in the public sphere. Lecture 3 hours.

3121-4 FORENSIC LAB 1-4 credit hours
Preparation for the participation in intercollegiate forensics and competitive speech activities including debate, discussion, original oratory, extemporaneous and impromptu speaking and oral interpretation. May be repeated. Laboratory 1-4 hours. Prerequisite: Departmental permission.

3353* TEAM LEADERSHIP PROCESSES 3 credit hours
Designed to enhance leadership skills and the knowledge of team leadership processes. Topics include the attributes of teams, critical evaluation of information and reasoning processes, creation of effective work climates, and contemporary approaches to leadership. The objective of this course is to learn how to provide leadership in the communication process of work teams. Lecture 3 hours.

3413* GENDER COMMUNICATION 3 credit hours
An examination of current theory and research on gender communication. Focuses attention on the relationship between communication and gender, including symbolic, social, and nonverbal dimensions. Topics include language attitudes, communication styles, gender identity construction, and relationship dynamics. Lecture 3 hours.

3633* PERSUASION 3 credit hours
A study of persuasive communication, including social, psychological, and rhetorical theories of human motivation; audience analysis, methods of adaptation; emotional, logical and rhetorical appeals; analysis of persuasive premises in advertising, social and political campaigns; and special emphasis on ethical responsibilities of the speaker, media, and listener. Lecture 3 hours.

3643* POLITICAL COMMUNICATION ANALYSIS 3 credit hours
Principles and methods of critical analysis will be examined, both historical and contemporary. Students will interpret and evaluate political persuasion. Emphasis will be given to speeches, campaigns, and movements. Lecture 3 hours.

3833* CONFLICT MANAGEMENT 3 credit hours
An analysis of conflict situations in personal, professional, and cultural contexts. Role of communication in creating, expressing, and influencing conflict messages and behaviors. Topics include theories of conflict, cooperative processes, dialogue, mediation, interpersonal barriers and power. Lecture 3 hours. Prerequisite: Students must be English Composition 1 eligible (i.e., have no English deficiencies).

3991-3 WORKSHOP 1-3 credit hours
Workshop designed to give intensive emphasis to a specific area of communication. May be repeated with a different topic for additional credit up to a maximum of six hours. Communication majors can count only three hours of workshop in any communication area toward the communication degree. Workshop 1-3 hours.

4313* INTERCULTURAL COMMUNICATION 3 credit hours
Development of a multicultural perspective to communication processes. Designed to broaden students' awareness of human diversity and foster better understanding among individuals and groups from different cultural experiences. Topics include worldviews, cross-cultural conflict, majority/minority relationships, identity development, and prejudices. Lecture 3 hours. Prerequisite: Junior standing.

4513* LANGUAGE AND SOCIAL INTERACTION 3 credit hours
The study of symbolic processes, meaning construction, and relationships between thought and language. Topics include symbolic interactionism,
dramatism, narrative, and social constructionism. Lecture 3 hours.

4623* COMMUNICATION THEORY 3 credit hours An advanced survey of major philosophical and theoretical issues in human communication research. Discussion of social scientific and humanistic perspectives, research methods, and theory development. Analysis and critique of contemporary theories in the field. Lecture 3 hours. Prerequisites: 12 hours of communication coursework and Junior standing.

4673* CORPORATE AND ORGANIZATIONAL COMMUNICATION 3 credit hours The theory and function of communication within businesses, government, hospitals, schools, industrial firms, and other organizations with emphasis on concepts and principles needed for effective communication. Lecture 3 hours.

4723 ORGANIZATIONAL COMMUNICATION INTERNSHIP 3 credit hours Supervised work experience in a professional setting which relates to the student’s career objectives. The internship will allow practical experience in corporate and organizational communication. May be repeated for a maximum of six hours. Internship 3 hours. Prerequisites: Upper division standing and department permission.

4901* COMMUNICATION CAPSTONE 1 credit hour This course provides an overview of the major concepts in communication with an emphasis on the integration of four primary communication tracks: Journalism, Public Relations and Organizational Communication, Radio-Television, and Speech Communication. The course will also cover career options and graduate education in communication and related fields. Communication program assessment is a component of the course. Communication majors are required to take this course during their senior year. Capstone/lecture 1 hour. Prerequisites: Student must be a communication major, have taken COMM 1113, COMM 2393, COMM 4673 or PBRL 2113, RTV 1013, and JOUR 2113. Student must have completed at least 18 credit hours of communication coursework. (Fall, Spring)

4991-3* SPECIAL TOPICS 1-3 credit hours Directed individual or group study of selected topic(s) in communication. The course may be repeated. Independent study/directed readings 1-3 hours.

DARI (DARI)

4153* INTENSIVE STUDIES IN DARI I 3 credit hours An intensive introductory study of Dari combining guided independent study of the written language with regular oral practice of the spoken language. Two hours independent study, one hour lab. Prerequisites: ENGL 1213 and six hours of study of another foreign language or permission of the department.

4163* INTENSIVE STUDIES IN DARI II 3 credit hours Continuation of DARI 4153. Two hours independent study, one hour lab. Prerequisite: DARI 4153.

DUTCH (DTCH)

4153* INTENSIVE STUDIES IN DUTCH 3 credit hours An intensive introductory study of Dutch combining guided independent study of the written language with regular oral practice of the spoken language. Two hours independent study, one hour lab. Prerequisites: ENGL 1213 and six hours of study of another Germanic language or permission of the department.

ENGLISH (ENGL)

0111 COLLEGE WRITING SKILLS Developmental course, no credit Supplemental instruction in college writing skills under direction of Writing Center staff. Students must be concurrently enrolled in ENGL 0113 Developmental Writing. Does not satisfy any degree requirement for any degree program at Cameron University. Lecture 1 hour.

0113 DEVELOPMENTAL WRITING Developmental course, no credit Provides practice in reading, writing and interpretation for students whose experiences as writers have not prepared them for ENGL 1113. Attention to the development of language skills is integrated into the course’s primary emphasis on essay writing. Individual conferences are arranged as needed. Does not satisfy any degree requirement for any degree program at Cameron University. Lecture 3 hours.

0403 ENGLISH FOR ACADEMIC PURPOSES I Developmental course, no credit This course is designed to prepare intermediate-level ESL students for academic reading/writing and listening/speaking tasks in college. Attention to the development of language skills is integrated into the course’s emphasis upon writing paragraphs and short essays. May be used as an alternative to ENGL 0103 by students for whom English is a foreign language and who score below a 16 on the English ACT test or below 65 on the CPT Sentence Skills Test. Does not satisfy degree requirements for any degree program at Cameron University. Lecture 3 hours.

0413 ENGLISH FOR ACADEMIC PURPOSES II Developmental course, no credit This course is designed to prepare high-intermediate and advanced ESL students for higher level academic reading/writing and listening/speaking tasks in college. Attention to the development of language skills is integrated into the course’s emphasis upon essay writing. May be used as an alternative to ENGL 0113 by students for whom English is a foreign language and who score above 15 but below 19 on the English ACT test or above 64 but below 96 on the CPT Sentence Skills Test. Does not satisfy degree requirements for any degree program at Cameron University. Lecture 3 hours.

1052 SUPPLEMENTAL WRITING INSTRUCTION 2 credit hours Writing tutorial providing remediation and support for those students who are enrolled in ENGL 1113, but whose test scores and prior coursework do not indicate preparedness for college-level writing classes. Does not satisfy major requirements for any degree program at Cameron University. Lecture 2 hours. Prerequisite: Satisfactory placement score. Corequisite: ENGL 1113.

2019-2021 UNDERGRADUATE CATALOG
1113* ENGLISH COMPOSITION I 3 credit hours Regular practice in reading and interpreting college-level texts and in writing expository essays that synthesize, incorporate and document the use of those texts to develop proficiency in critical thinking, reading, and writing. Lecture 3 hours. General Education, Communication.

1213* ENGLISH COMPOSITION II 3 credit hours Continued training and practice in composition with an emphasis on argumentation. Critical and logical thinking will be developed through the interpretation of a range of texts and through the composition of a series of argumentative essays, at least one of which will be a research paper that uses MLA style. Lecture 3 hours. Prerequisite: ENGL 1113 or ENGL 1123. General Education, Communication.

2013* POPULAR FICTION 3 credit hours Reading and discussion of twentieth-century short stories and novels. Lecture 3 hours. Prerequisite: ENGL 1213. General Education, Humanities–Aesthetics.

2053* FILM AS LITERATURE 3 credit hours The study of film as an educational, verbal, and visual medium for storytelling. Emphasis on literature adapted for film and on literary aspects of non-adapted great films. Lecture 3 hours. General Education, Humanities–Aesthetics.

2313* AFRICAN AMERICAN LITERATURE 3 credit hours A survey of writings by African American authors from Colonial times to the present. Lecture 3 hours. General Education, Humanities–Aesthetics and Humanities–Diversity.

2323* AMERICAN INDIAN LITERATURE 3 credit hours Examination of Native American literature, with emphasis on contemporary authors. Attention is directed to traditional myths and legends as they relate to contemporary themes. Lecture 3 hours. General Education, Humanities–Aesthetics and Humanities–Diversity.

2333 INTRODUCTION TO TECHNICAL WRITING 3 credit hours Introduces students to the basic principles of effective written communication as applied in a variety of professional settings (e.g., business, industry, government). Reviews elements of grammar, mechanics, and style as related to technical writing; trains students in collecting, organizing, presenting and documenting information in formal reports and in writing other kinds of documents (e.g., correspondence, proposals, manuals) appropriate to professional settings; encourages students to develop a sense of professionalism about their writing. Lecture 3 hours. Prerequisite: ENGL 1213.

2343* WOMEN IN LITERATURE 3 credit hours Historical and analytical exploration of the images of women in literature, with emphasis on women writers. Lecture 3 hours. General Education, Humanities–Aesthetics and Humanities–Diversity.

2413* THE BIBLE AS LITERATURE 3 credit hours A literary approach to the Old and New Testaments. Students analyze form, structure and influence of representative biblical literature. Lecture 3 hours. Prerequisite: ENGL 1213.

2980-3* SELECTED TOPICS IN LANGUAGE ARTS 0-3 credit hours Directed individual or group study of selected topics or problems in Language Arts. Areas of study will vary from semester to semester. The course may be repeated for additional credit with departmental permission. Independent study/directed readings 0-3 hours. Prerequisites: As listed for each separate offering, and/or department permission.

Completion of ENGL 1213 English Composition II and junior standing or permission of Department of English is required for enrollment in classes numbered 3000 or above.

3003* INTRODUCTION TO LITERARY STUDIES 3 credit hours Prepares students for upper division literature courses by introducing them to the terms, critical skills, and literary concepts useful for advanced literary study. Lecture 3 hours. (Fall)

3023* SURVEY OF AMERICAN LITERATURE TO 1865 3 credit hours A survey of American literature from its beginning to Whitman. Lecture 3 hours. Prerequisite: ENGL 1213. (Fall)

3033* SURVEY OF AMERICAN LITERATURE SINCE 1865 3 credit hours A survey of American literature from Whitman to the present. Lecture 3 hours. Prerequisite: ENGL 1213. (Spring)

3043* SURVEY OF ENGLISH LITERATURE TO 1800 3 credit hours A survey of English literature from its beginning to the close of the eighteenth century. Lecture 3 hours. Prerequisite: ENGL 1213. (Fall)

3053* SURVEY OF ENGLISH LITERATURE SINCE 1800 3 credit hours A survey of English literature from the beginning of the nineteenth century to the present. Lecture 3 hours. Prerequisite: ENGL 1213. (Spring)

3063* SURVEY OF WORLD LITERATURE THROUGH THE RENAISSANCE 3 credit hours Readings in world literature from classical antiquity to 1700, with emphasis on major authors. Lecture 3 hours. Prerequisite: ENGL 1213. (Fall)

3073* SURVEY OF WORLD LITERATURE SINCE THE RENAISSANCE 3 credit hours Reading of major works in world literature from the post-Renaissance period to the present. Lecture 3 hours. Prerequisite: ENGL 1213. (Spring)

3113* SHAKESPEARE 3 credit hours Interpretation and criticism of selected works of Shakespeare. Lecture 3 hours. (Spring)

3303* ADVANCED COMPOSITION 3 credit hours Critical scrutiny of the structure and style of prose. Study of how rhetorical principles are used and can be taught. Frequent papers. Lecture 3 hours. (Spring)

3663* TEACHING READING IN SECONDARY SCHOOLS 3 credit hours A course focusing on teaching reading processes in secondary schools. This course will assist students in: 1) selecting literature and understanding adolescent readers; 2) planning and pedagogy for
literature study for all students; 3) using research-based ideas and best practices in reading to engage students in deeper literacy; 4) using reading processes to teach students about social justice, diversity, and equity; and 5) close reading strategies in the classroom. Lecture 3 hours. Prerequisite: ENGL 1213 with a grade of C or better; admission to Teacher Education or Departmental approval. (Fall)

3813* LITERARY THEORY 3 credit hours An examination of the concepts that guide evaluation, interpretation, and appreciation of literature. Students will acquaint themselves with different theoretical approaches to literature and apply those approaches to specific texts so as to better understand the role of literary theory in the study of literature. Lecture 3 hours. Prerequisite: ENGL 3003. (Fall)

3881-3* WORKSHOP 1-3 credit hours Designed to emphasize special topics in English and the Language Arts. May be repeated with department permission. Workshop 1-3 hours.

