

COVID-19 Hotline Faculty and Staff FAQ

What should I do if a student shares that they have been in Close Contact* or tested positive for COVID-19?

- You should advise the student to submit an online self-reporting form available at www.cameron.edu/coronavirus-hotline.
- You may also contact the Coronavirus Hotline directly via email to coronavirus_hotline@cameron.edu, or by calling (580) 581-2676 (M-F from 9:00am to 4:00pm). Please provide the student's first and last name and student identification number, and information about the possible case. Please include any details you think the hotline might need to know.

**Close-contact is defined as being within 6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period starting from 2 days before onset of illness (or, for asymptomatic cases, 2 days prior to a positive test).*

What course of action is a student advised when calling the Hotline to announce a close contact or positive test case? Please note that the advice is specific depending on each student's unique situation.

- Students will be advised not to attend classes or exams in-person, not to participate at on-campus events and meetings of any kind, and not to visit campus facilities, offices or other campus spaces.
- Students may be strongly encouraged to wear an appropriate face covering according to CDC guidelines and local health department direction.
- Students will be advised to contact each instructor concerning their participation in the course.
 - Student Services will also provide a notice of medical absence to all respective instructors, as well as a return to class notification.
- If the student resides on campus, and depending on the student's specific case, they may be allowed to go home, relocated to quarantine housing, or be required to quarantine in place.
 - If a student remains on campus, the Student Housing office will arrange for meal delivery from the cafeteria to meet the student's dietary needs; AND
 - The Student Wellness Center will work with Student Housing to provide over the counter medicine to treat any symptoms; AND
 - The Student Wellness Center will be available for virtual counseling.

What standards are the Hotline following with regard to close contact or positive test cases?

- A student who has only a fever and no other symptoms of COVID-19 and has not had close contact with a positive COVID-19 individual, may return to campus/class after being fever-free for a minimum of 24 hours without using any fever-reducing medications.

- Students testing positive with COVID-19 who have symptoms and were directed to isolate at home, or at Student Housing spaces, may discontinue isolation and resume campus activities under the following conditions:
 - At least 10 days have passed since symptom onset; AND
 - At least 24 hours have passed since last fever without the use of fever reducing medication; AND
 - Other symptoms have improved; AND
 - A healthcare provider, or the appropriate health department*, has issued a letter stating that the student has met the criteria to end isolation.
- Asymptomatic students with COVID-19 may discontinue isolation and resume campus activities under the following conditions:
 - At least 10 days have passed since the date of their positive COVID-19 test; AND
 - A healthcare provider, or the appropriate health department*, has issued a letter stating that the student has met the criteria to end isolation.
- A student that was in close-contact to someone that tested positive for COVID-19 may return to campus activities under the following conditions:
 - If **no** COVID related symptoms are present:
 - **Unvaccinated students** may return after 10 days have passed without diagnostic testing; OR after 7 days have passed if the individual has a negative COVID-19 test administered no earlier than 5 days after the close-contact
 - If COVID related symptoms are present:
 - After 14 days have passed since the date of exposure; AND
 - No presence of symptoms
 - Testing is recommended 5 days after exposure to the infected individual. The student should notify the hotline if they test positive
 - **Fully vaccinated students** are not required to quarantine after an exposure to COVID-19 as long as symptoms are not present. Testing is highly recommended five (5) days after last exposure to the infected individual, even without the presence of symptoms. It is strongly encouraged that exposed students wear a mask in public indoor settings for 14 days after exposure or until they receive a negative test result. In the event that a fully vaccinated student tests positive for COVID-19, they should follow the protocol for positive COVID-19 students listed above.

** The health department that provided the COVID-19 test (Comanche County Health Department for Lawton and the Stephens County Health Department for Duncan) tracks positive cases and issues communications associated with testing within their jurisdiction.*

This information was compiled based off information and guidance provided by the CDC and the Comanche County Health Department. Guidance is subject to change. You can find more information about COVID-19 at the links below:

Campus Health Expectations for Fall 2021

Expectation 1: Practice good hygiene.

Practice good hygiene. Wash your hands regularly and avoid touching your face.

Expectation 2: Monitor your personal health daily.

Monitor your personal health daily

Expectation 3: If you are sick, stay home.

If you are sick, stay home. If you contract the coronavirus or if you have had significant exposure to the virus and you are a student, please notify the student hotline by submitting the online reporting form at www.cameron.edu/coronavirus-hotline, or by calling 580-581-2676. You may also email the hotline at coronavirus_hotline@cameron.edu. If you are an employee, please contact the Office of Human Resources at 580-581-2245.

Expectation 4: Respect personal space and practice social distancing.

Respect personal space. The pandemic has affected each of us differently so please consider your proximity to others.

Expectation 5: Cover your nose and mouth.

Cover your nose and mouth when you sneeze or cough. Proper wearing of face coverings indoors is strongly encouraged.