4013* MAJOR AUTHORS 3 credit hours Intensive study of one or more major authors. Topics may include Chaucer, Milton, Wordsworth, Hawthorne, Dickinson, Hemingway, Morrison, Chekov, Dostoevsky, and others. May be repeated to a total of 6 hours. Lecture 3 hours.

4023* STUDIES IN GENRE 3 credit hours Intensive study of a literary genre, with particular attention to formal characteristics and conventions and how they change over time. Topics may include the English novel, the modern English novel, the American novel, the contemporary American novel, modern American and British poetry, contemporary poetry, American drama, and others. May be repeated to a total of 6 hours. Lecture 3 hours.

4053* SEMINAR IN LITERATURE 3 credit hours Investigation of one or more authors or a topic of special interest such as a literary theme, movement or form. The topic varies from semester to semester. Students may repeat ENGL 4053 once for credit but may not elect the same topic. Seminar 3 hours. Prerequisite: Departmental approval.

4133* STUDIES IN AMERICAN LITERARY HISTORY 3 credit hours Intensive study of a period in American literary history, with particular attention to the relationship between literature and cultural context. Topics may include colonial literature, the American Renaissance, realism and naturalism, American modernism, and American post-modernism. May be repeated to a total of 6 hours. Lecture 3 hours.

4143* STUDIES IN BRITISH LITERARY HISTORY 3 credit hours Intensive study of a period in British literary history, with particular attention to the relationship between literature and cultural context. Topics may include British medieval literature, British renaissance literature, British literature of the Restoration and 18th century, British romanticism, Victorian literature, British modernism, and British post-modernism. May be repeated to a total of 6 hours. Lecture 3 hours.

4153* STUDIES IN WORLD LITERATURE 3 credit hours Intensive study of a topic in world literature. Material studied may include Caribbean literature. European literature, African literature, Asian literature, Central and South American literature, literature of the Indian subcontinent, and others, and may be organized geographically, historically, or thematically. May be repeated to a total of 6 hours. Lecture 3 hours.

4613* ENGLISH LINGUISTICS 3 credit hours A linguistic approach to the phonology, morphology, and syntax of the English language, with attention given to semantics and to the origins and development of the language. Lecture 3 hours. (Fall)

4623* ADVANCED GRAMMAR AND USAGE 3 credit hours A review of formal English grammar; improvement and practice in functional grammar and usage. Lecture 3 hours. (Spring)

4633* RHETORIC: THEORY AND APPLICATION 3 credit hours A study of traditional and current rhetorical theories with applications for teachers and writers. Consideration is given to discovery of ideas, organization of materials, style, rhetorical stance, and audience analysis. Lecture 3 hours.

4643* OLD AND MIDDLE ENGLISH 3 credit hours A study of Old and Middle English, with readings in prose and poetry. Lecture 3 hours. Prerequisite: ENGL 4613 or permission of the department.

4773 TEACHING OF ENGLISH 3 credit hours An introduction to methods and materials in teaching high school English. Teacher Certification students must be admitted to teacher education prior to enrollment in this course. Lecture 2 hours, laboratory 2 hours. Prerequisite: department permission. (Fall)

4961-3* DIRECTED READINGS IN ENGLISH 1-3 credit hours Intensive independent reading and research on a selected topic, writer, or movement in literature or language, under the supervision of a qualified member of the faculty. May be repeated to a total of 6 hours. Independent study/directed readings 1-3 hours. Prerequisite: permission of the Chair.

4983 WRITING INTERNSHIP 3 credit hours Field experience in writing under close supervision of a field-based supervisor and professor. May be repeated once. Internship/field experience 3 hours. Prerequisites: 12 hours of writing courses not including ENGL 1113 or 1213 and permission of the chair.

4993* ENGLISH CAPSTONE 3 credit hours Relevant reading and discussion assists graduating English majors in reflecting on their own growth as readers and writers of text over their undergraduate careers and in synthesizing material from various individual courses into a more meaningful understanding of the discipline as a whole. The course also helps prepare students for the workplace and/or graduate school. To be taken in the student’s final semester. Lecture 3 hours. (Fall)
**FRENCH (FREN)**

1113* BEGINNING FRENCH I 3 credit hours
An introductory course in the language and culture of French-speaking countries. Lecture 3 hours. General Education, Humanities–Diversity. (Fall)

1223* BEGINNING FRENCH II 3 credit hours
Continuation of FREN 1113. Lecture 3 hours. Prerequisite: FREN 1113 or equivalent. General Education, Humanities–Diversity. (Spring)

2113* INTERMEDIATE FRENCH I 3 credit hours
Emphasis is placed on active use of the spoken language. More complex syntactic and grammatical forms are presented. Course taught largely in French. Lecture 3 hours. Prerequisite: FREN 1223 or equivalent. (Fall)

2223* INTERMEDIATE FRENCH II 3 credit hours
Continuation of FREN 2113. Lecture 3 hours. Prerequisite: FREN 2113 or the equivalent. (Spring)

3113* FRENCH GRAMMAR AND LINGUISTICS 3 credit hours
A systematic review of French grammar and the cultivation of facility in reading French newspapers, magazines, and books, with additional emphasis on improving the student's control of spoken French. Lecture 3 hours. Prerequisite: FREN 2223 or equivalent.

3123* FRENCH CULTURE 3 credit hours
A systematic review of French culture. Conducted in French. Lecture: 3 hours. Prerequisite: FREN 2223 or equivalent.

3133* FRENCH COMPOSITION 3 credit hours
A systematic review of French grammar, with a view toward improving the student's control of written French. Conducted in French. Lecture 3 hours. Prerequisite: FREN 3113 or equivalent.

3143* FRENCH CONVERSATION 3 credit hours
Total emphasis on improving the student's control of spoken French, with a special emphasis on idiomatic French. Conducted in French. Lecture 3 hours. Prerequisites: FREN 2113 and 2223.

4113* L'HISTOIRE DE FRANCE 3 credit hours
A survey of the important political, social, economic, diplomatic, intellectual, and religious developments in French history. Conducted in French. Lecture 3 hours. Prerequisite: FREN 3143 or equivalent.

4123* FRENCH ECRIVAINS PROSODIQUES 3 credit hours
A course oriented toward the study of major French prose literary works, from the Middle Ages to the present. Relationships between literature and society will also be examined. Conducted in French. Lecture 3 hours. Prerequisite: FREN 4113 or equivalent.

4133* FRENCH POETS AND DRAMATISTS 3 credit hours
A study of the various trends in French poetry and drama. Conducted in French. Lecture 3 hours. Prerequisite: FREN 4123 or equivalent.

4143* FRENCH FOR BUSINESS AND INDUSTRY 3 credit hours
The French language as a means of communication in the world of business; basic commercial and economic vocabulary; trade and advertisement practices. Conducted largely in French. Lecture 3 hours. Prerequisite: FREN 4133 or equivalent.

**4961-3* DIRECTED READINGS IN FRENCH 1-3 credit hours**
Provides an opportunity for gifted and qualified students to work at a special project not offered in a regular course. May be repeated to a total of 3 hours. Independent study/directed readings 1-3 hours. Prerequisite: FREN 4143 or equivalent.

**GERMAN (GERM)**

1113* BEGINNING GERMAN I 3 credit hours
An introductory course in the language and culture of German-speaking countries. Lecture 3 hours. General Education, Humanities–Diversity. (Fall)

1223* BEGINNING GERMAN II 3 credit hours
Continuation of GERM 1113. Lecture 3 hours. Prerequisite: GERM 1113 or equivalent. General Education, Humanities–Diversity. (Spring)

2213* INTERMEDIATE GERMAN I 3 credit hours
An intermediate-level course in the German language, with emphasis on the more complex idiomatic, syntactic, and grammatical forms. Lecture 3 hours. Prerequisite: GERM 1223 or equivalent. (Fall)

2223* INTERMEDIATE GERMAN II 3 credit hours
Continuation of GERM 2213. Conducted largely in German. Lecture 3 hours. Prerequisite: GERM 2213 or equivalent. (Spring)

3013* GERMAN GRAMMAR AND LINGUISTICS 3 credit hours
A systematic review of German grammar; a study of the phonology, morphology, syntax, and semantics of modern Standard German. Lecture 3 hours. Prerequisite: GERM 2223 or equivalent.

3043* GERMAN CULTURE 3 credit hours
A systematic review of German culture. Conducted in German. Lecture 3 hours. Prerequisite: GERM 3013 or equivalent.

3113* GERMAN COMPOSITION 3 credit hours
Cultivation of the facility of writing in German. Conducted in German. Lecture 3 hours. Prerequisites: GERM 3013 and GERM 3043 or equivalent.

3123* GERMAN CONVERSATION 3 credit hours
Cultivation of the facility of communicating in spoken German. Conducted in German. Lecture 3 hours. Prerequisites: GERM 3013 and GERM 3043 or equivalent.

**ITALIAN (ITAL)**

1113* BEGINNING ITALIAN I 3 credit hours
An introductory course in the language and culture of Italy and other Italian-speaking areas. Lecture 3 hours. General Education, Humanities–Diversity.

1223* BEGINNING ITALIAN II 3 credit hours
Continuation of ITAL 1113. Lecture 3 hours. Prerequisite: ITAL 1113 or equivalent. General Education, Humanities–Diversity.
2113* INTERMEDIATE ITALIAN I 3 credit hours

2223* INTERMEDIATE ITALIAN II 3 credit hours
Continuation of ITAL 2113. Conducted in Italian. Lecture 3 hours. Prerequisite: ITAL 2113 or the equivalent.

4961-3* DIRECTED READINGS IN ITALIAN 1-3 credit hours
Provides an opportunity for gifted and qualified students to work at a special project not offered in a regular course. May be repeated to a total of 6 hours. Independent study/directed readings 1-3 hours. Prerequisite: ITAL 2223 or equivalent.

JOURNALISM (JOUR)

2113* INTRODUCTION TO JOURNALISM 3 credit hours
Mass communication and the importance of the media’s role in American society. Lecture 3 hours. Corequisite: ENGL 1113 or ENGL 1123.

3133 NEWSPAPER REPORTING 3 credit hours
A laboratory for students to expand the techniques developed in News Writing (JOUR 3013). Students will work directly to produce The Cameron Collegian. Laboratory 6 hours. Prerequisite: JOUR 3013.

3233 ADVANCED NEWSPAPER REPORTING AND DESIGN 3 credit hours
A laboratory for students to continue to expand the techniques developed in News Writing (JOUR 3013) and Newspaper Reporting (JOUR 3133). Advanced Newspaper Reporting and Design will also provide students the opportunity to directly help design and produce The Cameron Collegian. Laboratory 6 hours. Prerequisites: JOUR 3013, JOUR 3133, JOUR 3043 and JOUR 3343.

3991-3 WORKSHOP 1-3 credit hours
A workshop designed to give intensive emphasis to a specific area of journalism. May be repeated with a different topic for additional credit to a maximum of six hours. Communication majors can count only three hours of workshop in any area of communication toward the communication degree. Workshop 1-3 hours.

4963 JOURNALISM INTERNSHIP 3 credit hours
Field experience in Journalism under close supervision of employer and professor. Internship/field experience 3 hours. Prerequisite: 12 hours of Journalism or permission of the instructor.

4981-3* SPECIAL TOPICS 1-3 credit hours
Directed individual or group study of selected topic(s) in journalism. The course may be repeated for additional credit with departmental permission. May be repeated for a total of 6 hours. Independent study/directed readings 1-3 hours. Prerequisite: Junior standing.

JOURNALISM AND MEDIA PRODUCTION (JRMP)

1113* INTRODUCTION TO MASS MEDIA 3 credit hours
The purpose of this introductory class is to look at the various components of the mass communication industry with special emphasis in convergent mass media: the press, broadcast journalism, digital and social media and the internet. Mass media plays a significant role in our daily lives: this course will survey these interwoven components, including the technical aspects, history, legal and social issues and future ramifications. Lecture 3 hours. (Fall, Spring)

1123 MEDIA PERFORMANCE 3 credit hours
A course designed to meet the specific needs of the broadcast and web-based performer; instruction includes drills to develop effective vocal communications as a means of improving audio and video delivery. Lecture 2 hours, laboratory 3 hours.

1213* VISUAL MEDIA PRODUCTION 3 credit hours
The purpose of this class is to look at the various components of media graphics including photojournalism and layout design with emphasis on the use of software Photoshop and InDesign. Lecture 3 hours. (Fall, Spring)

1313* AUDIO AND VISUAL PRODUCTION 3 credit hours
Introduction to principles and techniques of audio and video production in radio, television, and online applications. Lecture 2 hours, laboratory 3 hours. (Fall, Spring)

2243* PHOTOJOURNALISM I 3 credit hours
The study of the principles and techniques of photography with an emphasis on composition and design. Students will learn scanning software and image editing software. Lecture 3 hours.

2323* RADIO PRODUCTION 3 credit hours
A look at the equipment in radio studios and its uses in editing, production and creating programs. Lecture 3 hours, laboratory 2 hours. Corequisite: JRMP 2323.

2323L* RADIO PRODUCTION LAB 0 credit hours
A look at the equipment in radio studios and its uses in editing, production and creating programs. Lecture 3 hours, laboratory 2 hours. Corequisite: JRMP 2323L.

2333* TV STUDIO PRODUCTION 3 credit hours
An introduction to the basic principles, procedures, and techniques of television studio production. The course includes video control, operation of cameras and editing machines, lighting, staging and directing, on-camera announcing and interviewing. Lecture 2 hours, laboratory 3 hours. Prerequisite: JRMP 1313. Corequisite: JRMP 2333L. (Spring)

2333L* TV STUDIO PRODUCTION LAB 0 credit hours
An introduction to the basic principles, procedures, and techniques of television studio production. The course includes video control, operation of cameras and editing machines, lighting, staging and directing, on-camera announcing and interviewing. Lecture 2 hours, laboratory 3 hours. Prerequisite: JRMP 1313. Corequisite: JRMP 2333L. (Spring)

2513* WRITING FOR MASS MEDIA 3 credit hours
This course will introduce students to the various strategies and styles of writing for mass media organizations that find themselves converging into multiple media institutions. Lecture 3 hours. (Fall, Spring)

2623* VISUAL COMMUNICATION 3 credit hours
This course is an exploration into why some images are
remembered while most are not. This course will explore how we see, why we see, the ethics of what we see, and equip students with a vocabulary for analyzing visual messages. The study of visual communication will change the way a student sees the world. Lecture 3 hours.

3223* LAYOUT AND DESIGN 3 credit hours Explores techniques, processes, and procedures for the publication of print media with an emphasis on the elements of design using the pagination program InDesign and the image editing software Adobe Photoshop. Lecture 3 hours.

3343* VIDEO FIELD PRODUCTION AND EDITING 3 credit hours Advanced techniques in field production for commercial and industrial television. Emphasis will be given to pre- and post-production stages, as well as training for independent assignments and "electronic news gathering." Lecture 3 hours, laboratory 2 hours. Prerequisite: JRMP 2333. Corequisite: JRMP 3343L.

3343L* VIDEO FIELD PRODUCTION AND EDITING LAB 3 credit hours LAB: Advanced techniques in field production for commercial and industrial television. Emphasis will be given to pre- and post-production stages, as well as training for independent assignments and "electronic news gathering." Lecture 3 hours, laboratory 2 hours. Prerequisite: JRMP 2333. Corequisite: JRMP 3343.

3363 PRODUCING THE DOCUMENTARY 3 credit hours Preparation for the participation in all phases of documentary production. The course will function as a team process with students participating in one or many aspects of the production. May be repeated for a maximum of six hours. Laboratory 6 hours. Prerequisite: Instructor permission.

3423* BROADCAST NEWS 3 credit hours Theories and practices of broadcast news gathering, writing, delivery, and ethics to develop professional attitude and skills in broadcast and internet news. Lecture 3 hours. Prerequisite: Students must be English Composition I eligible (i.e., have no English deficiencies).

3523* FEATURES, COLUMNS, and REVIEWS 3 credit hours The purpose of this course is to understand and practice writing news content while accounting for current changes and developments in mass media. This class will emphasize writing from the basis of craft, and we will examine newswriting style and develop writing skills specific to subjective, creative newswriting forms (features, columns, and reviews). Students will learn how to write across newswriting genres while adhering to ethical journalistic standards as dictated in the Society of Professional Journalists’ Code of Ethics. Lecture 3 hours. Prerequisite: Students must be English Composition I eligible (i.e., have no English deficiencies).

3533* BROADCAST WRITING 3 credit hours Concept and practices of writing for radio and television. Emphasis on writing news, commercials, and long-form scripts. Lecture 3 hours. Prerequisite: Students must be English Composition I eligible (i.e., have no English deficiencies).

3613* MEDIA LITERACY 3 credit hours The purpose of this class is to look at the various components of the mass media industry with special emphasis on Media Literacy and the impact of Media Literacy on our culture. This course provides a theoretical underpinning and critical analysis to the Journalism and Media Production curriculum. The course is grounded in media theory which espouses the use of literacy education and criticism to analyze mass media effects on society. Lecture 3 hours. Prerequisites: JRMP 1113 and JRMP 2513. (Fall, Odd Years)

3623* BROADCAST PROGRAMS AND RATINGS 3 credit hours Principles governing the selection of programs; preparation of broadcast schedules; and audience measurements. Focus will include program types, rating systems, program and audience analysis in radio, television and cable. Lecture 3 hours.

3633* SOCIAL MEDIA THEORY 3 credit hours Social Media Theory is the study of the development, impact and significance of social mass media technologies. Students study new social media, develop an analysis model to examine emergent social media, research current social media uses and present findings to their peers. Lecture 3 hours.

3721-3 WORKSHOP 1-3 credit hours Workshop designed to give intensive emphasis to a specific area of media. May be repeated with a different topic for additional credit up to a maximum of six hours. Journalism and Media Production majors may count only three hours of workshops towards their degree. Workshop, 1-3 hours.

3811-2 MEDIA PRACTICUM 1-2 credit hours Participation in all aspects media: radio, television; print online. Practicum, 1-2 hours. Prerequisite: Sophomore standing. (Fall, Spring)

4153* MEDIA HISTORY 3 credit hours Background and development of the early press. Emergence of the partisan press. Evolution of personal and independent journalism. Lecture 3 hours. Prerequisite: Students must be English Composition I eligible (i.e., have no English deficiencies).

4233* GRAPHICS FOR VIDEO PRODUCTION 3 credit hours An examination of the principles, procedures, and techniques used in creating graphics for video production. While special emphasis is placed on graphics creation for the television medium, students will explore the use of graphics for non-broadcast applications such as distance or adaptive learning. Lecture 2 hours, laboratory 3 hours. Prerequisite: Students must be English Composition I eligible (i.e., have no English deficiencies).

4213* PHOTOGRAFICIALII 3 credit hours The continued study of the principles of photography with an emphasis on composition and design. Students will continue to employ digital darkroom techniques in coordination with various modes of expression: print, video and online. Lecture 3 hours. Prerequisite: JRMP 2243 or instructor’s permission.

4353* CORPORATE VIDEO 3 credit hours Theory and uses of video in business and industry including writing,
planning, and production, as well as television programs for instructional and corporate applications. Lecture 2 hours, laboratory 3 hours. Prerequisite: JRMP 1313.

4413 NEWS EDITING 3 credit hours Study of editing, both practical and theoretical, in the media field. Lecture 3 hours. Prerequisite: Students must be English Composition I eligible (i.e., have no English deficiencies).

4433* ONLINE JOURNALISM 3 credit hours Adapting works for the Internet, incorporating style and format changes to accommodate online audiences. Writing assignments for news and marketing content. Examination of the elements of print and broadcast writing styles that contributes to online content. This course is a thorough review of the differences and similarities that mark the era of media convergence in journalism. Lecture 3 hours.

4643* MEDIA LAW 3 credit hours The principles by which mass media exercise their public functions and fulfill legal obligations to society. Right to know, truth and fairness, responsibility, libel, privilege, fair comment, privacy, contempt, copyright, and regulation of advertising. Lecture 3 hours. Prerequisite: Students must be English Composition I eligible (i.e., have no English deficiencies).

4653* MEDIA MANAGEMENT 3 credit hours Investigation into various print and broadcast media management functions, sales, network and labor relations, internal organizational structures, operating procedures and government regulations. Lecture 3 hours. Prerequisite: Students must be English Composition I eligible (i.e., have no English deficiencies).

4721-3* SPECIAL TOPICS 1-3 credit hours Directed individual or group study of selected topic(s) in broadcasting or journalism. The course may be repeated. Lecture 1-3 hours.

4823 MEDIA INTERNSHIP 3 credit hours Supervised work experience in a professional setting which relates to the student's career objectives. The internship will allow practical experience in a broadcast or journalism area. May be repeated for a maximum of six hours. Internship 3 hours. Prerequisites: Upper division standing and department permission.

LANGUAGE (LANG)

1001-3* INTRODUCTORY LANGUAGE WORKSHOP 1-3 credit hours An introductory course that provides beginning study in a selected foreign language, often with a special focus such as survival Spanish or Arabic for military personnel. May be repeated to a total of six hours. Content varies. Lecture 1-3 hours.

3991-3* IMMERSION EXPERIENCE 1-3 credit hours Field experience under close supervision of a faculty member in which student gains language proficiency through an immersion in target language environment. Field experience 1-3 hours. Prerequisite: 12 hours study of target language or equivalent and department permission.

4181-3* SPECIAL TOPICS IN LANGUAGES 1-3 credit hours Directed individual or group study of selected topics in language. This course may be repeated up to a total of 6 hours credit with departmental permission. Independent study/directed readings 1-3 hours. Prerequisites: ENGL 1213 and 6 hours foreign language study or permission on instructor.

LATIN (LATN)

1113* BEGINNING LATIN I 3 credit hours An introductory course in understanding, speaking, reading, and writing Latin. Lecture 3 hours. General Education, Humanities–Diversity. (Fall)

1223* BEGINNING LATIN II 3 credit hours Continuation of LATN 1113. Lecture 3 hours. Prerequisite: LATN 1113 or equivalent. General Education, Humanities–Diversity. (Spring)

2113* INTERMEDIATE LATIN I 3 credit hours An intermediate-level course in Latin. A review of grammar, writing, and speaking. Lecture 3 hours. Prerequisite: LATN 1223 or equivalent. (Fall)

2223* INTERMEDIATE LATIN II 3 credit hours Continuation of LATN 2113. Lecture 3 hours. Prerequisite: LATN 2113 or equivalent. (Spring)

3113* ROMAN WRITERS I 3 credit hours Beginning study of various authors of Roman literature. Topics may include Roman prose, poetry, or drama. Lecture 3 hours. Prerequisite: LATN 2223 or equivalent.

3223* ROMAN WRITERS II 3 credit hours A continuation of LATN 3113. Topics may include Roman prose, poetry, or drama. Lecture 3 hours. Prerequisite: LATN 3113 or equivalent.

4961-3* DIRECTED READINGS IN LATIN 1-3 credit hours Intensive independent readings and research on a selected topic, writer, or movement in Latin literature or language under supervision of a faculty member. May be repeated to a total of 6 hours with departmental permission. Independent study/directed readings 1-3 hours. Prerequisite: LATN 3223 or equivalent.

LINGUISTICS (LING)

4113* GENERAL LINGUISTICS 3 credit hours A systematic review of linguistics to include grammar, phonology, morphology, syntax, and semantics of world languages. Lecture 3 hours. Prerequisites: Completion of primary and secondary language requirements or concurrent enrollment in final level. (Fall)

4163 TEACHING ENGLISH AS A SECOND LANGUAGE: THEORY AND METHODS 3 credit hours Introduction to theories of language acquisition and methods of instruction; practicum in applications of theories and methods. Lecture 3 hours. Prerequisites: 6 hours English Composition, 3 hours foreign language or instructor permission.

4173 TEACHING FOREIGN LANGUAGES: THEORY AND METHODS 3 credit hours An introduction to methods and materials in teaching elementary and secondary foreign languages. Lecture 2 hours, laboratory 2 hours. Teacher Certification students must be admitted to teacher education prior to enrollment in this course.
PASHTO (PHTO)

4153* INTENSIVE STUDIES IN PASHTO I 3 credit hours
An intensive introductory study of Pashto combining guided independent study of the written language with regular oral practice of the spoken language. Two hours independent study, one hour lab. Prerequisite: ENGL 1213 and six hours study of another foreign language or permission of the department.

4163* INTENSIVE STUDIES IN PASHTO II 3 credit hours
Continuation of PHTO 4153. Two hours independent study, one hour lab. Prerequisite: PHTO 4153.

PERSIAN (FARSI) (PRSN)

1113* BEGINNING PERSIAN (FARSI) I 3 credit hours
An introductory course in the language and cultures of Iran and Afghanistan. Lecture 3 hours.

1223* BEGINNING PERSIAN (FARSI) II 3 credit hours
Continuation of PRSN 1113. Lecture 3 hours. Prerequisite: PRSN 1113 or equivalent.

POLISH (PLSH)

4153* INTENSIVE STUDIES IN POLISH 3 credit hours
An intensive introductory study of Polish combining guided independent study of the written language with regular oral practice of the spoken language. Two hours independent study, one hour lab. Prerequisites: ENGL 1213 and six hours study of another Romance language or permission of the department.

4961-3* DIRECTED READINGS IN POLISH 1-3 credit hours
Provides an opportunity for gifted and qualified students to work at a special project not offered in a regular course. May be repeated to a total of 3 hours. Independent study/directed readings 1-3 hours. Prerequisite: PORT 4153.

PORTUGUESE (PORT)

4153* INTENSIVE STUDIES IN PORTUGUESE 3 credit hours
An intensive introductory study of Portuguese combining guided independent study of the written language with regular oral practice of the spoken language. Two hours independent study, one hour lab. Prerequisites: ENGL 1213 and six hours study of another Romance language or permission of the department.

4961-3* DIRECTED READINGS IN PORTUGUESE 1-3 credit hours
Provides an opportunity for gifted and qualified students to work at a special project not offered in a regular course. May be repeated to a total of 3 hours. Independent study/directed readings 1-3 hours. Prerequisite: PORT 4153.

PROFESSIONAL WRITING (PRWR)

2013* INTRODUCTION TO CREATIVE WRITING 3 credit hours
A beginning level course for persons interested in writing literary fiction and/or poetry. Lecture 3 hours. Prerequisite: ENGL 1213 or department permission. (Spring)

3003* TECHNIQUES OF FICTION 3 credit hours
A study of the technical features of contemporary literary fiction, including close analysis, writing exercises, and round table workshops of original student work. Lecture 3 hours. Prerequisite: PRWR 2013 or department permission.

3013* TECHNIQUES OF POETRY 3 credit hours
A study of the technical features of contemporary literary poetry, including close analysis, writing exercises, and round table workshops of original student work. Lecture 3 hours. Prerequisite: PRWR 2013 or department permission.

3103* CREATIVE WRITING--THE SHORT STORY 3 credit hours
An intensive study of the literary short story. Students experiment with traditional and contemporary forms of the genre through writing exercises and round table workshops of original student work. Publishing is discussed. Lecture 3 hours. Prerequisites: PRWR 2013 and junior standing or department permission.

3203* CREATIVE WRITING--POETRY 3 credit hours
Practice in traditional and contemporary poetic forms. Students create and workshop original poems. Publishing is discussed. Lecture 3 hours. Prerequisite: PRWR 2013 or department permission.

3303* CREATIVE WRITING--NONFICTION 3 credit hours
An intensive study of creative nonfiction. Students experiment with traditional and contemporary forms of the genre through writing exercises and round table workshops of original student work. Publishing is discussed. Lecture 3 hours. Prerequisite: PRWR 2013 or department permission. (Spring)

3403* CREATIVE WRITING--THE NOVEL 3 credit hours
An intensive study of the literary novel. Students experiment with traditional and contemporary forms of the genre, crafting 4 book proposals and at least 50 pages of an original novel for round table workshop. Publishing is discussed. Lecture 3 hours. Prerequisites: PRWR 3003 or 3103 and junior standing or department permission.

3991-3* WRITING WORKSHOP 1-3 credit hours
An intensive concentration on a special aspect of creative writing. Focus will vary semester to semester, but special topics may include writing for children and young adults, sudden fiction, inspirational writing, nature writing, memoir, sports writing, and short story cycles. May be repeated with different topics to a maximum of 6 hours. Workshop 1-3 hours. Prerequisite: PRWR 2013 or department permission.

4003* ONLINE MAGAZINE EDITING 3 credit hours
Students learn to solicit, evaluate, and select literary fiction, nonfiction, and poetry for production of The Oklahoma Review. May be repeated to a total of 6 hours. Lecture 3 hours. Prerequisites: PRWR 2013 and junior standing or department permission.

4961-3* DIRECTED WRITING 1-3 credit hours
An individualized program of intensive independent writing with supplemental reading under the supervision of a qualified member of the faculty. May be repeated to a total of 6 hours. Independent study/directed readings 1-3 hours. Prerequisites: PRWR 2013 or junior standing or department permission.

PUBLIC RELATIONS (PBRL)

2113* INTRODUCTION TO PUBLIC RELATIONS 3 credit hours
An introduction to the history, development, and ethical practice of public relations as relationship management between an organization and its public.
Emphasis on building a philosophical foundation for the practice of advocacy through public relations. Lecture 3 hours. (Spring)

3213* PUBLIC RELATIONS WRITING AND PRODUCTION 3 credit hours Study and application of current trends and best practices in public relations. Includes instruction in communication methods and tactics, with emphasis on the production and dissemination of strategic communication messages. Lecture 3 hours. Prerequisites: JOUR 3013 and PBRL 2113.

3323*STRATEGIC CAMPAIGN COMMUNICATION 3 credit hours This course explores the planning, preparation and presentation of strategic communication campaigns. Emphasis on developing and integrating theories and strategies for campaign communication. Analysis and critique of public relations campaigns. Lecture 3 hours. Prerequisite: Students must be English Composition I eligible (i.e., have no English deficiencies).

3941-3 WORKSHOP 1-3 credit hours Public relations workshop designed to give intensive emphasis to a specific area of the profession. May be repeated with a different topic for a total of 6 credit hours. Workshop 1-3 hours.

4413* PUBLIC RELATIONS ETHICS 3 credit hours This course explores the nature of public relations from an ethical and philosophical perspective, including ethical decision making in public relations, truth telling, objectivity, and the justification of persuasion use in the marketplace of ideas. Themes of responsible advocacy and representation in the "Courts of Public Opinion" will underscore the course. Lecture 3 hours. Prerequisite: Students must be English Composition I eligible (i.e., have no English deficiencies).

4823 CASE STUDIES IN PUBLIC RELATIONS 3 credit hours Detailed analysis of current case studies in the planning and execution of public relations activities. Emphasis given to fact-finding, researching audiences, setting objectives, charting programs, execution, and evaluation. Lecture 3 hours. Prerequisite: Students must be English Composition I eligible (i.e., have no English deficiencies).

4931-3* SPECIAL TOPICS 1-3 credit hours Directed individual or group study of selected topic(s) in public relations. Course may be repeated.

4973 PUBLIC RELATIONS INTERNSHIP 3 credit hours Field experience in public relations in organizations, business, and industry. Internship/field experience 3 hours. Prerequisite: 12 hours of Journalism and public relations or permission of the instructor.

RADIO/TELEVISION (RTV)

1013* FUNDAMENTALS OF BROADCASTING 3 credit hours Survey of components of broadcasting and other electronic media systems in America, including technical aspects, history, legal and social issues. Lecture 3 hours.

3223 ADVANCED RADIO PRODUCTION 3 credit hours Theory and practice in the operation of advanced audio recording, and sound creation, and transmission equipment. Lecture 2 hours, laboratory 2 hours. Prerequisite: RTV 2213 or department permission.

ROMANIAN (ROMN)

4153* INTENSIVE STUDIES IN ROMANIAN 3 credit hours An intensive introductory study of Romanian combining guided independent study of the written language with regular oral practice of the spoken language. Two hours independent study, one hour lab. Prerequisites: ENGL 1213 and six hours study of another Romance language or permission of the department.

4961-3* DIRECTED READINGS IN ROMANIAN 1-3 credit hours Provides an opportunity for gifted and qualified students to work at a special project not offered in a regular course. May be repeated to a total of 3 hours. Independent study/directed readings 1-3 hours. Prerequisite: ROMN 4153.

RUSSIAN (RUSN)

1113* BEGINNING RUSSIAN I 3 credit hours An introductory course in the language and culture of the Russian Federation. Lecture 3 hours.

1223* BEGINNING RUSSIAN II 3 credit hours Continuation of RUSN 1113. Lecture 3 hours. Prerequisite: RUSN 1113 or equivalent. General Education, Humanities–Diversity.

4961-3* DIRECTED READINGS IN RUSSIAN 1-3 credit hours This course provides an opportunity for gifted and qualified students of Russian to work with an instructor on individualized topics in Russian language, linguistics, and literature. Course may be repeated to a total of six hours with departmental permission. Independent study/directed readings 1-3 hours. Prerequisite: RUSN 1223 or equivalent.

SOMALI (SMLI)

4153* INTENSIVE STUDIES IN SOMALI I 3 credit hours An intensive introductory study of Somali combining guided independent study of the written language with regular oral practice of the spoken language. Two hours independent study, one hour lab. Prerequisites: ENGL 1213 and six hours study of another foreign language or permission of the department.

4163* INTENSIVE STUDIES IN SOMALI II 3 credit hours Continuation of SMLI 4153. Two hours independent study, one hour lab. Prerequisite: SMLI 4153.

SPANISH (SPAN)

1113* BEGINNING SPANISH I 3 credit hours An introductory course in the language and culture of Spanish-speaking countries. Lecture 3 hours. General Education, Humanities–Diversity. (Fall)

1223* BEGINNING SPANISH II 3 credit hours Continuation of SPAN 1113. Lecture 3 hours. Prerequisite: SPAN 1113 or equivalent. General Education, Humanities–Diversity. (Spring)
2113* INTERMEDIATE SPANISH I 3 credit hours An intermediate-level course in the Spanish language. A review of grammar, writing, and speaking. Conducted in Spanish. Lecture 3 hours. Prerequisite: SPAN 1223 or equivalent. (Fall)

2223* INTERMEDIATE SPANISH II 3 credit hours Continuation of SPAN 2113. Conducted in Spanish. Lecture 3 hours. Prerequisite: SPAN 2113. (Spring)

3113* SPANISH GRAMMAR AND LINGUISTICS 3 credit hours A systematic review of Spanish grammar; a study of the phonology, morphology, syntax, and semantics of modern standard Spanish. Lecture 3 hours. Prerequisite: SPAN 2223 or equivalent.

3123* SPANISH CONVERSATION 3 credit hours Improving accent and rapidity of speech through speeches, presentations, impromptu dialogues. Conducted in Spanish. Lecture 3 hours. Prerequisite: SPAN 2223 or equivalent.

3133* SPANISH CULTURE 3 credit hours A systematic review of the cultures of the Spanish-speaking world, with additional emphasis on improving the student's control of spoken Spanish. Conducted in Spanish. Lecture 3 hours. Prerequisites: SPAN 3113 and SPAN 3123 or equivalent.

3143* SPANISH COMPOSITION 3 credit hours Cultivation of facility in writing Spanish. Planned and impromptu compositions. Lecture 3 hours. Prerequisites: SPAN 3113 and SPAN 3123 or equivalent.

3213* ADVANCED SPANISH GRAMMAR AND LINGUISTICS 3 credit hours An expansion and refinement of complex structures including nuances of the language not addressed in SPAN 3113 which may include archaic and literary tenses, special verb forms for indirect discourse, infrequently used compound tenses, advanced vocabulary, and expanded use of the subjunctive mood. Conducted in Spanish. Lecture 3 hours. Prerequisite: SPAN 3113 or equivalent.

3223* ADVANCED SPANISH CONVERSATION 3 credit hours Provides additional training in oral mastery of the Spanish language. Focuses on the automation of spoken language in all tenses/moods. Aims to achieve command of idiomatic expressions and advanced vocabulary. Conducted in Spanish. Lecture 3 hours. Prerequisite: SPAN 3123 or equivalent.

4113* LA HISTORIA DEL MUNDO HISPANICO 3 credit hours A survey of the important political, social, economic, diplomatic, intellectual, and religious developments in the Spanishspeaking world. Conducted in Spanish. Lecture 3 hours. Prerequisite: SPAN 3143 or equivalent.

4123* ESPANA EN SU LITERATURA I 3 credit hours The study of the major literary works of Spain from the Middle Ages through the 17th Century. Relationships between literature and society will also be examined. Conducted in Spanish. Lecture 3 hours. Prerequisite: SPAN 4123 or equivalent.

4133* ESPANA EN SU LITERATURA II 3 credit hours The study of the major literary works of Spain from the 18th Century to the present. Relationships between literature and society will also be examined. Conducted in Spanish. Lecture 3 hours. Prerequisite: SPAN 4123 or equivalent.

4143* HISPANOAMERICA EN SU LITERATURA I 3 credit hours The study of the major literary works of Spanish America from pre-colonial literature to the first half of the 19th Century. Relationships between literature and society will be discussed. Conducted in Spanish. Lecture 3 hours. Prerequisite: SPAN 3143.

4153* HISPANOAMERICA EN SU LITERATURA II 3 credit hours The study of the major literary works of Spanish America from the second half of the 19th Century to the present. Relationships between literature and society will be discussed. Conducted in Spanish. Lecture 3 hours. Prerequisite: SPAN 4143 or equivalent.

4163* SPANISH FOR BUSINESS AND INDUSTRY 3 credit hours The Spanish language as a means of communication in the world of business; basic commercial and economic vocabulary; trade and advertisement practices. Lecture 3 hours. Prerequisite: SPAN 3143.

4961-3* DIRECTED READING IN SPANISH 1-3 credit hours This course provides an opportunity for gifted and qualified students to work at a special project not offered in a regular course. May be repeated to a total of 3 hours. Independent study/directed readings 1-3 hours. Prerequisite: SPAN 4143 or equivalent.

SWAHILI (SWLI)

1113* BEGINNING SWAHILI I 3 credit hours An introductory course in the major language and the cultures of East Africa. Lecture 3 hours.

1223* BEGINNING SWAHILI II 3 credit hours Continuation of SWLI 1113. Lecture 3 hours. Prerequisite: SWLI 1113 or equivalent.

TURKISH (TURK)

4153* INTENSIVE STUDIES IN TURKISH I 3 credit hours An intensive introductory study of Turkish combining guided independent study of the written language with regular oral practice of the spoken language. Two hours independent study, one hour lab. Prerequisites: ENGL 1213 and six hours study of another foreign language or permission of the department.

4163* INTENSIVE STUDIES IN TURKISH II 3 credit hours Continuation of TURK 4153. Two hours independent study, one hour lab. Prerequisite: TURK 4153.

*Liberal arts and sciences course.
DEPARTMENT OF MATHEMATICAL SCIENCES

FACULTY

CHAIR
Narayan Thapa, Associate Professor

PROFESSORS
I. Argyros, K. Oty

ASSOCIATE PROFESSORS
J. Dover, G. Herring, H. Li,

ASSISTANT PROFESSORS
P. Budhathoki, J. Joshi

INSTRUCTORS
J. Castelli, S. Christensen, C. Sauer, J. Streck, P. Wyatt

MISSION STATEMENT
The mission of the Mathematical Sciences Department at Cameron University is to provide quality educational experiences in all mathematics and statistics courses offered through the department. The department offers courses that will provide all students, both majors and non-majors, with the knowledge and skills needed for lifelong learning, as well as an appreciation for the beauty and power of mathematics. Mathematics majors will acquire a broad and solid base in mathematics, enabling them to continue their education in graduate school or to pursue careers in teaching, industry, or government.

PROGRAMS OF STUDY
Degrees & Majors: B.A. Mathematics

GENERAL INFORMATION
Mathematics and statistics are fundamental to a wide variety of fields and careers. Our major in mathematics is broad based, allowing students to gain fundamental knowledge and skills in mathematics and statistics. We offer a variety of electives for students to customize their studies to their interests. Students who major or minor in mathematics have problem-solving and logic skills that are highly desired by employers in industry and government. Statistics is instrumental in the study of the behavioral and social sciences, the biological and physical sciences, and business.

STUDENT ORGANIZATIONS
MathCom
MathCom is a Cameron University Student Organization in Mathematics and Computer Science. It is open to everyone. MathCom assists in developing skills and leadership through peer, student, and faculty support.

Pi Mu Epsilon (Mathematics)
Pi Mu Epsilon is a non-secret organization whose purpose is the promotion of scholarly activity in mathematics among students in academic institutions, and among staff of qualified nonacademic institutions.
## Degree Plan: Mathematics (150)–Bachelor of Arts

School of Arts and Sciences
Department of Mathematical Sciences
Catalog Year: 2019-2021

2019-2021 UNDERGRADUATE CATALOG
COURSE DESCRIPTIONS

MATHEMATICS (MATH)

0013 PRE-ALGEBRA Developmental course, no credit This course provides a solid foundation in whole and signed number operations, fractions, decimals and percent. Does not satisfy any requirements for any degree program at Cameron University. Students who have unsuccessfully attempted this course two or more times are required to co-enroll in MATH 0121. Lecture 3 hours.

0103 BEGINNING ALGEBRA Developmental course, no credit This course is an introduction to algebra. Topics covered include introduction to the real number system, solving and graphing linear equations and inequalities, arithmetic operations using polynomials, factoring, and simplifying rational expressions. Does not satisfy any requirements for any degree program at Cameron University. Students who have unsuccessfully attempted this course two or more times are required to co-enroll in MATH 0121. Lecture 3 hours. Prerequisite: MATH 0013 or satisfactory placement score.

0115 BEGINNING AND INTERMEDIATE ALGEBRA Developmental course, no credit A combined beginning and intermediate algebra course. This course is designed for students who are able to cover the material in both beginning and intermediate algebra in one semester. Does not satisfy any requirements for any degree program at Cameron University. Students who have unsuccessfully attempted this course two or more times are required to co-enroll in MATH 0121. Lecture 5 hours. Prerequisite: MATH 0013 or satisfactory placement score.

0121 BASIC MATH SKILLS Developmental course, no credit This course is a supplemental developmental course providing an individualized plan of study to practice mathematical skills under the direction of the Mathematics Laboratory staff. Students who are enrolled in this course must be concurrently enrolled in MATH 0013, MATH 0103, MATH 0115, or MATH 0213. Does not satisfy any degree requirements for any degree program at Cameron University. Lecture 1 hour.

0213 INTERMEDIATE ALGEBRA Developmental course, no credit This course is designed to help students develop the skills needed for general education courses. Topics include radical and rational exponents, inequalities, quadratics, complex numbers, and an introduction to functions. Does not satisfy any requirements for any degree program at Cameron University. Students who have unsuccessfully attempted this course two or more times are required to co-enroll in MATH 0121. Lecture 3 hours. Prerequisite: MATH 0103 or satisfactory placement score.

1001 TECHNOLOGY FOR MATHEMATICS 1 credit hour An introduction to technology used in the practice and teaching of mathematics. Topics will vary by semester. Course may be repeated for credit for different topics. Lecture 1 hour. Prerequisite: MATH 0213 or MATH 0115 or satisfactory placement score.

1042 SUPPLEMENTAL SURVEY OF MATHEMATICS INSTRUCTION 2 credit hours Remediation and support for students who are enrolled in MATH 1413, but whose test scores and prior coursework do not indicate preparedness for college-level mathematics classes. Recommended for students enrolled in MATH 1413 who score less than 19 on the ACT Mathematics test and have not completed MATH 0213. Does not satisfy major requirements for any degree program at Cameron University. Lecture 2 hours. Prerequisite: MATH 0103 or satisfactory placement score. Corequisite: MATH 1413.

1052 SUPPLEMENTAL COLLEGE ALGEBRA INSTRUCTION 2 credit hours Remediation and support for students who are enrolled in MATH 1513, but whose test scores and prior coursework do not indicate preparedness for college-level mathematics classes. Recommended for students enrolled in MATH 1513 who score less than 19 on the ACT Mathematics test and have not completed MATH 0213. Does not satisfy major requirements for any degree program at Cameron University. Lecture 2 hours. Prerequisite: MATH 0103 or satisfactory placement score. Corequisite: MATH 1513.

1413* SURVEY OF MATHEMATICS 3 credit hours An introductory course in Mathematics designed to acquaint the student with mathematical ideas and their applications. This course covers topics in mathematics to help the student develop quantitative reasoning skills and to better understand the world around them. Topics include (but are not limited to) finance, statistics, describing data, and linear programming. Does not apply toward a major or minor in mathematics. Lecture 3 hours. Prerequisite: MATH 0213 or MATH 0115 or satisfactory placement score. General Education, Mathematics. (Fall, Spring)

1513* COLLEGE ALGEBRA 3 credit hours Topics covered are functions and graphs, including polynomial, rational, exponential and logarithmic; linear and nonlinear systems; and matrices. Does not apply toward a minor or major in mathematics or a major in mathematics education. Lecture 3 hours. Prerequisite: MATH 0213 or MATH 0115 or satisfactory placement score. General Education, Mathematics. (Fall, Spring)

1613* PLANE TRIGONOMETRY 3 credit hours The development, use and relations between circular and trigonometric functions; solutions of triangles; and application to practical problems throughout the course. Does not apply towards a major or minor in mathematics or a major in mathematics education. Lecture 3 hours. Prerequisite: MATH 1513 or satisfactory placement score. General Education, Mathematics.

Students with credit in mathematics courses numbered 2000 or above may not enroll in courses below 2000 without department approval.

2215* CALCULUS AND ANALYTIC GEOMETRY 1 5 credit hours Limits, derivatives with applications, the definite integral with applications. Lecture 5 hours. Prerequisites:
MATH 1513 and 1613 or equivalent. General Education, Mathematics. (Fall, Spring)

2235* CALCULUS AND ANALYTIC GEOMETRY II 5 credit hours Techniques of integration, applications of integration, polar coordinates, sequences and series, vectors. Lecture 5 hours. Prerequisite: MATH 2215. (Fall, Spring)

2244* CALCULUS AND ANALYTIC GEOMETRY III 4 credit hours Solid analytic geometry, partial differentiation, multiple integrals, functions of several variables, vector calculus. Lecture 4 hours. Prerequisite: MATH 2235. (Fall)

2353 MATHEMATICS FOR ELEMENTARY TEACHERS I 3 credit hours A basic course in mathematics for elementary education majors. An introduction to problem solving, number systems, whole number properties, and current technologies and manipulatives that relate to elementary mathematics. Additionally, operations with whole numbers are developed. Does not apply toward a major or minor in mathematics or a major in mathematics education. Lecture 3 hours. Prerequisite: Completion of one math general education course. (Fall, Spring)

2363 MATHEMATICS FOR ELEMENTARY TEACHERS II 3 credit hours An introduction to the structure of the real number system, functions, and probability and statistics for elementary education majors. Various manipulatives are used as teaching tools. Does not apply toward a major or minor in mathematics or a major in mathematics education. Lecture 3 hours. Prerequisite: MATH 2353 or department permission. (Fall, Spring)

2491-3 SELECTED TOPICS IN MATHEMATICS 1-3 credit hours A course designed to give non-mathematics majors the opportunity to study topics which are either not covered in the regular mathematics course offerings or not covered in sufficient depth for their needs. Topics considered appropriate for this course are those which require little or no calculus. May be repeated as often as desired with permission of the department chair. Lecture 1-3 hours. Prerequisite: Permission of the department.

2613* FOUNDATIONS OF MATHEMATICS 3 credit hours This course is designed to facilitate the transition from calculus to advanced mathematics. Topics include logic, sets, relations, functions, properties of real numbers, cardinality, combinatorics and probability. Lecture 3 hours. Prerequisite: MATH 2215. (Fall)

2713* ELEMENTARY CALCULUS 3 credit hours An introductory course in calculus for the non-mathematics major covering the following topics: limits, derivatives, and integration of functions of one or more variables. Applications will be related to Business, Economics, and the Social Sciences. Does not apply towards a major or minor in mathematics or a major in mathematics education. Lecture 3 hours. Prerequisite: MATH 1513 or equivalent. General Education, Mathematics.

3001 TECHNOLOGY FOR ADVANCED MATHEMATICS 1 credit hour An introduction to software packages used in the practice and teaching of advanced mathematics.

Topics will vary by semester. Course may be repeated for credit for different topics. Lecture 1 hour. Prerequisite: MATH 2215.

3013 INTRODUCTORY LINEAR ALGEBRA 3 credit hours An introduction to the basic topics of linear algebra to include linear systems, matrices, vectors, and vector spaces, eigenvalues, and linear transformations. Lecture 3 hours. Prerequisite: MATH 2613. (Fall, Odd Years)

3213* ABSTRACT ALGEBRA 3 credit hours The course emphasizes algebraic structures with particular emphasis on groups, rings, and fields. The fundamental theorems of group and ring theory are introduced and the beginning notions of field theory are presented. Lecture 3 hours. Prerequisite: MATH 2613. (Spring, Even Years)

3253 DIFFERENTIAL EQUATIONS 3 credit hours Ordinary differential equations with a brief introduction to solutions by series and Laplace transforms. Lecture 3 hours. Prerequisite: MATH 2235. (Spring)

3302* HISTORY OF MATHEMATICS 2 credit hours The historical development of mathematics. Lecture 2 hours. Prerequisite: MATH 2215.

3333* COLLEGE GEOMETRY 3 credit hours A comprehensive course which includes topics from both Euclidean and non-Euclidean geometries. Lecture 3 hours. Prerequisite: MATH 2215.

3343* NUMERICAL ANALYSIS 3 credit hours An introduction to elementary numerical analysis. Topics include analysis of errors, approximation of solutions to equations and systems of equations, interpolation, approximation of functions, numerical differentiation and integration, and approximation of solutions to ordinary differential equations. Experience with computer programming is highly recommended, but not required. Lecture 3 hours. Prerequisites: MATH 3253 and either MATH 3013 or MATH 4433.

3373 ALGEBRA FOR TEACHERS 3 credit hours A course in algebra specifically designed for teachers. Topics include integers, equations, functions, graphing, and applications of algebra. Does not apply towards a major or minor in mathematics. Lecture 3 hours. Prerequisite: EDUC 3003 and either MATH 2215 or MATH 2363.

3383 GEOMETRY FOR TEACHERS 3 credit hours A course in geometry specifically designed for education majors. Topics include constructions and geometric proofs as well as the study of geometric objects in two and three dimensions. Does not apply towards a major in mathematics or minor in mathematics. Lecture 3 hours. Prerequisite: EDUC 3003 and either MATH 2215 or MATH 2363.

3413 DISCRETE MATHEMATICAL STRUCTURES 3 credit hours An introduction to discrete mathematical structures. Topics include combinatorics, recursion, recurrence relations, generating functions, and graph theory. Lecture 3 hours. Prerequisites: MATH 2235 and MATH 2613.

4113 INTRODUCTION TO OPERATIONS RESEARCH 3 credit hours An introductory treatment of some of the
problems and techniques encountered in operations research. Topics include linear programming, network analysis, game theory, Markov chains, and analytical hierarchies. Lecture 3 hours. Prerequisite: MATH 2215 or 2713 or department permission.

4423* NUMBER THEORY 3 credit hours Divisibility of integers, congruencies, quadratic residues, mathematical induction, distribution of primes, diophantine equations, numerical functions and continued fractions. Lecture 3 hours. Prerequisite: MATH 2613 or department permission.

4433 MATRIX ALGEBRA 3 credit hours Elementary operations with matrix algebra, determinants, inverse of a matrix, rank and equivalence, linear dependence, vector spaces and linear transformations, characteristic equations of a matrix; bilinear, quadratic and Hermitian forms. Lecture 3 hours. Prerequisite: MATH 2215 or department permission.

4471-3 SEMINAR IN MATHEMATICS 1-3 credit hours Group projects designed to meet special needs. May be repeated as often as desired with permission of the department chair. Seminar 1-3 hours. Prerequisite: Departmental approval. Will count on major or minor only with department permission.

4483 INTRODUCTION TO REAL ANALYSIS 3 credit hours A study of the basic concepts of analysis, elementary set theory, the real numbers, sequences and series, functions of real variables, derivatives, and integrals. Lecture 3 hours. Prerequisites: MATH 2235 and 2613. (Spring, Odd Years)

4491-3 INDEPENDENT STUDY IN MATHEMATICS 1-3 credit hours Assigned research, readings, and reports based on the needs of the individual student. May be taken only by juniors and seniors. May be repeated as often as desired with permission of the department chair. Independent study/directed readings 1-3 hours. Prerequisite: Departmental permission.

4773 TEACHING OF SECONDARY MATHEMATICS 3 credit hours Various aspects of the pedagogy of teaching secondary mathematics courses will be explored. Lecture 3 hours. Prerequisite: Juniors or seniors who have been admitted to Teacher Education; MATH 2613, and one of MATH 3302, MATH 3333, MATH 3413, or MATH 4423.

4782 MATHEMATICS CAPSTONE I 2 credit hours This course serves to integrate the mathematics curriculum through a comprehensive survey of significant theorems within the field covering a wide spectrum of topics. Students will also begin working on a project to be submitted and presented in MATH 4792. Capstone/lecture 2 hours. Prerequisite: Departmental permission. (Fall)

4792 MATHEMATICS CAPSTONE II 2 credit hours This course serves to further the professional development of the student, including topics on careers and graduate school. Students will also submit and present their project started in MATH 4782. Program assessment is also a component. Capstone/lecture 2 hours. Prerequisite: MATH 4782. (Spring)

STATISTICS (STAT)

1052 SUPPLEMENTAL INTRODUCTION TO STATISTICS 2 credit hours Remediation and support for students who are enrolled in STAT 1513, but whose test scores and prior coursework do not indicate preparedness for college-level mathematics classes. Recommended for students enrolled in STAT 1513 who score less than 19 on the ACT Mathematics test and have not completed MATH 0213. Does not satisfy major requirements for any degree program at Cameron University. Lecture 2 hours. Prerequisite: MATH 0103 or satisfactory placement score. Corequisite: STAT 1513.

1513* INTRODUCTION TO STATISTICS 3 credit hours An introductory course in the techniques of experimental statistics including estimation and hypothesis testing. Does not apply towards a major or minor in mathematics or a major in mathematics education. Lecture 3 hours. Prerequisite: MATH 0213 or 0115 or equivalent. General Education, Mathematics.

2013* INTRODUCTORY PROBABILITY AND STATISTICS I 3 credit hours Descriptive statistics including graphical representation of data, elementary probability and combinatorial methods, binomial and normal distributions, statistical inference including point estimates of mean, variance and proportion, confidence intervals, test of hypotheses. Lecture 3 hours. Prerequisite: MATH 1413 or higher. (Spring)

2023 INTRODUCTORY PROBABILITY AND STATISTICS II 3 credit hours A continuation of STAT 2013. Emphasis on various experimental designs-chi square tests, analysis of variance, regression and correlation, and statistical inference, including confidence intervals and test of hypothesis are covered. Business applications will be emphasized. Lecture 3 hours. Prerequisite: STAT 2013 or departmental permission.

2613 BUSINESS STATISTICS 3 credit hours An introduction to quantitative tools used in business analysis. Measures of central tendency, distributions, regression and correlation, and statistical inference, including confidence intervals and test of hypothesis are covered. Business applications will be emphasized. Lecture 3 hours. Prerequisite: MATH 1513 or higher. (Fall)

3113 MATHEMATICAL STATISTICS I 3 credit hours Introduction to combinatorial methods, probability random variables and expected value, discrete distributions, continuous probability functions, and moment generating functions. Lecture 3 hours. Prerequisite: MATH 2235.

3123 MATHEMATICAL STATISTICS II 3 credit hours A continuation of STAT 3113. Sampling, interval estimation, tests of hypotheses, and regression and correlation. Lecture 3 hours. Prerequisite: STAT 3113.

*Liberal arts and sciences course
DEPARTMENT OF MILITARY SCIENCE

FACULTY

CHAIR
LTC Seth Hall, Professor

ASSISTANT PROFESSORS
MAJ J. Bost

INSTRUCTORS
TBD

MISSION STATEMENT
Partners with Cameron University and Fort Sill to recruit, educate, develop, and inspire Senior ROTC Cadets in order to commission officers of character for the Total Army who are critical thinkers and ready to lead in complex operating environments. Partners with 7 JROTC programs to develop citizens of character.

PROGRAMS OF STUDY

BASIC COURSE

MS I (Freshman Year)

Course Hours
ML 1011 Foundations of Officership Lab.......................... 1
ML 1012 Foundations of Officership .................................. 2
ML 1021 Basic Leadership Lab ........................................... 1
ML 1022 Basic Leadership ................................................ 2

MS II (Sophomore Year)

Course Hours
ML 2011 Individual Leadership Lab................................. 1
ML 2012 Individual Leadership Studies ........................... 2
ML 2021 Leadership and Teamwork Lab........................... 1
ML 2022 Leadership and Teamwork ................................ 2
ML 2002-8 Leader's Training Course (Summer) ............... 2-8

Students may receive Advanced Standing or placement credit for the Basic Course for prior active or reserve component duty in any service. Students may also receive partial placement credit if they completed 2 or more years of Junior ROTC (JROTC) in high school. The Professor of Military Science determines the credits given for JROTC experience.

Students with sophomore academic status may take MS I and MS II courses simultaneously. Students who have completed their sophomore year and seniors applying to graduate school may attend the Leader’s Training Course (ML 2002-8) if they are interested in qualifying for the Advanced Course.

ADVANCED COURSE

MS III (Junior Year)

Course Hours
ML 3011 Leadership and Problem Solving Lab................... 1
ML 3013 Leadership and Problem Solving ........................ 3
ML 3021 Leadership and Ethics Lab.................................. 1
ML 3023 Leadership and Ethics........................................... 3

MS IV (Senior Year)

Course Hours
ML 4004 Ldr Dev/Assessment Course (LDAC) (SU)........... 4
ML 4011 Leadership Challenges/Goal Setting Lab............. 1
ML 4013 Leadership Challenges and Goal Setting ............... 3
ML 4021 Officership Lab ................................................. 1
ML 4023 Officership ...................................................... 3

Completion of the Basic Course, LDAC or placement credit for the Basic Course and approval from the Professor of Military Science are prerequisites for the Advanced Course. Candidates for a commission must also complete classes in U.S. Military History, Communication Skills, and Computer Literacy in addition to the University’s general education requirement.

GENERAL INFORMATION
Reserve Officers’ Training Corps (ROTC) is a four year program designed to complement the student’s major and minor fields of study by developing the skills required in a leader. There is no military obligation for non-ROTC scholarship students enrolled in freshman and sophomore level classes. Contracted cadets receive a subsistence allowance each month during the academic year. Students completing the Advanced Course apply for a commission as a second lieutenant in the Active Army, Army Reserve or Army National Guard. Students may apply for 4 year Army scholarships during their senior year in high school, or 3 and 2 year scholarships after they enroll in the University. Qualified students may apply for Airborne, Air Assault, and other military training conducted during the summer. Students who successfully complete the ROTC program will have their general education four-hour Health and Wellness requirement waived.

STUDENT ORGANIZATION
Scabbard and Blade
The Military Science Club is a co-ed professional military club that exists to enhance its members’ involvement on campus and community events and increase their opportunities for personal and professional growth and development.
COURSE DESCRIPTIONS

MILITARY SCIENCE AND LEADERSHIP (MSL)

Basic Course

The ROTC Basic Course provides an introduction to the purpose and history of the United States Army, training in fundamental military skills, principles of instructional techniques, classroom and practical training in leadership. Enrollment in Basic Course classes is open to all full-time students, male and female, regardless of intentions to continue in ROTC or to pursue a commission. There is no military obligation incurred for Basic Course attendance by non-ROTC scholarship students. Full academic credit is given for all ROTC basic courses. To qualify for enrollment in the Advanced Course, a student must complete 8 hours of Basic Course credit, through any of the following combinations: completion of all 1000 and 2000 level courses, placement credit received from the Professor of Military Science for prior military service or JROTC leadership experience, or completion of MSL 2002-8, Leader’s Training Course. Students receive a subsistence allowance while attending the Leader’s Training course (MSL 2002-8).

1110 PHYSICAL FITNESS 0 credit hours Explore components of a fitness plan through practical experience and instruction with emphasis on aerobic and anaerobic fitness, muscular strength and endurance, flexibility, and nutrition. The course is modelled around the Army Physical Readiness Training (PRT) Program. For participating students who are not in the ROTC program, the Army PRT Program offers a different approach to fitness and fitness assessment. Will not satisfy General Education, Health and Wellness. May be repeated up to 7 times. Laboratory 0 hours.

1112 PHYSICAL FITNESS 2 credit hours Explore components of a fitness plan through practical experience and instruction with emphasis on aerobic and anaerobic fitness, muscular strength and endurance, flexibility, and nutrition. The course is modelled around the Army Physical Readiness Training (PRT) Program. For participating students who are not in the ROTC program, the Army PRT Program offers a different approach to fitness and fitness assessment. May be repeated for a maximum of 4 hours credit. Laboratory 4 hours. General Education, Health and Wellness.

1011 FOUNDATIONS OF OFFICERSHIP LAB 1 credit hour Leadership laboratory is a weekly period emphasizing practical application of leadership and military skills. Activities include: rifle marksmanship, map reading and land navigation, team building exercises, physical conditioning and small unit tactics. The availability of an outdoor training area on campus and the proximity of Fort Sill allows students to get out of the classroom and apply the skills they have learned in fast-paced exercises. Participation in Leadership Lab and Physical Fitness training is optional for “Non-Contracted” cadets (but highly encouraged); mandatory for “Contracted” cadets. Laboratory 1 hour. Prerequisite: Foundations of Officership (MSL 1012) or concurrent enrollment. MSL 1012 must be successfully completed before credit is given in this course.

1012 FOUNDATIONS OF OFFICERSHIP 2 credit hours

Introduces students to issues and competencies that are central to a commissioned officer’s responsibilities. Establish framework for understanding officership, leadership and Army values followed and “life skills” such as physical fitness and time management. Participation in Leadership Lab and Physical Fitness training is optional for “Non-Contracted” cadets (but highly encouraged); Mandatory for “Contracted” cadets. Lecture 2 hours.

1021 BASIC LEADERSHIP LAB 1 credit hour Leadership laboratory is a weekly period emphasizing practical application of leadership and military skills. Activities include: rifle marksmanship, map reading and land navigation, team building exercises, physical conditioning and small unit tactics. The availability of an outdoor training area on campus and the proximity of Fort Sill allows students to get out of the classroom and apply the skills they have learned in fast-paced exercises. Participation in Leadership Lab and Physical Fitness training is optional for “Non-Contracted” cadets (but highly encouraged); mandatory for “Contracted” cadets. Laboratory 1 hour. Prerequisite: Basic Leadership (MSL 1022) or concurrent enrollment. MSL 1022 must be successfully completed before credit is given in this course.

1022 BASIC LEADERSHIP 2 credit hours Establishes foundation of basic leadership fundamentals such as problem solving, communications, briefings and effective writing, goal setting, techniques for improving listening and speaking skills and an introduction to counseling. Participation in Leadership Lab and Physical Fitness training is optional for “Non-Contracted” cadets (but highly encouraged); mandatory for “Contracted” cadets. Lecture 2 hours.

1212 RANGER CHALLENGE 2 credit hours A Ranger Challenge Team is made up of nine people competing in various physically and mentally challenging events including rifle disassembly/assembly, an Army Physical Fitness Test, land navigation (written and actual), grenade assault course, basic rifle marksmanship, obstacle course, one-ropes bridge, radio assembly, and a ten-kilometer road march. Each year, Ranger Challenge teams across the country compete against each other in this two day competition. Lecture with Activity 2 hours. Prerequisite: Department permission.

2002-8 LEADER’S TRAINING COURSE (BASIC CAMP) 2-8 credit hours A four week opportunity to develop new skills, to grow personally and to qualify for enrollment in Army ROTC advanced courses. The Leader’s Training Course is a world-class leadership development program that will instill self-confidence and provide leadership skills for life. Prerequisite: Permission of the Professor of Military Science.
2011 INDIVIDUAL LEADERSHIP LAB 1 credit hour
Leadership laboratory is a weekly period emphasizing practical application of leadership and military skills. Activities include: rifle marksmanship, map reading and land navigation, team building exercises, physical conditioning and small unit tactics. The availability of an outdoor training area on campus and the proximity of Fort Sill allows students to get out of the classroom and apply the skills they have learned in fast-paced exercises. Participation in Leadership Lab and Physical Fitness training is optional for "Non-Contracted" cadets (but highly encouraged); mandatory for “Contracted” cadets. Laboratory 1 hour. Prerequisite: Individual Leadership Studies (MSL 2012) or concurrent enrollment. MSL 2012 must be successfully completed before credit is given in this course.

2012 INDIVIDUAL LEADERSHIP STUDIES 2 credit hours
Students identify successful leadership characteristics through observation of others and self through experimental learning exercises. Students record observed traits (good and bad) in a dimensional leadership journal and discuss observations in small group settings. Participation in Leadership Lab and Physical Fitness training is optional for “Non-Contracted” cadets (but highly encouraged); Mandatory for “Contracted” cadets. Lecture 2 hours.

2021 LEADERSHIP AND TEAMWORK LAB 1 credit hour
Leadership laboratory is a weekly period emphasizing practical application of leadership and military skills. Activities include: rifle marksmanship, map reading and land navigation, team building exercises, physical conditioning and small unit tactics. The availability of an outdoor training area on campus and the proximity of Fort Sill allows students to get out of the classroom and apply the skills they have learned in fast-paced exercises. Participation in Leadership Lab and Physical Fitness training is optional for “Non-Contracted” cadets (but highly encouraged); mandatory for “Contracted” cadets. Laboratory 1 hour. Prerequisite: Leadership and Teamwork (MSL 2022) or concurrent enrollment. MSL 2022 must be successfully completed before credit is given in this course.

2022 LEADERSHIP AND TEAMWORK 2 credit hours
Study examines how to build successful teams, various methods for influencing action, effective communication in setting and achieving goals, the importance of timing the decision, creativity in the problem solving process and obtaining team buy-in through immediate feedback. Participation in Leadership Lab and Physical Fitness training is optional for “Non-Contracted” cadets (but highly encouraged); mandatory for “Contracted” cadets. Lecture 2 hours.

2032 INDEPENDENT STUDY IN MILITARY SCIENCE 2 credit hours This course is available only to students with scheduling conflicts which prevent their completion of another lower division Military Science course. Content will duplicate the content of the course it replaces. Lecture 2 hours. Laboratory required if student is a contracted cadet.

Advanced Course
The Advanced Course, consists of MSL 3013, 3023, 4004, 4013 and 4023. Cadets normally attend Leader Development and Assessment Course (LDAC) (MSL 4004) during the summer between their junior and senior years. It is open only to students who have completed the Basic Course, Leader’s Training Course or for whom the Professor of Military Science has approved placement credit based on prior military service. The Advanced Course is designed to qualify a student for a commission as an officer in the United States Army. Students must qualify physically, mentally and morally prior to enrollment. They must complete all courses in sequence unless otherwise approved by the Professor of Military Science. Students receive full academic credit, to include 4 credits for the Leader Development and Assessment Course, and may declare a minor in Military Science (as approved by the Professor of Military Science). Students receive a stipend during the school year and veterans may draw the ROTC stipend and VA educational benefits concurrently. The Advanced Course emphasizes practical exercises in leadership.

3011 LEADERSHIP AND PROBLEM SOLVING LAB 1 credit hour Leadership laboratory is a weekly period emphasizing practical application of leadership and military skills. Activities include: rifle marksmanship, map reading and land navigation, team building exercises, physical conditioning and small unit tactics. The availability of an outdoor training area on campus and the proximity of Fort Sill allows students to get out of the classroom and apply the skills they have learned in fast-paced exercises. Attendance is mandatory for Juniors and Seniors. Laboratory 1 hour. Prerequisite: MSL 3013 or concurrent enrollment. MSL 3013 must be successfully completed before credit is given in this course.

3013 LEADERSHIP AND PROBLEM SOLVING 3 credit hours Students conduct self-assessment of leadership style, develop personal fitness regimen, and learn to plan and conduct individual/small unit tactical training while testing reasoning and problem-solving techniques. Students receive direct feedback on leadership abilities. Participation in Physical Fitness training, Leadership Lab, and one weekend Field Training Exercise is required. Lecture 3 hours. Prerequisite: Completion of Military Science Basic Courses or placement credit for the Basic Courses and permission of the Professor of Military Science.

3021 LEADERSHIP AND ETHICS LAB 1 credit hour Leadership laboratory is a weekly period emphasizing practical application of leadership and military skills. Activities include: rifle marksmanship, map reading and land navigation, team building exercises, physical conditioning and small unit tactics. The availability of an outdoor training area on campus and the proximity of Fort Sill allows students to get out of the classroom and apply
the skills they have learned in fast-paced exercises. Mandatory attendance for Juniors and Seniors. Laboratory 1 hour. Prerequisite: Leadership and Ethics (MSL 3023) or concurrent enrollment. MSL 3023 must be successfully completed before credit is given in this course.

**3023 LEADERSHIP AND ETHICS 3 credit hours** Examines the role communications, values and ethics play in effective leadership. Topics include ethical decision-making, consideration of others, spirituality in the military, and survey Army leadership doctrine. Emphasis on improving oral and written communication abilities. Participation in Physical Fitness training, Leadership Lab, and one weekend Field Training Exercise is required. Lecture 3 hours. Prerequisite: Completion of Military Science Basic Courses or placement credit for the Basic Courses and permission of the Professor of Military Science.

**4004 CADET LEADER COURSE 4 credit hours** A four-week leadership development exercise conducted at Fort Knox, Kentucky. Open only to (and required of) students who have completed MSL 3013 and 3023. The Cadet Leader Course environment is highly structured and demanding; stressing leadership at small unit levels under varying, challenging conditions. Individual leadership and basic skills performance are continuously developed throughout the exercise. Qualified cadets may assigned in leadership positions supporting the Cadet Initial Entry Training (CIET) exercise, either before or after their scheduled CLC. They may also attend Airborne, Air Assault, Northern Warfare and Cadet Troop Leader Training between the end of the spring semester and the beginning of the fall semester. Prerequisites: MSL 3013 and 3023.

**4011 LEADERSHIP CHALLENGES/GOAL SETTING LAB 1 credit hour** Leadership laboratory is a weekly period emphasizing practical application of leadership and military skills. Activities include: rifle marksmanship, map reading and land navigation, team building exercises, physical conditioning and small unit tactics. The availability of an outdoor training area on campus and the proximity of Fort Sill allows students to get out of the classroom and apply the skills they have learned in fast-paced exercises. Mandatory attendance for Juniors and Seniors. Laboratory 1 hour. Prerequisite: Leadership Challenges/Goal Setting (MSL 4013) or concurrent enrollment. MSL 4013 must be successfully completed before credit is given in this course.

**4013 LEADERSHIP CHALLENGES AND GOAL SETTING 3 credit hours** Develops student proficiency in planning and executing complex operations, functioning as a member of a staff and mentoring subordinates. Students explore training management, methods of effective staff collaboration and developmental counseling techniques. Participation in Physical Fitness training, Leadership Lab, and one weekend Field Training Exercise is required.

Lecture 3 hours. Prerequisite: Permission of the Professor of Military Science.

**4021 OFFICERSHIP LAB 1 credit hour** Leadership laboratory is a weekly period emphasizing practical application of leadership and military skills. Activities include: rifle marksmanship, map reading and land navigation, team building exercises, physical conditioning and small unit tactics. The availability of an outdoor training area on campus and the proximity of Fort Sill allows students to get out of the classroom and apply the skills they have learned in fast-paced exercises. Attendance is mandatory for Juniors and Seniors. Laboratory 1 hour. Prerequisite: Officership (MSL 4023) or concurrent enrollment. MSL 4023 must be successfully completed before credit is given in this course.

**4023 OFFICERSHIP 3 credit hours** Study includes case study analysis of military law and practical exercises on establishing an ethical command climate. Students must complete a semester-long Senior Leadership Project that requires them to plan, organize, collaborate, analyze and demonstrate their leadership skills. Participation in Physical Fitness training, Leadership Lab, and one weekend Field Training Exercise is required. Lecture 3 hours. Prerequisite: Permission of the Professor of Military Science.

**Leadership Laboratory**

Leadership laboratory is a weekly period emphasizing practical application of leadership and military skills. Activities include: rifle marksmanship, map reading and land navigation, team building exercises, physical conditioning and small unit tactics. The availability of an outdoor training area on campus and the proximity of Fort Sill allows students to get out of the classroom and apply the skills they have learned in fast-paced exercises. Attendance is optional for non-ROTC scholarship/non-contracted freshmen and sophomores, but they are always welcome and encouraged to attend. Attendance is mandatory for juniors and seniors.
OFFICERS AND FACULTY

OKLAHOMA STATE REGENTS
FOR HIGHER EDUCATION

GLEN D. JOHNSON, Chancellor–Oklahoma City
JOSEPH L. PARKER, JR.–Chair, Tulsa
ANN HOLLOWAY–Vice Chair, Ardmore
ANDREW W. “ANDY” LESTER–Secretary, Edmond
JEFFREY W. HICKMAN–Assistant Secretary, Fairview
JAY HELMY–Tulsa
GEN. TONEY STRICKLIN–Lawton
STEVEN W. TAYLOR–McAlester
MICHAEL C. TURPEN–Oklahoma City
RONALD H. WHITE, M.D.–Oklahoma City

BOARD OF REGENTS FOR
THE UNIVERSITY OF OKLAHOMA,
CAMERON UNIVERSITY,
AND ROGERS STATE UNIVERSITY

LESLIE J. RAINBOLT-FORBES, M.D.–Chair, Oklahoma City
C. RENZI STONE—Vice Chair, Oklahoma City
PHIL B. ALBERT–Tulsa
FRANK KEATING–Oklahoma City
GARY PIERSON–Oklahoma City
NATALIE SHIRLEY–Oklahoma City
ERIC STEVENSON–Westerville, OH
CHRIS PURCELL, Ph.D., VP for Univ. Governance–Norman
ANIL GOLLAHALLI, Legal Counsel–Norman

ADMINISTRATION

JOHN M. MCAFTHUR–President
RONNA VANDERSLICE–VP for Academic Affairs
NINETTE CARTER–VP for Business and Finance
ALBERT JOHNSON, JR.–VP for University Advancement
JERRETT PHILLIPS–VP for Enrollment Management and Student Success

FACULTY AND ADMINISTRATIVE STAFF

AHMED, SYED M. (2001) Business, B.A., M.A., University of Dhaka (Bangladesh); M.A., University of Manitoba; Ph.D., Simon Fraser University.

ARGYROS, IOANNIS K. (1990) Mathematical Sciences, B.S., University of Athens (Greece); M.Sc., Ph.D., University of Georgia.

BAUSCH, ROBERT S. (1995) Social Sciences, B.A., M.A., California State University-Fullerton; Ph.D., Purdue University.

BAXTER, CARRIE (2017) Agriculture, Biology, and Health Sciences, B.S., Cameron University; M.Ed., University of Central Oklahoma.

BISCETTE, ALDRICK (2016) Information Technology Services, Analyst/Programmer, B.A., Cameron University.

BLACKMAN, CATHERINE L. (1997) Library, B.S., Blue Mountain College; M.L.I.S., University of Southern Mississippi; M.S., Cameron University.

BOSS, STEPHANIE (2011) Chair, Sports and Exercise Science, B.S., University of Central Oklahoma; M.Ed., Southwestern Oklahoma State University; Ed.D. Walden University.

BRICKER, JIMMY (2016) Agriculture, Biology, and Health Sciences, B.S., University of Tennessee; M.S., Cornell University.

BRYAN, CLINTON (1988) Chemistry, Physics, and Engineering, B.S., University of Arkansas; M.S., University of Kansas; Ph.D., University of Arkansas.

BUDHATHOKI, PARSHURAM (2014) Mathematical Sciences, B.S., M.S., Tribhuvan University (Nepal); M.S., Ph.D., Florida Atlantic University.

CALIX, SHAUN (2013) Psychology, B.S., University of Alabama; M.S., University of Southern Mississippi; Ph.D., University of Missouri-Columbia.

CAMP, SUSAN (1994) Cameron University-Duncan, Assistant Vice President for Academic Affairs, B.S., Cameron University, M.Ed., University of Oklahoma.

CARTER, NINETTE (1992) Vice President for Business and Finance, C.P.A., B.Acctg., Cameron University.

HUCKABAY, GARY (1974) Mathematical Sciences, B.S., Southwestern State College; M.A., University of Missouri; Ph.D, Oklahoma State University. 2003

JAMES, WILLIAM (1975) Education, B.S.Ed., M.T., East Central State University; Ed.D., Oklahoma State University. 2001

JONES, JOE LEE (1976) Health and Physical Education, B.S., Oklahoma Baptist University; M.T., Southwestern Oklahoma State University. 2010

JONES, GAIL (1969) Technology, A.S., B.S., M.S., Oklahoma State University. 2005

KARASZ, JANICE M. (1975) Technology, B.S., Southwestern Missouri State University; M.S., Ph.D., University of Oklahoma. 1998

KENNEDY, IRA E. (1965) Agriculture, B.S., M.S., Oklahoma State University. 2000

KERR, JANE B. (1977) Chair, Home Economics/Human Ecology, B.S., Oklahoma State University; M.H.Ed., University of Oklahoma; Ed.D, Oklahoma State University. 1993

LAIR, MARYLyn G. (1968) Administrative Sciences, B.S., Oklahoma College of Liberal Arts; Ph.D., University of Oklahoma. 1987
MAPLES, VAL (1957) Health and Physical Education, B.S., Southwestern State College; M.S., Oklahoma State University. 1988
MCCOY, DOYLE (1969) Biology, B.S., East Central State University; M.S., University of Oklahoma; Ph.D., Oklahoma State University. 1982.
MCKELLIPS, KAREN (1968), Education, B.S., Southwestern State University; M.S., Ed.D., Oklahoma State University. 2001
MCKELLIPS, TERRAL (1968) Provost, B.S., Southwestern State College; M.S., Ed.D., Oklahoma State University. 2001
MCMANUS, MARGIE (1973) Education, B.S., Oklahoma State University; M.Ed., Ed.D., University of Oklahoma. 2003
MILLER, DAVID (1970) History and Government, B.A., M.A., University of Utah; Ph.D., University of New Mexico. 2007
MILLER, SYLVIA A. (1978) Business-Marketing, B.A., Southeastern Louisiana University; M.A., University of New Mexico; M.B.A., Ph.D., University of Oklahoma. 2007
MOOTS, JOHN (1973) Music, B.M.E., M.M.E., Wichita State University. 2010
MORRIS, JAMES KENT (1968) Mathematical Sciences, B.S., Southwestern State College; M.T., Central State College; Ed.D., North Texas State University. 2005
MUSSELEWHITE, LYNN RAY (1971) History and Humanities, B.A., Abilene Christian College; M.A., Ph.D., Texas Tech University. 2001
NETHERLAND, EDWIN LANE (1972) Biological Sciences, B.S., Huntington College; M.S., Ed.D., Oklahoma State University. 2004
PATE, EUGENE F. (1964) Communications, B.S., State College of Arkansas; M.A., University of Arkansas. 1985
PAZOURECK, REBECCA L. (1978) Psychology and Human Ecology, B.A., James Madison University; Dietetic Internship, Virginia Commonwealth University; M.S., University of Oklahoma; Ph.D., Oklahoma State University. 2008
PERRY, LORRAINE (2001) Psychology and Human Ecology, B.A., Mary Crest College; M.B.S., Cameron University.
PHILLIPS, DONALD S. (1979) Associate Provost, B.S., M.S., Ed.D., Oklahoma State University. 1998
PICKTHORN, BARBARA (1977) Library, Assistant Director, Reference and Instruction, B.A., M.L.S., University of North Texas; M.S., Cameron University. 2015
PROPHET, DONALD P. (1947) Agriculture, B.S., M.S., Oklahoma State University. 1982
RAMSEY, WILLIAM (1981) Business-Law, B.G.S., University of Nebraska at Omaha; B.S., Cameron University, J.D., University of Oklahoma. 2000
RIECKE, CAROLL (1970) Chair, Mathematical Sciences, B.S., Central Missouri University, M.S., Oklahoma State University, Ph.D., University of Houston. 1997
RUSSELL, TOM (1974) Computing and Technology, A.S., B.S., Cameron University; M.S., Midwestern State University; C.D.P., Institute for Certification for Computer Professionals. 2010
SCOTT, BARBARA (1979) Art, B.A., Queens College, (Charlotte, N.C.); M.L.S., Ph.D., University of Oklahoma. 2004

2019-2021 UNDERGRADUATE CATALOG
SEALS, THELMA JOLLY (1959) Physical Sciences, B.S.,
Oklahoma State University; M.Ed., University of
Oklahoma; M.S., Oklahoma State University. 1978
SEAMANS, ELDON L. (1986) Sociology, B.A., Maryville
College; M.Div., McCormick Theological Seminary. 1987
SHAHA¥, BILL G. (1967) Health and Physical Education,
B.S., M.T., Central State College. 1986
SHANAHAN, LAWRENCE B. (1972) English, Foreign
Languages and Journalism, B.S., M.A., Marquette
University; Ph.D., University of Wisconsin. 1999
SHAW, WANDA (1968) Art, B.S., M.S., Kent State
University. 1985
SHEETS, BOBBY (1980) Undergraduate
Coordinator-School of Business, B.S., M.E., Southwestern
State University; C.P.A., State of Oklahoma; Ph.D.,
University of Oklahoma. 1996
SIMPSON, PHILLIP M. (1971) History and Government,
B.A., M.A., North Texas State University; Ph.D.,
University of Arizona. 2005
SIRCY, OTICE C. (1968) English, Foreign Languages and
Journalism, B.A., University of Texas; M.A., North Texas
State University. 2000
SIRCY, VIRGINIA (1968) Music, B.M., North Texas State
University; M.M., Michigan State University; D.M.A.,
North Texas State University. 2001
SKRDLE, NANCY (1969) Serials Librarian, B.S., Oklahoma
College for Women; M.L.S., University of Oklahoma. 1993
SMITH, CHARLES WAYNE (1970) Chair, History and
Humanities, B.S., William Carey College; M.A., Ph.D.,
University of Southern Mississippi. 2000
University of Oklahoma; Ed.D., North Texas State
University. 1990
Cameron University; M.A., Ph.D., University of
Oklahoma. 2008
SOLSTAD, KENNETH (1972) English and Foreign
Languages, B.A., Yale University; M.A., Ph.D., University
of California at Berkeley. 2005
SPEARS, JOHN (1976) Health and Physical Education,
B.S., M.T., Southwestern Oklahoma State University. 1994
SPESARRD, MILTON L. (1964) Library, B.B.A., M.L.S.,
University of Oklahoma. 2001
SPRADLEY, TERRY P. (1966) Technology, B.A., Oklahoma
City, University, M.S., Ed.D., Oklahoma State University. 1987
STANTON, JIMMY H. (1968) Physical Sciences, B.S., Delta
State College; Ph.D., University of Mississippi. 2004
STEIGMAIER, MARK J. (1975) History and Government,
B.A., University of Santa Clara; M.A., Ph.D., University of
California at Santa Barbara. 2013
STEVENS, MARION D. (1966) History and Humanities,
B.A., Northeastern State College; M.A., Eastern New
Mexico State University. 1999
New Mexico University; Ph.D., University of Oklahoma. 1998
SULLIVAN, B. DON (1992) Vice President for University
Advancement, B.S., M.S., Oklahoma State University;
Ph.D., University of Missouri-Columbia. 2002
SUTHERLIN, TOM (1972) Computing and Technology,
A.S., B.S., M.S., Oklahoma State University. 2010
TABATABAI, MOHAMMAD (1984) Mathematical
Sciences, B.S., National University of Iran; M.S., Florida
State University; Ph.D, Memphis State University. 2014
TERRY, TAYLOR BROOKS (1965) Language Arts, B.A.,
Southern Methodist University; M.A., University of
Texas at El Paso. 1982
Languages, B.S., East Texas State University; M.A., Ph.D.,
Texas Women's University. 2014
TYLER, JACK D. (1967) Biological Sciences, B.S.,
Southwestern State College; M.S., Oklahoma State
University, Ph.D., University of Oklahoma. 2003
TYSON, LAWANDA (1971) Education and Psychology,
B.S., East Texas Baptist College; M.Ed., Ph.D., East Texas
University. 1987
VAN SCHUYVER, BILLYE (1981) Dean, School of
Education and Behavioral Sciences, B.L.S., University of
Oklahoma; M.A.T., Oklahoma City University; Ph.D.,
University of Oklahoma. 1996
VOELTZ, RICHARD A. (1987) History and Government,
B.A., University of California at Santa Cruz; M.A.,
University of Oregon; Ph.D., University of California at
Los Angeles. 2014
Stephen F. Austin State University. 2014
WEINSTEIN, LAWRENCE (1990) Psychology and Human
Ecology, B.A., Indiana University; M.S., University of
Oklahoma; Ph.D., Swedish University of Turku
(Finland). 2010
WILLIAMS, WARD (1968) Education and Psychology,
B.S., M.Ed., University of Oklahoma. 1985
WILSON, VICKI (1972) Health and Physical Education,
B.S., San Francisco State; M.S., University of Oklahoma.
1999
WRIGHT-SMITH, LINDA (1998) Computing and
Technology, B.A., Portland State University; B.S., M.Ed.,
Cameron University, Ph.D., University of Oklahoma.
2017
University, M.A., Ph.D., Oklahoma State University. 1985
YOUNGBLOOD, KAREN (1987) Criminal Justice and
Sociology, B.A., J.D., University of Oklahoma. 2009
ZIEGLER, ROBERT (1968) Biological Sciences, B.S., M.S.,
Fort Hays State College. 2003
